The Coleman language in the Gonzalez substitute would not diminish the amount of aid which is provided in this bill. It would, however, send a directive to the Secretary of Housing and Urban Development that in providing assistance, priority should be given to areas which exceed the national average in unemployment. The news media carry the pitiful picture of thousands of unemployed seeking only a handful of jobs. To some who characterize these pictures as unfair portrayals of an isolated few, these people are merely statistics to be counted on a computer abstract. We who represent them in Congress know differently. I urge that, by adopting the Gonzalez substitute, we choose to target assistance to them first.

Mr. PARRIS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Roemer amendment and in opposition to the Gonzalez substitute.

This legislation has a great number of flaws, but perhaps the worst is that the availability of Federal assistance would reverse the normal and traditional homeowner priorities for debt repayment. It would in fact actually create incentives for homeowners to go to foreclosure.

I think we would all acknowledge that currently, delinquent homeowners try to preserve their equities in their homes by trying to keep up with their mortgages first, before perhaps even paying other debts. This legislation would certainly turn that priority upside down.

There is not a person in this room that does not have real compassion for people who find it difficult to maintain their mortgage payments on a current basis; but the simple fact is that the substitute offered by the gentleman from Texas (Mr. GONZALEZ) will simply not be effective in helping them should they find themselves in that unfortunate position.

Without going into all the arguments against this substitute, some of which have been made, in a penetrating analysis of a few of the deficiencies of this legislation by my friend, the gentleman from Connecticut (Mr. MCKINNEY), there are some additional problems that I would like to address, which apply under the original legislation or under the substitute.

First, my friend, the gentleman from Massachusetts (Mr. FRANK) says that this is a carefully drawn piece of legislation. I am sure that the gentleman is sincere in that viewpoint; but with all due respect to him, I submit that that is simply not correct.

In the substitute, one can qualify for assistance due to the loss or reduction of income by any person contributing to the income of the mortgagor; however, the income and assets tests apply only when they cover the income and assets of the mortgagor and members of the family residing in the residence of the mortgagor.

□ 1350

Clearly those two provisions are inconsistent. It raises serious questions as to who is a member of the family.

Clearly the question arises: Is a mother-in-law a member of the family? Is a first cousin, perhaps a second cousin, a cousin once removed, a third cousin by marriage, is in fact a common-law relationship a member of the family under the provisions of this bill? What is a member of the family? There is no definition contained here, and these questions remain totally unanswered in this legislation.

Further, I am at a total loss to understand why the Federal Government should go to the extraordinary lengths of picking up the mortgage payments of homeowners without considering the ability of all countributors to make their own payments. Why should we ignore the income and assets of any contributor to the mortgage if the same individual can make the homeowner qualify for assistance under this bill?

We should, in my view, at least, at the very least, take into consideration the assets and income of any person contributing to the payment of the mortgage obligation.

Let me give you an example. If a divorced husband was making mortgage payments for his ex-wife and had an unfortunate reduction in his income from $100,000 to a mere pittance of $80,000 a year, his wife would qualify under the Gonzalez amendment for emergency mortgage assistance. Some emergency, right?

No consideration would be given to the income and assets of the divorced husband as long as he was not residing within the residence. And this assistance, ladies and gentlemen, is not peanuts. The average monthly subsidy is estimated to be $740 a month. The holder of a $90,000 mortgage at 17.5 percent would get a Federal payment of up to $1,260 a month. This is clearly excessive and unacceptable.

I applaud the efforts of the distinguished chairman of the Housing Committee to include, albeit reluctantly, an income and assets tests in this substitute and to eliminate the rebuttable presumption contained in the original bill.

The CHAIRMAN pro tempore (Mr. DURBIN). The time of the gentleman from Virginia (Mr. PARRIS) has expired.

(By unanimous consent Mr. PARRIS was allowed to proceed for 3 additional minutes.)

Mr. PARRIS. The fact remains, however, that the modest changes in the substitute do not go far enough toward assuring that this assistance is reserved for the truly deserving.

Further, both provisions provide that whenever the program is in effect in any district, each financial institution, or other mortgagee shall, and that means any person, bank, mortgage company, or whatever, everybody that holds any mortgage in that district must assist the mortgagor in applying for assistance.

What if the financial institution or the mortgagee is not within the district in which the program is activated? If we meet the national trigger——

Mr. SCHUMER. Will the gentleman yield?

The gentleman has raised a lot of questions and I would like to answer the gentleman.

Mr. PARRIS. If the gentleman would get his own time to discuss the legislation I would be very pleasured by that. I will yield later if I have the opportunity.

As long as the national trigger is met then that point perhaps is moot. But since the program and the legislation does, in fact, envision eligibilities by district, the question is critical. With so many lenders in this day and age using the secondary market, selling loans to other institutions in other areas of the country, the Gonzalez approach leaves some very grave and serious questions to be answered, none of which are addressed in this legislation.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. PARRIS. I will be glad to yield to my friend from Ohio.

Mr. WYLIE. I thank the gentleman for his contribution and I think he is making a significant argument here. I just had a chance to read a copy of the substitute offered by the gentleman from Texas, Mr. GONZALEZ, before we came to the floor. But it says here:

> The Secretary shall not include as assets the entitlement of any such individual to receive any payments under a pension, annuity, or similar plan or contract.

That implies to me that a person could be receiving an annuity of up to $90,000 or $100,000 and still qualify under this bill under the assets test or they could be receiving a pension of more than $20,000 and still qualify under the bill.

So I thank the gentleman for the contribution he is making. I think it is a valid one.

Mr. PARRIS. I thank the gentleman for his comment.

One final point.

Mr. SCHUMER. Will the gentleman yield?

Mr. PARRIS. I do not yield at this time, I would say to the gentleman from New York. If the gentleman will permit me to complete my statement then I will be delighted to yield at that time.

One final point. Neither H.R. 1983 nor the Gonzalez substitute do anything, as has been suggested earlier in previous comments briefly by the gentleman from Connecticut (Mr. MCKINNEY) to protect the Federal Government from taking as security property in which there is no equity.

Under either version the loans made are not limited to equity in the property.

Since the average loan is estimated at $10,000 it could very easily exceed any equity on certain new home purchases and if there is no equity in the collateral then it is a grant and not a loan.

Mr. Chairman, for these and a great number of other reasons, most of which have been discussed in general debate under the original bill, I cannot support the Gonzalez substitute.

The CHAIRMAN pro tempore. The time of the gentleman from Virginia (Mr. PARRIS) has again expired.

Mr. PARRIS. Mr. Chariman, I ask unanimous consent for 1 more minute.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Virginia?

Mr. SCHUMER. Mr. Chairman, reserving the right to object, is the gentleman prepared to yield and answer questions after he receives his 1 additional minute?

He has yielded selectively, so he is obviously not against the principle of yielding, and yet he has asked a number of questions on this bill and answered them erroneously and I would like simply to ask if the gentleman is going to continue on, and if time is not a problem, I want to make sure that the gentleman is willing to yield to a number of questions from people here who are eagerly waiting to answer him.

Mr. PARRIS. Will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Virginia.

Mr. PARRIS. As I have tried to indicate on I think three or four previous occasions during this statement on my past, at such time as the gentleman has asked me to yield, as soon as I complete my statement, should time permit, I would be delighted to yield to my friend from New York.

The CHAIRMAN pro tempore. Does the gentleman persist in his objection?

Mr. SCHUMER. Mr. Chairman, I withdraw my objection.

The CHAIRMAN pro tempore. The gentleman from Virginia (Mr. PARRIS) will be recognized for 1 additional minute.

Mr. PARRIS. For the reasons outlined in a large number of comments made on H.R. 1983, which I believe to be still valid, I cannot support the Gonzalez substitute.

The Roemer amendment, on the other hand, presents a reasonable approach, which, as has been indicated, can be implemented in a timely fashion. It will not burden the taxpayers with an additional $760 million in additional Federal spending and increase the deficit. It will facilitate the limited forbearance needed by distressed homeowners.

It will not be a Federal handout to a limited few but, rather, a real benefit to real people in the real world, and at an early time, and provide real assistance to Americans who find themselves in temporary distress.

I urge my colleagues to vote for the Roemer amendment.

I am now delighted to finally yield, at long last, and congratulate my friend from New York on his lately

found patience for that action on my part.

The CHAIRMAN pro tempore. The time of the gentleman from Virginia (Mr. PARRIS) has again expired.

(At the request of Mr. SCHUMER and by unanimous consent Mr. PARRIS was allowed to proceed for 2 additional minutes.)

Mr. SCHUMER. Will the gentleman yield?

Mr. PARRIS. I yield to the gentleman.

Mr. SCHUMER. I think a number of questions raised by the gentleman from Virginia are answered by the discussion we had with the gentleman from Louisiana.

But there is another point brought up by the gentleman from Virginia. He said that if a divorced spouse had an income of $100,000 that dropped to $80,000, then that would still allow the owner of the home whose spouse's income had dropped to qualify under this program.

As I read the bill it does not at all.

If you refer to section 4(b) on page 8, quite simply if the income drops and the alimony payments do not drop, then we are not going to have any problem because the ability to pay is not impaired.

So I would like to know what section of the bill the gentleman cites when stating that point because I just do not see it within the four corners of this bill.

Mr. PARRIS. I submit to the gentleman that if he would read the bill, and in my mind interpret it correctly, he would find that if there is a divorced couple in which situation the husband, who had a large income figure, and he was not residing within the residence to which we are presumably alluding here, then this section——

Mr. SCHUMER. I would just like for the gentleman to cite the section so that I might study the gentleman's interpretation.

Mr. PARRIS. I regret that I do not have a copy of the bill in front of me. I cannot at this time answer the gentleman's question.

Mr. SCHUMER. Then I yield back to the gentleman. Perhaps the gentleman from Ohio can answer.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. PARRIS. I am happy to yield to the gentleman.

Mr. WYLIE. I think the gentleman in the well is referring to page 8, paragraph (b). It says "any similar loss or reduction by any person contributing to the income of such mortgagor," and what you are assuming is that if they are married they are contributing to the income of that mortgagor, and if they are divorced and contributing alimony, and he reduces the alimony payment, then that is a loss or a reduction of income for that purpose.

□ 1400

The CHAIRMAN pro tempore. The time of the gentleman from Virginia has expired.

(On request of Mr. SCHUMER and by unanimous consent, Mr. PARRIS was allowed to proceed for 1 additional minute.)

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. PARRIS. Mr. Chairman, I yield to the gentleman from New York.

Mr. SCHUMER. Mr. Chairman, I thank the gentleman for yielding.

I think we did not finish reading this section B. After the part that the distinguished ranking minority member of our committee has said, it says, "Which reduction in income renders such mortgagor unable to correct the mortgage delinquency within a reasonable period of time or to resume full mortgage payments."

Mr. PARRIS. That begs the question, if I may reclaim my time.

The point is that if the person who has the $100,000 income and is not residing within the residence and has a loss of income then the assets and income test does not apply to that person. That is the fatal failure in this legislation. The assets and income test is simply not reasonable.

Mr. SCHUMER. If the gentleman will yield.

Mr. PARRIS. I yield to the gentleman.

Mr. SCHUMER. I thank the gentleman.

It is simply a reduction from $100,000 to $80,000 of the spouse who does not reside in the home, does not make it impossible to pay that mortgage—and I doubt it does—I submit this provision will not apply.

Mr. PARRIS. I submit to the gentleman if in this hypothetical, the payment was not being made in full to the divorced spouse my allegation in terms of reduction would still apply.

Mr. MORRISON of Connecticut. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, H.R. 1983 presents this House with an opportunity to respond to a need that exists all across this country.

Unemployment rates are higher today than at any time since the Great Depression. These high rates have persisted for not months, but years and we have every indication that such high rates of unemployment will continue for years into the future, notwithstanding the predicted recovery.

As a result of this prolonged period of high unemployment, many hard-working Americans, through no fault of their own, are threatened with losing their homes—homes they have worked long and hard to acquire, keep, and maintain.

This legislation responds to that problem.

H.R. 1983 provides for temporary assistance payments to correct mortgage delinquencies and maintain payments for up to 36 months when a homeowner is no longer able to do so because of involuntary loss of employment or reduction in earnings.

Under H.R. 1983 as presented, banks and other mortgagees will be required to maintain their current levels of forbearance in order either to qualify for assistance or to foreclose on a mortgage in any district in which the program is operating.

Federal funds will not take the place of current forbearance practices. In fact, H.R. 1983 will add to a mortgagee's ability to forbear in two ways: First, existence of the program will permit a mortgagee to have more confidence that there will be a source of funds to correct the deficiency at the end of the period of forbearance; second, the availability of these funds will reduce the total number of deficiencies, providing a bank or other mortgagee with resources such as to permit voluntary forbearance to other mortgagors.

The Roemer substitute would remove this feature from the bill.

This bill is an appropriate response to a very real crisis. It balances what is currently available to mortgagors in terms of voluntary forbearance with the additional financial assistance which is needed at this time to help so many hard-working individuals to retain their homes.

The Gonzalez substitute provides needed targeting and other improvements that have been suggested. Targeting will be based on the need in terms of unemployment, rates of foreclosure, and poverty so that the funds will be spent where they are most needed.

We have heard a lot of criticism about specific provisions of the bill and attempts to paint horror stories about how particular provisions might apply. Yet those who are making such criticisms are not, for the most part, coming forward with language that improves the bill; rather, they suggest that this worthy and needed program be abandoned entirely because they see some small provision which might in some unusual circumstance cause a problem.

I would suggest to those who make such criticisms that if they truly believe that we should pursue the American dream, that we should preserve homeownership of working men and women in this country, then they should suggest the changes they believe are needed to strengthen the bill rather than ask the Federal Government to turn its back on homeowners in need because some one person, somewhere in this country might receive assistance which was inappropriate.

Thank you, Mr. Chairman. I yield back the balance of my time.

Mr. DREIER of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am deeply concerned about the plight of Americans who are unable to meet their mortgage obligations. We obviously have a responsibility to help these people. Unfortunately, the bill now before us promises a great deal of assistance, but will actually provide little. In the end, it will only serve to promote the economic conditions of high interest rates and unemployment—which have helped cause so many of these foreclosures. The only answer is the substitute offered by the distinguished ranking minority member of our Banking Committee.

H.R. 1983 is really little more than an incentive to foreclose. Instead, what we should be doing is encouraging the ongoing practice by local lenders of forbearance. The mortgage bankers are telling us that the rate of foreclosures remained unchanged during the fourth quarter—while at the same time—the delinquency rate for mortgages rose. This plainly shows that local lenders are doing what they can to forbear. Contrary to what some have said, these local institutions have no desire to become real estate warehouses.

The Wylie substitute is the most realistic and most responsive approach to the homeowners who need temporary aid. If we instruct the regulators to relax current rules in order to further encourage forbearance, we can provide relief immediately. We can provide this assistance in a highly efficient manner by using existing mechanisms while we avoid providing lenders with an attractive incentive to foreclosure.

If our goal is to effectively help as many people as possible, why not make it easier to forbear? There is no monetary limit to forbearance. No billion-dollar appropriation is necessary. Instead of limiting our help to 25 percent of the mortgagors who may be delinquent, why not create a program which could help everyone in need at almost no cost?

As with so many bills we consider, H.R. 1983 is well intentioned. After all, who among us does not want to help the unemployed? Who among us would not want to help someone who faces the loss of their home through no fault of their own? But this bill takes the wrong approach. Besides being cumbersome, it will only provide a first-come, first-served handout to lenders who have the wherewithal to take advantage of this program. This bill has the potential to provide relief for those who need it the least.

More jobs, lower interest rates, lower inflation, and an economy in the dawn of a solid recovery have rendered the approach in this bill obsolete. Commonsense dictates that we continue to encourage the cost-effective and prudent policy of forebearance, while not offering an attractive $760 million incentive to foreclose.

I urge a "yes" vote for the Wylie substitute.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Roemer amendment and in favor of the amendment of my chairman, the gentleman from Texas (Mr. GONZALEZ).

□ 1410

Mr. Chairman, we are experiencing today the greatest recession since the thirties and the highest unemployment rate since World War II. People are in great pain.

Now in the thirties, when my father was laid off, they came in and took everything. You lost your home, you lost your furniture, you lost everything but your family.

Hopefully in the eighties we are a little more progressive. We care and we have the resources to care somewhat more for our people.

Now people are in great pain and they are not just the traditionally poor; they are the middle-class people who suddenly find themselves poor. The new poor, as we say. Like the fellow from my district who testified before our Banking Committee. He was a Vietnam veteran. He had worked for this trucking company for 15 years. He had paid on a new home for his wife and two children for 8 years. And he is being forced to lose his home because he cannot find a job and he has been out there looking. He does not want a handout, as he said to our committee. And this bill is not a handout. To represent it as a handout is absolutely being untruthful. We all know it is not a handout. Anyone who takes part in this proposition will have to pay back the loan once they get a job. This is a rotating fund.

This bill establishes $760 million for this rotating fund. It also establishes $100 million to provide assistance for those who are totally homeless. And we had many, many people come to our committee, who had the courage to come, who not only are facing foreclosure, they have nowhere to live at all.

Now what does $760 million buy? Because we always hear the argument, "This is a lot of money." It is a lot of money, but it is a rotating fund to be paid back.

What it buys is about, well it is about one-eighth of what the cost overrun is of a helicopter project. I do not hear a Member concerned about the cost overruns of all these defense contracts we dole out. Billions and billions and billions and billions of dollars of taxpayers' money are paid that are supposed to fulfill a contract for $4 billion and actually our taxpayers pay $8.6 billion.

But we do not have enough money, we do not have enough money for $760 million to serve 76,000 homeowners who lately have lost their jobs through no fault of their own. We do not have enough money to provide a meager, a meager $100 million to provide assistance and services for thousands of our homeless.

The homeless are not the usual types that we are used to thinking of in terms of taking part in some of our various institutions. These are women and children and husbands who came before our committee who do not have a place to stay.

Now I ask the Members who are opposed to this bill and want to gut the essence of this bill what your priorities are? If your priorities are to serve the American people at a time of need with this rotating fund, to give them a slight access to keeping their homes or to provide some shelter, then you will support the Gonzalez approach. If your priorities are that this is too much, but you have other priorities that serve all the waste and abuse that is in government, then you will not support this bill.

We have a lot of ways to save money in this budget. This is not one of them. This is one of the most critical needs of our people and particularly the middle class who have suddenly found themselves poor.

So let us pass this compassionate bill and do something to serve the American people.

Mr. LEVITAS. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I would be happy to yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentlewoman for yielding and I asked her to yield in order to address a question to my friend from Louisiana (Mr. ROEMER), who has offered an amendment.

I have got some problems with the bill, but I also understand what its purpose is as the gentlewoman has just explained. But what I do not understand is many of us last week voted for passage of the emergency agriculture credit bill. And I do not see conceptually what the difference is between providing this emergency agricultural credit for people in rural America who are suffering under the burdens of the recession at this time and what the proponents of this legislation are trying to achieve? What is the difference?

The CHAIRMAN pro tempore. The time of the gentlewoman from Ohio (Ms. OAKAR) has expired.

(At the request of Mr. LEVITAS and by unanimous consent, Ms. OAKAR was allowed to proceed for 1 additional minute.)

Mr. LEVITAS. This is a sincere question, trying to understand why we should support one as I did last week and not provide similar type of assistance and relief under the circumstances for people who are suffering with the possibility of losing their homes.

Mr. ROEMER. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentlewoman for yielding.

I thank the gentleman from Georgia for asking.

Two points quickly. The gentlewoman said in her remarks, well spoken remarks I might add, that she was concerned about the $100 million for the emergency shelter. I point out to the gentlewoman that the $100 million is in all of the options before us.

As to the question raised by the gentleman from Georgia, as to the comparability or parity inherent in the farm emergency bill last week and this, they are the same. The substitute that we offer as an amendment allows the Secretary of Agriculture the option to, under certain circumstances, forbear.

The CHAIRMAN pro tempore. The time of the gentlewoman from Ohio (Ms. OAKAR) has again expired.

(By unanimous consent, Ms. OAKAR was allowed to proceed for 30 additional seconds.)

Ms. OAKAR. Mr. Chairman, this bill under the Gonzalez approach does not talk about options with respect to loans for the Department of Agriculture. It grants a moratorium on the payment of home loans insured by FmHA for the individuals facing home mortgage foreclosures.

Mrs. ROUKEMA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the Roemer amendment. It represents a rational way to assist distressed homeowners without adding to the burden of the taxpayers.

I would like to note at this point in time that we are not discussing the subject of military cost overruns. And I speak to this point because the previous speaker, my good friend from Ohio, has implied there might be some tradeoff here. I stand second to none and I am well known in this House for my outspoken opposition to military procurement recommendations of the administration and egregious cost overruns. But we are now talking about an entirely different matter. There is no tradeoff here between defense spending and this so-called Emergency Housing Act.

Mr. Chairman, I would like to note for my colleagues that the $760 million for mortgage payments to certain homeowners would be just the start of what will undoubtedly become a virtual entitlement program that will cost billions.

It is interesting that the committee report notes that utilizing the provisions in H.R. 1983, this program would have been triggered only twice nationally. The report conveniently omits the fact the trigger also applies by Federal Home Loan Bank Board districts, and as a result, it would have been in effect in 4 of the 12 districts continuously for virtually all of the last 10 years.

On that basis alone, we can dispel the argument that this legislation is of an emergency nature required by current economic conditions. H.R. 1983 is, by its very construction, a permanent program and the Members of this body must realize that. The Roemer amendment, on the other hand, recognizes the incremental problem of foreclosures and directs those agencies responsible for supervising the financial institutions which have made these mortgages, to take such steps as necessary to encourage forbearance.

Financial institutions are already doing an admirable job of forbearing, but they are under pressures from their Federal supervisory agencies. These pressures can result in increased foreclosures. This substitute both resolves this problem and correctly turns the attention of the supervisors and the institutions toward additional forbearance efforts and therefore I believe deserves the strong endorsement of this House.

□ 1420

Mr. LEVIN of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Roemer amendment.

Mr. Chairman, and especially Members of the committee from the opposition with whom I have had the enjoyable opportunity of serving and discussing this bill, and for whom I have deep respect—and I look over the aisle at several in particular who have participated in this debate and who I think indeed have a deep social conscience—and I want to address my remarks primarily to them. I am not going to talk about IMF or El Salvador. I am not going to talk about what other budget expenditure might take the place of this bill if it is not passed. I am also not going to talk at length about the details raised by several, including the gentleman from Connecticut (Mr. MCKINNEY), although, as a lawyer, I think I might enjoy it. I could spend some time, for example, in talking about the definition on page 8.

The gentleman from Connecticut (Mr. MCKINNEY) referred to that and said, "What is the meaning of the terms 'willful,' 'repeated', or 'felonious misconduct'?"

The truth of the matter is that those terms have meaning in unemployment compensation law.

If there is a technical flaw, correct it.

The main point is that there is real need here. The question is not whether there can be more bank forbearance. The Gonzalez bill embraces the forbearance proposal the gentleman from Ohio (Mr. WYLIE) has suggested. The question is whether we should go beyond it. That is the issue.

When I returned from law school in 1957 to Michigan, there was serious unemployment. I represented a lot of smaller wage earners and medium wage earners. I represented a lot of people in the building trades. There was a lot of unemployment. Housing construction was down; commercial construction was down in southeast Michigan. But the people there were able to wander someplace and find a job; they were able to somehow salvage their mortgage, maintain their home.

The truth of the matter is, today that is not true. Building tradesmen and others have wandered throughout this country, being unemployed in Michigan, and they have not been able to find work. And so the statistics read like this for Michigan: In the first half of 1982, the foreclosure rate was 77 percent higher than in the comparable period in 1981, 149 percent higher than in 1980, and 146 percent higher than in 1979. And this is in an area where banks hesitate to foreclose because unemployment is so serious, they do not know what they are going to do with the homes if they take them back. But they have been taking them back twice or three times as often as they were several years ago.

And that is what you have to face. Do not call this a handout when you know it is a loan. Do not call it a giveaway when you know that people sign a document and they are obligated to pay it back.

In a sense, what we would be doing as a people under the Gonzalez substitute is forming a unit somewhat as is done for insurance. We would be spreading the risk. But the people whom we would be helping would have to pay it back.

It is said by the gentlewoman from New Jersey, "Well, this may be a permanent program."

The only way it would be a permanent program would be if unemployment continues at its present level or at a very serious level. The only way it would be a permanent program would be if there would be continued misery at the levels that we see today.

And I ask you, those of you who talk, as I believe is so true, about the importance of family and the sanctity of home, what in the world do you expect people to do who are unemployed, who have nowhere to turn, who have not been receiving forbearance from the bank and, after years

and years of struggling to buy a home, cannot retain it? What do you want them to do?

One thing you should not do is to come back on this floor and talk about the sanctity of the family or that the home is a castle. Do one of two things: Refrain from that, or step up to the fact that in this time of crisis we have the obligation, through a loan program, to allow people to retain their homes, to allow families to stay together. That is the issue, not IMF, not El Salvador, not helicopters or anything else, and not forbearance as in the Roemer proposal, because that is in the Gonzalez proposal.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. LEVIN) has expired.

(By unanimous consent, Mr. LEVIN of Michigan was allowed to proceed for 1 additional minute.)

Do you want to take one step more that gives thousands of people in this country a chance to retain their home? And do not say it does not cover everybody in need. That is a weak argument. Maybe it does not. But we should throw a lifeline out to tens of thousands. And if it turns out that need is inadequate, then we can consider extending the lifeline longer, rather than not having it being given in the first place.

This is well-considered legislation. I strongly urge that we reject the Roemer substitute and then proudly vote for the proposal of the gentleman from Texas (Mr. GONZALEZ).

Mr. FRANK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have been a little disappointed by the tone of the debate. We have a legitimate philosophical question: Should there or should there not be such a program at all?

We have, on the part of those on the subcommittee, met with a variety of Members. To the extent that they had constructive suggestions, tightening amendments, we have adopted them.

Some of the arguments we have heard on the other side have been straightforward: There should be no Federal program that seeks to aid.

But others, I think, have fallen short of that standard.

I have to mention the attack of the gentleman from Connecticut on the assets test. Several weeks ago, I submitted to my friend, the gentleman from Connecticut, a version of an assets test, because I had voted with him in committee to apply one. We persuaded everyone to adopt one. I submitted it to the gentleman from Connecticut. I asked him if there were any problems. He told me it was OK. Several weeks have passed by. Now, weeks after having told me that it was acceptable, he has strained and labored and worked harder than I have ever seen him work to find a potential possible way to find a problem in it. When I get that from the gentleman from Connecticut, when we get an agreement that this is a good assets test, and several weeks later, he suddenly finds, under great strain, a problem that has been there all along, I think we are not being allowed to discuss the thrust of the amendment.

I will yield to the gentleman, who would not yield to me when he raised the point.

Mr. MCKINNEY. I thank the gentleman for yielding, and I would also suggest that I did not use the gentleman's name in the debate.

Mr. Chairman, I would say to the gentleman that one of the reasons this ex-tire dealer has a staff to review such proposals is that they have pointed out to me only this afternoon the fact that the pensions, unlimited pensions, are totally excluded, and that is why I raised that point.

Mr. FRANK. Then I wish, when I make an agreement with the gentleman about good words, that if his staff has to sign off on it, he get them to sign off a little earlier and not wait 1 month and then bring up this kind of possibility on the floor.

Similarly, with regard to the gay divorcee with a $100,000-a-year husband. The fact is that under the bill, a reduction of income only triggers assistance, as the gentleman from Brooklyn pointed out, if that reduction endangers your ability to pay the mortgage. The $80,000-a-year husband would not be endangered, presumably, in his or her ability to pay the mortgage.

I understand that there are Members who say we should not try anything at all to respond—I would say to the gentleman from Virginia who wants me to yield that the same rules apply on yielding when I speak as when he speaks. The gentleman would not yield during his statement, and I do not believe in one-way streets in this particular situation.

The point is, Mr. Chairman, that people who have an objection to the program in principle ought to articulate the objection of principle. We have heard two that I understand. One is that it is an entitlement and covers too many people; the other is that it does not cover enough people. Now, I understand. I often hear these points. The problem is, today we are hearing both from the same people. They are simultaneously telling us that this is a terrible program because it is an entitlement that is going to cost us an enormous amount, and also that it does not cover enough people. I think people ought to have to flip a coin and pick one of those, whichever stick they think is more convenient to beat the program.

Finally, we have the great passion with which we are being told that we should adopt the forbearance provision and that if we were serious, we would rush right into the forbearance provision. Well, here, I think, we may need reference to the Copyrights Subcommittee, because a little theft of intellectual property is involved. It was the chairman of the full committee, the gentleman from Rhode Island, who came up with the forbearance idea as part of this package. The minority, to my knowledge, had no concern for dealing with this problem at all until the chairman had brought it up.

Mr. Chairman, I yield to the gentleman from Ohio.

Mr. WYLIE. I discussed the idea of forbearance with the chairman before the amendment was offered, and we agreed to the amendment, and I did support it in the committee.

Mr. FRANK. Well, I appreciate that.

Mr. WYLIE. At the first hearing, as a matter of fact, I suggested the idea.

Mr. FRANK. My point is, I saw no separate bill. Until this legislation was adopted, there was no separate bill on this. But I am glad that we have come to an agreement on forbearance. I just regret seeing it being used as an alternative, particularly since—and this is my final point—we were told by some of the Members that our bill will be unfair because HUD will have to pick and choose and will not be able to treat everyone equally.

So what is the alternative? What is the minority's version of fairness and equality? Relying wholly on the forbearance of the banks which means that someone who lives in an area where the bank is willing to forbear will be OK, and someone else will not?

□ 1430

Nothing will guarantee less equity and equality of treatment than having no Federal program whatsoever and leaving individuals entirely to the whim of the individual banks.

So I do not think that we have received the real arguments here. There is an objection in principle to any program whatsoever coming forward. That is the choice we have to make. If Members had specific amendments, they came forward and we have adopted many of them. In fact, as the gentleman from Michigan pointed out, one amendment we adopted, proposed by the gentleman from Kansas, will disallow people who lose their jobs through their own fault. That became the subject of ridicule by the gentleman from Connecticut, and I do not think it was ridicule based on the facts, because this is good, legal language which has been used and developed to decide when people do not qualify for a benefit.

I wish that the Members who are opposed in principle to any Federal program, would be more explicit.

Mr. HAMMERSCHMIDT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am not a member of the committee of jurisdiction, but briefly, I want to approach this discussion from a little different angle.

As I understand the bill being debated and possibly amended, H.R. 1983 is meant to be available to both VA and conventional mortgagors. I would want my colleagues in the House to know that the Committee on Veterans' Affairs is currently considering its own mortgage relief proposal utilizing the VA's direct loan revolving fund. In fact, we passed it through the full committee yesterday and hopefully it will come to the House floor next week, or shortly thereafter.

The VA program would be an alternative to the current payoffs on foreclosure, and they are actually estimated to save money over the next several years, much in the same way that the TMAP program was to operate for FHA mortgages.

As I have listened to this debate, I note that interestingly the VA program is more restrictive than is H.R. 1983. For instance, it requires a 6-month delinquency rather than 3 months to qualify for assistance, and the maximum loan is $8,400 compared to an average loan of $10,000 under H.R. 1983.

In addition, the mortgagor must have a reasonable prospect of being able to resume full payments of the primary loan within 6 months after receiving assistance.

The finding is with the Administrator and is more restrictive than either H.R. 1983 or the Gonzalez substitute.

I guess the point I want to make to my colleagues is that what is also interesting is that CBO's estimates on the bill were based on assumptions that the VA would be very selective in approving loans. For instance, it assumed that the veterans who were unemployed are currently reemployed, and even with that assumption, CBO projections—not OMB, but CBO projections—they project that 40 percent of those loans would not be repaid even with those restrictions. Now, 40 percent is pretty high. I think our colleagues need to know about CBO's assumptions, even on the more restrictive legislation for mortgage relief coming from the Veterans' Affairs Committee.

What I am really wondering here today is, if our veterans legislation is being pursued in vain? What incentives would a veteran have under our approach if he had access to the more liberalized provisions of H.R. 1983?

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to my colleague, a member of the Committee on Veterans' Affairs, the gentleman from Ohio, a very able Member, for his response.

Mr. WYLIE. I thank the gentleman for yielding.

I also happen to be a member of the Committee on Veterans' Affairs, along with the gentleman from Arkansas, and the gentleman from Arkansas does make a very valid point with respect to the VA program, which we have passed out of our committee.

This substitute offered by the gentleman from Texas (Mr. GONZALEZ) would in effect supersede the VA program because this is, as you point out, a much more generous program for veterans and they would be well advised to go for this program. That will make the VA program moot, as long as money is available.

So with respect to the veterans, what we are doing here, I suggest, is along the lines of the statement by the gentleman from Arkansas. He is right on target and accurate, and I think it is another reason why we should support the Roemer amendment and vote down the Gonzalez substitute.

Mr. HAMMERSCHMIDT. I thank the gentleman for his response and for the contribution he makes in this committee and the Committee on Veterans' Affairs.

I just want to call the attention of my colleagues to the fact that there is other legislation moving that could give veterans mortgage relief.

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Texas.

Mr. GONZALEZ. I thank the gentleman for yielding.

Mr. Chairman, I am impelled to do this by the dialog just terminated with the gentleman from Ohio (Mr. WYLIE) because it is so erroneous.

In the first place, to say, as Mr. WYLIE said, that if this legislation is adopted it would supersede the veterans' assistance program is not only erroneous, it is an absolute distortion because it would be like saying that the veterans' access to medical care in the VA hospitals, per se, supersedes his pension rights. It is the same thing. If anything, this would be supplementary under certain conditions that the veteran would have to qualify for that places him in the same economic conditions as other nonveterans.

Mr. HAMMERSCHMIDT. If I may reclaim my time, as I understand it, if the Gonzalez substitute passed the House, for instance, then the veteran would have two choices if our veterans' legislation passed. He could go to the veterans' legislation for relief or he could go to your legislation, H.R. 1983.

Mr. GONZALEZ. It all depends. If your veteran happens to be in that particular circumstance that I am targeting, yes, but it is not necessarily so.

Ms. KAPTUR. Mr. Chairman, I move to strike the requisite number of words.

I rise in opposition to the Roemer amendment and also in support of the Gonzalez substitute.

I also rise on behalf of 1,000 families, this year alone, in my district who are waiting for action by this body to help them retain their rights of home ownership. I might say that I am very happy that this bill is numbered H.R. 1983. Truly this is the first piece of legislation that we have had on the floor during this session of Congress that is a part of our phase 2 efforts to address the problems of unemployed—Americans who have never come to this body asking for assistance before, people who have traditionally been the financial backbone of their communities.

I think particularly of a family who came to me just a few weeks ago. The man, the head of the family, is 50 years old. He is a glassworker who for 20 years has been employed in one of our local plants. He has paid taxes. In fact, he and thousands of other Americans who will benefit by this program are the very people who have paid into the Federal Treasury. This family has raised three children. But over the last year and a half, due to unemployment, they have lost all their health benefits. And they are about to lose their home. They have $39,000 remaining on their mortgage.

In this legislation, we are not talking about aiding people who are fringe elements of our community or chronic delinquents. These people have backed their communities and this country and, in fact, have been our most faithful taxpayers over the years. They believe in America. Now they are turning to us in good faith and are asking for a helping hand to hold onto their most prized possession, their dwelling.

I consider this bill to be very responsible. The committee on which I serve has been most responsive to the amendments that have been offered on both sides of the aisle and in fashioning the Gonzalez substitute to meet reasonable objections.

The bill requires an applicant to agree to a lien on his or her home and, in fact, that lien is subordinate to all other liens on the property. There is a strong assurance that the applicant will make every effort to repay the Government's investment; in fact, there is a 38 percent of income requirement both during the period of unemployment and even after the owner returns to work. The program is a loan program that must be fully repaid at 10 percent interest.

Based on the mortgage of the family that I described, what would be the total expenses for a homeowner? The total housing expenses would be about $595 a month, including principal and

interest, taxes, insurance, mortgage insurance, maintenance, and utilities. And what amount of the total housing expenses would the homeowner pay toward his or her mortgage and what amount would the homeowner receive as a loan under H.R. 1983? Because the homeowner is required to pay 38 percent of his or her income toward the expenses, based on estimated income of $9,500 a year, he or she would pay $279.93 a month and the Federal payment would be $315.07.

One thing we can be sure of. In order to save their homes, homeowners are seeking every job opportunity available.

□ 1440

Unfortunately, in a district like mine, unemployment has just ticked up again. Thus, the need for this program becomes more compelling.

This bill will not encourage foreclosures. In fact, the people who are going to be receiving assistance under this bill do not want any handouts. They are even embarrassed to ask for it. The bill requires strict assets as a last step prior to being considered under this program. An average family of four cannot have earned more than $20,000 per year for the 3 prior calendar years preceding this program. So in no way is this program a handout.

I think that we have made an effort in this bill to encourage responsible lenders, reponsible homeowners, and a responsible government, acting hand in hand during a severe recessionary period in our history when we want to help the American people. I have no doubt the skeptics in this Chamber will be surprised as the cooperative effort of caring American insures the successful implementation of this program. I gather that there is more hesitancy in this Chamber than there is on the part of the American people. They sent this Congress a strong message last November to help them work through these very difficult times. We have no reason to deny them.

Mr. SCHUMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as we close this debate, I think a number of points should be made to all the Members of the House because I think there are many Members of the House who genuinely want to vote for this legislation but feel reluctant to do so because they are afraid it is not drafted as carefully and as properly as it might be.

I have been involved in this legislation for several months now, and I can assure those Members that this bill has been tightened and tightened and tightened so it is one of the most carefully drafted pieces of legislation to reach the floor of the House at least in the short time, 3 years, that I have been here.

Let us talk about some of the objections. The most valid objection, it seems to me, is made by Members that they feel this is a good program but we cannot afford the $760 million that it requires because it will increase the deficit. This argument is the most difficult argument to answer, I think, for all of us, because all of us want to reduce the deficit. Are the dollars worth it?

I would simply ask all the Members whose minds are so hesitant about this issue to think about all the other programs in our budget of more than $800 billion and determine if those were as carefully drawn and serve as worthwhile a purpose as this bill does.

I say that at a time when we are going to be asking Members in this House, including Members on that side of the aisle, to vote for moneys for the IMF and to vote for moneys for all sorts of other programs it pays to really examine this legislation carefully. To vote no on this and vote yes on so many other programs could be a political dilemma as well as an issue dilemma for people.

The second issue that has been brought up here—and I think this one is less valid—is the equity issue. We want to be fair to everybody, but I ask the Members to ask their constituents, in whose hands would they trust equity more, in their hands of their local bankers or in the hands of this program? Since when have all bankers of America been more equitable and fair than our Government? Why do we put the entire onus for dealing with this problem, which we all know is a severe one, in the hands of bankers?

I submit that if we do, there will be no equity. Some bankers will be generous and good and they will help homeowners; others will say, "no dice," and they will not. So depending on the accidental circumstance of who manages the local bank in a community, we will see how much foreclosure there will be in that community. Is that equity? Is that equity, compared to a program where those thoughout the country have access to the program on a first-come, first-serve basis? Not at all.

So the Members who are so concerned about equity have not found very much equity in the Roemer amendment.

The final point that I would address is the fact that some say that this is a giveaway program. It hardly is, I say to the Members.

Do the Members know what we are asking people who are out of work to pay as a percentage of their mortgage? It is 38 percent of their income that must go to pay their mortgage even while they are receiving these loans. That is 38 cents, nearly 40 cents out of every hard-earned dollar of a family that is on unemployment or a family that does not have much income. That is what that family has to continue to repay while that person or that family is out of work. That does not seem to me like a giveaway program.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I thank the gentleman from New York (Mr. SCHUMER) for his statement, and I concur in it.

Not only that, but 38 percent of their income has to be paid after they are back at work. That has to go to be paid out for the loan that was made.

Mr. SCHUMER. Yes, I will get to that.

Mr. VENTO. That is a very important point, and I commend the gentleman for his statement.

Mr. SCHUMER. I thank the gentleman from Minnesota (Mr. VENTO) and that brings me to the next point.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, during the course of the hearings we were told that 10 percent of 4 million American homeowners now pay 40 percent or more of their income toward mortgage payments already, so 38 percent does not seem to me to be a very good test.

Mr. SCHUMER. Mr. Chairman, the gentleman must understand, No. 1, that up until recently what most experts figured was that the fair percentage of one's income that should go to shelter should be 25 percent. Even this administration, as the gentleman well knows, because we have argued about it in committee perhaps ad nauseam, has said that 30 percent ought to be the maximum, as typified in their rent amendments to public housing to section 8. Even they, who do not believe in those programs, even the people in HUD and the people in OMB, say that 30 percent ought to be as high as we should go, and in this bill we say 38 percent. The point made by the gentleman from Minnesota (Mr. VENTO) is another valid point. Once a person finds work, they must continue to pay 38 percent of their income under this bill.

The CHAIRMAN. The time of the gentleman from New York (Mr. SCHUMER) has expired.

Mr. SCHUMER. Mr. Chairman, I ask unanimous consent that I may be permitted to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. PARRIS. Mr. Chairman, I reserve the right to object.

Mr. SCHUMER. Mr. Chairman, I will be happy to yield to the gentleman when I have finished, as he yield-

ed to me after he finsished his statement.

Mr. PARRIS. Mr. Chairman, under my reservation of objection, I thank the gentleman for that observation.

The point was made by our friend, the gentleman from Massachusetts, that when I had the floor, I failed to yield to my friend in the well, and I would remind the gentleman that at the termination of my statement I was delighted to yield to him.

Mr. Chairman, I withdraw my reservation of objection.

Mr. SCHUMER. Mr. Chairman, the gentleman did indeed yield to me, and I would be happy to yield to him later.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SCHUMER. Mr. Chairman, as I said, after regaining employment a spouse must pay 38 percent of his income, at a 10-percent rate of interest. That is close to the prevailing mortgage rate right now. That is hardly a giveaway program.

This is a different and tough program, and the Members of this House ought to realize that many groups have opposed this program because they think it is too tough. It is not too tough. It is equitable, it is fair. It does not solve everybody's problem, but it solves a good percentage of people's problems and I submit that for us to turn away from this program during these difficult times, because either the banks can do it better or because not every person will be taken care of under this program, is not the course to take. Those are not valid reasons for opposing the program.

Mr. WYLIE. Mr. Chairman, will the gentleman yield on the question of the 38 percent?

Mr. SCHUMER. I have concluded my remarks, but I am happy to yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I thank the gentleman for yielding.

I just received this substitute as I came on the floor today, and I had not read over the assistance payments provision. This is what it says:

> Payments with respect to any mortgage under this title shall be in an amount that, together with the contribution of the mortgagor involved, is equal to the amount of the principal, interest, taxes, assessments, ground rents, hazard insurance, expenses of the mortgagee involved in connection with payments or repayments under this title, and mortgage insurance premiums due under such mortgage, and the initial such payment. . . .

Is that all included in the 38 percent?

Mr. SCHUMER. That is correct, as it is with the 30 percent and the 25 percent in the guidelines that I spoke of before. This is payment for shelter, and those are various components of the payment for shelter.

Mr. WYLIE. It would also include utilities, so there are a lot of things involved.

Mr. SCHUMER. Yes; but again it is the same thing under the 30-percent guideline that HUD promulgated for section 8 and for others.

The CHAIRMAN. The time of the gentleman from New York (Mr. SCHUMER) has expired.

(On request of Mr. MITCHELL, and by unanimous consent, Mr. SCHUMER was allowed to proceed for 1 additional minute.)

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Maryland.

Mr. MITCHELL. Mr. Chairman, I thank the gentleman for yielding, and I obviously associate myself with his remarks. Again I want to indicate that I believe his analysis of the logical analytical analysis of the bill is correct.

□ 1450

I think you are wasting your time. That is what I started out saying earlier today. There are some Members in this body who are just so rigid and so inflexible that no matter how logically you delineate what is really in the bill, you will not convince them, because they have made up their minds that our Government has no responsibility to those who are suffering through no fault of their own. That is a problem we are confronting in this House.

There are some who come to the floor not willing to accept any kind of an explanation. They just say, "We don't want the bill because the Government shouldn't be doing this and the banks are going to forbear."

Mr. Chairman, I associate myself with the remarks of the gentleman from New York. I thank the gentleman for at least being analytical and having an open mind on an issue, which I do not think exists uniformly in this House.

Mr. WRIGHT. Mr. Chairman, I move to strike the requisite number of words.

Mr. GONZALEZ. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

[Roll No. 101]

□ 1500

The CHAIRMAN. Three hundred eighty-six Members have answered to their names, a quorum is present, and the Committee will resume its business.

□ 1510

The CHAIRMAN. The gentleman from Texas (Mr. WRIGHT) is recognized for 5 minutes.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the Roemer-Wylie amendment and in favor of the Gonzalez substitute.

I think the Gonzalez substitute offers all the protections in its present form that any reasonable and prudent person could expect.

On the other hand, the language that is offered in the form of the Wylie amendment now offered in the name of Mr. ROEMER does nothing really except to constitute a hortatory encouragement without any force to bankers to be lenient if they will.

One of those speaking in favor of the Roemer approach asked the question a moment ago, who among us would not help the poor if we had the opportunity? I think we are going to discover the answer to that question immediately. Whenever the vote comes, we are going to discover who among us would and who among us would not render some assistance to those who through no fault of their own are being rendered homeless.

This is one of the most grievous problems that could confront a family.

We now are suffering the highest rate of home and farm foreclosures that this Nation has witnessed in the past 45 years.

It is an epidemic. It is estimated that maybe 2 million people have been rendered homeless with literally no place to lay their heads at night, no place to go, no home, no shelter.

I think it would be very difficult to imagine any blow to the nervous system that would be any more devastating to one's self-esteem than for the head of a household suddenly to have himself and his family dispossessed, thrown completely out of the shelters that they had come to rely upon, with no other place to go to.

Now that has happened in the past year to 230,000 American families. Two-hundred and thirty thousand, almost a quarter of a million families in this 1 year have been dispossessed from their homes.

Most of them have been thrown out of their homes not through any fault of their own but because the vicissitudes of this economic recession have caused them to lose their jobs. Without work they could not pay.

Now the Wylie approach advocated by Mr. ROEMER would simply call upon the banks and lending institutions to forbear.

Well, we have a record of 230,000 instances in the past year in which they have not forborne, they have not found it in their hearts and their consciences and perhaps they have not been able under the terms of their charters to forebear.

This provides the bank as well as the individual an opportunity to have a second chance.

I hope everybody fully understands what is encompassed in the Gonzalez substitute. To call it a gift would be wrong, it is not a gift, it is a loan, a repayable loan. Families will be required to pay up to 38 percent of their income. Only if it is a family of four making less than $20,000 with one of the main breadearners unemployed can they qualify for the loan.

The loan will not apply to the kind of things that a family might desire to have such as a swimming pool or a tennis court or the luxury items.

The loan will apply only in the case of a family rendered subject to foreclosure by reason of losing a job in this recession and it will not apply to a family that has gotten into trouble through its own fault. It will not apply to someone who has lost a job through misconduct; it will not apply to someone who has simply refused to pay his mortgage. It will apply only in those cases where a family earns less than $20,000 a year, is willing to take a loan and repay it at 10 percent, which certainly is not a gift.

Only a few years ago a 10-percent mortgage was thought to be too high for the average family to afford. And to pay up to 38 percent of that family's income. Now the gentleman from Ohio suggested a moment ago that 38 percent is not a very high figure, since 10 percent of our families pay more than 40 percent of their income for shelter and housing. Well, it suggests itself to me that if that be the case, that 10 percent paying more than 40 percent of their total income for shelter must be in the very lowest economic brackets. And I suggest to you very seriously that 40 percent of a family's income is indeed a very substantial amount to drain away from that family's total resources simply so they may keep a roof over its head.

So, what we do is not a handout; it is a hand up. It is an opportunity, it is a chance for those temporarily rendered jobless at least to keep the family together, at least to keep a roof over its head. It does not differ in any substantial way from the bill we passed by an overwhelming majority just last week, I believe, in this House, the Emergency Agricultural Credit Extension Act.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. WRIGHT. Any of us from rural areas or representing areas with many rural constituents who voted for that bill and enjoyed the support of some of the people from the city and urban areas in support of that bill, I think would have no consistency whatever to oppose the Gonzalez approach in this bill for urban developers or for people who may be in small towns. You do not have to be a big city dweller to lose your home.

So, I would urge you very earnestly to reject this approach or just saying: "Please banker, be nice, if you will." That does not do anything at all. That is a little bit like what many of us did in the State legislatures where we once served. How many of the Members can remember, those who have served in State legislatures, those grandly sounding resolutions that were passed by those legislatures, either memorializing Congress to do something or condemning some evil that existed in society?

I recall on one occasion when I was in the legislature in Texas there were successive days on which members offered resolutions, one condemning child molesters, the next condemning drug abusers, another condemning rapists and finally one member sought to wrap it up in an omnibus antisin resolution in which he said, "We shall hereby and herewith condemn in all of its evil manifestations." He hoped he would put an end to the hortatory expressions, by this all-encompassing condemnation of evil. We might as well just pass a resolution condemning recessions, condemning joblessness, condemning the idea that anybody would ever lose his home and it would not do a bit of good.

Now, you have a chance to do some good, you have a chance to give a little help, as well as a pat on the back to some of the people out here who, through no fault of their own, are rendered jobless and whose families, unless we act, are going to be rendered homeless.

It is the kind of thing that has made America great because it is the very symbol of a government that does not intrude in the private marketplace

except to permit a person to have an opportunity that that person should enjoy as a citizen of the United States.

And for those reasons, I hope that you will oppose this somewhat meaningless amendment and then support the Gonzalez substitute.

□ 1520

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Roemer-Wylie amendment.

Mr. Chairman, it is certainly an oversimplification to suggest that those who would vote for the Roemer-Wylie amendment are against helping those who are in prospect of losing their homes.

Under this bill only a few will be helped. According to testimony, which we obtained before our committee, there are some 230,000 to 250,000 people who would qualify right now. And by the most liberal of estimates, some 60,000 to 70,000 people would be helped. So we are asking others who would not be helped to help pay for the payment of the mortgage and interest on those few who would be helped.

But the real issue here is the question, is the program workable? Now it is not just my idea that this is a bad bill. We are not alone in the idea that it is not good. I will read from some letters that I have received in support of our position that this is a bad bill.

Secretary of HUD, Samuel R. Pierce, said:

Our principal objection to H.R. 1983 is that its enactment would have exactly the opposite impact from that which is intended. Enactment of H.R. 1983 would severely inhibit the market incentive to forbear. The net result would be that lenders, not homeowners, would be the beneficiaries of the assistance."

He adds in the next letter on May 5:

In addition the amendments offered by Mr. Gonzalez would add further regulatory complexities to H.R. 1983 without making it more equitable or feasible to implement.

The amendments, if they are to be accepted, are primarily cosmetic and do not really go to the basic structure of the program. As I pointed out a little earlier none of the amendments would change the fact that the program would have been operative for the last 10 years in certain districts in the United States on a continuing basis. In the Pittsburgh district, it would have been operative for 100 percent of the time; Cincinnati, 100 percent of the time. The Members can see the chart. And in all districts an average of 59.4 percent of the time. And this indicates that such a program, if it started now, would likely have to be implemented far into the future.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Chairman, the bill that the gentleman and I have worked so hard on and so genuinely put forward here today has been described by an earlier speaker as a "pat on the back." I do not think anybody who has looked at the banking system of this country and realizes that the banks are up against certain ratios and requirements under the law to foreclose, that their honest effort at forbearance, because forbearance is in the banks own best interest, is being thwarted. And our amendment demands that the Federal regulators relax those rules and regulations so forbearance can take place.

It happens to be the same language that the good chairman in genuine effort put in his bill. The difference is that we do not match forbearance with a pot of $760 million side by side, because if the banks have to choose between forbearance and getting part of that $760 million, which do my colleagues think the banks would choose? Forbearance or a check from the Federal Government?

I thank the gentleman.

Mr. WYLIE. I thank the gentleman for his very cogent and insightful observation. And we did find that lenders are out there willing to forbear right now. They are rescheduling payments, which is in their best interest, as the gentleman suggested. It is not in their best interest to be in the home business.

So what our amendment does is to encourage forbearance, wherever possible, without jeopardizing the safety and soundness of the institution.

Speaking of bankers, the American Bankers Association said:

We do not believe the solution to this delinquency problem is the creation of a $760 million program to be administered by HUD because it would be counterproductive to the immediate short run of reducing federal deficits.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. WYLIE) has expired.

(By unanimous consent, Mr. WYLIE was allowed to proceed for 3 additional minutes.)

Mr. WYLIE. Mr. Chairman, the U.S. League of Savings Institutions says:

The cost-benefit ratio of H.R. 1983 is exceedingly negative. Our research indicates that most foreclosures continue to be caused by factors other than unemployment. We are convinced that HUD may not be capable of providing sufficient support and administration for this program.

The American Farm Bureau Federation says:

We cannot support H.R. 1983. We encourage you to support instead the Wylie substitute.

The Mortgage Bankers Association say:

We question whether or not there is a need for emergency foreclosure relief at this time as it could address the problem that we believe will soon be on the wane. We are greatly concerned about the impact on the federal deficit, which is already excessive.

And the National Realtors Association has indicated support for my substitute.

I think it is a far better way to encourage forbearance among the lending institutions and not institute this new, very expensive program. The Office of Management and Budget has estimated it could cost up to $15 billion over the next 5 years, if all of those 145,000 eligible citizens were satisfied in accordance with the provisions of this bill.

So, I think our amendment, the Roemer-Wylie amendment, is a far better way to go and I encourage support and adoption of the amendment.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

Back in the 1930's when we had even more disastrous economic conditions and people's homes were being foreclosed by the thousands every week, we came up with the Home Owners Loan Corporation, which had the authority to issue bonds—it was capitalized by the Federal Government, but had authority to issue bonds—and take over mortgages from the banks.

□ 1530

I would like to ask the gentleman, since we have had experience with this before. Did the Homeowners Loan Corporation cause the banks to foreclose instead of forbear? What was our experience at that time? Can the gentleman tell me?

Mr. WYLIE. Our experience with Homeowners Loan Corporation was very bad. As a matter of fact, in the report which we had presented with this bill, it shows that within 2 years of its creation the organization employed over 20,000 people. Its final liquidation did not occur until 1951, 18 years after its creation. It was really the worst kind of bureaucracy. They acquired over 200,000 homes. The Homeowners Loan Corporation acquired over 200,000 homes. They became the owners of over 200,000 homes, and they received 1,886,491 applications.

I do not think that is a good analogy.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it seems to me that the figures the gentleman just gave prove the opposite of his conclusion. They received almost 2 million applications, and they acquired 200,000 homes, which does not indicate, to me,

that it precipitated a rash of foreclosures but that in fact, in most cases, even though we had a Homeowners Loan Corporation, the banks forebore.

Furthermore, the fact is that HOLC did save hundreds of thousands of homeowners from foreclosure. Furthermore, HOLC turned a profit to the U.S. Government of many millions of dollars.

I suggest that, while this emergency legislation is desirable—and I certainly support it as a stopgap—we should reinstitute a Homeowners Loan Corporation as soon as feasible. I have introduced a bill to do just that. But I simply say for the present, that experience does not support the argument that the gentleman just made and that in fact it proves the contrary.

The most important thing is that we have over 1 million people in default on their mortgages today around this country, and thousands of them are being foreclosed every month. They are looking to Congress for action. It is time we did something to give them relief.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Ohio.

Mr. WYLIE. The point is that the Homeowners Loan Corporation did not save the homes. They foreclosed on them. They acquired 200,000 homes.

Mr. SEIBERLING. I do not accept that as proving that the HOLC kept the banks from exercising forebearance.

Mr. Chairman, there are thousands and thousands of families already suffering the problems and fears associated with unemployment. Many of them must now face the further threat of losing the roofs over their heads. In 1982, more than 1 million American homeowners were delinquent on their mortgage payments, and in the first half of 1982, more than 21,000 American families lost their homes to foreclosure. Such a situation clearly justifies the need for this legislation.

However, the $760 million authorized by the bill will help only a fraction of the total number of families facing eventual foreclosure as a result of this recession. Moreover, we need a comprehensive mortgage assistance program in place which is not subject to the whims of whatever administration happens to be in office.

That is why I have introduced H.R. 2547, the Homeowners Loan Corporation Act of 1983. My bill has many features in common with H.R. 1983, but it goes further by creating a permanent program to assist homeowners facing foreclosure because of economic conditions beyond their control. H.R. 2547 would revive the Homeowners Loan Corporation, a particularly effective program developed during the depression.

Under my bill, the Homeowners Loan Corporation would give lending institutions interest-bearing bonds in exchange for mortgages when the lending institutions are threatening foreclosure because of delinquent mortgage payments. The Corporation would then make arrangements for the homeowner to begin making regular payments to retire the Corporation's assistance over a 30-year period. Payments would be a maximum of 30 percent of a homeowner's income, and interest on the Corporation's assistance could not exceed 10 percent. Since the Corporation would be empowered to sell bonds to raise capital for its mortgage assistance activities, the program would be self-sustaining, and would require only an initial, recapturable authorization from the Congress.

If the economic emergency we are suffering now does not substantially abate, the foreclosure problem is going to get worse, and we will have to provide a more comprehensive program of assistance than that authorized by H.R. 1983. The Homeowners Loan Corporation Act of 1983, H.R. 2547, is a necessary follow-on to H.R. 1983.

Mr. HILER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Roemer amendment.

Mr. Chairman, I think there are several issues involved with this particular bill that really have not been accented enough today. Had this program already been in existence, it would have started in September 1981 throughout the country. The trigger mechanism is such that the bill, once enacted, will stay on for years and years into the future. It was pointed out by the gentleman from Ohio that in many areas of the country, this bill, had it been enacted years ago, would have been in existence for over 10 years by this time.

If we take the assumptions involved in many economic forecasts, this bill would be in effect from now until mid-1987, well into an economic recovery, and it would be at a cost of some $15 billion, a significant impact on the budget.

I might also add that there are two other statistics that I think are important when we consider the emergency nature of this bill. The conventional foreclosure rate in 1982, which reflects the number of mortgages actually foreclosed as a share of all mortgages held by insured S&L's, was 0.24 percent. This is less than half of the postwar peak foreclosure rate of 0.58 percent. What we are experiencing today is not a high since the depression; it is not even half of the highest point it has been in post-World War II.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. HILER. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I think the gentleman is making a very important point, and I do not want it to be overlooked. Would the gentleman repeat those figures as to the foreclosure rates?

Mr. HILER. Certainly. The current foreclosure rate in 1982 reflecting the number of mortgages foreclosed as a share of all mortgages held by insured S&L's was 0.24 percent. The post-World War II peak foreclosure rate was 0.58 percent, or nearly 2½ times higher than it is at current levels.

Mr. WYLIE. So the situation in which we now find ourselves is not necessarily the kind of a situation which calls for $760 million in money to pay off mortgage interest; that is the point the gentleman is trying to make?

Mr. HILER. That is exactly the case. In fact, if we look at the current FHA 1982 foreclosure rate, it is 0.44 percent, which is about one-third below the 1.14 percent foreclosure rate in the 1973-74 recession.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. HILER. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Chairman, one of the issues today, one of the issues that the committee has fought hard—and I think rightfully so—to suppress is that this program is not really an entitlement program. We have had dialog throughout the day that this is not really an entitlement program. They point out the so-called contradictions when some of us say it is not enough money to help all homeowners facing hard times. That is no contradiction. It is not enough money to help everyone. It helps one out of three or one out of two or one out of four or one out of five. It is a little piece of the program. They say, therefore, it cannot be an entitlement program, and they tried to suppress that word.

The truth is, how are you going to tell one out of five, "We will help you," and when the next four come, what are you going to tell them?

The truth is, the word "entitlement" is not used in the bill. And those who say it is not an entitlement are legally correct; but the practical political effects of this move today is the birth of yet another entitlement, the cost of which we can never calculate, and I further predict that this program like all other entitlement programs, will never end.

Mr. HILER. I thank the gentleman for his comments. I think he is exactly on the mark. Had this program been enacted in 1973, in many areas of the country it would still be in effect. In fact, if we enact it today, in all likelihood, with the current trigger mechanism, it will be in existence for the

next 5 years or more, at a cost of some $15 billion.

I think the bill goes in the wrong direction at this time with falling interest rates and the general economic recovery.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. ROEMER) to the amendment offered by the gentleman from Texas (Mr. GONZALEZ) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. WYLIE).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ROEMER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 197, noes 220, not voting 15, as follows:

[Roll No. 102]

NOT VOTING—15

Dixon	Heftel	Michel
Early	Hubbard	Owens
Edgar	Leath	Skelton
Ford (TN)	Marlenee	Smith, Robert
Hefner	Martinez	Vandergriff

□ 1550

The Clerk announced the following pairs:

On this vote:

Mr. Marlenee for, with Mr. Hefner against.

Mr. Michel for, with Mr. Dixon against.

Mr. Robert F. Smith for, with Mr. Ford of Tennessee against.

Mrs. COLLINS and Mrs. BOGGS changed their votes from "aye" to "no."

So the amendment to the amendment offered as a substitute for the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. WALKER TO THE AMENDMENT OFFERED BY MR. GONZALEZ AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WYLIE

Mr. WALKER. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. WALKER to the amendment offered by Mr. GONZALEZ as a substitute for the amendment in the nature of a substitute offered by Mr. WYLIE: On page 27, after line 5, insert the following new section:

SEC. 5. None of the funds authorized under this act shall be expended in violation of section 7 of Public Law 95-435.

Mr. GONZALEZ. Mr. Chairman, I have a point of order.

The CHAIRMAN. The gentleman from Texas (Mr. GONZALEZ) is recognized on his point of order.

Mr. GONZALEZ. Mr. Chairman, we do not have a copy of this amendment on our side.

The CHAIRMAN. The Chair will state to the gentleman that that is not subject to a point of order.

Mr. GONZALEZ. Mr. Chairman, I thought that the gentleman had asked unanimous consent to consider the amendment as read.

The CHAIRMAN. The Chair will state to the gentleman that the amendment has been read.

Mr. WALKER. Mr. Chairman, I would be glad to give the gentleman a copy of the amendment if he wishes to see one.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. WALKER) is recognized for 5 minutes in support of his amendment.

Mr. WALKER. Mr. Chairman, it seems to me, as I have listened to the debate, that it presents us with a couple of questions, the main question being, What is it that the unemployed really want?

If the unemployed that I speak to in my district are any indication of what the unemployed across the country are saying, what the unemployed really want is to go back to work. They want to work in this country; they do not want a lot of programs passed by this Congress that simply allows them

to be comfortable in their unemployment. They want to go back to work.

As I think of that, that leads us to a second question: Does this bill really help or does it harm them and prevent them from getting what it is they want?

It seems to me that the answer is that insofar as we add to the deficit, it undermines the economy, it undermines the economic recovery, and thus it means longer periods of unemployment for those people whom we say we want to help. The one thing that it seems to me we are all agreed on is that massive deficits in this country are a contributing factor to economic misery.

The New York Times said recently in an editorial in which it talked about budget deficits, and I quote:

> The same president and congressional leaders agree with America's allies that our impending deficits are the main threat to a sustained recovery. The prospect reinforces expectations of renewed inflation, keeps interest rates high, and thus suppresses investment.

□ 1600

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I think the gentleman has a good amendment and we accept it on this side.

Mr. WALKER. I thank the gentleman very much. I hope the other side will accept it, too; although I doubt it.

The thing that we have as a base line of belief in this country today is that the kind of deficits that are being racked up, whether you blame them on the President or whether you blame this on the overspending of Congress, is the fact that those deficits are doing harm to the economy and insofar as the economy is harmed, people are out of work and people will not go back to work very soon. By piling on more and more deficits, we compound the misery that the economy has led us into and in the case of bills like the one we have before us, we do so knowingly.

We have heard a lot about the American family's right to a home here today during the debate. Nothing more destroys that right than the high interest rates that too much Government spending brings on.

Those massive deficits just happen to be against the law. Public Law 95-435, the law which is the law of the land, requires us not to be spending with massive deficits, but to have a balanced budget.

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from California.

Mr. DANNEMEYER. I am not sure I understand what the gentleman from Pennsylvania is saying. Is the gentleman telling the Members of the House that the existing law requires that we have the budget of the United States balanced?

Mr. WALKER. Well, I know that the gentleman finds that shocking, given what we are doing here today and given what we do with regard to spending.

Mr. DANNEMEYER. Is that the law?

Mr. WALKER. But that is absolutely the case. The law of the land, Public Law 95-435, requires a balanced budget right now.

Not only that, but I would say to the gentleman that in two succeeding Congresses we have reaffirmed that law. We have said that we should continue to adhere to that policy adopted by the 95th Congress.

Mr. DANNEMEYER. How long has that been the law of this country?

Mr. WALKER. Well, since the 95th Congress, so we have had it as the law of the land for about 8 years now.

Mr. DANNEMEYER. Why in the world are we tolerating a situation which is in violation of the law which this body has adopted? Does the gentleman have an explanation for that?

Mr. WALKER. Well, I just do not have an explanation, I might say to the gentleman. I think it is positively appalling that we have for years now gone ahead and spent in deficit, even though we have reaffirmed the law which says that you have got to have a balanced budget, and the American people think we should have a balanced budget. The American people think we were right when we passed that law, and the American people have said time and time again that they believe that balanced budgets are what this country needs and what an economic recovery can be built upon; yet we go ahead ignoring what the American people say they want and what the law of the land requires of us.

What this particular amendment says is that we need to be facing up to what the American people desire of us and what it seems to me the law requires.

My amendment would simply say that whatever we do in this bill has to be done in compliance with the law of the land.

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield further?

Mr. WALKER. I am glad to yield to the gentleman from California.

Mr. DANNEMEYER. The gentleman is making an excellent point. I only hope that this amendment will be adopted so that at least we can have consistency in the rulings of the House.

I thank the gentleman for yielding.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 3 additional minutes.)

Mr. JACOBS. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from Indiana.

Mr. JACOBS. Well, in view of what the gentleman has just said, I assume the gentleman supports the spirit of that law, limiting the national debt, as well as the letter.

The gentleman does not think the President would propose to change that limit, does he?

I read in the paper that he is planning to ask to raise the debt limit.

Does the gentleman anticipate that?

Mr. WALKER. I would say to the gentleman that what the gentleman from Pennsylvania is concerned about is the letter of the law. The letter of the law requires a balanced budget and it seems to me that at the very least we as the body of Government that is constitutionally given the responsibility for appropriating money and authorizing money should be the ones who are most concerned about the letter of the law.

Mr. JACOBS. So the gentleman thinks it is all right to raise it?

Mr. WALKER. The letter of the law requires a balanced budget right now.

All I am saying is that with regard to this bill that it seems to me we ought to think that the letter of the law is important to us.

In today's edition of USA Today, one of the national newspapers that many of us have come to read, they have an editorial entitled, "It Is Time To Attack the Deficit Monster."

Yes, it is, and right here we can begin with this particular bill. Your constituents are telling you that that is what they want. We have heard from them, saying that they support the Byrd-Grassley amendment. Many of you have probably gotten letters saying that.

This is the Byrd-Grassley amendment in language that can be understood with regard to this particular bill.

This amendment is precisely the issue of a balanced budget. It says that we have to obey the balanced budget law. It says that we have to put the economy back in order so that the unemployed can go back to work.

For those who say they favor a balanced budget, here is your opportunity to put your votes where your words are.

Mr. ST GERMAIN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, really, it is with fear and trepidation that I stand here to oppose this amendment, because I note that the gentleman who offered the amendment has a pin on that says, "House Guerrilla", and here I have a

pin that is just a Saint, a little tiny Saint.

Yes; I saw the other House guerrilla, too. You know, when I was a young child in Rhode Island, there was a very popular radio program before the days of television. All of you probably heard of Amos and Andy, but up in New England we had Joe and Baptiste. They were two Frenchmen from Canada.

Well, we saw the Joe and Baptiste show a few minutes ago. It was really something to behold. The two guerrillas put it on for us.

But in answer to the query from the gentleman from Indiana, he stated, how about the President and the deficit? He is the chap who is responsible for the largest deficits in the history of this country.

Yes; we are all for the deficit being reduced and eliminated and we are all for putting people back to work; but the fact of the matter is that there are millions of people out there who are out of work through no fault of their own, through no fault of their own.

The legislation as presented by the distinguished chairman of the Housing Subcommittee requires that eligibility be only granted to those individuals who are out of work and unable to meet their mortgage payments, through no fault of their own.

We just had a vote, a substantial vote, by the Members of the House, who have proven by that vote that they have compassion and feeling for the poor unfortunates of this Nation.

Now, you know, I do not know about Joe and Baptiste who were here a few seconds ago, but I am going to bring legislation in the near future to the floor of this House for $8.4 billion for increased participation in the International Monetary Fund—and at whose request, at whose behest? At the request of the President of the United States and the Secretary of the Treasury of the United States.

I am wondering how Joe and Baptiste are going to react to their President's query and entreaty on that one. The President sent me a three-page letter telling me how important this legislation is to the future economy of the world and he told me that he is going to be talking to all the guerrillas and asking those House guerrillas to support that legislation.

I am going to do my best on my side, because I feel it is the responsible thing to do. I am working hard for that legislation. I want to help our President, our President on this side and your President on that side. He is our President. I am going to help him on that; but in this instance, I say the least we can do for the poor unemployed people, unemployed through no fault of their own, is yes, if we can help with that, I am for increased participation and certainly we can do a little something for the poor unfortunate people of this country.

Let us reaffirm the vote we just had.

Mr. Chairman, I yield back the balance of my time and I hope we can get to the important business of this Nation forthwith. Vote down this amendment and proceed to adopt the Gonzalez substitute.

Mr. DANNEMEYER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I noticed that the previous speaker made reference to the fact that the President of the United States has recommended a budget for this country that is substantially out of balance and is using that as an argument why we should turn down the amendment offered by the gentleman from Pennsylvania.

I want to remind my colleagues that Presidents can only spend what Congress appropriates, nothing more, nothing less. That is part of the division of responsibility in our political system.

Interestingly enough, this Member from California not more than 2 months ago offered an alternative budget plan for this House to consider whereby the deficit for 1984 would be projected at $63 billion.

□ 1610

That was done by cutting spending rather than increasing taxes, and it was done by establishing a spending level about $88 billion less than what this President proposed.

What happened to that proposal? The Rules Committee of this House, controlled by my colleague's party, the Democratic Party, analyzed whether or not they would make consideration of that proposal in order. Can you believe, they would not even permit that proposal to be voted on here on the floor of the House of Representatives?

Why in the world would people in this Chamber who are saying they are for a balanced budget refuse one of their Members the opportunity of even having such a proposal considered? I confess I cannot answer that question because it leads to a consideration of logic. When you engage in logic it is difficult to come to a conclusion as to what is the real reason for a result.

But I can only conclude to my colleagues that on that point the reason that the House leadership, the Democrats who control this place, did not want that proposal to be voted on, on the floor of the House was very simple. They did not want their Members in the election of 1984 to answer to their constituents as to why they had voted against reducing spending.

I cannot figure out any other reason. It is the old shell game; now you see it, now you do not.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding because it was brought out in debate earlier that the debt limit ceiling has been raised and that the President recommends the increases in that.

I would point out to the gentleman that the same budget resolution he is talking about was voted on pretty much by party lines, it was the other party, the other side of the aisle that voted to increase the debt limit ceiling. They voted to do that. They voted to expand and to move us further into debt in this country.

That is their prerogative, but it is they who are doing it. I think it is well to point out that what we are trying to do with the amendment I have offered is trying to bring some sense into this process and trying to move us toward a day when we might have a balanced budget again.

I thank the gentleman for yielding.

Mr. DANNEMEYER. I appreciate my colleague from Pennsylvania pointing that out.

I can only ask in conclusion that the next time the Rules Committee has before it a proposal to permit the consideration of a substantially reduced spending program for the country that you will join with me in asking them to at least permit that to be considered on the floor of the House for a record vote. Then we can all tell our constituents how we voted up or down.

I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER) to the amendment offered by the gentleman from Texas (Mr. GONZALEZ) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. WYLIE).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ROEMER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 157, noes 254, not voting 21, as follows:

□ 1630

Mr. YATRON changed his vote from "aye" to "no."

So the amendment to the amendment offered as a substitute for the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. WORTLEY TO THE AMENDMENT OFFERED BY MR. GONZALEZ AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WYLIE

Mr. WORTLEY. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. WORTLEY to the amendment offered by Mr. GONZALEZ as a substitute for the amendment in the nature of a substitute offered by Mr. WYLIE: In paragraphs (a) and (b) of the proposed section 110, strike out "$760,000,000" each place it appears and insert in lieu thereof "$380,000,000".

Mr. WORTLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WORTLEY. Mr. Chairman, my amendment is very simple and straight-forward. I seek to limit the authorization contained in the emergency mortgage foreclosure assistance bill from $760 million to $380 million.

Why?

Because the amount of money talked about in the bill is an unrealistic sum. Richard Pratt, former Chairman of the Federal Home Loan Bank Board, in his appearance before the Housing Subcommittee stated:

With particular regard to the current delinquencies ratio, two considerations are important. First, a loan is generally categorized as delinquent until *all* past payments and late changes are paid. Thus, it is incorrect to conclude that more than 2 percent of loans are totally non-performing. While the overall delinquency rate is about 1.25 percent, delinquent borrowers *may be making* partial payments on some of those loans.

Others who testified said that while the incidence of foreclosures was up in 1982, it is impossible to separate the investment properties from the owner occupied properties. The Federal Government has no business bailing out speculators who are in over their heads. Yet the way in which the statistics are gathered, a distorted picture of the real situation exists.

Many of us who serve on the Banking Committee conducted informal surveys of lenders in our home districts. I contacted a commercial bank, a mutual savings bank, and a savings and loan association. I asked each one of them the same question. How many homes, primary residences, have you foreclosed in the past 2 years. Neither the savings and loans association nor the commercial bank have foreclosed on any residential property. The savings bank has foreclosed only two times in 2 years.

The bill before us has been labeled emergency legislation. Yet, it has languished for 2 months because the votes are not there. When I decided to offer an amendment to reduce the authorization by half, the unemployment rate in my congressional district mirrored the national average of the time, 10.4 percent. In 2 months time, the unemployment rate for the metropolitan Syracuse, N.Y., area has dropped a full percentage point to 9.4 percent. Although the national average unemployment rate of 10.2 percent is still far too high, progress has been made and will continue.

Mr. Chairman, if a person loses his job and goes to the bank and explains his personal situation, he will find that financial institutions are more than willing to work out extended payback plans whereby individuals can make reduced payments, pay only the interest, or whatever is appropriate to maintain ownership of his home.

In some parts of the country due to severe structural economic problems, foreclosures, unfortunately, are more commonplace. If we are to help these people hold onto their homes, let us do it in a sensible fashion. Let us not throw money at a problem that is vir-

tually nonexistent in many parts of the country.

By reducing the authorization level called for in the bill, we will be more likely to target funds where they are acutely needed without adding to the deficit and prolonging the problem.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the amendment before us has been offered in the subcommittee as well as in the full committee and it was roundly defeated.

Listening to the debate earlier from that side of the aisle, one of the arguments used was that there was not enough funding in this resolution. Well, we will not use Joe and Baptiste but we will use Tonto from the Lone Ranger, "You are speaking with forked tongues." You cannot have it both ways. Either there is not enough, or there is too much.

I agree with those who say there is not enough money in this bill. However, we tried to be as circumspect as possible and that is why we limited the amount.

Now I am proud of the fact that many financial institutions in this country are exercising forbearance on foreclosure.

By the same token, unfortunately that is not universal. And this idea of going to your friendly banker, yes, a lot of them are friendly, but then I received a letter 2 days ago in my office from a senior citizen whose checking account was 26 cents below the amount of the check he wrote, which I think was for $18, due to a service charge that he had not noted. "Perils of Pauline", within 2 weeks that 26 cents delinquency cost that man $23, charged by his friendly bank.

Then of course we have the banks now who say unless you have $5,000 you do not speak to people, you speak to machines.

Are those the ones we want to rely upon?

As I say, fortunately, a lot of financial institutions are working with people to try to assist them. They do not want to be property owners and real estate owners. But by the same token, the other side of the coin also applies.

For that reason, I must oppose this amendment and ask that we defeat it not only as roundly as the previous one, but even with more fortitude, again, thinking of the people who, through no fault of their own, are unemployed. Even though the unemployment rate may have come down in a particular metropolitan area it does not mean that those people who are still unemployed are having it any better.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Maryland.

□ 1640

Mr. MITCHELL. I thank the gentleman for yielding.

Mr. Chairman, I oppose the amendment primarily to defend my friends on the other side. I do not want them to be caught out on that limb, saying that there is not enough money, as the gentleman has indicated, and then face another cut. My friendships on that side are too great. So in defense of the Members on that side, who have already gone on record a dozen times saying that there is not enough money in it, we must oppose this amendment to defend their honor, I would think.

Mr. ST GERMAIN. I thank the gentleman for his remarks.

Mr. Chairman, I would just like to state at this time again that we do not want to keep the House here late this evening. We do not want to do that. We want to move expeditiously. For that reason, we are not going to debate this any further. It is not deserving of any further debate. The issue is clearcut. We call for defeat of the amendment.

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. WORTLEY. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from New York.

Mr. WORTLEY. I thank the gentleman for yielding.

Mr. Chairman, during the hearings that we held on H.R. 1983, we heard many references to the fact that a sheriff from Pennsylvania had removed 43 properties from public auction in order to save the distressed homeowners from losing their properties. Well, I was fascinated to pick up a recent issue of the Pittsburgh Post Gazette, which talked about the people who were about to lose their homes and the sheriff who had interjected himself. I noted that of the 43 properties that were up for public sale, 18 of them had been used as collateral for business ventures that had gone sour; 16 were withdrawn from the auction prior to the sheriff's action; of the 13 homes saved from sale, 8 were owned by persons without jobs, and of these 8, 3 are likely to be put up for sale again; debts ranged from $2,725 to $163,000; one debtor had not made a payment in 2 years, and another had purchased a house in February 1982 and he had made just two payments; in all cases the attorneys representing the lender said that it was to the lender's advantage to settle without resorting to a sheriff's sale.

I think it is obvious that all of the reports about foreclosures and sheriffs' sales do not involve simple questions of the family breadwinner being temporarily unemployed. The banks are, in fact, granting forebearance, without the taxpayers coughing up $760 million and without busting the budget and without piling up further deficits and without crowding out the private sector.

Mr. Chairman, I maintain that this bill calls for too much money, and I respectfully urge my colleagues to vote in favor of the amendment now before them.

Mr. WYLIE. I thank the gentleman for his contribution.

Mr. Chairman, I appreciate the fact that Members on the other side of the aisle were attempting to defend my honor. And may I say that I do not want it defended just quite in that way.

The debate which I have engaged in here is a matter of principle with me, and I would be much more satisfied with the gentleman's amendment if it had zero rather than $380 million which is has, because I think we are getting the Government into a business that it should not be getting into. We are getting the Government into the conventional loan business. There are points that I have made a little earlier. And, as a matter of principle, I do not think we should, through the conventional lending system, get into what amounts to a social welfare program. And the point I was making is that if we do in fact pass legislation like this—and I really do not think that this bill will ever become law, I am predicting that it will not—then the number of eligible households is likely to average 145,000 a year and, as I said before, based on CBO estimates, over a period of 5 years that is going to add up to $15 billion.

So when we are talking about the difference of $380 or $760 million, it is really an enunciation of principle.

Now, the point was made a little earlier here that the conventional foreclosure rate in 1982 by all insured S&L's was 0.24 percent, and this was less than half of the post-war peak foreclosure rate of 0.58 percent, despite the current high unemployment problem. So I do not think that it matters whether the amount today is $760 or $380 million or $1 billion. I still do not think that that goes to the basis of the problem. So I think that the gentleman's offering the amendment and allowing us to further debate the issue is commendable, and I compliment the gentleman for his amendment and I support it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. WORTLEY) to the amendment offered by the gentleman from Texas (Mr. GONZALEZ) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. WYLIE).

The amendment to the amendment offered as a substitute for the amendment in the nature of a substitute was rejected.

AMENDMENT OFFERED BY MR. BARTLETT TO THE AMENDMENT OFFERED BY MR. GONZALEZ AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WYLIE

Mr. BARTLETT. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. BARTLETT to the amendment offered by Mr. GONZALEZ as a substitute for the amendment in the nature of a substitute offered by Mr. WYLIE:

In section 2 of the bill, after the proposed section 105(a)(4), insert the following new paragraph:

"(5)(A) such mortgagor has filed a plan with the bankruptcy court under chapter 13 of title 11, United States Code; and

"(B)(i) such court has dismissed the case of such mortgagor following a denial or revocation of confirmation of such plan; or

"(ii) the case of such mortgagor has been converted to a case under any other chapter of such title; or

"(iii) such mortgagee has been granted relief from the stay provided under section 362 of such title;

Redesignate the subsequent paragraphs, and any references to such paragraphs, accordingly.

Mr. BARTLETT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BARTLETT. Mr. Chairman, I rise to offer this amendment which I think would improve the workings and reduce the bureaucratic excuses of this bill. I do not believe it will become law, but the bill may be passed out of the House today. I hope not. I have shared this amendment with all of the Members of the House as a way to improve this bill by insisting that, before the new program be enacted for any individual, that that mortgagor first use the existing law that is contained in the wage earner's plan in chapter 13 of the Bankruptcy Act. The wage earner's plan, Mr. Chairman, is for temporary relief of mortgagors, of debtors, but it was more comprehensive than this emergency-aid type of program. The wage earner's plan, which is in wide use in this country, is not a straight bankruptcy but it is referred to explicitly in the law as a wage earner's plan.

The wage earner's plan, Mr. Chairman, is used right now. It is used in all manner of cases in which the assets are examined comprehensively. All debts are looked at by a trustee of the court. The courts have held that this plan does include unemployed persons, so that the court can look at all of the assets and all of the debts. No one under this plan would be forced into straight bankruptcy, but it would be an attempt for a workout and an attempt that the creditors and the debtors get together, using the trustee.

I would quote, Mr. Chairman, from the Bankruptcy Reform Act of 1978, from the majority description, and it reads, in part:

The benefit to the debtor of developing a plan of repayment under chapter 13, rather than opting for liquidation under chapter 7, is that it permits the debtor to protect his assets.

I would suggest, Mr. Chairman, that that is what we are trying to do, include the asset of a home. In a liquidation case the debtor must surrender his nonexempt assets, but under chapter 13 the debtor may retain his property by agreeing to repay his creditors. Chapter 13 also protects a debtor's credit standing far better than a straight bankruptcy.

Mr. Chairman, this amendment has a good deal of support on both sides of the aisle. I would submit to the Members that this amendment allows the system to work and to use the existing laws that are now in place, and then if this did not work, and if the chapter 13 did not work, if the wage earner's plan did not work, the file would already be complete and the trustee could simply turn over to HUD the file that had already been prepared.

I join with my colleague, the gentleman from Texas (Mr. HALL), on the other side of the aisle, and my colleague, the gentleman from Connecticut (Mr. MCKINNEY), in offering this amendment.

□ 1650

Mr. ST GERMAIN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I shall not travel to the well because I do not think we want to waste that much time.

Again, this amendment is familiar to us. We have addressed it both in subcommittee and full committee, and I appreciate the sincerity of the sponsor of the amendment in offering the amendment, but I do not believe he is an attorney. I am an attorney, and about the only people who will be happy about this and dance up and down with glee would be the legal profession because of the additional fees available to them under this.

I would also submit another thing. Call it anything you will, the fact still remains that out there across the land, this means people would be looked upon as having filed for bankruptcy. Why do we force them to do that, or to take a pauper's oath, so to speak, before they can get assistance? It reminds me, in this instance, of perhaps asking people to take on the scarlet letter. Nathaniel Hawthorne wrote the book, "The Scarlet Letter." Well, we do not want our poor unfortunates who are unemployed through no fault of their own to be branded with a scarlet letter, and for that reason we oppose the amendment and we ask that it be roundly defeated.

I yield back the balance of my time.

Mr. MCKINNEY. Mr. Chairman, I move to strike the last word.

I very seldom disagree with my good friend, the chairman of the Banking Committee, the gentleman from Rhode Island, but I think that this wage earners' reorganization plan does just exactly the opposite of impugning a scarlet letter. It was designed, I think, with good intentions, to keep people from going into bankruptcy. It would allow the bankruptcy court to appoint a trustee who will look at the totality of the debt of the person involved. The trustee will get an agreement from the creditors as to how they will accept payment so it is possible for that very person to make his payments without losing his home, without losing his car, without losing his family's personal possessions.

There is nothing in this bill, even though it may save a house for 3 years, that necessarily is going to save any of the other possessions of the individual involved on which there may be time payments. There is nothing in this bill that is going to assure that a person after 3 years is going to be able to keep his house. There is nothing in this bill that assures that anyone is going to be able to afford to pay their regular mortgage plus the 10-percent interest.

There is, in fact, an incentive in this bill not to renegotiate, not to reorganize, not to change the loan, but in fact to take the money and leave the person right where he lives.

Three years is no secret answer in Michigan where 300,000 people will never build another automobile. Three years is not necessarily any great answer in Pittsburgh, Pa., where the still mills lay quiet.

It is a basic national problem. If, in fact, the amendment of my good friend from Texas were put into this bill, it would allow people a chance at a very moderate cost, without great legal tangles, not to declare bankruptcy, not to lose their house, but in fact to reorganize their debts, something that this Government itself might try to do once or twice but it has not.

It seems to me that this is a very good amendment, Mr. Chairman. Since this bill is going to help some people, but not very many, the fact might be, if in fact, the gentleman's amendment were accepted, that we could stretch it across a larger number of people and have it provide more benefit.

I enjoyed the chairman's motion that we move this on. I am aware of the fact that this bill has had what is known around here as the full-court press and that it will probably be passed, but I really, honestly, do not know how any of you can say that the

Gonzalez substitute is an amendment which would improve this bill. Improving this bill would almost be an impossibility, but the Bartlett amendment would improve it.

Mr. Chairman, I yield back the balance of my time.

Mr. SAM B. HALL, JR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Texas.

I think the gentleman is on the right track in trying to help the potential number of people who would qualify under this legislation by requiring that homeowners seeking help should also apply under chapter 13 of the Bankruptcy Reform Act for relief.

This feature of the bankruptcy law gives the debtor some flexibility. It is a way to satisfy debt in a concise, reasonable way. It insures his or her credit standing, and should he or she not qualify under the chapter 13 procedure, then once dismissed from the procedure, the provisions of H.R. 1983 would still come into play.

If the bill before us today is to be effective it must serve those in the greatest need. If the debtor has the potential to satisfy the debt without foreclosure, then the bankruptcy judge or trustee can make this determination, and by so doing, it simply opens up the act for more people who may have the greatest need for its assistance.

I think we set a bad precedent if we eliminate traditional legal means for meeting one's obligations. A judge in bankruptcy can easily determine if a person does not have the potential either now or within a reasonable time to satisfy the debt. If the debt cannot be satisfied, then the debtor will be relieved of the provisions of this amendment and the debtor can apply the vehicle established under the bill before us.

I think there would be less criticism of this bill by the taxpayers if it contained an alternate, more flexible approach for obtaining relief rather than an indiscriminate filing that relieves all obligations.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. SAM B. HALL, JR. I yield to the gentleman from Massachusetts.

Mr. FRANK. I appreciate the gentleman yielding.

Mr. Chairman, I have one point to make in opposition to the amendment.

The gentleman, as I do, serves on the Committee on the Judiciary. The state of the bankruptcy courts is one of our problems right now. One of the things, it seems to me, that they do not now need is an infusion of all the mortgage problems so that the bankruptcy courts, over which we are now roiled as to what kind of judges they should have and about which there is a great deal of complication presently, should not have to become adjuncts to this program.

There have been arguments about excessive redtape, et cetera. To require everyone involved here to enter the chapter 13 process would impose on the already burdened bankruptcy courts a burden that I do not think they either want to carry or would be able to carry well.

Mr. BETHUNE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment of my colleague and I am tempted to talk about the technicalities of his amendment but that has already been discussed here. In fact, I think all of the discussion this afternoon has been about technicalities and it has been about the particular bill before us. That is as it should be. We should dig into the bill and try to figure out exactly what it will do and what it will not do.

But I think all too often here in this chamber we get so close to our work that we cannot see the forest for the trees. I do not know about you but I am concerned by the fact that Federal lending and credit assistance programs are growing at a rate faster than Federal spending programs.

I always like to say this twice, because people do not believe it. Federal lending and credit assistance programs are growing faster than Federal spending programs.

People talk and moan and groan about the deficit and what we are going to do about that and what it will do to the economic recovery that we all hope is now underway, but we continue to come here day after day and make legislation that sounds good as we discuss it here in this vacuum, but we never put it in the larger context.

□ 1500

We are blinded by the fact that we are too close to our work.

I think the bill is better today than the mess that came out of committee. Of course, that was not hard to do. I was pleased to see that the excellent amendment which I was going to offer, limiting the amount that could be used for hot tubs, riding stables, Jacuzzis and whatnot, are included in the new substitute, so maybe the bill is a little better than when it came out of committee.

But it is still a bad bill, because when we put it in the larger context of what this Congress is doing to the credit market and to the deficit, we have got to realize that we are doing the wrong thing here.

I have been referring to this year, 1983, as the "year of the bailout," because that is what it seems to be to me. A lot of the new Members have told me that they find the only thing we do here in this Congress is to bail out one industry or the other or one segment of the population or other, and they have good reason to say that because just last week we passed the emergency agricultural credit bill and added another billion or so in off-budget lending and spending to the deficit, even though we had already dumped some $8 billion or $9 billion in the PIK program to help the farmers of this country.

The Chrysler Corp. was in town yesterday asking for a $200 million sweetener to the Chrysler bailout which this Congress passed a couple of years ago. Of course, the big banks are here in town asking for $8.5 billion or so to bail them out of the improvident loans they have made around the world. The multilaterals, of course, are asking for more money. I can tell the Members at this point that the REA is going to be here pretty soon asking for $8 billion or $9 billion to help bail them out. And now here we have this bill before us to bail out those who, for one reason or another, have become unable to pay their house payments.

Now, maybe if we were only talking about the ones I just mentioned, it might not be so bad and we would want to pass the bill and get it out of here. But the fact is we have over $600 billion in outstanding credit assistance programs out there right now. Do the Members realize how much that crowds people out of the credit market and runs interest rates up? Where are all the people who are concerned about deficits and high interest rates and the effect that the actions of this Congress have on the credit markets of this country? Where are they when we discuss these particular bills? No one seems concerned about what we are doing.

Mr. Chairman, I would say this: I believe that this Congress is headed for a real confrontation on the issue of credit assistance and Federal lending programs, and maybe it is time that we did, because we do have this much on the books right now and it is growing faster than spending. It is a real problem, and everybody knows it is a real problem. There are two ways to handle it. Those of us on this side generally have one opinion, and the Members on the other side have another opinion.

The CHAIRMAN. The time of the gentleman (Mr. BETHUNE) has expired.

(By unanimous consent, Mr. BETHUNE was allowed to proceed for 5 additional minutes.)

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. Mr. Chairman, I will ask the gentleman, at some point is the gentleman going to get to a discussion of the amendment having to

do with bankruptcy which the gentleman offered?

Mr. BETHUNE. Yes, I will be reaching that discussion by and by.

Mr. ST GERMAIN. That would be interesting because, as the gentleman said, we have greatly discussed the legislation on the floor, and it would be nice to discuss the legislation pending before us.

Mr. BETHUNE. Mr. Chairman, I know that the gentleman does not want to hear the kinds of things I am saying because it messes up the playhouse, but nevertheless it is important that we discuss this bill in the context of the problem we have in this country.

Certainly it would be nice to run these things through without ever having to total them up, but what I am trying to suggest here today is that when we add these bills up, we are encroaching on the credit market. As I said, I think we are headed for a real confrontation, and I think it is about time. I can see it coming, and it is going to be part of the 1984 Presidential election campaign, as it should be, because those Members over here, I am inclined to think for the most part, particularly those who prefer to call themselves liberals, are of the opinion that this Government can do a better job of allocating and pricing credit than the market can.

On the other hand, those of us over here for the most part happen to believe that the market is a more efficient allocator of credit and pricer of credit.

We are headed for a confrontation because on that side there is developing the idea of a reconstruction finance corporation or an industrial bank or some sort of national industrial recovery act. I read it in the papers that are put out. I think they ought to get into that, and we ought to bring it out and debate it. Those of us over here are resistent to that idea for the reasons that I have stated.

What we are doing here day after day in the Congress is passing one bill after another through the Congress without coming to grips with that problem. I think we have got the cart before the horse. I wish they would come on in with their idea of allocating credit and pricing credit, and let us get on with the real discussion we are going to have to deal with.

This bill is not going anywhere. We know that. It would never make it through the Senate, and if it did, the President would veto it. So this bill is dead right here as we discuss it. Why do we not move to the larger issue and have a debate on that? That is what would be the more important thing to do.

I think that the Roemer-Wylie substitute was a good effort. I think that the amendment that the gentleman offers focuses attention on the fact that there is an apparatus out there right now. It is not as if there was not anything out there in place trying to take care of these kinds of problems.

Forbearance is taking place out there. In fact, the chairman of the Federal Home Loan Bank Board, Richard Pratt, made the point that the ratio of forbearances is more favorable than the delinquencies that are there. He has made that point. So forbearance is taking place. There are a lot of things that take place out there in the private sector under the rules and regulations we have in place right now.

The gentleman's amendment calls attention to the fact that there is a legal remedy which is designed to absorb some of these shocks and work them out. So I think there are a good many reasons for adopting the gentleman's amendment.

Frankly, I think the better thing to do would be to scuttle this bill, send it back to the committee, and let us get on to the business of trying to structure the larger mechanism we are going to have to have in this country if we are going to make intelligent judgments here. We should not make judgments in a vacuum. We should not decide these bills one by one, because when we do that, we ignore the larger picture, and when we get down to add them all up, we have not the faintest idea what we have done to our national economy.

Mr. Chairman, I think we ought to discuss the problems in the proper order.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to my friend, the gentleman from Maryland.

Mr. MITCHELL. Mr. Chairman, I will be very brief.

I do not think that this is the forum in which that should be done. The gentleman makes some very interesting arguments, but it seems to me that we ought to develop a paper and have that submitted to the Joint Economics Committee for some consideration and let it start working its way through the process, rather than deal with it in the context of this bill. I am sincere about that.

Mr. BETHUNE. I know the gentleman is sincere, and I, frankly, have spent an inordinate amount of time in the last 3 years trying to get the attention of this Congress on this issue. I think it is coming now.

Mr. MITCHELL. But the gentleman's vehicle ought to be the Joint Economic Committee. It is a broad policy issue.

Mr. BETHUNE. But in the meantime the gentleman should understand that I think we are getting the cart before the horse. That is why I come down here and systematically fight against each one of these bills. I was one of the few who voted against the Ag bill last week.

Mr. MITCHELL. Mr. Chairman, if the gentleman will yield further, I would just say that he should move it expeditiously to the Joint Economic Committee. That is the gentleman's starting point.

Mr. LEVIN of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I want to make a few quick points. A chapter 13 procedure is available only to debtors with regular income. One can be unemployed and have regular income. If you are unemployed and have no regular income, you cannot go into a chapter 13 procedure.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, unemployment compensation, I submit, is considered income.

Mr. LEVIN of Michigan. Yes, but some people have exhausted their unemployment compensation. Tens of thousands of people have exhausted their unemployment compensation. They have no income at all, and under the amendment offered by the gentleman from Texas (Mr. BARTLETT) they would have to file for a proceeding for which they are ineligible. That is just a pure fact.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield? Would the gentleman prefer to yield now or at a later time?

Mr. LEVIN of Michigan. I will be glad to yield now to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, court cases have in fact held that unemployed persons are eligible for chapter 13 if they have regular income, which includes unemployment benefits, social security income, disability income, self-employment, or other types of regular income.

□ 1710

The bill that we have before us would make someone eligible for the new program if they simply had their income substantially reduced; so my question to the gentleman would be the other part to it, and that is if they do not qualify for chapter 13, then they are not harmed. They would have filed for something, had their file begun and then would come back and qualify for this program.

Mr. LEVIN of Michigan. So the gentleman would require that somebody who had no regular income, before they were eligible, to hire an attorney, because you cannot readily go through a chapter 13 procedure without finding an attorney. They would have to file with the court, after retaining counsel, and then be told by the court that you are ineligible for a chapter 13

procedure because you have no regular income.

Now, that is a bizarre conclusion for anybody to suggest. The bankruptcy procedure, whether it is chapter 13 or anything else, I say to the gentleman from Texas, is a bankruptcy procedure. It requires legal fees and it has the onus of bankruptcy proceedings. This is a bill that attempts to keep the onus off people who, through no fault of their own, are losing their homes. They should not have the onus of losing their homes and they should not have the onus of being labeled a bankrupt, regardless of the chapter that goes after their name.

This is a misguided amendment and I urge that we defeat it.

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words. I want to speak briefly in favor of the amendment.

Mr. Chairman, I submit that a chapter 13 is what is referred to as a wage earner's plan. Now, to be sure, it is not part of the bankruptcy law, but I would not perceive it as a bankruptcy proceeding, as the gentleman who just spoke would.

This amendment would provide what I call a holistic approach to the problem and would treat the mortgagor's total financial situation.

I have in front of me here an article from the Los Angeles Times which says, "Homeowners faced with foreclosure needn't panic."

The article mentions there are options and the first move is counseling.

In the same respect the first move under this wage earner's plan is counseling.

An application is filed. It is a one-page application. You do not have to hire an attorney. You do not have to go through legal fees or legal proceedings to get into the bankruptcy proceeding or into the wage earner's chapter 13 plan. After the application is filed, then the referee or the bankruptcy judge just summarily can refer it to a referee, who goes over the program with the people who are involved.

Now, it is a condition precedent, but it certainly is not any more bizarre, I may respectfully suggest, than all the conditions precedent which the HUD Secretary has to go through in order to determine if a person qualifies under this bill.

As I pointed out a little earlier, there are 65 different determinations that the HUD Secretary has to make.

I think it might be far better to have a trustee make the determination that there is no counseling available or that there is no other approach available to this person who is facing a delinquency.

So I think that the gentleman from Texas has offered an amendment which deserves consideration and I am glad to support it.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman.

Mr. BARTLETT. In addition to what the gentleman has so correctly stated, upon the filing, as the gentleman knows, of the one-page form, all debts are stayed, so that no harm is done if someone is not going to qualify for chapter 13, because all his debts, including his foreclosure proceedings, would be stayed.

I think the gentleman would concur that, in fact, what this does is try to use existing law to assist more people. If there were 1.2 million delinquencies last year, and this bill, H.R. 1983, would only help 76,000 of them or 60,000 of them, and this bill creates an incentive for banks and savings and loans in this country to foreclose instead of to forebear, there are going to be a lot more foreclosures.

So this amendment would use the existing laws to assist people in a more comprehensive way than H.R. 1983 would do without that.

Mr. WYLIE. Well, I think it deserves favorable consideration, because I think it could provide guidance for a possible workout plan and might, as the gentleman suggests, make the whole program, if it is ever going to pass, which I do not think it will, available to more people.

Mr. DURBIN. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. Yes; I am glad to yield.

Mr. DURBIN. Will the gentleman concede that the point made earlier by the gentleman from Michigan is correct, that if a person's unemployment compensation benefits have run out and he is receiving no social security assistance, that he could not qualify for chapter 13 and therefore could not qualify for any assistance whatsoever under this act?

Mr. WYLIE. Then this condition precedent would not apply in that case; but if they do have income, and there is a possibility for working out a plan, this might be, as I say, a recommended alternative.

Mr. DURBIN. But they would have to file the plan, even though they would be ineligible under chapter 13?

Mr. WYLIE. Pardon me. I did not get that.

Mr. DURBIN. Would they have to file the plan, even though they are prima facie ineligible under chapter 13?

Mr. WYLIE. Well, it would be evident immediately from their application that they have no income. I would assume that would be the end of it.

Mr. DURBIN. They still have to file, though.

Mr. WYLIE. Well, they would not necessarily. I would not think they have to file, no.

Mr. DURBIN. But that is what the amendment says.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I am happy to yield.

Mr. BARTLETT. Further, if they had no income at all, and the gentleman would agree they are going to need more help than just help on their mortgage payments, because they have other payments to make of which the trustees of chapter 13 could assist them far more than this one assistance could.

Mr. WYLIE. Well, I think they could develop some kind of financial profile which would be beneficial.

I support the gentleman's amendment.

Mr. LOWERY of California. Mr. Chairman, I rise in support of the amendment offered by the gentlemen from Texas (Mr. BARTLETT and Mr. HALL) and the gentleman from Connecticut (Mr. MCKINNEY).

This amendment is quite simple. It would require that a homeowner seek the existing relief provided by chapter 13 before qualifying for Government assistance under H.R. 1983. This approach provides several practical advantages, which I would like to point out to my colleagues.

First of all, the legislation as currently written lacks incentives for the homeowner and lender to avoid a default or foreclosure situation. In fact, this bill may actively encourage these problems. Testimony heard in subcommittee showed very plainly that currently, financial institutions are indeed exercising a great deal of forebearance.

A chapter 13 or wage earners' proceeding provides relief to the consumers for all of their debts—auto loans and other consumer debts, as well as mortgage payments—and this situation is obviously in the long term best interest of the individual.

Third, by requiring a chapter 13 proceeding prior to receiving assistance under H.R. 1983, we will help expedite the administration of the program. The reason for this is that many of the determinations required by the Secretary of HUD in the provisions of this bill will have already been made during the chapter 13 proceeding. For example, under a chapter 13 proceeding, the employability of the individual is taken into consideration, thus relieving the Secretary from making a determination of reasonable prospects of repayment.

Another advantage of the adoption of this amendment is that those individuals who are able to reschedule their debts under chapter 13 can go ahead and do so, freeing the $760 million in authorized funds to be targeted to those who cannot keep their homes by rescheduling.

The last advantage which I would like to mention—but one of the most important—is that, in actual practice

under a chapter 13 proceeding, the amount of equity the homeowner has in his home is taken into account. This is something that is not addressed in H.R. 1983, and provides some insurance that HUD payments and the original mortgage will not exceed the value of the home.

Mr. Chairman, once again I urge the support of my colleagues for this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. BARTLETT) to the amendment offered by the gentleman from Texas (Mr. GONZALEZ) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. WYLIE).

The question was taken; and on a division (demanded by Mr. BARTLETT) there were—ayes 34, noes 38.

RECORDED VOTE

Mr. BARTLETT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 154, noes 254, not voting 24, as follows:

[Roll No. 104]

□ 1730

Mr. RITTER changed his vote from "aye" to "no."

Mr. FORSYTHE changed his vote from "no" to "aye."

So the amendment to the amendment offered as a substitute for the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. BETHUNE TO THE AMENDMENT OFFERED BY MR. GONZALEZ AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WYLIE

Mr. BETHUNE. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. BETHUNE to the amendment offered by Mr. GONZALEZ as a substitute for the amendment in the nature of a substitute offered by Mr. WYLIE: Page 7, after line 7, insert the following new subsection:

"(d) Notwithstanding any other provision of this section, the Secretary may not institute or reinstitute the program of assistance established in this title in any district unless, following the occurence or reoccurrence of the delinquency rate condition described in subsection (a)(2), each Federal supervisory agency with respect to financial institutions subject to this jurisdiction, and the Secretary with respect to other approved mortgagees, determine that such program will not reduce the degree of forbearance, or result in any increase in the number or rate of foreclosures, by such financial institutions and mortgagees with respect to mortgages on residential property in such district.

Mr. BETHUNE. Mr. Chairman, we can always sense when people are ready to bring a matter to its conclusion and I sense that that time is near. Accordingly I will not belabor this point. But I have a nifty little amendment here which I think will do a lot of good for this particular bill.

□ 1740

Mr. Chairman, the debate so far has brought out that this bill is intended to reduce the number of foreclosures and to increase the degree of forbearance out there in the marketplace to help the people who are having problems.

That is not just coming out in the debate, that is a stated purpose of the bill. And I will just read the part of the bill which declares:

It is the purpose of this title to establish a program that will preserve and promote forbearance with respect to mortgages and through emergency mortgage relief payments prevent widespread mortgage foreclosures and distress sales of homes resulting from the temporary loss of employment and income.

So, it has been developed in the debate. It is stated as an express pur-

pose of this bill that that is our objective.

All this amendment does that I have is to say that the Secretary may not institute or reinstitute the program unless he finds that it will not reduce the degree of forbearance or increase the number or rates of foreclosures.

In other words, we are asking the people who will be administering the program to make the finding that we have stated to be our express purpose before they continue on or before they allow the trigger to trigger another new round in the program.

Now, I talked to some extent here a little earlier about the lending programs. And I was serious in my concern that we have a tendency here to throw money and to throw credit assistance at particular problems. One of the byproducts of that is that the programs become sloppy. We all know that. You can look at the student assistance program, for instance. In one college in my home State, we have a 50-percent default note in the student assistance program. That does not mean that we should get rid of the program, but it means we should try to do something to hold down those kinds of defaults and delinquencies.

So, you have to build in some oversight when you do things through Government as opposed to doing it in the marketplace. You have to build in some sort of pressure, some control point; otherwise, the program will inevitably become sloppy and you will begin to drift away from your express purpose.

So the amendment that I offer is not complicated at all. It just simply says what it says and that is that if the Secretary finds that we are not reaching our stated purpose that he shall not then implement or carry out the program.

I think it is plain. I think Members can vote it up or down. Frankly, I think we need that type of control in the bill.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I certainly appreciate the concern of the gentleman from Arkansas and I want to assure the Members of the House that indeed the committee had the same concern. This was considered very seriously in the subcommittee and in the full committee and for that reason we do include in the legislation the following:

> Such mortgagee has extended to the mortgagor involved the same or greater opportunities for voluntary forbearance as such mortgagee extended to similarly situated mortgagors within the 4-month period ending March 31, 1983.

Very frankly, that is a much clearer criterion than that presented in the amendment, because unfortunately the Bethune amendment would ask that the Secretary in essence be a Solomon and have a crystal ball and mindreading device, whereas in the Gonzalez substitute we say, the same forbearance criteria that has been exercised for the 4-month period prior to March 31, 1983.

So I agree with the gentleman's desire, but I feel the bill as written indeed addresses that which concerns him much more directly than the amendment presented.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

And is it not the same Secretary who is addressed in the amendment of the gentleman from Arkansas, the Secretary who is in opposition to this bill?

Mr. ST GERMAIN. The gentleman makes a pretty good point.

Mr. BETHUNE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Arkansas.

Mr. BETHUNE. I thank the gentleman for yielding.

Of course, Secretaries come and go and some hope that this one will go and another will come.

Mr. ST GERMAIN. Is the gentleman among them?

Mr. BETHUNE. No.

The point being that this like so many bills we write here will have a life of its own and will go on into perpetuity.

It seems to me that what I am asking to be done here would be much larger in scope than what the gentleman pointed out that is already in the bill. That would work on a case-by-case basis surely, but it seems to me that we should ask the Secretary, since we really do not know how this program is going to work, to make the kind of findings that I am asking for and they are measurable events.

Mr. ST GERMAIN. Mr. Chairman, I am constrained to regain my time and say to the gentleman, I understand what the gentleman is trying to do. I, however, feel constrained to oppose the amendment because you are asking the Secretary to do something that with all the intelligence and the wherewithal of Secretary Pierce, he just would not be able to do it under these circumstances.

The bill protects us from that evil which the gentleman is concerned about. For that reason, I urge defeat of the amendment so we can proceed with the business before us and vote.

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I yield to the gentleman from Arkansas (Mr. BETHUNE).

Mr. BETHUNE. I thank the gentleman for yielding.

Mr. Chairman, this is not a finding that would be made just by the Secretary of HUD, but by the other officials who would head the other agencies that might be involved, the Federal Home Loan Bank Board, FDIC, Federal Reserve and others.

These findings can be made. As a matter of fact, in the testimony before the committee, Chairman Pratt of the Federal Home Loan Bank testified that lenders are forbearing and he said that was supported by data showing that the ratio of actual foreclosures by FSLIC insured associations in 1981 and 1982 was significantly lower than the ratio of loans 60 days or more delinquent.

So these measurements can be made. They are good measurements that should be made, because if you do not make these kinds of measurements in a larger sense, you are going to leave it to the plenipotentiaries to dispense this on a case-by-case basis. And I assure my colleagues this program will result in the same kind of inefficiencies, waste, and fraud that this Congress has become famous for.

I would urge Members to seriously consider voting "aye" on this amendment. If you want to put some oversight into this bill and if you want to have some backup, some assurance, that at some point we can check our work, because this is a rather expensive proposition and it comes at a time when we are passing other bailout legislation, and I think we ought to stop and ask ourselves whether or not we are being careful and prudent with the taxpayers money.

Mr. WYLIE. Mr. Chairman, I think the gentleman has a good amendment and I support it.

The gentleman from Rhode Island (Mr. ST GERMAIN) suggested that we were asking the Secretary of HUD to have the wisdom of Solomon in making this determination, but may I respectfully suggest we have imbued him with the wisdom of Solomon already in ths bill. I have repeated it before, but there are about 65, by my count, determinations that the Secretary of HUD has to make before anybody can qualify. And I think this just kind of pins it down a little more. And I think the gentleman from Arkansas has a good amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas (Mr. BETHUNE) to the amendment offered by the gentleman from Texas (Mr. GONZALEZ) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. WYLIE).

The question was taken, and on a division (demanded by Mr. BETHUNE) there were—ayes 29, noes 90.

RECORDED VOTE

Mr. BETHUNE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 175, noes 234, not voting 23, as follows:

[Roll No. 105]

□ 1800

The Clerk announced the following pairs:

On this vote:

Mr. Marlenee for, with Mr. Hefner against.

Mr. Michel for, with Mr. Dixon against.

Mr. Robert F. Smith for, with Mr. Ford of Tennessee against.

Mr. SMITH of Florida changed his vote from "aye" to "no."

Mr. RALPH M. HALL changed his vote from "no" to "aye."

So the amendment to the amendment offered as a substitute for the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

● Mr. FORD of Tennessee. Mr. Chairman, I join my colleagues today in support of H.R. 1983, the Emergency Housing Assistance Act. This measure fulfills a great need within our country today—the need to protect those Americans who are in danger of losing their homes because of the current economic recession.

Skyrocketing inflation and increasing interest rates have prevented many families from purchasing homes in recent years. Those who did manage, those who did overcome the economic barriers to purchasing a home, now face the possibility of losing all for which they have worked. Trying to meet mortgage payments in this time of economic recession has become an impossibility for many homeowners who have lost their jobs.

Unemployment has made keeping these homes a luxury for many. Owning a home should not be a luxury in our great country, but the recession and high unemployment rate have made it so for many people. In my own district of Memphis, the number of home foreclosures has increased steadily over the past 3 years, from 961 in 1980 to 1,550 in 1982.

The economic framework which allowed great numbers of Americans to own a home was a sign of strength and stability, not only for the homeowner personally, but for our country as a whole. We must maintain that stability. We cannot let this period of economic recession take away what has taken so long to construct. If the American dream of owning a home is to remain truly attainable, additional assistance must be provided during these difficult times.

H.R. 1983 seeks to aid those who are in danger of losing their homes because of a substantial loss of income, due either to unemployment or reduced employment. The 76,000 homeowners facing foreclosure could be helped. The bill would also provide greatly needed assistance for shelters and services for the homeless.

There is no question that something must be done. I believe this measure is the answer. It assists those who are in greatest need due to the recession. There are enough safeguards within H.R. 1983 to protect against abuse by both the applicant and the lending institutions. Before assistance is given, it must be determined that homeowners will be able to resume mortgage payments within 3 years and that they can be expected to repay the mortgage in full.

I urge my colleagues to support this measure. Economic recovery will otherwise be a hollow victory for the many who are on the verge of losing their homes and for those many more who will be threatened in the near future.●

● Mr. WEISS. Mr. Chairman, I support H.R. 1983, the Emergency Housing Assistance Act of 1983. This initiative provides badly needed assistance

to homeowners facing foreclosure, however I am especially supportive of the bill because it provides $100 million for shelter for the many thousands of Americans who are homeless.

We, as a nation, are facing a crisis. The most conservative estimates of the number of homeless in our country range from 225,000 to 1 million people, although those working directly with the homeless put the figure at closer to 2 million. This is a national disgrace. The ranks of the homeless have not been so swelled since the depression.

Who are these people? In years past they were the invisible among us; hidden from our view in the skid rows of our cities, and yet invisible too because we could not conceive of an existence so deviant from our own. They were there, but we could not see them. Today, no such great schism exists between "them" and "us." Today's homeless are a disenfranchised cross section of society torn apart from the mainstream by forces over which they have little control.

Current economic conditions, particularly a staggering level of unemployment which today stands at an intolerable 10.3 percent, have caused thousands of Americans not unlike ourselves to seek shelter in cars, under bridges and in public parks. These involuntary nomads are the pitiable victims of the Reagan administration's callous, shortsighted and unfair economic policies.

Furthermore, those who are employed at low-income jobs, or are able to pay for housing from entitlement benefits, face a critical shortage in low-cost housing and publicly subsidized housing. Experts estimate that renovation of low-income housing into condominiums and townhouses for the middle and upper classes displaces 2½ million Americans per year. Too many of these people cannot find alternative, affordable housing.

As well as those displaced by economic conditions, there are many deinstitutionalized former psychiatric patients among the homeless. While the rolls of the Nation's mental hospitals have decreased by over 500,000 in the last 25 years, there has been no commensurate rise in housing and community support services for these individuals.

In combination, the current causes of homelessness create a population of homeless which is more often under 40, includes more women, more children, and more minority persons than ever before.

The magnitude of the problem of homelessness in America demands a response on the part of the Federal Government. That response is forthcoming, at least in part, in the emergency shelter assistance provisions of the Emergency Housing Assistance Act. H.R. 1983 provides $100 million in fiscal year 1984 to assist cities, nonprofit agencies, and in some instances State governments, to meet the emergency housing needs of the homeless. The funds would be used primarily to rehabilitate existing buildings to provide decent and sanitary shelter for the homeless, to maintain existing shelters, and to defray the cost of utilities.

H.R. 1983 deserves support because it targets assistance for the homeless to those communities where the greatest need exists. Yet provisions are included which stipulate that funds allocated under the act cannot be used to supplant existing, ongoing emergency shelter assistance. Consequently, those communities already attempting to meet the needs of the homeless are not penalized for their effort. Also, special attention must be paid in the allocation of grants to the numbers of homeless children and families in a community, a clear and needed recognition of the changing nature of the homeless population.

Ultimately, we must think in terms of reenfranchising the homeless—of weaving them back into the fabric of our society. We must think of ways to preserve and expand the existing stock of low-cost housing; we must bolster our support at the community level of the chronically mentally ill; and we must develop job training programs which provide the skills necessary to function effectively in an increasingly technologically oriented society. However, the desperate men. women, and children in our Nation whose lives are threatened daily by their lack of shelter cannot wait for long term solutions. We must act now on their behalf. I urge my colleagues to join with me in supporting H.R. 1983, a modest targeted, yet urgently needed initiative which may help spare the lives of thousands of homeless individuals.

Mr. Chairman, I also want to express my strong support of the amendment offered by my distinguished colleague from New York (Mr. SCHUMER), which has been incorporated into the bill and compliment him for his initiative.

In this time of recession and economic hardship, thousands of unemployed Americans are unable to make payments on their homes through no fault of their own. It is entirely appropriate, therefore, for the Congress to offer them assistance for a limited period until they get back on their feet. I congratulate my colleague from Texas, Mr. GONZALEZ, and the members of his subcommittee for bringing this legislation before the House for consideration.

However, this important bill originally offered help only to homeowners suffering hardship from the recession. Nearly one-third of the people of our country rent their homes, and they disproportionately represent the lower income portion of our population least prepared financially to cope with the problems of unemployment. This is certainly true of many of my constituents living both in Manhattan and the Bronx in New York City. Many of these people are having difficulty meeting their monthly rental payments because of income lost through unemployment or reduced employment and are in danger of being evicted from their apartments. It is no less traumatic for a family to be thrown out on the street for failing to pay rent than for a family to lose its house for failing to make mortgage payments. The consequences seem equally disastrous to me, and both renters and homeowners seem equally deserving of help from the Congress.

Mr. SCHUMER's amendment authorizes $100 million for short-term assistance for renters who cannot meet rental payments because of unemployment or reduced employment. Assistance would be triggered or shut off in the same way as homeownership assistance under the bill. Rental aid would be administered by cities that apply for HUD grants and could be provided for a maximum of 18 months. Tenants would have to contribute 38 percent of their net income toward rent, assistance would be available only to individuals whose preemployment income was at or below the median level, and rent could not exceed the area median.

Mr. Chairman, this is a workable approach to a difficult and pressing problem. Congress should not discriminate in offering help to deserving citizens based on whether they rent or own their homes. I strongly urge the House to adopt this amendment as part of H.R. 1983.●

● Mr. FRENZEL. Mr. Chairman, once again, it is presented without sufficient study or information. Once again we are being asked to vote on a new and costly spending program. Regretably, but inevitably, I must oppose it.

Our passion for showering the taxpayers' money on every problem we can unearth seems to be growing. The emergency mortgage foreclosure bill is yet another example of a bad habit that is now an addiction.

This bill is clearly a resurrection of the political games of the 1930's and the mid-1960's. Last time Congress created a temporary mortgage assistance bill was in 1933. This "temporary" program lasted 18 years and employed over 20,000 people. The Government ended up foreclosing on over 200,000 homes. If it did not work then, why should we expect it to work now?

The intent of H.R. 1983 is to avoid widespread foreclosures by providing temporary assistance to individuals who are having difficulty making monthly payments. Yet, once the Federal Government shows it is willing to

take over delinquent mortgages, lenders will be tempted to pursue foreclosures in order to unload some of their problem loans.

As a result, this legislation is likely to reduce the incentive for lenders to exercise forbearance on delinquent home mortgages. Whenever the Government pays a bounty for an action, it gets plenty of it. This bill provides great incentive for both borrowers and lenders to have plenty of foreclosures. There will be lots of them.

In its current form, the eligibility requirements in H.R. 1983 are vague. Although less than half of those eligible will actually receive assistance, no assets test has been formulated. There is no way to guarantee that lower and moderate homeowners will be given priority. Obviously, the committee did not care enough about the problem to pass a bill that might work. If all it wanted was a symbol of sensitivity about a problem, the committee picked the best unworkable symbol in sight.

Administrating this program will be, at best, chaotic and slow. HUD, by its own admission, does not have the expertise or the experience to take on the role of mortgage bankers, therefore implementing the program will require a horde of new employees. The great bureaucratic sprawl will continue.

Despite its number, H.R. 1983 could not be more untimely. Even the most pessimistic forecasters must admit that the economy is showing signs of recovery. Nothing will jeopardize prospects for a recovery more than a resurgence of wasteful, ineffective symbols.

I see no redeeming value in this bill. We do not need it; we can not afford it; it will probably end up hurting those it was intended to help.●

● Mr. BONIOR of Michigan. Mr. Chairman, I wish to add my voice to those in support of H.R. 1983, the Emergency Housing Assistance Act of 1983. During these times of high unemployment and loss of income, relief must be forthcoming to those families facing mortgage foreclosure.

In Michigan, the foreclosure rate has been climbing over the last 4 years. In 1982, the Michigan foreclosure rate was up almost 300 percent over its level in the second half of 1979. It now exceeds the national average. In fact, the foreclosure rate for the HUD Michigan/Indiana district was the highest in the Nation, and Michigan's foreclosure rate was higher still.

The appeal to pass H.R. 1983 lies not only in circumventing escalating foreclosures, but in the savings that would accrue to the Federal Government through its passage. Many homes facing foreclosure are financed through Federal loan mortgage loan guarantees. In saving homes with a Federal mortgage guarantee, the Federal Government is also saved from meeting its guarantee obligations.

Here is legislation that is undeniably in line with the administration's efforts to balance the budget and reduce the Federal deficit. Yet, here, also is a bill that extends new hope to families whose world is blighted by interminable economic hardships.

I urge that we work toward the expedient passage of H.R. 1983.●

● Mr. WON PAT. Mr. Chairman, I rise to congratulate Congressman ST GERMAIN and his colleagues on the Banking Committee for the excellent work they did in drafting H.R. 1983, the Emergency Housing Assistance Act. This is a fine bill and I am pleased to support it in every way I can.

There is no doubt that this bill is needed now to help the tens of thousands of Americans who are in dire danger of losing their homes. The Nation's economy has been in for some tough times recently and the impact of the unemployed workers has been nothing less than tragic.

This Congress must act now to help these people and I urge my colleagues here today to vote for H.R. 1983. I know my own constituents in Guam and Americans residing in other territories place high hopes on the success of this bill. In Guam our unemployment rate is now 14 percent and it is rising. We place a very high cultural value on our land and our own homes and the thought of losing either of these is terrible indeed for our people.

Perhaps the real tragedy is that those who are faced with bankruptcy are not deadbeats. These are men and women who have gladly worked in the past and want to do so again. Their prayers for assistance can be met by this bill—at least in part. And I hope that we will not let them down by defeating H.R. 1983 in the House.

H.R. 1983 is a piece of legislation which has come at the right time in our history. Years from now, I believe that Americans will remember the time when this Congress came to the rescue and said with a loud voice that we will not forget those who are in dire need of help from the Federal Government.●

● Mr. FORD of Michigan. Mr. Chairman, I rise in strong support of H.R. 1983, the Emergency Housing Assistance Act of 1983. I want to commend my colleagues, Subcommittee Chairman HENRY GONZALEZ and Chairman FERNAND ST GERMAIN, for promptly moving this crucial legislation through committee to the floor of the House.

H.R. 1983 would establish a $760 million homeowners emergency relief fund in the Department of Housing and Urban Development. This loan fund would assist up to 100,000 American homeowners who have suffered a substantial loss of income because of unemployment, and are either 90 days behind in their payments or are facing foreclosure proceedings by a lending institution. H.R. 1983 provides important safeguards to insure that the financial interests of the Federal Government are protected. The Secretary of HUD can examine the prior work record of an applicant to determine that the applicant can reasonably be expected to resume payments within 3 years. In addition, a lien on the applicant's home will be held by HUD to protect the Government's investment.

This legislation also contains a crucial protection for unemployed homeowners, particularly the unemployed workers in the automotive and related industries within the 15th District of Michigan. This "rebuttable presumption" contained in H.R. 1983 insures that if an applicant meets the criteria set forth in the legislation and agrees to the provisions, he or she will then be eligible for assistance. This will prevent the Secretary of HUD from determining that such an applicant is a "bad risk" because the applicant lives in an area of severe economic decline which may not provide additional jobs in the foreseeable future. Without this protection, the Secretary of HUD could determine that the auto or steel industry will continue its depression for some months and make unemployed workers from such industries ineligible for this assistance.

The Emergency Housing Assistance Act of 1983 is of particular importance to Michigan for other reasons as well. Unemployment in my State continues to exceed 15 percent of the work force. During the last quarter of 1982, over 3,900 Michigan families were involved in foreclosure proceedings. An additional 30,000 families were unable to meet their scheduled mortgage payments during the same period.

H.R. 1983 also authorizes $100 million to assist cities, nonprofit organizations and States to meet the emergency housing needs of the homeless. The severe recession in Michigan and other States has resulted in a substantial increase in the number of people who have no place to call home. As the demand for such shelters has increased, local funds have been exhausted.

The need for Federal assistance is urgent. The private sector is unable to meet the demands for assistance for either the homeless or unemployed homeowners. The 1982 annual report of the Society of St. Vincent de Paul, a major Detroit-area charity, exemplifies the demands which the current recession has placed on nonprofit groups. The need to provide food and shelter for the homeless has utilized an increasing portion of their contributions. In 1982, the society was unable to assist several hundred people who requested assistance to help maintain their homes because the amount owed was beyond what

this charity could handle as a private organization. This group is generally able to provide only 1 month's mortgage payment.

The Emergency Housing Assistance Act of 1983 is an integral mechanism to reduce the hardships placed on the unemployed by the current recession. I urge that the House pass H.R. 1983.●

● Mr. FRENZEL. Mr. Chairman I support the substitute offered by Congressman WYLIE which is now offered by the gentleman from Louisiana (Mr. ROEMER). The Wylie substitute does indeed make a noble effort in encouraging forbearance on delinquent mortgages, and I commend the gentleman for his proposal.

Financial lenders do not want to foreclose on bad mortgages, they do not want to go into the real estate business, and most importantly, they do not want to force families out of their homes.

Instead, it is the natural tendency for lenders to exercise forbearance, and less than half of those mortgages that undergo forclosure procedures are actually foreclosed. The Wylie substitute will facilitate forbearance by relieving financial institutions of some of the regulatory pressures that can lead to foreclosure.

Another advantage of the Wylie substitute is that it will encourage borrowers and lenders to work out a realistic repayment plan, without the unnecessary burden of Government intervention. The bill in its current form will throw the few who actually do receive Government assistance even further into debt, and eventually these families will be forced to pay off the backlog.

Finally, I support the substitute because it provides the fairest approach available today for all mortgagors having difficulty making their monthly payments. It does this without creating another bureaucratic pigeon hole, without encouraging lenders to foreclose, and best of all, without costing the taxpayer a single dollar.●

Mr. WYLIE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time to explain what we intend to do here as we approach final passage. The vote now occurs on the Gonzalez substitute to the Wylie substitute, and we do not intend to ask for a rollcall vote on the substitute. Then there will be a motion to recommit which I will offer, and I say, Mr. Chairman, that we do not intend to have a vote on that. We will have a vote on final passage.

But I would like to suggest a no vote on final passage coming from this side of the aisle. The amendments that were accepted or are likely to be accepted are primarily cosmetic and really do not go to the basic structure of the program, as I see it.

□ 1810

Only the assets test which adds some complexity to the bill really makes a difference to the original bill. I think it is still very complicated and I would like to read just one section to point out how very complicated this piece of legislation is. It is actually subsection (a) of section 106, which says:

"SEC. 106. (a) During any period in which the program established in this title is in effect in any district, each financial institution or other mortgagee shall, not less than 30 days prior to instituting any foreclosure proceeding with respect to any property described in paragraphs (1), (3), and (6) of section 105(a), assist the mortgagor involved in the preparation and submission to the Secretary of an application for assistance under this title.

Now, does that apply to the mortgagor in the district where the mortgage was taken?

In the case of a lot of big California S&L's, they sell their mortgages to the New York savings banks. Are the New York savings banks obligated to send out an application form to the person to whom the money was loaned in California? Just what does that mean?

I suggest, does that language apply in the district of a mortgage or does it apply in the district of the mortgagee or does it apply in both? If it is not triggered, this program on a national basis, is it triggered in a district?

That raises another serious question. What effect does it have on the secondary market as far as mortgages are concerned?

There are a lot of complicated questions like that that remain unanswered, I respectfully submit, Mr. Chairman.

For these reasons, I think we should vote no on final passage.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. GONZALEZ) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. WYLIE).

The amendment offered as a substitute for the amendment in the nature of a substitute was agreed to.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. WYLIE) as amended.

The amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. AUCOIN, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill (H.R. 1983) to amend certain housing and community development laws to provide emergency mortgage assistance to homeowners and emergency shelter for the homeless, pursuant to House Resolution 142, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. WYLIE

Mr. WYLIE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. WYLIE. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. WYLIE moves to recommit the bill, H.R. 1983, to the Committee on Banking, Finance and Urban Affairs.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WYLIE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 216, nays 196, not voting 20, as follows:

[Roll No. 106]

NOT VOTING—20

Dannemeyer	Hefner	McDade
Dickinson	Heftel	Michel
Dixon	LaFalce	Owens
Dwyer	Lantos	Smith, Robert
Early	Leath	Spratt
Edgar	Marlenee	Wilson
Ford (TN)	Martinez	

□ 1830

The Clerk announced the following pairs:

On this vote:

Mr. Dwyer for, with Mr. Dannemeyer against.

Mr. Dixon for, with Mr. Michel against.

Mr. Hefner for, with Mr. Marlenee against.

Mr. Ford of Tennessee for, with Mr. Robert F. Smith against.

Mr. Lantos for, with Mr. Dickinson against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 216. An act to amend title 18, United States Code, to combat, deter, and punish individuals who tamper with household products with intent to cause personal injury, death, or other harm, and for other purposes.

PERSONAL EXPLANATION

Mr. DWYER of New Jersey. Mr. Speaker, I voted in the affirmative on the last bill, H.R. 1983. I did put in my card and register an affirmative vote, but apparently it did not register on the machine. I just looked at the printout on the computer and I find I was listed as not voting.

TESTIMONY OF U.S. REPRESENTATIVE J. J. "JAKE" PICKLE BEFORE THE SUBCOMMITTEE ON ACCOUNTS, COMMITTEE ON HOUSE ADMINISTRATION, U.S. HOUSE OF REPRESENTATIVES, APRIL 15, 1983

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ANNUNZIO. Mr. Speaker, Members of this Chamber were recently advised of House Administration Committee Order No. 35, chief purpose of which is helping Members to update their offices with newly approved technologies that will improve their performance and productivity.

At hearings before the Accounts Subcommittee, one of our pioneering colleagues submitted a statement testifying to his trials and successful adaptation of this technology in his Washington and district offices.

We are grateful to the gentleman from Texas (Mr. PICKLE) for his contribution to our hearings. Because many of us can benefit from his experience, I insert his statement in the RECORD at this point:

TESTIMONY OF U.S. REPRESENTATIVE J. J. "JAKE" PICKLE BEFORE THE SUBCOMMITTEE ON ACCOUNTS, COMMITTEE ON HOUSE ADMINISTRATION, U.S. HOUSE OF REPRESENTATIVES, APRIL 15, 1983

Mr. Chairman and members of the committee: I appreciate the invitation to tell you of my experiences in automating my office and the reasons behind my decision to do so.

I began considering ways to automate our office operations in 1972. At that time, there were very few vendors capable of meeting the needs of a Congressional office, and none that could offer an in-house system for information retrieval that would meet the needs of our constituents.

No significant progress toward developing integrated hardware systems suitable for the House of Representatives occurred until this Committee established House Information Systems. At the same time the Library of Congress was developing the Scorpio information system to assist Members in providing necessary information to their constituency. For those of you with historical interest, much of this background is covered in the article "Computers for Congress" published in the March 1983 CRS Review. It was the establishment of House Information Systems which brought the House of Representatives into the information age.

Since the early 1970's the legislative branch under the direction of House Administration has worked toward bringing information technology to our offices in many different ways.

What I have been looking for, these past 11 years, is a system that would provide access to the various available data bases, adequate file storage, and word processing capability . . . in a manner allowing multiple users and simultaneous performance of tasks. This has been a long search.

In 1979 we pioneered the use of the IBM Office System Six word processing and filing system. We found, however, that the

correspondence demands placed on the office by the constituents of the 10th Congressional District of Texas were more than that equipment could properly handle. It was at this point that we began what became a three-year research project that culminated in our recent decision to select the Digital Equipment Corporation's PDP 11/24 computer, and the Correspondence Management System (CMS) software written by House Information Systems. The DEC resource personnel, the professionals from HIS, and Robert Chartrand and John Rosenthal with the Library of Congress have been most helpful in assisting my staff in developing a fully integrated Congressional Office Information Network (COIN). Their professional expertise has been essential and most appreciated throughout this venture.

At this point, I would like to discuss briefly some of our thinking prior to entering into this project. Before making this investment in both time and money we weighed a number of factors. These covered some variables which were under our control and others which were not.

The first external factor was that of constituent correspondence. From an analysis of the mail flow records of my office it became clear that we have experienced in recent years a steady increase in written correspondence from citizens of the 10th District. While this increase covers all categories of correspondence, it is particularly evident in the area of mass mailings. More traditional record keeping and letter writing systems were steadily bogging down under the strain of sheer numbers in this area. Therefore, it was necessary to find some means of ordering an otherwise chaotic stream of mail.

Secondly, with the continued increase in rapid dissemination by the news media of information about Congress, and with the inauguration of C-Span, greater pressure has been brought upon my staff to be immediately familiar with the latest developments in all aspects of the federal government. House Information Systems and the Library of Congress have become outstanding resources in meeting this need for rapid, current and accurate information. However, before it would be possible to provide constituents with the full benefits of these services an investment in new office equipment would be necessary.

In short, there has been constant pressure in recent years for more rapid dissemination of more technical information on a constantly increasing scale.

Faced with these external pressures which demanded attention, we looked for means available to my office to meet this need. Here, the most severely limiting factor to increased staff productivity was, and continues to be, space. Since this is a problem faced by all Members, and since there is no additional office space available to the Congress, we did not feel that this problem was one that could be eased in the near future. Furthermore, we recognized that in addition to not having room for them, additional staff would not necessarily improve the quality of information provided by our office. While it would prove a welcome relief to those heavily burdened with some clerical functions it would at the same time increase the cost and burden of personnel management. So for these reasons, new staff would not really provide the answer to our problem.

Our best alternative, we thought, was to increase the efficiency of the present staff. The earlier investment in the IBM System Six had proven a partial success in this respect. While the IBM equipment has and continues to perform up to all expectations (indeed its printer capabilities are unmatched), it is not capable of being expanded to meet our continually growing volume of mail. However, its use had begun the process of office automation. It had also illustrated some of the limitations and problems which would be encountered in this endeavor. Based on our experience with it we developed a list of capabilities which any new equipment would have to meet. After an extensive search of available computer hardware and software we determined that the CMS software being developed by HIS would best meet our needs, and that the Digital hardware in this system would be most likely to remain current in this area of rapidly changing technology.

This system permits all staff members to be given access to the Member Information Network and the Library of Congress SCORPIO databases. Now, it is reasonable for each staff member to become involved in researching and gathering information with which to respond to constituent inquiries. At the same time all staff have a word processing terminal at their desks, which greatly simplifies answering correspondence, as well as the CMS file system for easy retrieval of constituent correspondence history. This increases dramatically the flexibility of our staff. Instead of being tied to the typewriter, each staff now has the capacity to function in a much broader way. While each person has areas of primary responsibility and expertise, in times of need all members of my staff can devote attention to any specific area. This has allowed for a more useful pattern of cross-training and personnel development, and will in the long run aid in staff retention and recruitment with obvious benefits to the constituents of the 10th District. In short, the DEC system has enabled us to spend less time on routine clerical tasks and more time on our primary function which is legislation.

Clearly, this system is evolving, and as the first member office to contract for this equipment I have entered into this enterprise recognizing that my office is to a certain extent charting unknown territory. We are currently in the process of "debugging" the system and trying to interface with the pre-existing IBM System Six printer. In addition, the staff is still learning how to take full advantage of this new equipment and how to integrate it into the way business is conducted within the office.

Once the equipment is successfully in operation here, I hope to be able to acquire the equipment necessary to allow my Austin office to be linked to the same information network. This will allow my District staff to better serve constituents that visit them and need legislative information. In addition, it will, in the long run, allow me to more efficiently distribute my staff and thereby possibly alleviate some of the overcrowding I have previously mentioned.

While the acquisition of this system has proven beneficial to staff productivity, it has not been without cost, costs over and above those associated with staff retraining and office restructuring. This project has required a substantial financial commitment. In the first year it has required an investment of approximately $36,000 for the Washington office alone. In anticipation of this expense it was necessary to cut other office expenses substantially, and to implement stringent cost controls over such things as: use of supplies, joining of organizations, travel, subscriptions, telegraph and telephones. It is true that for the two years prior to making this purchase no significant office equipment was acquired, and that some portion of this expense would have been required under any circumstances. Nonetheless, this is not a venture to be entered into lightly. Given present budget limitations its cost could well limit its availability among the Congress.

The equipment is modern and timely and allows for a more efficient office operation. I believe this is the type of technology the Congress must move to in order to meet the ever growing demands on its Members. But, to move in this direction, you must have the full commitment of the office, by both the Member and the entire staff. Failure to understand in advance the capacities and limitations of office automation systems can only lead to disappointment and frustration. This equipment is not a gadget, plaything, or a toy. It is a tool. To take full advantage of it requires a serious commitment of both staff time and financial resources.

In summation let me say that to date I have been substantially satisfied by the performance of this office automation system. It has always been my hope to have a system which allowed for rapid response to all forms of communication from the residents of the 10th District and I have every confidence that this new enterprise is a major step toward achieving that aim.

WITHDRAW AMERICAN TROOPS FROM LEBANON

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, I commend Secretary of State Shultz for obtaining an agreement in principle between Israel and Lebanon for the withdrawal of Israeli troops. That is a significant accomplishment. At the same time, I hope that agreements on troop withdrawal will not lead to an increase in the number of U.S. Marines in the Multinational Force. In fact, we should seek ways to withdraw all American troops currently stationed in the Beirut area.

Since the creation of the State of Israel, the United States has played a major role in its security.

From 1948 to 1983, the United States has supplied Israel with over $27 billion in the form of grants and loans for military and economic aid. The increase in total annual aid given to Israel since 1972 is well over 500 percent. Israel is now seeking $3.2 billion in U.S. economic and military assistance for fiscal year 1984 which is an increase of approximately 30 percent over fiscal year 1983. During a period of extreme fiscal difficulties for our own Government, it will be difficult for Congress to justify any increase in foreign aid, and yet continuance of U.S. aid is vital to Israel's future security.

Since September 1982, 1,200 U.S. troops from the 32d Marine Amphibi-

ous Unit, along with 2,500 French and Italian troops, have been deployed in and around the Beirut area. The marines' mandate has changed several times since the first deployment in the evacuation of the PLO from Beirut. They are currently supporting and training the Lebanese Army as it expands its authority over part of occupied Lebanon.

Since the beginning of the U.S. Marine deployment, numerous confrontations have taken place between Americans and Israelis, ranging from boundary misunderstandings to outright harassment of marines by Israeli soldiers. In a letter to Secretary of Defense Caspar Weinberger, General Barrow, commandant of the U.S. Marine Corps, expressed extreme concern over the friction between the two forces, citing that Israeli troops had placed American troops "in life-threatening situations, replete with verbal degradation of the officers, their uniform, and their country." As long as the marines are stationed in Lebanon, the possibility of more confrontations is high.

Unfortunately, these clashes between American and Israeli troops are detrimental to American public opinion toward Israel. In a questionnaire I mailed to my district, I found that 63 percent of my constituents who responded supported the reduction of economic and military aid to Israel. Only 3 percent favored an increase. In a similar questionnaire sent by a Congressman whose district adjoins mine, 62.3 percent opposed providing increased aid to Israel. Certainly, it is not in the interest of Israel to have American public opinion soured by our military presence in Lebanon. The first marine killed in an incident involving Israelis will create even more public hostility among Americans and more reluctance to provide Israel with assistance.

These clashes are not the only sources of growing disenchantment with our marine presence in Lebanon. The U.S. Marines pose a desirable target for any of the numerous violent political organizations in Lebanon seeking international attention. Recently, our U.S. Embassy in Beirut was severely damaged by a car bomb planted by one of these organizations. Approximately 57 people were killed—17 American—and over 100 were injured. There were also two separate incidents where unknown gunmen fired upon the marines.

What role will Syria play? The Soviet Union has replaced all the Syrian weaponry destroyed by Israel during the fighting last summer. Also, it has been reported that Soviet technicians may now be operating SA-5 antiaircraft missiles in the region. Syria has never cooperated with Israel in the past and I do not anticipate that the Syrians will make life any easier for Israel now. Syria can only be overjoyed at strained United States-Israeli relations caused by the marine presence in Lebanon and the protracted talks regarding Israeli withdrawal from Lebanon. This leads me to believe that Syria will prolong its own withdrawal as long as possible, thereby lengthening our marines' deployment in the region.

When the withdrawal does take place, additional troops in the MNF will be needed to support the Lebanese Army as it stretches its authority over the newly released territory. According to press accounts, it may take 3 to 5 years to fully equip and train the Lebanese Army to be able to patrol all of Lebanon. If so, the marines' role in the MNF would become more permanent. I believe that would be an enormous mistake for the interests of both the United States and Israel. Furthermore, an expanded or prolonged U.S. marine presence in Lebanon is unnecessary. Any one of several other countries that do not play such an important role in Israel's security could assume our position in the MNF without altering the effectiveness of the force.

Therefore, given our central role in the survival of Israel, I urge President Reagan not to expand marine participation in the MNF and to vigorously explore possibilities for the withdrawal of all marines already stationed in Lebanon.

UPHOLDING THE BREZHNEV DOCTRINE

(Mr. NICHOLS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. NICHOLS. Mr. Speaker, it is rare that I take the floor on foreign policy issues but I believe that the debate over our Central American policy is vitally essential to the security of this Nation.

On the editorial page of today's Wall Street Journal is outlined a clear and concise picture of what our responsibility in this area should be. Simply because a country in Central America falls under the influence of the Soviets does not mean our responsibility ceases. Quite the contrary, our responsibility for insuring democracy and human rights in our Western Hemisphere increases under these circumstances.

For the reading of my colleagues, I am pleased to submit to the RECORD of this body "Upholding the Brezhnev Doctrine." It is an article that warrants the close attention of all our Members.

[From the Wall Street Journal, May 11, 1983]

UPHOLDING THE BREZHNEV DOCTRINE

A banner headline in Sunday's Washington Post announced an exhaustive history of what congressional intelligence committees have been told about U.S. aid to anti-Sandinista guerrillas in Nicaragua, complete with reports of troop strengths and other items of military intelligence. The story is a testimony to the journalistic enterprise of the Post, and anything but a testimony to the wisdom of involving Congress in covert activities.

This observation is especially pertinent given Congress' current inclination to dabble in foreign policy in general and Caribbean policy in particular. Its general stance is to duck all responsibility, giving the executive funds to do what it wants but accompanying them with restrictions designed to cover the congressional backside if the actions are questioned. How this works is quite neatly depicted in the Post history.

Clearly the "problem" with the Nicaraguan operation is that it has been too successful. In particular, the anti-Sandinista forces have done too well at winning the hearts and minds of the Nicaraguan people. They keep attracting recruits, their numbers growing to 7,000 today from 500 at the beginning of 1982. There is even some chance (perhaps overrated) that they might actually take over the country, throw out the Sandinistas and send the Cubans packing. Horrors, that's not what Congress has in mind.

Indeed, it seems that in its wisdom Congress has enacted the Brezhnev Doctrine into U.S. public law. The Brezhnev Doctrine, originally announced to justify the Soviet invasion of Czechoslovakia in 1968, holds that once a nation has joined the Communist bloc it cannot be allowed to change its mind. Congress' version, called the Boland Amendment, prohibits covert aid "for the purpose" of overthrowing the Sandinista junta.

A little guerrilla harassment is perfectly OK, in Congress' view, so long as it doesn't become too serious. The U.S. can finance and encourage anti-Sandinista Nicaraguans to take up guns and risk their lives, so long as their purpose is not to reclaim their country from Castroism, but merely to interdict arms traffic to Marxist guerrillas elsewhere in Central America. Watching the growth of the anti-Sandinistas, Congress has developed a dark suspicion they may have something more on their minds.

So the intelligence committees are putting the Boland Amendment and all those detailed briefings to the purpose for which they were intended. To wit, leaking to the press so that Congress can deny it had anything to do with what's going on. If it keeps the executive from doing anything, so much the better with at least some in Congress. And if it jeopardizes the lives of people who have put their trust in the U.S., tough luck.

For our part, we see no reason in the world that the Brezhnev Doctrine ought to supplant the Monroe Doctrine. Nothing could bring peace to Central America so quickly as the overthrow of the Sandinistas. If there is a chance that this could be accomplished through covert aid to a popular uprising, it would be money very well spent indeed. As recently as 1965, Lyndon Johnson sent 28,000 Marines into the Dominican Republic, chartered an election and left.

Today, hardly anyone remembers, let alone complains.

Now of course, Congress may believe we should forswear military power, overt or covert. It may believe that, even if the practical result is allowing Castro to take over, for our sins we should abstain from Latin America. These are familiar propositions, and can be debated and decided. But if these are the things that Congress believes, its obligation is to stand up and say so.

Instead, Congress plays its responsibility-ducking game. It will not cut off aid to El Salvador, merely voting less than needed to do the job. It will not terminate the Nicaraguan operation, merely keep it going until September while the executive branch jumps through some hoops, filing reports and making declarations to give Congress more excuses.

"We are no longer simply to be informed," Sen. Moynihan explained. "We want to be a part of the process." Surely this is the last thing the nation needs. If Congress decides not to sanction covert action, that is its right, and the public can judge its responsibility for what follows. But the one clear thing is that such actions cannot be run by a committee, let alone a committee of congressmen. For actions where a single voice is mandatory, the Founding Fathers gave us an executive branch, a president and a commander in chief. The president ought to demand that Congress choose between abandoning covert action or letting him run it. He cannot afford to be put in a position that keeps his policies from succeeding but saddles him with responsibility for their failure.

THE LATE HONORABLE KATHARINE ST. GEORGE

The SPEAKER pro tempore (Mr. FOLEY). Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 60 minutes.

Mr. GILMAN. Mr. Speaker, it is with sad regret that I rise to pay homage to one of the most courageous and remarkable women I have ever known.

Katharine St. George was initially elected to the 80th Congress in 1946. During the subsequent 18 years, Katharine St. George continued to represent four counties in southeastern New York with integrity, with energy, and with dedication.

When she quietly passed away last week at the age of 86, she was mourned as the "first lady" of the mid-Hudson region of New York.

Although Congresswoman Katharine St. George's accomplishments were many, she is remembered today especially for being the author and major sponsor of the first equal rights amendment to warrant serious consideration by this body and by the Senate. She was the first Member to sponsor hearings on the issue of ERA and, although the proposed amendment to the U.S. Constitution did not gain congressional approval until after her retirement, many historians and women's rights groups credit her with laying the initial groundwork which paved the way for ERA's eventual acceptance.

It is doubtful if, in that day and age, such a radical proposal as ERA could have been accepted had it not been initially sponsored by a Member who had earned the admiration and respect of both sides of the aisle. Katharine St. George won that high esteem by her devotion to her congressional duties and by her integrity.

Congresswoman St. George will also be remembered as the first woman in the history of the Congress to serve on the prestigious House Rules Committee.

Mrs. St. George was also one of the first women to serve on the House Armed Services Committee. It was unfortunate, but she had to fight a courageous battle, against the thinking of the times that the Armed Services was "no place for a woman." The fact that she prevailed—and did so with dignity—again blazed the trail for those who followed her.

Mrs. St. George was also a member of the Post Office and Civil Service Committee, and during the 83d Congress, when her party was in the majority, she was chairman of the Subcommittee on Postal Operations. During her tenure as chairman, the Postal Operations Subcommittee issued a report which included recommendations for improvements which were subsequently put into effect. It was estimated that those improvements resulted in a $70 million annual savings to the Federal Government. Mrs. St. George was the prime mover behind the successful move to appoint an Assistant Postmaster General for Personnel, which resulted in further savings for the taxpayers.

During her long tenure in the House, Mrs. St. George also served on the Committee on Committees. She initiated many bills during her time in the House which were enacted into law to improve the lot of the Federal employees, including a cost of living pay adjustment bill, a training program for Federal employees bill, a code of ethics, revision of Internal Revenue Service laws, and improvements in our social security legislation.

In 1956, Mrs. St. George became the first woman in history to represent the United States at the Interparlimentary Union Conferences, and continued to represent us on that bipartisan international group until she left Congress in 1964. In fact, she served as president of the interparliamentary group during her last years in Congress.

All in all, Katharine St. George amassed an enviable record of public and legislative service.

But, what manner of person was this, who warranted the universal respect of her colleagues, and who was returned to Congress year after year after year by the voters of Rockland, Orange, Sullivan, and Delaware Counties in New York?

Katharine Delano Price Collier was born in Bridgenorth, England, on July 12, 1896, where her father, Price Collier, was temporarily assigned as a foreign correspondent with the now-defunct Forum magazine. Price Collier was one of the most widely known and respected journalists of his day, and his intimate knowledge of the personalities and issues which shaped international politics had a profound effect on his young daughter.

Katharine's mother, the former Katharine Delano, of Newburgh, N.Y., was a member of one of the first families of the Hudson Valley. Young Katharine's mother was the sister of Sara Delano, the mother of our 32d President, Franklin Delano Roosevelt.

Returning to their home of Tuxedo Park, N.Y., when young Katharine was 2, the Colliers were in a position to see that their daughter would take advantage of the educational opportunities available to her. Accordingly she was educated in private schools in the area until the age of 11, when she was sent to Europe to complete her studies. She studied in England, France, Switzerland, and Germany, where she was presented at the court of Kaiser Wilhelm II—a heady experience for a young girl. In her later congressional career, Mrs. St. George put her foreign education to good use. Being fluent in a number of languages, she became the first Member of Congress to regularly broadcast over the Voice of America in foreign tongues.

In 1917, Katharine married George Baker St. George, a renowned businessman and sportsman. The marriage endured for 40 years, until Mr. St. George's death in 1957. This happy marriage produced one child, the lovely and gracious Priscilla Ryan, who still resides in Tuxedo Park. In addition, Mrs. St. George is survived by two grandchildren, and six great-grandchildren.

Mrs. St. George became interested in local politics at a relatively young age, being elected to both the town council of Tuxedo, N.Y., and the board of education of Tuxedo, in 1926. Mrs. St. George retained both of these positions for over 20 years, and in fact served as president of the school board from 1930 until her election to Congress.

Mrs. St. George soon became known as "Mrs. Republican" in Orange County, serving as treasurer, vice chairman, and finally, chairman, of the Orange County Republican Committee. She was a delegate to the 1944 Republican National Convention, and in 1956 she received an unprecedented honor—she was appointed the first woman ever to serve as parliamentarian at a Republican National Convention. Her performance in this capacity, as well as the reputation she had earned by then with her colleagues as

a master of parliamentary procedure, warranted her reappointment to the same position at the 1960 Republican Convention.

Her initial election to Congress, in 1946, came about after her stunning defeat of an incumbent in a primary election. She was reelected by massive margins every subsequent 2 years. In 1956, the Democratic Party nominated a well-financed, nationally known candidate to challenge Mrs. St. George. Although the campaign generated national publicity, the results were the same: Katharine St. George was reelected yet again.

We all remember 1964, and what a devastating year that was for the Republican Party. That was the year, in a major political upset, that Katharine St. George lost her seat in Congress. But it is well to reflect on the fact that, while the national Republican ticket was losing her district by margins of 2 to 1 and 3 to 1, and while most of the Republican State legislators and local officials in her district were losing their seats, Katharine St. George was defeated for a 10th term in Congress by less than 5,000 votes out of nearly 200,000 cast—a tribute to the nonpartisan respect that this woman, "Mrs. Republican," had achieved.

After her departure from Congress, Mrs. St. George continued in her role as the "first lady" of the mid-Hudson Valley. She served on the board of directors of the Woman's National Republican Club, the Quassaick Chapter of the Daughters of the American Revolution, the Rockland County Business and Professional Woman's Club, the Sylvanius Thayer Hall of Fame Committee, the National Committee of American Friends of Captive Nations, the National Institute of Social Sciences, the Citizens Committee for the Nation's Civic Auditorium, and the Committee of 1 Million Against the Admission of the People's Republic of China to the United Nations. She also kept her hand in local politics, serving as Republican chairman of the town of Tuxedo for many years.

Soon after her retirement from Congress, Mrs. St. George was elected to the New York State Republican Committee from her assembly district. She served with distinction on that body until 1982, when redistricting would have required her to run against an incumbent from an adjacent district. Although she undoubtedly would have won reelection easily, she graciously stepped down, because it was time "to give a younger voice" an opportunity to be heard.

Last October, the State Republican Committee asked me to publically present Mrs. St. George with a certificate naming her an honorary life member of that committee. The decision to so honor her—the first and, so far, only time in history this honor was conferred—was rendered unanimously, in recognition of Mrs. St. George's years of devotion to her Nation, to her region, and to her party.

Mr. Speaker, the first time I ran for Congress, Mrs. St. George was an early and staunch supporter of my candidacy. This support never waned over the years, and I consider this support an immense honor. I have often solicited Mrs. St. George's advice and counsel, and only her recent illness, which proved to be fatal, has silenced her guidance and her assistance.

I am confident that all of my colleagues, especially the 39 current Members of Congress who served concurrently with Mrs. St. George, will join with me in expressing our deepest condolences to her family and loved ones, and join with me in saluting the "first lady of New York's Mid-Hudson Valley," surely one of the most remarkable women that our Nation in the 20th century has produced.

□ 1840

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from New York.

Mr. FISH. I thank the gentleman for yielding.

Mr. Speaker, I take this opportunity to rise in tribute to Katharine Collier St. George, a longtime friend of my family and a former colleague who served in this body from 1946 through 1964.

Mrs. St. George represented the mid-Hudson Valley of New York, an area that the gentleman from New York, Mr. GILMAN and I have the privilege of representing now. She was a first cousin of President Franklin D. Roosevelt and a descendant of the original settlers at Plymouth Rock.

This distinguished lady was born in England but grew up in Tuxedo Park, N.Y., in Orange County. She attended schools in New York until the age of 11, when she was sent to Europe to continue her education, studying in England, France, and Germany.

In Congress, Mrs. St. George represented New York's 27th Congressional District which included Orange, Sullivan, and Delaware Counties. She always took a strong interest in improvements for Federal employees, a strong national defense, and became the chief sponsor of a proposed equal rights amendment for women.

In 1962, she became the first woman to serve on the House Rules Committee and also was the assistant Republican whip in the House. She was the parliamentarian at the National Republican Conventions in 1958 and 1962.

Before she came to the House of Representatives, Mrs. St. George was the Republican chairman of Orange County. Last year she became the first person in history to be voted an honorary life member of the New York State Republican Committee.

I am deeply saddened by the death of Katharine St. George who was an insightful legislator, as well as a compassionate woman with great preception into the issues and problems affecting her constituency. Her wit, graciousness and intellect will long be remembered by those privileged to know her.

The Hudson Valley will greatly miss her outspoken loyalty and devotion to the Republican Party, and her undying concern for the welfare of this country.

Mr. GILMAN. I thank the gentleman from New York for his kind remarks.

I know that the gentleman has been closely alined with Katharine St. George over the years and now represents a portion of her former district.

Mrs. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. GILMAN. I am pleased to yield to the gentlewoman from Louisiana.

Mrs. BOGGS. Mr. Speaker, I am so pleased that the gentleman has given me the opportunity to participate in this tribute to a woman of great charm and wit and keen intelligence and enduring strength, Katharine St. George.

Mrs. St. George came to the Congress, as the gentleman said, in the 80th Congress which was the year following World War that my husband, Hale, returned to the Congress. And we had a wonderful relationship with her and with the members of her family with whom we were privileged and honored to be associated.

I was very pleased that the gentleman mentioned Mrs. St. George's ERA resolution which was one that she felt was long overdue and without the kind of enduring strength that she always exhibited would not have gotten as far as it did without her leadership. Were she here now I am certain that we would in the newly instituted resolution to have ERA resurrected she would be one of the guiding lights in that regard.

Recently I was a delegate to the Interparliamentary Union Conference and someone said to me, "Are you the first woman delegate from the United States?"

And I said,

Oh, no. I am pleased to tell you that many years ago Katharine St. George of New York was not only a woman delegate to the IPU, but her connections with people all over the world served our country so well in those regards.

My husband, Hale, was a delegate during the years when Mrs. St. George was and I had the opportunity of traveling with them from time to time to the conference meetings. And as a U.S.

delegate, just in the last couple of weeks in Helsinki, Finland, I remembered her participation and the fact that she was able to represent what I felt was all that was the best of the United States. And I was so proud of her performance at those international meetings.

I am very pleased that I was able to follow and tread very softly in her considerably large footsteps at the IPU meeting. And I am so pleased that the gentleman has taken this occasion to pay tribute to such a marvelous U.S. woman.

Mr. GILMAN. I thank the gentlewoman for her kind remarks and particularly since the gentlewoman is a member of that distinguished group of lady Members of our House.

Mr. PEPPER. Mr. Speaker, it is with profound sorrow that I rise today to pay tribute to a great public servant, our late former colleague Mrs. Katharine St. George. A legislator in the very finest meaning of the word, Mrs. St. George was as committed to this institution as she was to the many causes in which she so deeply believed.

Although she perhaps is best remembered for being among the first and most influential sponsors of the equal rights amendment for women, Mrs. St. George was a pioneer in many other fields as well. She was the first woman to serve as a member of the House Rules Committee. It is my sincere regret that she left the Congress the year before I took my own seat on this distinguished committee which I am now privileged to chair. Mrs. St. George was also the first woman in history to serve as parliamentarian at a Republican National Convention, and was the first woman to attend an International Parlimentary Union conference. She later acted as the IPU president—a position I am presently honored to hold myself.

The range of Katharine St. George's achievements is a testimony to the diverse talents of this extraordinary woman. Over her long congressional career, she became the first Member of Congress to make regular radio broadcasts over the Voice of America in a foreign language, and as an active member of the Armed Services Committee, she flew aboard the F-104B Starfighter airplane. Becoming the first woman to break the sound barrier.

Katharine St. George was more than an outspoken advocate of equal rights for woman and a champion of the elderly and the Federal worker. There have been many before and after who have served here and who have spoken as eloquently and persuasively. But few have become as expert on knowing how to get things done as did she.

A first cousin of Franklin Delano Roosevelt, Mrs. St. George shared his love of freedom and his compassion for people. Surely there have been no two more committed public servants, no two more genuine national heroes than they. One led the Nation as President, the other was a leader among her colleagues in Congress. It has been said that no one understood the power of the presidency better than did F. D. R. Mr. Speaker, clearly Katharine St. George was equally without peer in understanding the power of the power of the Congress. She was a master at using the rules to promote those causes so important to her.

With her passing, the Nation has lost one of its true leaders, but her unfailing belief in this great democracy and its rich potential is the legacy she leaves to us. She gave us all a model to follow and a dream to share.

● Mr. O'NEILL. Mr. Speaker, I was deeply saddened to learn of the death of Katharine St. George.

She was beginning her fourth term in Congress when I came here as a freshman in 1953 and she had already established herself as a diligent and talented legislator.

Katharine St. George was a gracious and lovely woman and I had the privilege of getting to know her in some depth as we sat across the aisle from each other on the Committee on Rules.

I had tremendous respect for Katharine—for her capabilities, her noble ideals, and her dedication.

Millie and I extend our sympathy and affection to Katharine's daughter, Priscilla and her family.●

● Mr. PRICE. Mr. Speaker, I join my colleagues in remembering our former colleague, the Honorable Katharine St. George of New York.

I served with Mrs. St. George on the Committee on Armed Services during all the years she was a member of the committee, and I confess to being a great admirer of her competence and courage. As a member of the committee checking out the F-104 as its first female passenger, she became one of the few women born in the 19th century, if not the only one, to break the sound barrier.

Yes, courage and conviction are words that apply perfectly to Mrs. St. George. She was the first Member of Congress to introduce the equal rights amendment, which was not passed until almost a decade after she retired. She was one of the original cosponsors of a code of ethics for the House, and I was pleased to work with her on this, carrying the fight after she retired and eventually becoming the first chairman of the House Committee on Standards of Official Conduct.

I am privileged and proud to have known Mrs. St. George and to have served and worked constructively with her. I regret her passing and extend my sympathies to her family and friends now deprived of her shining light. They should be comforted to know that the contributions of this fine American will not be forgotten.●

● Mr. STRATTON. Mr. Speaker, I rise to join in paying tribute to our former colleague, the late gentlewoman from New York, Mrs. Katharine St. George.

Mrs. St. George's name had been well known to me even before I came to Congress in 1959. She was famous in New York State, as well as nationally, because she had been elected in 1946 to represent the district which included the family estate of the late President Roosevelt, Hyde Park; and also because she was a cousin of F. D. R., her mother and F. D. R.'s mother being sisters. Yet Mrs. St. George, as a forthright legislator, did not hesitate to oppose the continuing programs of the late wartime Chief Executive when she believed they were wrong.

My first opportunity to meet Mrs. St. George personally, however, was when I was assigned to the House Armed Services Committee as a freshman member. She was the only woman member of that committee which has top authority over our Armed Forces.

Congressional tradition has it the chairman of the committee, Hon. Carl Vinson, was very reluctant to permit members of his committee to ask questions of witnesses. Those stories may have been a bit exaggerated, let me say; but it became clear to me very early that whenever the gentlelady from New York requested the floor during committee deliberations, chairman Vinson very quickly and graciously yielded to her. Not just because she was a very lovely and gracious lady; but also because he knew that Mrs. St. George was well versed in military matters, and he realized that her comments and suggestions always made sense.

As a member of the committee, Mrs. St. George—we rarely referred to her as Kassie in her presence—was a very active and dedicated member, visiting our troops in the field and abroad. In fact one of the most prominent photographs displayed in the committee's main office was of Mrs. St. George in flying gear and helmet, taken immediately after she had just completed a flight in the Air Force's new F-104B Starfighter aircraft as it broke the sound barrier at 35,000 feet—the first woman passenger to be carried on such a flight.

Mrs. St. George was regarded as an effective legislator and as such was respected by Democrats as well as Republicans. She was a great and patriotic American, and we were sorry to lose her from the House in 1964. And I am sorry now indeed to learn of her passing. Yet in the years since she left Congress she continued her vigorous schedule of community involvement and her consistent support of a strong

and vigorous America during those difficult days of the late sixties and the decade of the seventies.

All of us who were privileged to know Katharine St. George and to serve with her will miss her very greatly.●

● Mr. BOLAND. Mr. Speaker, I want to join the Members of the House in paying tribute to our former colleague, Mrs. Katharine St. George.

I was privileged to serve in the House during a portion of Mrs. St. George's tenure in this body. She was a dedicated and effective representative of the people of New York and provided distinguished service to our country. Her work on the Post Office and Civil Service Committee, the Government Operations Committee, and the Rules Committee earned her the respect and trust of her colleagues.

Mrs. St. George was a champion of equal rights for women long before that cause became fashionable. She advocated an equal rights amendment for women as a means of insuring equality under the law, and I think it is safe to say that her efforts laid the groundwork for much of the progress made on the women's rights issue during the last 20 years. When the history of the women's rights movement is written, the role of Mrs. St. George will have a prominent part in it.

Mr. Speaker, I want to convey my deepest sympathies to Mrs. St. George's family on their loss.●

● Mr. ADDABBO. Mr. Speaker, it is with great sadness that we pay tribute today to my former colleague and friend Mrs. Katharine St. George who passed away last week at the age of 86.

Mrs. Katharine St. George served as a representative of the Mid-Husdon Counties of New York State for nearly 20 years in Congress.

Among her noted accomplishments, Mrs. St. George is best known for her battling through the years for equal rights for women. She has served as an inspiration for women throughout the country until her death. As in 1963, Katharine became the first woman ever elected to be president of the U.S. delegation at the Inter-Parliamentary Union Conference which was responsible for talks on how nations around the world can strengthen their democratic systems.

Former Congresswoman St. George has served her country with great ability and distinction. As she led women to greater influence in Government, Mrs. St. George said:

> Let us go forward as comrades in the great epic of America. There is a strong possibility that the coming of women to politics is a new transfusion of blood of freedom. The American women—a phenomenom of the 20th century—can reshape the world.

Katharine and her strength to fight for what she believed in will be sorely missed by everyone.●

● Mr. LENT. Mr. Speaker, it is with sadness that I join my colleagues in a tribute to the late Congresswoman from New York, the Honorable Katharine St. George.

Although I did not have the privilege of serving with Congresswoman St. George, I share with my colleagues who did have this honor the same feelings of respect and admiration that they held toward this remarkable lady.

Mrs. St. George represented the mid-Hudson Valley of New York in Congress for 18 years, from 1946 to 1964. Prior to her election to Congress, she was an active member of her community of Tuxedo Park, N.Y. There, she served on the town board, the board of education, and the Orange County Republican Committee. She also was a delegate to the 1944 Republican National Committee Convention.

In Congress, Mrs. St. George distinguished herself by being the first woman in the history of the United States to serve on the House Rules Committee. She also served on the Post Office and Civil Service Committee, as well as on the Armed Services Committee.

Following her years in Congress, Mrs. St. George maintained her commitment to public service. From 1972 to 1982, she was a member of the New York State Republican Committee. And in 1982, she became the first person in history to be voted an honorary life member of the New York State Republican Committee.

Mr. Speaker, all of us serving today owe a debt of gratitude to former Congresswoman St. George. Her hard work and dedication to the public good should serve as examples to us all as we work to carry on the good deeds that we all associate with Katharine St. George.●

● Mr. ZABLOCKI. Mr. Speaker, it is both an honor and a privilege to join my colleagues today in paying tribute to the long and remarkable public career of a remarkable woman, our former colleague, the Honorable Katharine St. George of New York. There are probably not too many of us left in this body who served with her, as I did, during all but the first 2 years of her House tenure.

As the gentleman from New York (Mr. GILMAN) has pointed out, Mrs. St. George established a number of "firsts" in the history of this body: The first woman to have served on the Rules Committee, in addition to two other major standing committees of the House; the first Member of Congress to make regular broadcasts over the Voice of America in a foreign language; the first woman to serve as parliamentarian at the Republican National Convention; and the first woman passenger on the F-104B—Starfighter—plane which broke the sound barrier at 35,000 feet. She was also an early and prominent leader in the movement for equal rights for women, long before that cause became fashionable—or even topical.

Above all, however, Katharine St. George will be remembered as a person of strong character and integrity, who won the respect and admiration of Members and friends on both sides of the aisle. Her influence on her fellow legislators was, in fact, a key factor in the legislative history of the early post-World War II period.

The recent death of Katharine St. George, therefore, marks the passing of an era; but it also represents the loss of a valued colleague and friend, who had demonstrated by a long and distinguished public career that active participation in the political life of this Nation can be a most honorable profession.

To her daughter, Mr. Patricia St. George Ryan, to her two grandchildren and six great-grandchildren, I extend my deepest sympathy.●

● Mr. BENNETT. Mr. Speaker, we have all been grieved about the passing of our friend and former colleague Katharine St. George. She ably represented the Mid-Hudson Valley of New York State in Congress from 1946 through 1964 when she returned to her home in Tuxedo Park, N.Y., in retirement. She and I were the original cosponsors of the Code of Ethics for Government Service which is still the law of the land.

I also served with her on the House Armed Services Committee and later she served on the Rules Committee. She was a leader in everything she undertook and served as president of the Inter-Parliamentary Union and as Parliamentarian of the Republican National Committee in 1956 and 1960. She was a very able, very personable lady whom we all not only respected, but greatly loved. She will be very much missed and our deepest sympathies go out to her family.●

● Mr. BROOMFIELD. Mr. Speaker, I join my fellow Members of the House of Representatives in mourning the death of a truly remarkable person, a friend and former colleague, the Honorable Katharine St. George.

When I first came to the House of Representatives in 1957, Katharine had already been representing her New York district for close to a decade. In fact, she was only the 43d woman to be elected to the House in its entire history. During the subsequent years that we served together as colleagues and fellow Republicans, my respect and admiration for her wit, charm, intelligence and political savvy increased. It was an honor to serve with Katharine and to be numbered among her many friends.

Katharine served the constituents of her district well as evidenced by her several terms in office. She served the

Nation equally well as evidenced by her distinguished record.

She is one of the unsung heroines of the women's movement as she worked for years laying the groundwork for the eventual passage in Congress of the equal rights amendment.

From her position on the House Post Office and Civil Service Committee, she worked to improve the Federal civil service and to provide Federal workers a fair compensation.

During her years as a Member of Congress, Katharine also served on the House Armed Services Committee and on the House Rules Committee where she was the first woman to hold such a position.

Katharine's record as a member of the Republican Party is equally broad and illustrious. It stretches from serving on the town board of her hometown of Tuxedo Park, N.Y., to being a delegate to the 1944 Republican National Convention, to serving as the parliamentarian at the 1956 and 1960 Republican National Convention.

Mr. Speaker, I look back on the years that I have known Katharine with great warmth, and I wish to extend my heartfelt condolences to her family.

Katharine St. George was a very distinguished and caring individual. The Nation is richer because she chose to serve in public life, and I am the more fortunate because she was my friend and colleague.●

● Mr. HORTON. Mr. Speaker, today I join with my colleagues to pay tribute to a great American and good friend, the late Mrs. Katharine St. George. I share the grief of my colleagues with the news of Mrs. St. George's passing and extend my sincere condolences to her family and to her friends.

When I came to Congress in 1963, Mrs. St. George was a seasoned and highly respected legislator whose counsel I never hesitated to seek. She ably represented her constituents along the Hudson River of New York for 18 years. During that time she distinguished herself as a leader of the women's movement. She has been correctly recognized as the driving force behind efforts to amend the Constitution to insure equal rights for women. In fact, she was the chief sponsor of the Equal Rights Amendment, a statement that those of us who followed her continue to fight for today.

Mrs. St. George also served her constituents and her colleagues as an important member of the House Committee on Armed Services and the Committee on Post Office and Civil Service. She was the first woman to sit on the House Rules Committee, serving from 1961 through 1964. Mrs. St. George was also an assistant Republican whip and sat on the Committee on Committees.

Those of us who knew Mrs. St. George have lost a trusted friend and colleague. This institution and this country have lost a distinguished stateswoman and a great American.

Again, I extend my condolences to the family and friends of Mrs. Katharine St. George and I pay tribute to her memory.●

● Mr. BROYHILL. Mr. Speaker, Katharine St. George was a real lady. She earned the respect and admiration of all who served with her, before the day of ERA and at a time when the custom was to deal with your colleagues in less strident tones and with calm, well reasoned voices. She was a champion of equal rights, and her calm demeanor, her reasoned and deliberative arguments won her many adherents to her cause. It was an honor to serve with her.●

GENERAL LEAVE

Mr. GILMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material, on the life, character and public service of the late Honorable Katharine St. George.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

□ 1850

THE CRIME OF GENOCIDE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York (Ms. FERRARO) is recognized for 60 minutes.

Ms. FERRARO. Mr. Speaker, I have asked for this special order to talk about the crime of genocide. When the history of the 20th century is finally written, genocide will be seen as "the crime of the century."

The 1948 U.N. Convention on the Prevention and Punishment of the Crime of Genocide defines genocide as a set of actions "committed with the intent to destroy, in whole or in part, a national, ethnical, racial, or religious group." It is truly a terrifying notion, that an entire race of people might be violently eliminated from the Earth.

Yet it is an idea which has been tried repeatedly in modern history.

The first genocide of the 20th century was the Turkish massacre of the Armenians. Beginning in April 1915, the Turkish Government began a systematic campaign to eliminate the Armenian people. The details of that slaughter were recently related by many of my colleagues in the Chamber on the occasion of Armenian Martyrs Day.

I need not review that tragic story tonight. But the ultimate result bears restating. Over a 3-year period, 1.5 million Armenians, men, women, and children, the elderly, students, and professionals, were murdered. From the 1914 level of 2 million, the Armenian population of Turkey declined to less than 100,000 people in 1920. Some half a million Armenians were scattered around the globe.

While the Turkish Government bears responsibility for the murder of a million and a half innocent people, the rest of the world must account for its failure to act on the reports of the massacre while it was taking place.

That the world knew of the arrests, forced evacuations, and mass murders of the Armenians while they were happening is not in doubt. Repeated communiques filed by U.S. Ambassador Henry Morgenthau detailed the extent and brutality of the suffering inflicted on the Armenians. The American Consul General in Smyrna, George Horton, in a report to the Secretary of State, wrote the following:

> I also have other statements from eye-witnesses . . . of the highest standing in the religious and educational world, which leads me to believe that what is now taking place in Armenian Turkey surpasses in deliberate and long-protracted horror and in extent anything that has hitherto happened in the history of the world.

The report went on to state that the increasing ferocity of the extermination campaign could ultimately affect 2 million people.

It is important to note that the Horton report was submitted in November 1915—the massacre would continue for several years after that.

I have dwelled on the Armenian genocide not because it is unique as a flagrant abuse of human rights, but precisely because it is not unique. The world knew about the Nazi Holocaust against the Jews—and failed to act. The world knew about the mass murder in Cambodia—and failed to act. Those failures spread the shame of these unspeakable crimes against humanity far beyond those directly responsible for them.

The events in Turkey in 1915, and in Germany in World War II, and in Cambodia in the 1970's, are of course, not directly related. The madness and brutality of the perpetrators of each genocide had their own tragic basis.

But there is a strong tie in the world's silence in the face of each of these horrors. We can only be haunted by the words of Adolph Hitler, who said, in embarking on his "crazed attack" on the Jews, "Who, after all, speaks today of the annihilation of the Armenians?"

Now, today, years too late for the millions killed in Nazi gas chambers and Khmer Rouge execution centers, we stand to say that we speak of the annihilation of the Armenians. And of the Jews, and of the Cambodians. We stand to remind the world of these crimes against humanity, that we may prevent future crimes.

There is an international instrument designed to help in this effort. Eighty-eight nations have joined as parties to the U.N. Convention on the Prevention and Punishment of the Crime of Genocide. Sadly, despite the leading role the United States played in drafting the convention, the United States still has not ratified it.

United States ratification is long overdue. More than 70 members of the House have joined me as cosponsors of a resolution calling for U.S. ratification. If we are to make mass murder by government a relic of history, the United States must lend its moral force to this effort.

There is currently a photo exhibit in the rotunda of the Cannon Building on the tragedy in Cambodia. Amnesty International is sponsoring the exhibit, which consists of photographs of the evidence of the genocide which took place in Cambodia from 1975 to 1979. The photos are a chilling documentation of the historic fact of the Cambodian genocide, and the title of the exhibit, "Cambodian Witness," is a fitting and poignant reminder of the role the rest of the world must play in responding to the Cambodian tragedy.

The text of the exhibit states that role this way. "A witness is someone called to be present and testify to an event having taken place."

It is important that we testify to the truth of the events recorded in David Hawk's photos of Cambodia's nightmare. In recent months we have seen our own State Department bow to pressure from the Turkish Government and retreat from the decades-old position of our Government acknowledging the fact of the Armenian genocide. So we must know the truth, and we must help others to know it.

But we must do more than that. We have a responsibility to act to prevent similar events from occurring in the future. The first step toward that goal is to ratify the genocide convention and take our rightful place in the community of nations squarely on record on this most basic of human rights issues. I am hopeful that this special order will contribute to that end.

● Mr. FAUNTROY. Mr. Speaker, I am pleased to be a cosponsor of House Resolution 50, a resolution expressing the sense of this great body that the Convention on the Prevention and Punishment of the Crime of Genocide should be ratified.

Mr. Speaker, the Convention on the Prevention and Punishment of the Crime of Genocide was first submitted for ratification in 1949. Our country's failure to ratify this Convention is a diplomatic embarrassment and represents a shameful retreat from law.

This continuing retreat from law is an unfortunate legacy emanating from the political dynamics of 1948. The year 1948 was a turning point for the United States and its policy toward human rights as an international concern. A restrictive concept of human rights led by then Senator John W. Bricker was gaining dominance. The forces behind a more restrictive concept toward human rights as an international concern comprised a wide spectrum of groups. Many were lawyers concerned over the use of treaty power to usher in domestic economic and social changes. Others, concerned with maintaining the structure of racial segregation and apartheid in the America of that period, stressed their devotion to the principle of states rights. Others, all too familiar today, were in opposition to any form of international cooperation, especially through the United Nations. In addition to these categories of opponents to the promotion and protection of human rights on the domestic and international level, there were numerous civic groups, patriotic organizations, and newspapers that were upset over what they saw as the misuse of executive agreements by Presidents Roosevelt and Truman. Many of the backers of this ascending restrictive movement saw the U.S. involvement in the effort to promote and protect human rights, especially through international treaties, as an attempt to force an alien philosophy on the United States, despite the fact that U.S. delegations then and through the years since have sought with great success to keep the texts acceptable to the American concept of human rights and in accord with the bill of rights contained in the Constitution.

The Convention on the Prevention and Punishment of the Crime of Genocide was an early casualty of this reactionary movement. Adopted by the General Assembly of the United Nations in Paris on December 9, 1948, and signed by the United States 2 days later, it was submitted to the Congress on July 16, 1949. Hearings were held on January 23, 24, and 25 and February 9, 1950. The convention, however, was not ratified at that time.

In April and May of 1970, the Committee on Foreign Relations held public hearings on the Genocide Convention and ordered the convention reported with understandings and declarations on July 28, 1970. In March 1971, the convention was considered, ordered, and for the second time debated briefly on the Senate floor in October of 1972.

In February 1973, the committee, for the third time, ordered the convention reported and in January and February of 1974 there was substantive debate on the floor of the Senate. In 1976, the Committee on Foreign Relations reported the convention for the 4th occasion, and in 1977 President Carter joined his predecessors in recommending ratification. In May 1977 and December 1981, there were again public hearings. There the matter stands as of this moment. As of today, May 11, 1983, there are 92 countries party to the Convention on the Prevention and Punishment of the Crime of Genocide, which has been operative since January 12, 1951, but not the greatest democracy, the United States of America.

Mr. Speaker, what is in this Genocide Convention that has prevented ratification?

The Genocide Convention seeks to get member nations to:

> Undertake to enact, in accordance with their respective Constitutions, the necessary legislation . . . to provide effective penalties for persons guilty of (a) genocide, defined as including, with intent to destroy in whole or in part, a national, ethnic, racial or religious group, (1) the killing of members of the group, (2) causing serious bodily or mental harm to members of the group, (3) deliberately inflicting on the group conditions of life calculated to bring about its physical destruction, (4) imposing measures intended to prevent births within the group, and (5) forcibly transferring children of the group to another group; (b) conspiracy to commit genocide; (c) incitement to commit genocide; (d) attempt to commit genocide; and (e) complicity in genocide.

Mr. Speaker, with our historical memory of the horrors of the Atlantic slave trade in African flesh, slavery and segregation in our own country, the curative results of the civil and human rights in our country, the savagery of Hitler's genocidal murder of European Jewry, the massacre of the Armenians, and the present day realities of Cambodia and South Africa, it is difficult to understand our Nation's failure to ratify the Genocide Convention. The arguments in opposition are weak and in terms of present day realities not only outdated but in fact absurd. Questions of domestic jurisdiction raised by opponents are unworthy of our country and sound more appropriate for South Africa and the Soviet Union, which often raise the issue of domestic jurisdiction to avoid issues of human rights abuse taking place within their borders.

Surely, Mr. Speaker, we can and are better than that company and can take a stand against the heinous crime of genocide.

It is high time, that our great Nation joined with the other 92 nation's party to the Convention on the Prevention and Punishment of the Crime of Genocide.●

● Mr. GREEN. Mr. Speaker, I am proud to join my colleagues to commemorate the victims of genocide and to call for ratification of the Genocide Treaty.

Genocide has stained the history of this century again and again. The shame of the Armenian genocide, the Nazi Holocaust, and the attempted genocide in Biafra and Cambodia can never be redressed, nor can it be forgotten. We can only mourn those who died, and, in remembering their fate,

pledge such atrocities will never again occur.

Prevention of genocide must be a matter of witness, but it should also be a matter of international law. This idea was first developed, but never fully acted upon, by the League of Nations. When the horrors of the Holocaust were realized by the world after World War II, the search for a legal mechanism to deal with genocide was renewed, and the U.N.'s ad hoc committee drafted the Convention on the Prevention and Punishment of the Crime of Genocide. Thirty-five years ago the U.N. unanimously approved the treaty, and 88 member nations have ratified it. Unfortunately, despite our country's staunch defense of human rights and strong participation in the U.N., the United States has failed to ratify the treaty.

I believe the treaty should be ratified immediately and, toward this end, urge my colleagues to cosponsor House Resolution 50, which expresses the House's support for ratification of the Genocide Convention. Currently on display in the Capitol Rotunda is a presentation on the victims of the grisly, genocidal regime of Pol Pot, and I urge all my colleagues to view it. Any who are concerned about the need for the treaty will be persuaded that we must do everything in our power to prevent genocide from ever again occurring.

Thank you, Mr. Speaker. I also appreciate the work of our colleague, Ms. FERRARO, who organized this special order.●

● Mr. MRAZEK. Mr. Speaker, instances of genocide in recorded history stand as humankind's most heinous intrusions upon the moral precepts that have guided civilized behavior.

To most of us, the mere concept of genocide is incomprehensible. Yet, inexorably through time, instances of genocide have blackened both ancient history and modern reality.

Even as it occurs, we find genocide unfathomable. We refuse to believe until it is too late; later we make hollow vows to prevent its reoccurance. Then, unbelievably, it happens again. Of the world's vicious cycles, this stands as the most horrible example.

The 20th century has witnessed acts of genocide and autogenocide unsurpassed in the history of the human race. The Nazi Holocaust and the massacre of the Armenians are but two examples of the destructive force of tyranny and madness unleashed against one people. I commend the efforts of many Members of this body who recently rose to condemn these modern-day atrocities. Yet, we must now move beyond words to demonstrate through our actions the strength of our resolve to put an end to these crimes.

This country cannot claim immunity to the political, cultural or racial forces which lead to genocide. Native Americans, the original occupants of this land, exist in a shattered form after 100 years of cultural progress doled out by this Government. There are no degrees of genocide and failure to prove intent cannot wipe away the horror.

We might begin to rectify our own conduct by joining 88 other nations of the world in ratifying the Genocide Convention. The pact calls for a universal realization that it is incumbent upon all of humankind to stop this outrage and to validate our humanity. We can agree that genocide is an act of madness, yet we have never gone so far in our belief as to ratify an accord to help stop it.

Mr. Speaker, the legal and constitutional questions which once stood between us and the Genocide Convention are no more than convenient and tragic attempts at dilatory posturing today. I urge the support of House Resolution 50 by my colleagues as a means of expressing our convention to the other body that we have waited long enough, and perhaps too long. Somewhere in the world the opportunity for genocide lives and festers. We must dedicate ourselves to eradicating this concept from the realm of the possible.●

● Mr. FISH. Mr. Speaker, I join my colleagues today in speaking out against the crime of genocide. Unfortunately, the 20th century has seen repeated instances of genocide—in Turkey, at the beginning of the century; in Europe in the thirties and forties; and in recent times in Cambodia. Each time we either cry out in horror over the crimes—after the fact—or we try to persuade ourselves that it did not happen, that no government or group of people could participate in something so inhuman.

We assuage our feelings by proudly declaring that it could not happen here, that our system of government would prevent such a travesty of humanity. I am sure that the German people in the 1920's did not believe that it could happen to their country either.

This year we have taken a step toward preventing such events in the future. We are working toward educating ourselves and others in the hopes that we will be able to recognize the actions and events that foreshadow genocide, wherever in the world it may occur, so that we may prevent it from happening again. We have dedicated a U.S. Holocaust Museum to provide a factual account of what has occurred in the past, and what humanity is capable of in the future. We must not allow future generations to make the same mistakes we have made, and unfortunately, continue to make.

There is obviously much more to be done. One item that we have left undone is the ratification of the Genocide Convention. After World War II, the United Nations drafted the International Convention on the Prevention and Punishment of the Crime of Genocide. It was passed by the General Assembly on December 9, 1948, and signed by the United States on December 11. The Convention has never been ratified. The Senate Foreign Relations Committee has favorably reported it four times, but it has been brought to the floor of the Senate only once, and it was not passed.

It is essential that we make a commitment to this treaty's ratification. I would like to send a message to the Members of the Senate to ask that they address this issue. It would bring to the attention of the American people and the world, the U.S. position on the crime of genocide. It is not enough to speak out. The United States should be willing to formally commit itself to preventing and punishing the crime of genocide.●

● Mr. FROST. Mr. Speaker, a few weeks ago we met in these Chambers to honor those courageous survivors of the Holocaust who recently gathered in Washington. At that time we expressed horror and outrage at those atrocities of 40 years ago and stated with great resolve that they would never be forgotten, Indeed, I do not fear that they will be forgotten, for today what were once considered unspeakable horrors—the crimes committed by the Nazis against humanity—provide material for best-selling novels and made-for-television movies. I do not object to these artistic endeavors, in fact I applaud those who seek to educate the public about this blight on our recent history. My only fear is that we will lose sight of the fact that these words and these pictures are merely pale imitations of a stark and horrible reality. I am afraid, not that we will forget, but that we will grow complacent.

And I believe we have grown too secure in our belief that another Holocaust could not occur today; for if we look around us we see that one has occurred. The execution of Cambodian citizens by that country's government from 1975 through 1979 reached proportions that are as startling as they are horrifying. Each Member of this body should walk to the Rotunda of the Cannon Building to view the photo exhibit "Cambodia Witness." It is a grim reminder of the need for constant vigilance in the safeguarding of human life and dignity.

Let us, then, put an end to complacency. As Members of the greatest legislative body in the world, we have a unique opportunity, as well as a weighty responsibility, to insure that the most basic human right is protected. All of us must examine our values and make a new and even stronger commitment that the gruesome mis-

takes of the past will never be repeated. Let us stand firm in our resolve that our children will lose no more of their heritage to senseless killings. Thank you.●

● Mr. LEVINE of California. Mr. Speaker, we are here today to take part in a special order on the crime of genocide. Note I said the "crime" of genocide. It was not until December 1948, when the U.N. General Assembly adopted the Convention on the Prevention and Punishment of the Crime of Genocide, that genocide was designated an international crime. That was after the systematic and brutal extermination of 6 million Jews by the Nazis and of 1½ million Armenians by the Turks.

The U.N. Genocide Convention defines "genocide" as a number of acts "committed with the intent to destroy, in whole or in part, a national, ethnical, racial, or religious group," including killings, and "deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part." While the slaughter of the Armenians and Jews are the most familiar examples of genocide, the systematic murder of people is carried out by governments of many countries, even to this day. Such killings have occurred in Cambodia, El Salvador, Uganda, the Soviet Union, Syria, Guatemala, Central African Empire, Afghanistan, Equatorial Guinea, the Philippines, Iran, Argentina, Chad, Chile, Namibia, Columbia, India, Libya, Burandi, Bolivia, and Ethopia. Gil Elliot, in a book titled "Twentieth Century Book of the Dead," published in 1972, estimated that over 100 million people were killed in the first 70 years of this century.

This number is so great that it is almost impossible to comprehend—over 100 million people murdered—their most fundamental human right life itself extinguished, denied absolutely and forever.

On this solemn occasion we remember these people, and we reaffirm our commitment to preventing future tragedies. Whether we call it genocide, holocaust or extermination, it is a vile and heinous crime against all humanity. The taking of even one life is a sacrilege, the taking of a million lives a profanation of unspeakable magnitude.

We must never forget what has gone before, and we must realize that it can happen—and it is happening—now. We must be ever vigilant in our defense of the most sacred of all rights—the right to life, and we must seek to protect it for the future of all mankind.●

● Mr. ACKERMAN. Mr. Speaker, I would like to thank my distinguished colleagues, Representatives FERRARO, LANTOS, LEACH, and PORTER, for organizing this important and necessary special order on genocide.

Less thoughtful people might say that this Congress has overdone genocide this month, beginning with the special order on the Holocaust survivors in early April and proceeding to the order on Armenian Martyrs Day a couple of weeks ago. But most people will realize that as long as there are those who deny that such horrors ever took place, as long as there are recurrences of such tragedies—as in the recent mass executions in Cambodia—such orders will be necessary.

It is incredible, especially on such a beautiful May afternoon, that there is a place in our language for even the concept of genocide: the deliberate and systematic destruction of a racial, political, or cultural group. But the fact that the word and the deed continue to exist means that we can never rest until it is eradicated.

I would like to urge my colleagues to take a minute to cosponsor three resolutions which have been introduced in the House and which affirm our commitment to fighting genocide.

The first, by Congresswoman FERRARO, House Resolution 50, urges the United States to ratify the Convention on the Prevention and Punishment of the crime of Genocide. The second, by Congressman PASHAYAN, House Resolution 171, affirms the occurrence of the Armenian genocide. And the third, by Congressman ROE, House Joint Resolution 42, establishes a National Day of Remembrance of Man's Inhumanity to Man.

In reality, every day should be a day of remembrance. We as elected representatives of the people have a responsibility to work for generations past, present and future. And until genocide is an event of ancient history, we shall not have completed our work.●

● Mr. LENT. Mr. Speaker, I rise today to join my colleagues in calling attention to the horrible crimes against humanity which have been committed during this century. Despite our advancements we have, Mr. Speaker, seen all too many occasions of man killing his fellow man. Genocide, Mr. Speaker, is a horror that must be stopped.

Anyone who has stopped for only a few brief moments in the rotunda of the Cannon House Office Building, cannot help but be struck by the display exhibited there known as "Cambodia Witness." Sponsored by Amnesty International, this stark and sad example of recent history depicts the frightening realities of the millions of murders carried out by the Communist Government of Cambodia against its own people.

The pictures show for all the world to see the remains of men, women, and children, innocent victims of a brutal regime lacking any respect for the sanctity of human life. This grim, heart-rending display cannot help but kindle in our hearts a sense of outrage over the senselessness of such killings.

Through this exhibit, and the recent observances of Holocaust Memorial and Armenian Martyrs' Day, we have been reminded of the need to maintain vigilance in defense of the most basic human right—the right to live in peace.

Mr. Speaker, it is essential that the grim story of such terrible crimes against humanity be told again and again so that they are not permitted to recur. It is with this thought, Mr. Speaker, that I join my colleagues in this special order on genocide.●

● Mr. MINETA. Mr. Speaker, today, I join those demanding vigilance against genocide. The systematic elimination of a group of people for religious, racial or political reasons is a tragic, hideous violation of human rights.

It is sad but true that genocidal murders have marked the history of the 20th century. We must recognize this harsh truth and respond by combating the evil hatred which leads to genocide.

The U.S. Senate could take one important step in this struggle by ratifying the Convention on the Prevention and Punishment of the Crime of Genocide. This important ratification would serve as a significant affirmation of our Nation's determination to prevent genocide. Yet we must do far, far more.

Each American should personally and actively participate in efforts to insure that there will never again even be an opportunity for genocide.

As a nation and as individuals, we must work to protect civil rights around our world, around our country, and around our community. We must not be passive when we face prejudice or see racist scapegoating, for these are the evil seeds that precede genocide.

Our painful recognition of the horrors which occurred in this century must help us end indifference to the fate of others. Today and forever, let us offer the vigorous action necessary to prevent the hideous crime of genocide.●

● Mr. DWYER. Mr. Speaker, today we pause to record our deep concern over the crime of genocide. It is a crime that has touched many groups all over the globe, and we must continue to raise our voices to decry this worst of all crimes.

In recent months, we have had the opportunity to focus on the injustice and tragedy perpetuated by this systematic persecution, exile, and ultimate massacre.

On Armenian Martyrs Day we took note of the 1.5 million Armenians who suffered death or deportation at the hands of the Ottoman Government. This, the first genocide of 20th centu-

ry Europe, still demands our attention and a full accounting of this crime.

That history repeated itself less than two decades hence in the form of the Holocaust, is a telling reminder that we must remain forever vigilant against such crimes.

We were all duly moved by the presence here of 10,000 American Holocaust survivors last month, moved not only by the magnitude of their suffering, but equally compelled by the strength and conviction with which they emerged from a period of darkness that to most is still incomprehensible.

What these survivors brought forth is a dedication and commitment which remains a source of strength in our continuing efforts against persecution in other parts of the world.

This year also marks the 50th anniversary of the manmade famine in Ukraine where over 7 million persons perished under a genocidal Communist policy.

As a country dedicated to freedom, we must keep a most watchful eye on the threat of genocide and keep the enforcement of human rights and civil liberties in the forefront of our foreign policy choices.●

● Mr. LANTOS. Mr. Speaker, what is the face of genocide? How can anyone deal with what is, to most, an abstract concept?

I suggest the faces of genocide can be found anywhere. Faces without particular distinctions. Men and women and children, who work, who play, who spend time with their families, who try to make the most of their brief time on this Earth.

Look around this Chamber. Look out on Independence Avenue, at the hundreds of visitors who come daily to the Capitol. Ask yourself, how are we so different from those who lived in villages in Turkey in 1914?

How are the people on the street outside so different from those in Berlin, or Warsaw, or Budapest? How are they different from people in Uganda, or Iran?

How is it that people in those places in those times were set upon by their governments? What crime did they commit? What act brought the wrath of their rulers down upon their heads?

The answer is simple. Their crime is that they were born. Born as Armenians. Born as Jews. Born as Buddhist, or Chinese, or Baha'i.

In life, they were similar. So, too, are they in death. There is a shattering exhibit of photographs of the atrocities and genocide in Cambodia on display in the Cannon rotunda, showing some of the work of the Pol Pot regime, which ruled that country between 1975 and 1979.

Take a look at the mass graves, at the bones, at the skulls still covered with blindfolds. Can anyone tell the difference between the contents of those graves, and the ones in Europe. I do not think so.

Genocide is a universal evil, defying time and place. Talking about millions killed here, millions killed there, which government ruled here, which ruled there—while descriptive, cannot reflect the true face of genocide.

That is found only in looking, one by one, at the victims, and trying to figure out who they were and why they are dead.

We may not be able to do much in some instances to prevent genocide, Cambodia stands out as one example. But we should not shrink from the opportunity to speak out against it, by whatever means we have.

There is a treaty, the United Nations Genocide Convention, which has been ratified by 85 countries. The United States stands out as a significant exception. One can make all sorts of political arguments why we should not sign it, but I daresay none of them stand up when one looks into the faces of the survivors, and at the remains of a society decimated by a government's ultimate brutality to its people.

Let us make an all-out effort to ratify this treaty, to oppose genocide. This Nation must not forget the face of genocide.●

● Mr. FRANK. Mr. Speaker, the great enemy of genocide is memory. In taking out this special order, my colleagues have assured that the massacres and pogroms of this century are not forgotten. Further, as long as the horrors of this and other centuries remain clear and vivid in our national conscience, the hope of preventing future genocides is advanced.

Two weeks ago, at the first American gathering of Jewish Holocaust Survivors, thousands of survivors and their children gathered in Washington to bear witness to the memory of their ordeal. As one of the participants reflected as she surveyed the crowd at one of the gathering's events:

Perhaps no one can truly understand what these people experienced or be with them in their innermost thoughts, but we must reflect on this time in history, the message it presents to us today. And not forget.

The author of these thoughts, Lesley Weiss, is the daughter of an Auschwitz survivor and currently serves as the assistant director of the New England Anti-Defamation League. She joined her mother in Washington in fulfillment of her belief that the new generation should neither forget nor be indifferent to their "grim heritage." In this spirit, I have entered her essay into the RECORD in order to give fuller meaning to our shared goal of preventing future acts of genocide.

[From the Christian Science Monitor, May 2, 1983]

A DAUGHTER AT THE GATHERING

(By Lesley Weiss)

As I looked around the Capital Centre, the cavernous sports arena filled with 15,000 people—Jewish survivors of Hitler's rampage through Europe and their children—I wondered aloud to my mother: "It's hard to believe that even more than this number of people were murdered." My mother looked at me. "I saw this number of people walk into the gas chambers every day in Auschwitz."

We were attending the first American Gathering of Jewish Holocaust Survivors April 11 to 13 in Washington. A reunion bringing together people originating from many different countries in Europe speaking many languages from all walks of life, all sharing a grim heritage.

The survivors gathered to sustain a dark memory. They brought their children to ensure that the new generation would remember and not be indifferent.

They came to find anyone who had information about friends, townspeople, and most of all to find witnesses who might provide an account of how family members perished in the extermination camps and prisons. The events surrounding their deaths are most often unknown.

They found comfort in being with each other, shedding the public posture usually reserved for the rest of the world to whom the Nazi horrors are a mere historic event.

As I looked at the aging faces, I was struck with the realization that the collective experience of pain in their hearts and memories encompasses every kind of cruelty that man has ever inflicted on his fellow man. This shared memory united this diverse remnant of European Jewry.

Throughout the week, we listened to scholars and poets, community leaders, and elected officials try to interpret those events. The survivors exhibited the greatest surge of emotion when speaker after speaker praised the United States for giving them a home and a chance to rebuild their lives. They were equally emotional when they heard Israel's safety and security reaffirmed. Because it is these people who really understand what the absence of a Jewish homeland meant to the Jews in those years of annihilation.

And they were moved by the Americans public's recognition of this tragedy. I heard the sentiment expressed several times: "The death camps were to be the end of evil, strife, war and distrust in the world." Its sheer magnitude was to make these concepts obsolete. But, on the whole, the world ignored the Holocaust and the survivors and generally did not acknowledge the events that took place.

It is the creation of Israel and the knowledge that there is a country that will never close its doors to Jews from anywhere should there ever be a need which provide some measure of consolation to these survivors of the Holocaust.

They have witnessed the world fall around them in Europe, and they came to this country to rebuild their lives. Since then they have had children, pursued careers, and continued living.

As I watched my mother and her few surviving family members among the thousands of people like them at the gathering, I thought about the responsibility that remains.

Perhaps no one can truly understand what these people experienced or be with them in their innermost thoughts, but we must reflect on this time in history, the message it presents to us today. And not forget.●

● Mr. LEACH of Iowa. Mr. Speaker, I am pleased to join my distinguished colleagues, Mr. PORTER, Mr. LANTOS, and Mrs. FERRARO, in sponsoring this special order today.

When faced with the dark history of genocide, it is no longer simply enough to remember. The holocausts of the 20th century have victimized the Armenians, the Jewish peoples of Germany and Eastern Europe, the Cambodians, the Ugandans, the Chinese in Indonesia, the Hmong in Laos, as well as the Baha'i of Iran. The memory of these tragedies will haunt us forever.

The right to human life itself is the most basic right all of us claim as human beings on this Earth. It is the first and foremost of those inalienable rights upon which our forefathers, in the Declaration of Independence, established the right to revolt and establish a new nation. Any government which treads on these rights faces the righteous wrath of its subjects and its neighbors in the world community.

International human rights instruments of the 20th century have amplified the universality of the right to life we enshrine in our own political history in such documents as the Universal Declaration of Human Rights.

However, one of the most important human rights conventions to emerge from the ashes of World War II—the Genocide Convention—today stands unratified by the United States. Yet, as my colleagues know, the United States was instrumental in the drafting of this convention in those years immediately following World War II and the discovery of the horrors of the Nazi Holocaust. Every administration since then—Republican and Democratic alike—up until this administration which has not yet taken a position, has supported its ratification. It has been favorably reported by the Senate Foreign Relations Committee no less than four times and in 1974 managed to get 55 votes in an effort to break the filibuster, but still has not garnered the necessary two-thirds vote for ratification.

During the last Congress, the Senate Foreign Relations Committee once again held hearings on the Genocide Convention, at which time the distinguished Republican chairman of that committee stated:

I support ratification of the Genocide Convention . . . It remains today what it was at the time of its original negotiation: an important statement by the nations of the world that those who would perpetrate the unspeakable crime of trying to exterminate a national, ethnic, racial, or religious group must not be allowed sanctuary anywhere in the world. . . . It forms a general network of treaties which declare certain actions to be international crimes, justifying concerted action by all countries to bring the perpetrators to trial. However new and untried this concept may have seemed to the Senate in 1949, there is nothing radical or unusual about it today. Just last summer, the Senate approved by a vote of 98-0 two treaties which provide for just such international action, the first against those who take hostages for political purposes and the second against those who divert nuclear materials for unauthorized use. . . . If we can agree to condemn and seek to punish such violators of international law, why should we not agree to treat the perpetrators of genocide in the same manner?

In the early days of this administration, Secretary of State designee, Alexander Haig noted in response from a question in his confirmation proceedings regarding the Genocide Convention:

Ratification of the Genocide Convention would unquestionably be helpful in various international fora where the United States has been critized for its failure to ratify the Genocide Convention. This is ironic because the United States was a leader in the post World War II effort to conclude this Convention. . . .

Later that year, in confirmation hearings, the nominee to be the new Assistant Secretary of State for Human Rights and Humanitarian Affairs, Elliott Abrams, told the Senate Foreign Relations Committee that the Genocide Convention and related treaties would be a high priority when he assumed office. He said:

As soon as the Bureau is fully staffed, my first priority is going to be to study those treaties and conventions and try to get some decisions . . . My own predilection is to have the United States sign and ratify treaties such as the Genocide Treaty, not because they are going to have any effect within the United States, where we are well beyond the minimum standards that these treaties would impose, but really because they have a certain standing in the international community and it is an embarrassment to us in some cases if we do not ratify when many other countries do. I have not given the Genocide Treaty the intensive study that I intend now to give it. But it would be my hope that no problems arise in the review of it which would prevent me from reaching the conclusion that ratification is possible.

On this occasion when we recall the horrors of this most egregious of human rights abuses, I would urge the President to take a strong affirmative stand in favor of ratification. It is a small but important step that can be taken to help insure this world will never again witness mass murder on such scale.●

● Mr. SUNIA. Mr. Speaker, in whatever forms it might take the crime of genocide—the systematic, planned annihilation of an ethnic, racial, political or cultural group—is one to the most heinous and vicious dark sides to human group behavior yet discovered in mankind's nature.

The 20th century is replete with examples of this from the Holocaust against the Jews during World War II, the massacre of Armenians, and recent events in Cambodia in Southeast Asia.

Even in our own country over the last several centuries things have not always been exemplary in the defense of civil rights of our citizens and have only recently been redressed and realined in view of human dignity and equal rights and privileges for all our citizenry.

The crime of genocide is especially atrocious as it singles out one group for its attack. We all should be very alert and reaffirm our basic human values and maintain extreme vigilance concerning any movement, whether within our own country or without, toward any insidious drift toward this unspeakable crime against all of humanity. It must be prevented throughout the world and not allowed to happen again anywhere on Earth.●

● Mr. EDGAR. Mr. Speaker, all too often we find ourselves witness to the most pointless examples of destruction and violence. Acts of terrorism, assassinations, and instances of random brutality have become frighteningly commonplace. And yet. as terrible as these senseless cruelties are, infinitely more horrifying is the cold and calculated extermination of a people. It is this, the ultimate crime of genocide, on which we focus today.

Between 1915 and 1917, 1½ million Armenians died at the hands of their Ottoman overlords. The extreme suffering endured by the Armenian people, coupled with the cruel and cynical policies pursued by the Turkish Government at this time, mark the Armenian massacre as the first genocide of the 20th century. This grim distinction was not sufficient to forestall the occurrence of additional cases of genocide during this century, however. Indeed, the genocide of the European Jews during World War II eclipses all others in the scope of its depravity. This planned and systematic extermination of millions of innocent people stands as a monument to mass hysteria and intolerance. Even today, the cruelty of the Holocaust is largely incomprehensible. This most horrible of crimes against humanity was not to be the last, however. As recently as the 1970's, the Cambodian Government of Pol Pot carried out a program of mass executions against its own people. Once again, the world was shocked by another example of organized brutality of huge proportion.

Sadly, there is no lack in modern history for documented cases of genocide. The examples I have cited are among the most terrible of these, but are by no means the only ones. The victims of genocide number in the millions.

There are some who think it best to put the memory of these atrocities behind us. The wounds are deep and the memories painful. And yet, even as

the grass grows over the graves and the horrors recede into the past, we must never allow ourselves to forget the millions whose suffering and death were a result of man's inhumanity to man.

Clearly, reparation can never be made for the suffering inflicted upon the victims of genocide. At the same time, we can and must act to insure that such tragedies are never repeated. George Santayana once warned that "those who do not remember the past are condemned to relive it." We must remember the Armenians, the Jews, the Cambodians, and the millions of others in whose name we pause to reflect today.●

● Mr. BATES. Mr. Speaker, I rise today to speak of the crimes of genocide committed in the 20th century. It is a plain fact that decade after decade horrors are perpetrated on the peoples of this world. This has been true from Armenia to Germany to Cambodia. But revulsion in and of itself can accomplish little. We must remember our painful duty to share the lessons of history with our children and generations yet unborn.

Why are we so insistent on calling attention to atrocities that happened many years ago? The answer is very simple. If decent and humane people of this world do not remember the savagery that has taken place, history will repeat itself. Adolph Hitler once explained how the Third Reich could commit its atrocities by saying, "Who still talks nowadays of the Armenians?". You can be sure that we still talk nowadays of the Jews.

We will never lower our voices, as individuals and as a nation, in support of peoples around the world who are struggling to break the yoke of brutal regimes. Violence has become a part of the daily diet of mankind. Daily, we hear the cries of those individuals who struggle for freedom. Let us make sure that we never lower our voices in their support.●

GENERAL LEAVE

Ms. FERRARO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

GENOCIDE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. PORTER) is recognized for 10 minutes.

Mr. PORTER. Mr. Speaker, we meet today to discuss the most frightening abuse of human rights known to man—genocide, the deliberate and systematic destruction of a racial, political, or cultural group. What is even more frightening is that fact that we have seen three acts of genocide in this century. We must never forget and we must make certain that such acts never occur again.

Last night I was part of a program that depicted the horrors of this destructive violation of human rights. Amnesty International presented a photographic display entitled "Cambodia Witness." The exhibit depicts the intentional and deliberate attempt of the Khmer Rouge to eliminate various population groups in Cambodia. Through mass murders, executions, and evacuations of thousands of people, Cambodian society was shattered. The terror of this destruction is heightened by the fact that it occurred during the last decade.

The theme is exemplified in the title of the exhibit, "Cambodia Witness." The text of the exhibit defines witness as "knowledge, understanding and wisdom." So many people try to deny that they were witnesses to this and other grotesque acts of genocide. Yet our history books prove that we knew what had happened. History tells about the Armenian genocide in World War I. This tragic sequence of events began with the execution of 300 Armenian leaders in Turkey in 1915, and ended in 1923 with more than 2.5 million Armenians—men, women, and children—dead, many from internment in concentration camps. A tragedy of this magnitude would surely be thought one of the most infamous events in all history. When it ended the people cried out that we would never allow such violations against human life to happen again. We said then that we understood.

But as Hitler moved into his "final solution," genocide against the Jews in World War II, it was clear that the world had forgotten. Hitler himself said "Who, after all, speaks today of the annihilation of the Armenians." After 6 million Jews were killed, what has been described as the darkest age of mankind was said to be over. And the world cried out that never again would we allow such violations against human life to happen. Again we thought we understood.

And yet the knowledge of what happened and our repeated declarations that we understood the need to stop genocide from reoccurring—in any form, in any place, against any peoples—lacked the wisdom to stop a third act of genocide—the killing of over 1½ million Cambodians, not years and years ago, but between 1975 and 1979.

We are witnesses to all these atrocities. It is we—you and I and all caring human beings—who must take the responsibility to assure that it will truly never happen again. Today we are reminded of our role as a witness to genocide. And as witnesses we realize the need to combine knowledge, understanding, wisdom and our collective wills and commitment to assure that the right of a people to live is never again violated.

As cofounder of the Congressional Human Rights Caucus, I, together with the other 110 members of the caucus, will continue to focus attention on these crimes against humanity. The caucus is dedicated to ending violations of human rights abuses wherever they are found in the world and to emphasize the responsibility of Congress in furthering for all peoples the principles of individual freedom on which our country was founded.

It is time to return the value of human rights to the highest priority in our relations with the world at large and to assure that such grotesque violations of human rights are part of our past.

I urge my colleagues to accept the full definition of a witness—we know genocide has happened, and we understand the need to stop this destructive act. Let us now use our wisdom and our strength to end genocide once and for all. Let us not forget that all these acts which I have mentioned occurred in this century and let us fulfill our responsibility to draw public attention to them again and again so that we and generations to come will shrink in horror from them and will do everything possible so that all men and women are free from persecution, free from discrimination and free from the threat of genocide or indeed from any violation of their basic rights as human beings.

TRIBUTE TO THE LATE HONORABLE E. ROSS ADAIR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. COATS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. COATS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include therein extraneous material on the life, character, and public service of the late Honorable E. Ross Adair.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. COATS. Mr. Speaker, it is with both sadness and appreciation that I rise today to pay tribute to our fallen comrade, the late E. Ross Adair, who served in this body so well for 20 years, from 1950 to 1970. It is sadness because we will all miss Ross, those who knew him and those who served with him, those with whom he served and those whom he served. All of us

will miss Ross and miss him in a way that we cannot describe.

But we also rise today in appreciation, in appreciation for the very full life and very rich life that he lived. Those who had the privilege of knowing Ross, know that he left something of himself with everyone whom he met, and it is that appreciation that we want to express today.

Ross served, as I said, for 20 years in this body. He was a predecessor of mine and served the Fourth District of Indiana and served it very well. Born on December 14, 1907, the son of a newspaper editor and a school superintendent, he graduated from Albion High School in Albion, Ind., and then went to Hillsdale College in Hillsdale, Mich., where he received his bachelor's degree, and later to George Washington University Law School here in Washington where he received his law degree. Few know that Ross, during law school, saw the other side of life here on Capitol Hill as he served as a Capitol policeman during that time, paying his way through school and earning his law degree.

□ 1900

In World War II he distinguished himself and was awarded battle stars for the Normandy, northern France, the Ardennes, and central European campaigns, and then he was elected to the House of Representatives for 10 consecutive terms, between 1950 and 1968.

In 1971 President Nixon appointed Ross as Ambassador to Ethiopia, a post which he held until 1974, when he resigned to return to his law practice in Fort Wayne.

In his 20-year term in Congress, Ross Adair served first as ranking member of the Veterans' Affairs Committee and then as ranking member of the Foreign Affairs Committee, where he was especially involved in issues involving Africa and the Middle East. Those who knew Ross know of his intense interest in worldwide and foreign affairs and his involvement with embassy people and people from all over the world and of his special contribution in that area.

Ross and his wife Marian, who was also very involved here in Washington and who made some great contributions to this city, visited Washington often after Ross returned to Fort Wayne. He was always here for Members Day, whenever his health permitted. He always stopped by the office and always had a word of encouragement. One thing that marked Ross was that never a negative word came forth; there was also positive encouragement.

At the age of 75, on May 7 of this year, congestive heart failure, which occurred less than 24 hours after going into extensive open heart surgery, took the life of Ross Adair, and he is survived by his beautiful wife, Marian, his son Stephen, who serves in the law firm in Fort Wayne, and his daughter, Caroline Dimmers, of Hastings, Mich.; and five beautiful grandchildren.

I had the privilege of being one of five who paid tribute to Ross, not at his funeral, but at a celebration of appreciation for his life. Doug Coe, whom many of us know here as the founder of the National Prayer Breakfast Group, something that Ross was intimately involved in, flew out to Fort Wayne and paid tribute to Ross. I would just like to quote from one thing that Doug said:

> He cared deeply about the needs of others. His love and devotion to Jesus Christ made him like that. He knew that love for God is found in love for people.

Orvas Beers, Ross' law partner since 1948 in the firm of which Ross was senior partner, and Allen County Republican Chairman for many, many years, and perhaps Ross' closest friend in Fort Wayne, said this:

> He had a tremendous effect on the Republican Party and on all of us involved. He was a kind, compassionate, and complete Christian.

And I think this is a special tribute to Ross and the kind of person he was. Orvis Beers said, "We used to say, 'he's the kind of person we all should be.'"

That says a lot to sum up the kind of person Ross was, "the kind of person we all should be."

Rev. Howard Brown, the pastor of Ross' church in Fort Wayne, the Forest Park United Methodist Church, which Ross joined in 1934, and George Roche, president of Hillsdale College, also gave tribute to Ross. So it was a special moment yesterday in Fort Wayne when many people, more than 300 people, gathered together to honor Ross Adair and the life he lived.

Ross was a great help to me personally. He helped me in the campaign, I was a young, naive, inexperienced candidate running for office for the first time, and he was willing to take me aside and give me advice and give me encouragement. He helped me along the way, and afterward, ever the statesman, Ross never called, never forced himself on me, but was always there and always available for advice whenever I asked—and I asked often. His visits to Washington always resulted in a stop by the office. He would ask, "how are your doing? Anything I can do to help?" He always had a good word of encouragement.

His wife, Marian, was always by his side, and Marian, who made such an important contribution along with Ross—they were truly a team—will continue his work and continue the things he has done. She left a real legacy in Washington also. Her involvement with the international community, her involvement with the embassy people, and Ross' involvement with people around the world from his service in Ethiopia will long be remembered.

Ross proved that you did not have to be negative and you did not have to run someone else down in order to be a successful Congressman. Ross conducted the kind of campaign we all should conduct. He was always decent, always positive, and always speaking about his positive contribution and never running his opponent down. In fact, one of the tributes paid to Ross was from Ed Roush, the Member who succeeded Ross in 1970. He said that of all the campaigns he ran in, the two campaigns in 1968 and 1970 were as decent as any he was ever in.

Ross leaves us a legacy. He is an example, as Orvas Beers said, of what we all should be.

Mr. Speaker, I know there are a number of Members who want to say a few words, and I would be happy to yield to them at this time.

Mr. LATTA. Mr. Speaker, will the gentleman yield?

Mr. COATS. I am happy to yield to the gentleman from Ohio.

Mr. LATTA. Mr. Speaker, I thank the gentlemen from Indiana for giving us an opportunity to express our sadness at the loss of one of our former colleagues, E. Ross Adair. He will be missed—by his family and by all those with whom he served. I was honored to be able to call him my friend.

Ross came to Congress in 1950, and during the two decades he served, steadily he moved to the forefront, rising to the post of ranking Republican on the House Foreign Affairs Committee and serving as well on the Veterans' Affairs Committee and the Committee on Committees.

As the most senior Republican on the Foreign Affairs Committee he was a leader and a guiding light to those who served with him. I came to know and respect him as a man of his word and a man of deep conviction.

Mr. Speaker, Ross Adair served his country well—as a highly decorated World War II veteran; as the Representative of the Fourth District of Indiana for 20 years and as Ambassador to Ethiopia.

We all know Ross loved America. He loved Indiana. For 20 years he poured out his heart and soul in the public arena for the good of this Republic. He gave to America much more than he ever asked in return. His patriotism and belief in the greatness of America never wavered.

The people of Indiana and indeed the entire Nation were the beneficiaries of two decades of distinguished congressional service from Ross Adair. This service will be long remembered.

I join with his family, his many friends, and this Nation in mourning his passing.

Mr. HILER. Mr. Speaker, will the gentleman yield?

Mr. COATS. I yield to the gentleman from Indiana.

Mr. HILER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I first want to commend the distinguished senior Republican of the Indiana congressional delegation, JOHN MYERS, and my good friend and colleague, DAN COATS for thoughtfully arranging this special order. Ross Adair was one of the most distinguished members ever to have served in this House.

I have never had the opportunity to know Mr. Adair personally. But I know the legacy he has left for those of us in the Indiana congressional delegation to carry on.

Ross Adair's record is one which each of us should try to emulate. He was a dedicated public servant. He persevered on behalf of his Nation, his State, and those whom he represented so well during his 20-year tenure in this body. I am honored to be a small part of the Hoosier State's rich heritage of legislative service, a heritage Ross Adair largely crafted.

Being one of the younger Members of this House, I have a special appreciation for those colleagues and former colleagues of mine who have accumulated tremendous records of service. I am awed and inspired by Ross Adair's record of service. He served his country in war. He served his country in Congress. He helped lead this Congress during a critical time in our Nation's history, as the ranking Republican member of the House Foreign Affairs Committee. He represented this country as Ambassador to Ethiopia after his service in Congress ended. And he continued his service up until his death.

The outstanding quality of statesmanship that my good friend DAN COATS and his predecessor, Senator DAN QUAYLE, have provided this Nation I know is due in large part to the example set and counsel provided by Ross Adair.

My heartfelt sympathies to the Adair family during their time of loss. I yield back the balance of my time.

□ 1910

Mr. GONZALEZ. Mr. Speaker, I came to the Congress, that is, I was sworn in on January 8, 1962. Mr. Adair was one of the first who even though belonging to the other party came over and pointed out that he was a 6-term occupant of the House of Representatives and revealed himself to be not only friendly, but very helpful.

I think every one of us serving here remembers vividly his first day of arrival and what it means to have a friendly countenance and a friendly hand.

Then, of course, the following 6 years, I had the privilege of serving with Mr. Adair and I got to know him a little bit better, certainly a lot more than the average that one has the opportunity to really get to know in a body of 435 Members.

He always revealed himself, indeed, as a true gentleman, what I always identify in my mind as a symbol of what I call, whatever that image formed in my mind is, I call it the "Old Stock American."

He was very genial and I always thought reflected a high level of official comportment as a Member of this House. It is with sincere and deep regret that I hear of his passing and wish to convey to his family and to those that belong to his family, his loved ones, my sincere condolences at his passing.

Once again, I thank the gentleman for giving us the opportunity to say these few words.

Mr. COATS. Mr. Speaker, I thank the gentleman from Texas for those words and reminiscences that he has of serving with Ross Adair in this body and providing us some insights as to Ross's conduct that we all know about and appreciate so much.

Ross leaves a real legacy and it is a privilege for me to be able to follow in that legacy, to serve the people that Ross served, to walk where he walked and talk to the people he talked to.

I just know that he is listening today and I want him to know that it is a great privilege to follow him and walk in his steps. I know that as I do walk in his steps, I will serve the people of the Fourth District of Indiana very well.

● Mr. QUILLEN. Mr. Speaker, it is with sadness that I join my colleagues in remembering our friend former Congressman E. Ross Adair, who passed away last Saturday.

Congressman Adair was a fine man and a fine public servant. I was privileged to serve in the House with Ross Adair for 8 years and recall his many efforts on behalf of his constituents in Indiana. He was an outstanding representative for his district, and he also served with distinction as the ranking minority member of the House Committee on Foreign Affairs.

Following his 20 years of service in the House, Congressman Adair continued to serve his country as our Ambassador to Ethiopia.

Ross Adair was laid to rest yesterday afternoon in Fort Wayne. I am saddened by his passing and wish to extend my sympathy to his wife, Marian, and the members of his family.●

● Mr. MONTGOMERY. Mr. Speaker, I would like to join in paying tribute to one of our former colleagues, the Honorable E. Ross Adair of Indiana, who died last Saturday of congestive heart failure.

Ross not only distinguished himself as a Member of the House of Representatives from 1950 to 1970, but he also served this country as Ambassador to Ethiopia. His ambassadorship lasted until 1974 when he returned to his practice of law in Fort Wayne, Ind.

He became the ranking member of the House Foreign Affairs Committee and was a very knowledgeable and valuable member of that panel. I especially appreciate the work he did on the House Select Committee on U.S. Involvement in Southeast Asia. I was chairman of that House select committee and I can say that Ross made a great contribution to it.

Ross Adair spent most of his adult life in service to his State of Indiana and to this country. He was a great American and we shall miss him.●

● Mr. WINN. Mr. Speaker, I would like to pay tribute to a distinguished former Member of the U.S. House of Representatives and to a fine human being, E. Ross Adair. During his 20 years of service in the House, the honorable gentleman from Indiana rose to the position of ranking minority member of the Foreign Affairs Committee. However, more importantly, he used that position and his seniority in the House to promote legislation and policies that were sound, reasonable, and insightful.

Ross Adair earned wide respect and admiration throughout the membership of the House. I was among his many admirers who looked to his leadership. As one who was privileged to serve with Ross Adair in this body, I can say that there have been few who have demonstrated the compassion for people, the understanding of issues, and the strength of character of the gentleman from Indiana, E. Ross Adair. As we grieve his death, it is fitting that we remember his outstanding example of service and seek to achieve it in carrying out our own responsibilities as elected representatives.

Joan and I would like to extend our deepest sympathy to Ross Adair's lovely wife, Marian, and to his children, other family members, and friends.●

● Mr. MICHEL. Mr. Speaker, I am saddened by the report of the death of our good friend and former colleague, Ross Adair of Indiana. During 20 years in Congress, Ross demonstrated not only political ability of the first order, but personal qualities that endeared him to all of us.

He became ranking Republican member of the House Foreign Affairs Committee during a period when many critical issues emerged concerning our Nation's role in the world.

It is difficult under any circumstances to learn of the death of such a distinguished colleague. It is particularly difficult in Ross's case because, as his law partner put it, Ross was "a kind, compassionate and complete

Christian * * * the kind of person we should be."

Neither our Nation nor the State of Indiana can afford such loss. Our condolences go to his family and many friends.●

● Mr. BROOMFIELD. Mr. Speaker, "He was a kind, compassionate, complete Christian. . . . the kind of person we should be." That is how one friend of E. Ross Adair described the former Fourth District of Indiana Congressman who died of congestive heart failure on May 7 in Fort Wayne, Ind.

Ross Adair, who served for 20 years in the House, was the ranking minority member of the Foreign Affairs Committee prior to leaving the House at the end of the 91st Congress. He was respected by those of us who served with him for his grasp of foreign policy issues, his fairness, and consideration of the views of others.

In 1971, he was named Ambassador to Ethiopia by President Nixon, a post he held until 1974.

While a native of Indiana, Ross Adair attended Hillsdale College, Hillsdale, Mich., and George Washington University Law School in Washington, D.C. While in law school, Adair got his first taste of Capitol Hill by working part time in the folding room and as a Capitol Hill Policeman.

Adair was an active participant in various international parliamentary conferences, and his wife, Marian, was an active partner, giving special attention to international Christian leadership programs.

Following his retirement from Government service, Ross and Marian returned to Fort Wayne where he was a senior partner in the law firm of Adair, Perry, Beers, Mallers & Larmore.

In addition to his widow, he is survived by a son, Stephen, of Fort Wayne; a daughter, Mrs. Caroline Dimmers of Hastings, Mich., and five grandchildren.

To his family we extend our condolences on the passing of E. Ross Adair, a distinguished legislator, a conscientious public servant, and a devoted husband and father.●

● Mr. BOLAND. Mr. Speaker, I am pleased to join my colleagues in paying tribute to the late Honorable E. Ross Adair who passed away on Saturday May 7, 1983.

Those of us who served with Ross will always remember him as a fine legislator and friend. He had a tremendous record of public service, having served in the U.S. Army in World War II, as probate commissioner of Allen County Indiana, as a Member of Congress and as U.S. Ambassador to Ethiopia. Throughout his career, Ross distinguished himself as a compassionate and principal leader, and as a scholar of the law. I am sure that the people of Indiana and the entire Nation have been saddened by his passing. I extend my sympathy to Ross' family.●

● Mr. HILLIS. Mr. Speaker, I am most privileged and honored to have this opportunity to take part in a special order for a former member of this body from my home State, E. Ross Adair, who died last Saturday of congestive heart failure.

I had been well acquainted with his reputation for honesty and his abilities as a legislator even prior to my coming to Congress 12 years ago. I vividly recall that I had come to Washington as a member-elect at the same time Congressman Adair was preparing to leave. With a kindness and foresight which was characteristic of this man, he made a special effort to invite me into his office for a visit, even though he was busily preparing to close down after two decades here. I have never forgotten that visit, during which he gave me most helpful advice, and shared his viewpoints on life in the Capital, telling me what I might expect. It served me well throughout my own career here, and I am most thankful for having known this man. Our paths have crossed a number of times since that memorable first visit and I continued to have the pleasure of sharing his experiences and his warm friendship. His reputation for integrity was indeed a model to follow.

He was a most able servant of the people of Indiana's Fourth District for 20 years, and rose to the status of ranking minority leader on the House Foreign Affairs Committee. He later served as our Ambassador to Ethiopia for nearly 4 years, before returning to his native city and the practice of law.

I am proud to have known this man, a gentleman and a leader, a man who always walked tall among his colleagues as well as among his constituents.●

● Mr. BROYHILL. Mr. Speaker, I was saddened to hear of the untimely passing of my good friend, Ross Adair. When I came to Congress in 1963, Ross was one of the key Members of Congress that I turned to for advice and counsel. Ross was always most helpful. He was most patient to take time to explain the issues to a new Congressman and his advice was always sound. He and his lovely wife, Marian, were most kind to Louise and me, and we will always be grateful for their friendship.

Louise joins me in extending to Marian and the family our sincere condolences and deepest sympathy. Ross will be sorely missed.●

● Mr. ZABLOCKI. Mr. Speaker, like many of my colleagues who remember him with high regard and affection, I was deeply saddened to learn of the death this past weekend of the Honorable E. Ross Adair of Indiana.

Ross Adair was a distinguished and highly respected member of this body for over two decades, and it was my privilege to serve with him on the Committee on Foreign Affairs, both before and after he became ranking minority member.

Ross was a man of high integrity, deep personal conviction, and sound judgment, who made a strong and lasting impression on this body. As a practicing attorney in Fort Wayne for 18 years, as a representative of Indiana's Fourth Congressional District, and as an Ambassador to Ethiopia, he served his community, his constituents and his country with great honor and distinction.

A man of quiet dignity, great dedication and obvious sincerity, Ross Adair won many friends and admirers in this body. I remember well the numerous tributes which were paid to him on the House floor on the eve of his departure—as Members of every political persuasion expressed their admiration and respect for his outstanding public career. For someone of his modest inclination and disposition, it was undoubtedly an overwhelming, memorable—and, I should add—richly deserved experience.

To his wife, Marian and all members of the Adair family, I extend my deepest sympathy, together with a shared sense of loss over the passing of this great American.●

● Mr. ERLENBORN. Mr. Speaker, I would be remiss if I did not take a moment to pay tribute to E. Ross Adair, a former colleague and old friend, who passed away a few days ago.

When I came to Congress in 1965, Ross had already been here for 14 years, and I quickly learned that he had a vast knowledge of international matters he was willing to share. In the process, we became friends.

I remember well the many courtesies and warm hospitality he extended when I later had occasion to visit Ethiopia while he was our Ambassador there.

I hope his wife and daughter will find comfort in knowing that his friends in Congress have fond memories of Ross and will not soon forget this statesman.●

VOTER INTEREST AND PARTICIPATION ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 10 minutes.

● Mr. CORCORAN. Mr. Speaker, today, I am introducing legislation which is not a panacea for all the controversial effects of the various Federal election campaign laws passed since 1971. This legislation is, though, a beginning in our attempt to reassert the role of the major political parties and individuals in the political process. Now, I am opposed to the remedies

which have been introduced by my colleagues which would limit the ability of political action committees and others to contribute to candidates for Federal office. The growth of these political action committees (PAC's) is as a direct result of the vacuum caused by laws enacted during the last decade which have reduced the influence of both the Democratic and Republican Parties to contribute and expend funds in behalf of candidates for the Congress. Likewise, individuals, who under the 1974 FECA amendments were prohibited from contributing more than $1,000 to any candidate for Federal office per election, have seen their ability to influence elections erode with the burgeoning inflation rates of the 1970's and early 1980's.

What my legislation would do is encourage individual interest in the political process, and along with that, allow for the rebuilding of the political parties by giving them a greater part in the election of candidates to the House of Representatives and the Senate. In later special orders, I will further refine my remarks about this important topic.

At this point, Mr. Speaker, I would like to include a section-by-section analysis of the bill and insert the text of it:

Section 1: Short Title—"Voter Interest and Participation Act of 1983"

Section 2: This section would permit the mailing of absentee ballots for any Federal election to prospective voters and the returning of same without postage. This is similar to a bill which I introduced during the 96th Congress.

Section 3: This section amends the Internal Revenue Code of 1954 by increasing the tax credit for political contributions to candidates for various offices. It would adjust the tax credit from $50 to $200 for individuals filing their own returns, and from $100 to $400 for joint filings. The credit would remain at 50 percent of the total contributions up to the above stated limits.

Section 4: This provision also amends the Internal Revenue Code by applying the appropriate tax rate, rather than the highest tax rate, on investment income of national, state, and local political party committees.

Section 5: This section increases the ability of individuals to contribute to candidates or their principal campaign committees from $1000 to $3000 per election. This is a recommendation of the Harvard University Institute of Politics study conducted in 1979. The study, undertaken for the House Administration Committee, concluded that the FECA has had a major impact on how federal candidates and political parties operate. The study's major findings were that individual contribution limits have been set too low, forcing candidates to turn to PACs and their own personal wealth. This section also increases the amount that individuals and non-multi candidate political committees can contribute to political party committees. The limit, per calendar year is doubled, from $20,000 to $40,000. Finally, the aggregate sum that individuals can contribute to all political activities would be increased from $25,000 to $50,000 per calendar year. Provision (c) of this section would eliminate all contribution and expenditure limitations by a political committee of a political party with respect to candidates running for the Congress. It would keep in place all disclosure requirements of the political parties currently in the law.

Section 6: This section discusses the applicability of the above sections of the bill. All provisions become effective during calendar year 1984 or after the 1984 election cycle, depending on the specific section in the legislation.

H.R. 2976

A bill to increase voter participation by providing for free mailing of absentee ballots, improving tax credits for political contributions, and increasing certain campaign contribution and expenditure limitations, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Voter Interest and Participation Act of 1983".

SEC. 2. (a) Chapter 34 of title 39, United States Code, is amended by adding at the end the following new section:

"§ 3406. Mailing of absentee ballots for Federal elections

"(a) Except as provided in subsection (b) of this section—

"(1) absentee ballots for any Federal election, voting instructions for such ballots, and return envelopes for such ballots sent to voters by State or local election authorities; and

"(2) such absentee ballots returned by voters to State or local election authorities;

may be mailed free of postage.

"(b) Any matter mailed under subsection (a) of this section shall bear the words 'Absentee Ballot—No Postage Necessary', or words to that effect specified by the Postal Service, in the upper right-hand corner of the address area.

"(c) This section shall not apply to mail matter transmitted under the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc et seq.) or the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd et seq.).

"(d) As used in this section—

"(1) the term 'Federal election' means a general or special election held solely or in part for the purpose of electing any candidate for the office of President, Vice President, Presidential elector, Senator or Representative in, or Delegate or Resident Commissioner to, the Congress; and

"(2) the term 'State' means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.".

(b) The table of sections for chapter 34 of title 39, United States Code, is amended by inserting after the item relating to section 3405 the following new item:

"3406. Mailing of absentee ballots for Federal elections.".

(c)(1) Section 2401(c) of title 39, United States Code, is amended by striking out "3403-3405" and inserting in lieu thereof "3403-3406".

(2) Section 3627 of title 39, United States Code, is amended by striking out "3403-3405" and inserting in lieu thereof "3403-3406".

SEC. 3. Section 41(b)(1) of the Internal Revenue Code of 1954 is amended—

(1) by striking out "$50" and inserting in lieu thereof "$200"; and

(2) by striking out "$100" and inserting in lieu thereof "$400".

SEC. 4. (a) Section 527(h)(1) of the Internal Revenue Code of 1954 is amended by inserting after "principal campaign committee" the following: "or a committee established and maintained by a political party".

(b) The subsection heading for subsection (h) of section 527 of the Internal Revenue Code of 1954 is amended by inserting after "COMMITTEES" the following: "AND POLITICAL PARTY COMMITTEES".

SEC. 5. (a) Section 315(a)(1) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(a)(1)) is amended—

(1) in subparagraph (A), by striking out "$1,000" and inserting in lieu thereof "$3,000"; and

(2) in subparagraph (B), by striking out "$20,000" and inserting in lieu thereof "$40,000".

(b) The first sentence of section 315(a)(3) of such Act (2 U.S.C. 441a(a)(3)) is amended by striking out "$25,000" and inserting in lieu thereof "$50,000".

(c) Section 315 of such Act (2 U.S.C. 441a) is amended by adding at the end the following new subsection:

"(i) Notwithstanding any other provision of this Act no limitation shall apply to contributions or expenditures by a political committee of a political party with respect to an election for the office of Senator or Representative in, or Delegate or Resident Commissioner to, the Congress.".

SEC. 6. (a) The amendments made by section 2, section 5(a)(1), and section 5(c) shall apply to elections taking place after December 31, 1984.

(b) The amendments made by section 5(a)(2) and section 5(b) shall apply to calendar years beginning after December 31, 1983.

(c) The amendments made by section 3 shall apply to contributions paid after December 31, 1983, in taxable years ending after such date.

(d) The amendments made by section 4 shall apply to taxable years beginning after December 31, 1983.●

MARY ANN MIKULIC, WINNER OF THE OLIN TEAGUE AWARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. HAMMERSCHMIDT) is recognized for 5 minutes.

● Mr. HAMMERSCHMIDT. Mr. Speaker, on Thursday, April 21, the Veterans' Administration honored Mary Ann Mikulic, a nurse at the Seattle, Wash., VA Medical Center, with the Olin Teague Award for achievements of special benefit to veterans with service-connected disabilities.

This was the fifth annual ceremony, established by the VA to recognize outstanding practitioners of health care and medical research for those veterans who have been disabled while in service to this Nation.

The award is admirably and warmly named for Tiger Teague, a colleague of many in this Congress, and a man with whom I had the pleasure of serving during his tenure as a Member and, unforgettably, chairman, of the House Veterans' Affairs Committee. Beloved by those of us who worked with him, and those he cared for throughout the veteran community,

Tiger's memory could not be better served than by this distinguished award for selflessness and professional dedication.

Ms. Mikulic was selected for this year's award from nominations submitted by VA facilities around the country, each one with individuals and teams worthy of high commendation for their contributions to patient care. Her speciality of rehabilitation nursing for war-injured veterans, and her extensive studies on patient treatment issues that impede or promote rehabilitation, have earned her this very competitive honor.

Since joining the Seattle Medical Center staff in 1975, her efforts in the field of rehabilitation have been extensively published in professional journals, both within the VA and throughout the private and military community as well.

Ms. Mikulic received the national association of rehabilitation nurses certificate of appreciation, and, in 1981, Nurse Mikulic, a colonel in the U.S. Army Reserve, was awarded the Army Commendation Medal for her work.

Mary Ann Mikulic has been with the VA since 1952 when she joined the agency as a staff nurse in Vancouver, Wash. She received her nursing degree from the University of Portland and her graduate and postgraduate degrees from the University of Washington at Seattle. With all her other duties, she has been teaching at the University of Washington School of Medicine since 1975, maintaining a schedule that is itself an indicator of the highest level of personal dedication.

Mr. Speaker, those of us in this Congress who knew Tiger Teague and his efforts to promote benefits and health care for this Nation's soldiers can be assured that the Olin Teague Award for extraordinary service to the service-disabled veteran has been thoughtfully and appropriately bestowed on a woman of high personal merit and professional stature. I extend my congratulations to nurse Mary Ann Mikulic and to all those who give so much to the disabled American veteran.●

CRIME VICTIMS ASSISTANCE FUND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 10 minutes.

● Mr. FISH. Mr. Speaker, today I am introducing a bill to establish the crime victims assistance fund. This is a companion to S. 704, introduced by Senator HEINZ, a leader in the effort to help victims of crime.

Federally funded compensation for victims of crime is an important part of the Federal effort to assist victims of crime. A compensation program, however, has not been established due to serious disagreement over how to fund such a program. It is generally agreed that general revenues should not be used to finance a victim's compensation program.

The President's Task Force on Victims of Crime recommends that a Federal compensation program be financed in part by the revenue from an excise tax on handguns, currently used to fund wildlife programs. Instead of diverting these funds, which are used for worthy purposes, my bill finances victims compensation through a new one-time compensation fee, increased fines, improved collections, forfeitures, and impounding of a defendant's sizable gains. These five areas of raising funds are also recommended by the task force report.

Revenue would be collected from a one-time compensation fee authorized for all Federal crimes. Courts would be permitted to levy fees from $10 to $100 for misdemeanors, and $25 to $500 for felonies. Based on 1981 crime statistics, these compensation fees will generate an estimated $700,000 to $10 million in new revenue.

Federal courts ordered more than $93 million in fines last year. A surcharge of up to 100 percent, depending on the criminal's ability to pay, would be levied on all Federal fines, and the money would be directed to the crime victim's assistance fund.

Less than 60 percent of the fines ordered in 1982 were collected. In many cases, no fines are even ordered. The act establishes procedures to encourage the courts to levy appropriate fines and improve collection of all fines levied. First, judges would be required to levy fines in all cases, taking into account the criminal's ability to pay any restitution ordered, or state for the record reasons for not so doing. Second, where the fine has been ordered, a lien would be created and the Attorney General charged with collection.

Almost $15 million in forfeitures will be ordered by Federal courts in 1983. With the exception of items needed by law enforcement agencies, the revenue from these forfeitures would be diverted into the crime victim's assistance fund.

In those instances where the criminal realizes a gain or the victim suffers harm in excess of the maximum fine authorized in the fee collection provisions of the bill, the judge would be empowered to impose a fine that is double the gain or loss. This provision is intended to insure the penalty bears some reasonable relationship to the crime committed.

I am disturbed by the recommendation of the task force that victims compensation programs be financed from the Federal excise tax on firearms and other weapons. This proposal introduces an extraneous and unnecessarily controversial element into the victims issue. It is based on the unfair premise that law-abiding citizens who pay these taxes are responsible for the criminal misuse of firearms. The revenue now collected from the sale of firearms is placed into the Pittman-Robertson Fund, which supports the maintenance of hunting preserves, certain wildlife studies, and a hunter education program. The fund benefits both the hunting enthusiast and the preservation of our environment. Adoption of this proposal would unite gun owners, hunters, and environmentalists, all of whom strongly oppose diversion of 25 percent of the Pittman-Robertson Fund to the victims compensation program.

My bill would use half of the victims fund to finance State and local compensation programs, and the other half to finance State and local victim and witness assistance programs.

To be eligible for compensation funds, the State's program must have been operational for 1 year, agree to provide compensation for all victims within its jurisdiction, and include psychological counseling among the basic services offered victims. In instances of exclusive Federal jurisdiction, victims may apply to any convenient participating State for compensation. The amount of compensation ordered shall then be reimbursed dollar for dollar from the victim's assistance fund plus the State's related administrative cost up to a maximum of 25 percent of the award.

The other half of the funds would be made available to support State and Federal victim and witness programs. These funds would provide Federal assistance in accomplishing the purposes of the Omnibus Victim's Protection Act of 1983, to support ongoing victim and witness assistance programs, improve facilities for victim and witness assistance training programs for law enforcement agents in the rights and needs of victims and witnesses, and general public awareness program. Such funds as may be required by the Attorney General to support the administration of this act would also be drawn from this source.

The Attorney General is required to report on the effectiveness of the new law at the end of 3 years.

Mr. Speaker, my bill is an important step in helping victims of crime. I urge my colleagues to support this legislation, which will be considered by my Judiciary Committee. The provisions are fair and effective, and should cause no controversy or opposition. Assistance for victims of crime is long overdue.●

11-059 O-87-25 (Pt. 9)

APPAREL IMPORTS ARE CRUSHING AMERICA'S LARGEST MANUFACTURING EMPLOYER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, I rise to urge the support of my colleagues for House Resolution 172, expressing the sense of the House of Representatives that the President should reduce imports of apparel so that imported garments comprise no more than 25 percent of the American apparel market, a bill I cosponsored which was introduced by my colleague from New York, the Honorable CHARLES B. RANGEL.

The textile and apparel industries comprise the Nation's largest manufacturing employers, and one out of eight workers in manufacturing industries is employed by these mills and factories—a total of 1.6 million to 2 million workers, depending on unemployment rates and the amount of imports. These workers are greater in number than those employed by the auto, steel, and chemical industries combined. Twenty-five years ago, 4 garments out of 100 sold in this country were imported, and now that figure is up to 40 out of 100. If our Nation's apparel import level had remained at that 1958 level, about 660,000 Americans would still have jobs.

The average wage in the women's and children's apparel industry in the United States is $4.94 per hour, but in mainland China the average is 16 cents per hour, in South Korea, 63 cents per hour, and in Hong Kong, the wage is $1.18 per hour. These low wages, of course, bring down the cost of the clothes made, but unfortunately, these savings are seldom passed along to the American consumer. The only beneficiaries of this sweat shop labor are the importers, the wholesalers, and the retailers who buy the products cheaply and then turn around and make drastic markups in the prices.

In some sectors of American manufacturing, the technology and production methods used are outdated, but not in the apparel industry. In fact, most plants abroad are using American production methods. The recession, of course, has also hit the apparel industry, but in 1982, when the national unemployment rate was 9.7 percent, the rate for the apparel industry was 15.4 percent. Since 1970, unemployment in this industry has never been less than 7 percent.

The resolution I have cosponsored urges that imported apparel comprise no more than 25 percent of the American market. The resolution is not designed to ban imports entirely, but only to stop the deluge of imports which is beginning to threaten all of the some 950,000 jobs we have left in the apparel industry. As I stated above, about 660,000 jobs have already been lost. A rollback of the import level to 25 percent of our Nation's apparel market would create jobs for some 315,000 American workers, and I urge my colleagues to support House Resolution 172.●

FOR A CONCERT OF THE AMERICAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

Mr. ALEXANDER. Mr. Speaker, for the last 2 months the attention of this Congress—although deflected from time to time by other major considerations—has been riveted on the question of war and peace in our own hemisphere. But tragically, although events in El Salvador or Nicaragua may at any moment erupt with dangerous and unpredictable consequences, as President Reagan has warned, we have still not evolved a satisfactory bipartisan consensus on foreign policy toward the Americas.

Along with my colleagues, I welcomed the President's decision 2 weeks ago to speak to a joint session of Congress on the subject of Central America. And I am convinced that the President did much, merely by making the speech, to provide the opportunity for consensus. By sharing his thoughts with us, he invited us to think of a common purpose. And I for one am willing to work with him in a spirit of true bipartisan cooperation—which does not mean, however, that any Member of Congress is obliged to agree with either the substance or the details of his specific proposals. The President opened the door to bipartisan compromise.

In reality—and perhaps the President would privately acknowledge the fact—the administration's present policy toward Central America is clouded with ambiguity. Some of the figures in Mr. Reagan's aid request are clear enough, but not the rationale for it nor his strategy for an enduring hemispheric peace. Yesterday I was in a group, composed of Congressmen and other concerned Americans, who received a briefing from an analyst in Latin-American American affairs. She had recently returned from talks with our embassy officials in Central America and with parties to the worsening disputes down there, and she provided a quite detailed presentation. But when I asked her the one question that interested me most, whether we had—or were perceived to have—a clear and definite policy in the region with good chances for success, her answer, in essence, was this: that the President's policy meant different things to different people.

The President himself has given conflicting signals—most obviously in the way he has dealt with an issue crucial to his chances for the good will and support of this Congress. I mean, of course, the question of whether this administration's policy is in violation of the Boland amendment, which by unanimous vote last December in this House expressly forbade attempts to destabilize and overthrow the Government of Nicaragua. Many sophisticated explanations have appeared in the press as to what the Poland amendment really meant. But, as someone who knows and esteems the very forthright gentleman from Massachusetts, (Mr. BOLAND) and as someone, moreover, who remembers well our mood of December, I can assure the President that the amendment means exactly what it says—no more and no less.

Rightly or wrongly, we in the United States have been credited—if that is the right word—with several instances of destabilization in Latin America in years past, and this reputation has done us little good and much harm down there. Even the implication that we are conniving at another government's overthrow is damaging to our chances for good relations with our Latin neighbors, and it is grist for the propaganda mill of our adversaries.

So when the President provides on one day a carefully crafted argument that we are seeking only to "interdict" the flow of military supplies from Nicaragua to El Salvador, and then, on another day the same week, proclaims that we are supporting freedom fighters in their rebellion against the government of Nicaragua, then our credibility as a nation and our good intentions as a neighbor are cast into serious doubt. This is especially true when a number of informed analysts tell us in this or that newspaper practically every day that the bulk of these freedom figthers are former National Guardsmen loyal to the expelled regime of the dictator Anastasio Somoza. And these are men who are now boasting, for the whole to hear, that with American support they will be in Managua within 6 months.

President Reagan is well known for his view of world history which was conceived in the ashheaps and confusion of Europe after World War II, when Soviet military forces occupied most of the countries of Eastern Europe.

He understandably sees in the events of Central America a scenario of world conquest by monolithic communism and therefore suggests a policy of military containment for the insurgent movement in El Salvador and a policy of isolation and hostility for Nicaragua. The President's policy is reinforced by the proclamation of the Sandinista leaders stating their

goals of revolution for the Latin people for the Western Hemisphere.

The problem is that virtually every hemispheric American—except, perhaps, those of us who make policy norht of the Rio Grande—is aware that the real problem in Latin America is not simply a military one. It is economic, social, and political—in that order of importance. Nobody but us Gringoes appears to believe in the strategy of suppressing discontent by force of arms. Nobody, that is, but the regimes which have demonstrated an incapacity to maintain order in their own countries without foreign assistance and weapons at the ready.

President Reagan must surely understand—as the gentleman from Maryland (Mr. BARNES) said—that if every Communist guerrilla were killed off tomorrow, the essential discontents of Central America would not disappear. They would erupt again and again from their source in the enduring hardships of an entire continent.

I agree with President Reagan that the stability of Latin America is vital to the security interests of the United States. I would add, as a member of the party whose greatest leader, Franklin D. Roosevelt, proclaimed a "Good Neighbor" policy toward Central and South America, that the region is vital to our economic interests as well. And beyond that are humanitarian issues and a concern for the well-being and future happiness and prosperity of peoples who stand to us, not only in the relation of neighbors, but of close kin. What we call the American Dream—a vision of human progress and freedom—is common to all the nations of the Americas.

But the dream has turned to a nightmare in much of Latin America, and, while I agree with the President that peace in general depends on our readiness and our strength, I believe that we must enlarge both our view of the problem which confronts our sister nations in the south and the framework of our response to it.

I have concerned myself with Central American events since I first visited the area in 1971. It was obvious to me then—long before there were airstrips in Grenada or Sandinistas on the march—that social and economic misery was widespread. The pathetic signs of poverty and malnutrition were all around me in the wasted bodies of children. And, in the withered and distressed roadmaps of their parents' faces, I discerned the passage of events toward the crisis conditions of today. I saw, and knew that I was seeing, prerevolutionary conditions.

In Nicaragua, we allowed ourselves to become identified with a despot and his crumbling regime. And, as Ambassador Lawrence Pezzulo noted at the time, Somoza's overthrow was interpreted throughout Latin America, by the Old Guard and the New Revolutionaries alike, as the harbinger of continuing change.

Ambassador Pezzulo earned a reputation as an astute analyst of Pan-American affairs during his term of service in Nicaragua, and his concern for our own national interest as well as the legitimate aspirations of the Central American nations is unquestioned. He is echoed by another distinguished public servant, Sol Linowitz, the former Presidential trouble-shooter and Ambassador to the Organization of the American States. In "America at the Crossroads," a recent report of the Inter-America Dialogue—a bipartisan and all-hemispheric body which is familiarly known as the Linowitz Commission—we are told, "Authoritarian regimes which impose harsh discipline upon their people lose their legitimacy and ultimately their authority.

The attempt by such regimes to suppress their people's desire for basic reform leads to an ever-deepening bitterness, especially if the repression is long-enduring and if the Strong Man or the oligarchy is supported by an external power. Extremist personalities, with no compunctions against the use of force, eventually displace the democratic reformers whose reasoned calls for change have been frustrated. We must be certain that, through indifference to the people's legitimate desire for freedom, we do not assist in the creation of such Frankenstein monsters in our own hemisphere.

The President is right to sound the alarm about Central America, but he has proposed little more than the tired old policy of defensive reaction to and military containment of insurgent movements there. And in so doing, he has, I think, overlooked possibilities for hemispheric cooperation in achieving a long-term solution. I would say that the administration should ask itself why the Mexicans or the Venezuelans or the Colombians or the Panamanians, the so-called Contadora countries, have proposed—not that we or they should attempt military containment—but instead that we and they should together orchestrate a policy toward Central America which would resolve differences between nations and between factions through negotiation.

It is worth noting that these countries are the success stories of Latin America. They have begun to develop a secure economic and industrial base; in some cases they have achieved democratic systems similar to our own, and in others they are on the way to that happy end product. Most importantly, these are sovereign nations that fully deserve the right to deal with the United States on equal terms—as loyal friends and as partners in the development of the hemisphere.

Let us, then, acknowledge and actively encourage the democratic aspirations and economic independence of the nations in our hemisphere, and let us heed the call of the Contadora group and of the Linowitz Commission, which has recently called also for a Concert of the Americas.

It is time for us to move away from approaches that are covert and unilateral and which rely on military means to approaches that are overt and multi-national and which rely on negotiation and economic and political inter-dependence. We should all recall the words of President Kennedy, who in 1962 said that the time had passed when the United States either could or should try to police the world by itself.

I welcome the suggestion this week by our Ambassador to the United Nations, Jeane Kirkpatrick, that the administration found useful potential in the Contadora initiative and that our approach to Central America might incorporate hemispheric talks. This was a positive step indeed toward the goal of a bipartisan policy.

It was my privilege recently to participate in a televised colloquy in this Congress with Members of both parties, and I have engaged in numerous conversations with colleagues on both sides of the aisle and with informed students of the Central American situation. With the same goal of a bipartisan consensus in mind, I offer my time and energy to the process of formulating a plan which will have support from both parties in the United States and effective support as well from the other countries of the hemisphere.

Accordingly, I would suggest a five-part scenario which might form the basis of a long-term solution in Central America.

First. We could respond favorably to the Contadora initiative and perhaps even entertain the idea of a general hemispheric peace conference which would focus on the major disputed questions of the Americas. In line with the recommendations of the Linowitz Commission, there should be no important exclusions. All nations of the hemisphere who profess an interest in resolving the crisis should be invited. This would specifically include Castro's Cuba. Realistically, there is little hope for a long-term peaceful solution in Central America without Cuba at least acquiescing in the terms of an agreement. Castro should be given a chance to adjust his course from mischiefmaking to one involving cooperation with other nations and other systems.

Second. As a corollary to this conference, we can join with our neighbors in seeking an immediate cease-fire in the region of Central America. This would be a difficult objective to achieve under any circumstances, and is possible only through the kind of

open, inclusive dialog that the Linowitz Commission has suggested.

Third. There might, as an additional corollary, be an immediate cessation of all arms imports into the area. And, once again, as the Commission has suggested, this may require an understanding with the Soviet Union as well as Cuba.

Fourth. During the transitional period from the convening of a peace conference until a permanent agreement is achieved, an international security force—whose composition would be agreed upon by the conferring nations—could enforce conditions of peace.

Fifth. Finally, and indispensably, the nations of the Americas—North, Central, and South—could develop a program of social, political, and humanitarian initiatives which would nourish democratic government rather than authoritarian practice. This process would imply a respect for and tolerance of social and economic differences between the nations, but it would insist on democratic institutions in the countries of the Americas.

We do not hedge on our democratic convictions, nor shall we ever turn our backs on the great heritage of Washington and Bolivar, who led revolts against oppression and tryanny so that future generations should have the freedom to pursue happiness in their own way.

So far the Cubans and the Soviets have advertised a prescription of violent overthrow for the ills of the Americas. I say that the United States—whose revolution of two centuries ago is still the best model for mankind—should advertise our own prescription for progress. We must work with our sister nations to help build their economies as we help to build their hopes and fulfill their dreams. Through a leadership that is both determined and compassionate, we must show the way to a true hemispheric cooperation. As that great adopted American and world citizen, Albert Einstein, said, "Peace cannot be kept by force. It can only be achieved by understanding."

And, in bringing ourselves and our partners in the hemisphere to that understanding, we will show once again that peace, freedom, and the democratic process—not domination or fear of change—are the real motivations of American foreign policy.

□ 1930

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman.

Mr. GONZALEZ. Mr. Speaker, I rise because of the impressive force of the gentleman's presentation. I think what he has said here is very, very important, very significant to the point where I would think that every Member of this body, both in the House and in the Senate, should at least have an opportunity to read these remarks and the thinking that this distinguished gentleman from Arkansas has presented us with.

I had intended to speak out on the subject matter but the gentleman has summed up in such a perceptive, knowledgeable and well-organized manner whatever I have been endeavoring to say for the last few years in this regard, and what I was intending to, that I think this is so conclusive and so well thought out that I must compliment the gentleman and thank him for this service.

I rank what he has said here for the record today of such importance that the debates we had on what was described here on the floor time and time again as the single most important issue confronting us, the so-called nuclear freeze resolution, in my mind pales into insignificance with the importance of what the gentleman has here said.

I believe that the thing that has worried me the most has been the fact that the lack of perception on the part of our leadership, not just the present leadership but even the immediately preceding leadership, going back to April 1, 1980, which was the first time that I ever spoke out on this, also motivated, because of the information that had reached me by fellow Americans in the service of our country, both in the military as well as the civilian service, coming back from such places as El Salvador, not after the outbreak of this turbulent period in Salvador, but right before, and also from Nicaragua, and advising me that they were looking me up because they did not know who else to go to to try to communicate with the leaders in the State Department as well as the Presidency the troubling aspects of what they were witnessing and had seen and warned.

□ 1940

The first notice came to me in September of 1979 and if the gentleman will remember that was critical point 1 month later in El Salvador. And what these fellow Americans told me came out so accurately that I felt impelled to try to reach the President then and the State Department and could not.

So about 6 months I finally spoke out on the floor for the record. I did not think I was going to have any influence, but the fact that the gentleman here is in a leadership capacity in the House of Representatives and has spoken so knowledgeably, so incisively, with such an uncanny perception, I really think that the whole world, especially in the modern era, has been determined in its most inportant aspects of development in disastrous wars by the misperceptions of the leaders of our countries. The perceptions we have held and continue to hold with respect to Russia. The continuing misperceptions of Latin America and the radical change in Latin America just in the last 5 years, not even trying to consider the radical difference between 1960, President Kennedy and today.

I have said this if President Kennedy were the President today the reality of the Latin American world as such and so dramatically different that he would not now succeed were he promulgating the Alliance for Progress, which incidentally was announced unilaterally.

And what the gentleman has summed up, the gentleman's five point presentation, is brilliant. I have no other words for it. I would like to enlist in the cause with whatever meager support I can give. I do not have any status in committee membership, but certainly whatever I could do by adding my voice, I want the gentleman to know that I am at his service in this respect, but I consider these words and utterances here in the last few minutes of a tremendous range of importance.

I do hope that there will be some way that this record can be reproduced and disseminated to every Member of the Congress.

Mr. ALEXANDER. I thank the gentleman from Texas, my friend, whose knowledge and guidance I will depend upon during the months ahead and also he hopefully can assist me in serving as an interpreter for our friends from Latin America.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, on Monday, May 9, I had to be in Miami, Fla., to meet with a large group of people in an effort to save a black hospital project on which I have been working for 1 year. It was essential that I be there to conduct the meeting and do everything I could to assist in finding a cooperative solution for the completion of this needed hospital.

Fortunately, I believe that we were successful in saving the hospital which would serve an area of Miami, where 140,000 blacks live and where unemployment is by far the highest in the area, where jobs and health care are an urgent priority.

On account of my absence I regret that I missed the votes on the following bills: H.R. 2357, the Congressional Award Act; H.R. 2173, Contract Services for Drug Dependent Federal Offenders Authorization Act of 1983; H.R. 2174, the Federal Antitampering Act; S. 653, the Foundation for the Advancement of Military Medicine Act of

1983; and House Resolution 184, providing for consideration of H.R. 2175, the Justice Assistance Act of 1983.

Due to the overwhelming majorities in favor of these bills, I was able to be paired in favor of only one bill, H.R. 2174, the Federal Antitampering Act. Had I been present, I would have voted "aye" in favor of each of the other four bills which also passed that day.●

KGO EDITORIAL SUPPORTING MORATORIUM ON OUTER CONTINENTAL SHELF OIL AND GAS LEASING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, in March, I joined Representative STUDDS and Senators CRANSTON, KENNEDY, and TSONGAS in introducing legislation—H.R. 2059—which would exempt certain sensitive Federal areas offshore California and Massachusetts from oil and gas leasing and development. After consultation with local governments and industries, as well as public interest groups, portions of the California Outer Continental Shelf (OCS) were included in the bill. Numerous California county and city governments have expressed their concerns over the impact of oil and gas development in certain especially sensitive areas off the State's coastline, and have supported a selective OCS oil leasing moratorium. As a result, a moratorium on California OCS oil and gas leasing has gained compelling and broad public support in the State. It is indicative of this public support that both California Senators have now introduced bills which—while not identical—would exempt identical California offshore areas from development.

I believe KGO Radio, a San Francisco ABC affiliate, spoke for many Californians when it summarized its support for H.R. 2059 in a recently aired editorial. This editorial speaks not only in support of H.R. 2059's introduction; it firmly supports further congressional consideration of the broader issues surrounding OCS leasing as well. I recommend these brief-but-forceful words to my colleagues for their consideration.

The editorial follows:

GOOD NEWS FROM CAPITOL HILL

It's "pay-off" time at last in the long campaign by KGO Radio to prevent oil and gas exploration along Northern California's coastline. For three years we have opposed leasing and drilling that would despoil that area and we've urged strong federal legislation to insure coastal preservation.

And our call has been answered. Sweeping legislation has just been introduced in Congress to ban such offshore development until at least the year 2,000! Its principal authors are Senator Cranston and Congressman Leon Panetta of Monterey.

We now urge all forty-five other members of California's delegation—the largest in the Congress—to co-sponsor this bill, H.R. 2059. We ask you to tell your Washington representative to vote it into law.

Victory for our coastline is finally in sight.●

ROGER W. TUBBY, FORMER PRESS SECRETARY TO PRESIDENT TRUMAN AND AMBASSADOR TO THE UNITED NATIONS, GENEVA, SPEAKS OUT ON FREEDOM OF SPEECH ON COLLEGE CAMPUSES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. STRATTON) is recognized for 5 minutes.

● Mr. STRATTON. Mr. Speaker, Roger W. Tubby, press secretary to President Truman and former Ambassador to the United Nations, Geneva, recently spoke at the State University of New York Oswego campus on the many incidents of abuse of freedom of speech that have taken place on our college campuses in recent months.

Ambassador Tubby points out the same people who heckled Ambassador Kirkpatrick and other speakers attempting to express a political point of view are the most vociferous in demanding that their right to be heard not be curtailed in any way. Unfortunately, it appears these individuals are establishing double standards; and I think it is incumbent on the college community at large to defend the right of all individuals to speak out.

Ambassador Tubby's remarks are excellent, and under unanimous consent to extend my remarks I enclose these remarks at this point:

UNIVERSITY PRESIDENTS CHIDED FOR SILENCE ON CAMPUS ABUSE OF FREEDOM OF SPEECH

On this eve of St. Patrick's Day which commemorates a man of faith in the Christian spirit, it is sad to note the prevalence of bitterness and intolerance not only in Ireland between Catholics and Protestants, but in the Mid-East between Arab and Jew, and in south Asia between Hindu and Moslem.

Indeed, in our own country there is a spirit of rancor and intolerance as we discuss disarmament and foreign aid to El Salvador and other countries.

Everyone on this Earth should be deeply concerned about the consequences of widespread poverty and famine and of nuclear war.

How best to meet these awesome challenges?

But, on some campuses freedom of discussion on these and other issues is denied by a few disciplined, well-organized demonstrators who insist that only their views should be heard.

Shamefully most college and university presidents have been silent over incidents of gross intolerance on their own or other campuses.

When I was at Yale during the depression, as a member of the Liberal Club I invited Socialist Presidential candidate Norman Thomas to speak on campus although many of the alumni detested Thomas and most of the students knew little or nothing about him. We also invited leaders of industry, college professors of many different points of view, and politicians from both major political parties. There were no obscenities, stompings or shouting downs.

But in recent years, especially when the objectives of Soviet policy have been challenged, there have been well orchestrated demonstrations on campuses around our country and in other countries. This latter we have just seen in West Germany prior to the last election there.

In the 1960s orchestrated campus demonstrations supported Soviet objectives in Viet Nam.

Now in the 1980s orchestrated campus demonstrations support Soviet objectives in El Salvador.

In the 1960s Democratic and Republican administration officials were barred from speaking or hooted off platforms on many campuses, including my own at Yale.

The radical left faculty and students were in control in the '60s and apparently are in control now in the 80s on many campuses where only opinions tolerated by radical faculty and students may safely be expressed.

U.S. Ambassador to the United Nations, Jeanne Kirkpatrick, a month ago was jeered, hissed and booed til she left the platform at the prestigious University of California at Berkeley. Why? Because she believes the U.S. should support the people of El Salvador against communist guerrillas.

A week later, the President of Smith College advised Mrs. Kirkpatrick that Smith wouldn't be able to guarantee her security at Commencement this Spring when she was to be given an honorary degree. Students Against Intervention in El Salvador organized the protest against her. Mrs. Kirkpatrick is not going to Smith.

Last week, Mrs. Kirkpatrick addressed 4,000 people at the University of Minnesota. Hecklers tried to drown her out.

Where are the protests against this kind of behavior? Why are college and university presidents silent? Are they fearful of criticism from some of their faculty and students? Do they not believe in freedom of speech? Probably all of them do.

Sun Tzu in 600 B.C. wrote: "Sow internal discord, destroy your enemy without fighting him."

There are those in our society who are trying to do just this, and for whom? For what cause? Not really for the people of Viet Nam (who are now far worse off than they were before the communist take-over); not really for the people of El Salvador who voted overwhelmingly a year ago for a democratic government despite guerrilla killings and disruption of the economy.

Let's be blunt about this.

Those who deliberately or naively engage in demonstrations partial to Soviet views are doing the work of Moscow.

It is ironical that liberals, people who think of themselves as genuine liberals, should serve as agents, knowingly or not, of a regime that is not liberal at all; rather, it is dictatorial, tyrannical, ruthlessly repressive, and with an elite ruling class that makes a mockery of Marxism. Such an elite class exists in every communist dictatorship.

The leaders in the Kremlin have subjugated the peoples of Eastern Europe and they are now at their bloody work of crushing the Afghans and attempting to crush the Salvardoreans.

When they succeed, as they have not only in Eastern Europe, Central and South-east Asia, and in parts of Africa and Latin Amer-

ica, they do not create governments and societies that come close to meeting Marxist communist ideals. Rather, they set up, cynically using communist propaganda, new dictatorial governments subservient to, and supported by, Moscow. They become part of the Russian empire, outposts of Russian power, using Soviet techniques for control of the populace, with neither free press or elections, but with a strong and pervasive secret police and employment of informers and terror, of murder and imprisonment.

Not appealing this Russian model.

Destitute, desperate Haitians do not seek a new and better life in nearby communist Cuba. Rather they risk their lives in leaky, fragile small boats to reach the United States.

Hundreds of thousands of Cubans themselves have fled their homeland for the freedom and opportunities available in our country.

So, too, with Hungarians in 1956; Czechs in '68 at the time of the Prague Spring; and, more recently, the pathetic boat people of South Viet Nam.

Do you hear of their opting for Russia as a new homeland? Maybe a few, very few.

Are impoverished Hondurans clamoring to get into the paradise of Nicaragua? Do the famished refugees of Africa seek asylum in communist countries? No.

Ours is still the great mecca of hope and opportunity for millions around the world.

However, should we ourselves become a police state, whether right or left, the appeal would be lost.

The righteous yahoos of the Moral Majority, the naive idealists or robots of the campus left, are entitled to state their views loud and clear and as often as they wish, but they should not be allowed to bar others from speaking, others who disagree with them, whether on El Salvador or the nuclear freeze.

Years ago Robert Hutchins, chancellor of the University of Chicago, said: "Freedom of inquiry, freedom of discussion, and freedom of teaching—without these a university cannot exist."

Well, it might exist, as some do in dictatorships, but not as exemplars of openmindedness and free inquiry.

So I find it discouraging and indeed it is dismaying that college and university presidents are not strongly condemning and taking action against those subverting or thwarting freedom of speech on their campuses.

Maybe we're ready to be had, if our intellectual leaders are so pusillanimous.

Maybe we're ready to be had if some of our media parrots communist propaganda while disparaging those who support and fight and die and vote for freedom.

However, there is a healthy growing awareness against intolerance, against slanted news. There is sympathy for the Poles and the Afghans, even if there are few campus demonstrations on their behalf. There is an understanding as to what the Russian leaders are up to.

There is an awareness of the complexities of the disarmament problem, the need for and difficulty in achieving verification of nuclear weaponry. Since 1962 the Soviets have refused to allow verfication on their territory, though we have said, come see what we've got.

There is growing awareness of the complexities of the political and economic situation in Latin America, not only as to what the Soviets and their surrogates are up to, but of the reasons for distrust of the U.S. because of American exploitation over many years of Latin American natural resources.

Because we know how difficult, complex and tragic the situation is in many parts of the world; because we are appalled by the enormous expenditures on arms and fearful of a holocaust; because we know we should be able to manage relations between peoples without war and that we can, if we will, banish famine from the Earth—for these and other reasons we need to reach out to one another, to try to understand and help one another.

This we cannot do if we close our minds, if we bar others from speaking to us, if we insist that our way is the only way.

Faith can be a mighty force for good, or evil. Wonders have been done for the human spirit and welfare by Christian leaders, but in the name of Christian faith there were the horrors of the Spanish Inquisition, the massacres of infidels.

Let us reason together. "Jaw, jaw, jaw, is better than war, war, war," Churchill said, and he also said, "Democracy is a very imperfect form of government but it is the best yet devised by man." Why? Because issues can be openly debated, candidates openly chosen, leaders openly challenged, supported, or deposed.

This is why on our campuses especially, where the questing mind is nurtured, that many different points of view should be heard; philosophic; political, right, left, center; even demagogic. Let 'em all come, if they wish, the more the better.

There may even be kernels of wisdom for us from those we mistrust. Why are they the way they are? Why are the Russians paranoid about the outside world, and each other? There are some quite understandable historical reasons.

With our fantastic scientific advances (a thousand angels dancing on the head of a pin seems quite possible in this age of the microchip), a world of plenty seems possible, but is a world of peace possible?

Are we like lemmings destined by self-destruction?

Beware frozen attitudes, closed minds, blind dedication to one way which might not be the best way.

Rather, listen, ponder, react constructively. How can we do better?

With life and the treasures of civilization in peril as never before, it is so crucially important for your generation to be open, questing, innovative in the search for peace and well-being.●

ADDRESS BY HON. PAUL N. McCLOSKEY, JR., AT THE 16TH ANNUAL MEETING OF THE U.S.-ARAB CHAMBER OF COMMERCE

(Mr. RAHALL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. RAHALL. Mr. Speaker, I would like today to bring to the attention of my colleagues a speech made by a former Member of Congress, the Honorable Paul N. McCloskey, Jr., of California. I believe that at this time, with a new wave of violence in the Middle East still fresh on our minds, we can all benefit from the wisdom of his views as expressed in the following speech:

ADDRESS BY HON. PAUL N. McCLOSKEY, JR., AT THE 16TH ANNUAL MEETING OF THE U.S.-ARAB CHAMBER OF COMMERCE

The Honorable Pete McCloskey. (Applause)

Mr. McCLOSKEY. Ladies and gentlemen, I'm going to try to be relatively brief, and allow at least a third of the time allotted to me for questions and answers.

I want to throw down to this group a challenge which I think may be among the greatest challenges of our time.

Something has happened in this country which makes many of us ashamed.

Last year, when Israel invaded Lebanon, while they might have justified the initial 25 miles to take out artillery and rockets that were threatening northern Israel, when Israel went further and put the City of Beirut under siege, used U.S. weaponry against the City of West Beirut, and in a City of 600,000 people, killed 100 Lebanese or Palestinian civilians for each soldier killed by their bombardment, when they used cluster bombs in a civilian area in violation of a sworn agreement that they had entered into with the United States and then reiterated that agreement after they, allegedly by mistake, used cluster bombs in 1978, and then, finally, after Ambassador Habib had obtained Isreaeli assurance that if the PLO left west Beirut assurance the Israelis would not enter, that the women and the children and the old people that the Palestinians had left behind would be protected, Israel ordered its troops into West Beirut, ordered the sealing off of the refugee camps at Shatila and Sabra, and ordered the Christian Lebanese militia, in their own words, to purge those camps using Israeli flares and Israeli bulldozers, each of those actions violated an agreement with the United States.

The 1952 Defense Agreement with Israel provided that they would use our weapons only in self-defense, never in aggression against a foreign country.

The Arms Export Control Act of 1968 provides explicitly that when any nation uses U.S.-supplied arms for aggressive purposes that we, by law, should no longer send them arms.

The cluster bomb agreement was specific and precise. It provided, when we gave the cluster bombs to Israel, a weapon which can devastate an area 25 acres in size, dropping these little bomblets all over the area, timed to go off some five minutes, some ten, fifteen, twenty, twenty-five and thirty minutes, a weapon that against civilians is devastating, because when the planes leave and silence descends on the area that's been bombarded, women, old people, children come out and the bombs go off at five-minute intervals, that they would not be used for aggressive purposes in civilian areas.

I saw, when I was in West Beirut in late July, an elderly woman looking through the rubble of one of the apartment house buildings, a 20-story apartment house building in West Beirut. I asked her what she was looking for. Her son, perhaps twelve years old, said, she's looking for the body of my little sister, whom you Americans have killed.

Now that feeling in the Arab world, that it is American weapons and American munitions that are killing Lebanese and Palistinians, is only too justified, because America, between June, when that invasion started, and December, not only condoned what the Israelis had done, but chose not to invoke the Arms Control Act, nor the Defense

Agreement, nor the cluster bomb agreement.

In fact, when President Reagan asked Congress to give $2.4 billion in aid to Israel, but to forgive only $500 million in indebtedness, which has been part of our aid package for many years, the House voted to increase that forgiveness of debt to $750 million, and the Senate voted to increase it to $850 million.

How can any American businessman doing business with the Arab world, justify to the Arabs, that after Israel had broken their agreements with the United States, had violated international law, even after the President proposed the peace plan in September that requested Israelis to stop creating new settlements, Prime Minister Begin increased both the number and the pace of the settlements and the Congress has voted the money to finance both the weapons and the settlements?

There is no one in the Arab world who is not joined together with the ringing words of our own concepts of social justice that there should be justice for individuals, justice for Palestinians.

How do we explain to the Arabs how, at a time when U.S. arms have been used in violation of U.S. law and U.S. agreements, we not only continue to give aid to Israel, but we increase it?

That is a shame on the American conscience. Why does it occur? It occurs because, regrettably, a lobby in the United States, formed with honorable purposes, made up largely of honorable people, and good people, our American Jewish community, has reached such strength that the Congress quails before the Jewish community lobbying in America.

Prime Minister Begin can confidently say, as he did, about the Jewish lobby in Washington and their clout in Washington: "their strength is such, that Washington quails before them."

A colleague of Prime Minister Begin said, and I quote: "We are confident that the Jewish community in America will stand up courageously in support of Begin and challenge the U.S. government if it becomes necessary."

The New York Times, which rarely makes this type of a quote, quoted Ariel Sharon to a thousand Jewish leaders from America who had gone over to Israel during the height of the Lebanese controversy. "We are counting on your support. You owe it to us."

Interestingly enough, these leaders were not taken to south Lebanon to see what had happened to Tyre and Sidon, were not taken to the camps where the Palestinian prisoners, even today, are denied POW status and international enquiry, but they were taken to a settlement on the West Bank.

Now what has that support of the Jewish community meant with respect to the actions of the Congress? Let me quote from AIPAC's own words. AIPAC is the American-Israel Public Affairs Committee, headquartered in Washington. This is a brochure that came to my office two years ago.

The headline is, "What is AIPAC's record?" "In 1979, AIPAC lobbied successfully for $1.8 billion in military and economic aid, as well as an additional $3 billion for Israel to relocate her defense forces from the Sinai."

"In 1980, on an operating budget of just over $1 million, AIPAC helped secure $2.2 billion aid for Israel."

"What are AIPAC's present objectives? In 1981, AIPAC is the only organization lobbying night and day against the Saudi arms deal package. AIPAC is working to guide and protect this year's foreign aid request for Israel of $2.2 billion through each house of Congress."

"Who runs AIPAC?" Another headline. Answer: "AIPAC's Executive Committee is comprised of 100 distinguished citizens, one-third of whom are Presidents of the major Jewish organizations, and the other two-thirds of whom are important non-elected political leaders from across the United States."

The six million member Jewish community in America is a fine group of citizens. You and I know Jewish citizens who have excelled in the arts, the professions, the business world. They're fine people, by and large. But they are joined together, understandably, by a desire to see Israel prosper, some because they believe, with Begin, that Israel is entitled to own not just the West Bank, but, as Jerry Falwell said the other day, that Begin envisions an Israel stretching through Egypt to Turkey to Saudi Arabia.

Indeed, if you read Begin's own book, "The Revolt," it reads a little like "Mein Kampf." You can't find it in most libraries. I suspect the Jewish community has bought all the copies of "The Revolt" and burned them.

In "The Revolt," Begin describes how, in 1944, when, as a part of the newly-formed Polish Brigade that was allowed to leave Russia and go to the Mideast fight, he reached the soil of Eretz, Israel, he bent down and kissed the land of his forefathers, the land of historic Israel, and the land that he spoke of, that he kissed, was not the West Bank, or current Israel; it wasn't even the east bank. It was Jordan proper.

The Begin position has been picked up and echoed by the Jewish community in the United States.

I'd like to read you excerpts from a letter by one of the leading Jewish businessmen of California; a fine man, an honorable man. But to understand the impact on Congress, his own words, I think, are best set forth:

"I have read with interest, Congressman McCloskey, your letter. I must admit a leaning in your direction this early in the campaign.

"Before I would be willing to provide my full support, and the consent to having my name added to your Senate Advisory Committee list, I must know more about your views on specific matters relating to the Middle East. Therefore, I would appreciate your answers to the following questions:

"(a) How do you believe the President should handle the delivery of the four committed F-16 fighter plans which he recently impounded in response to the disruption of the Iraqi nuclear facility?

"(b) What do you feel the American government's posture should be toward Israel and Iraq in the aftermath of this incident?

"(c) How will you vote regarding the delivery of the AWACS aircraft to Saudi Arabia?"

He goes on and says: "I realize the straight forwardness and pointed nature of these questions. I'm very much aware of the sensitivities of the American government's relationship with the Arab nations, and I too believe Saudi Arabia to be a worthwhile friend of the United States, a position which they have shown repeatedly over the past five years. In addition, I recognize the delicacies involved in balancing our nation's interests in Israel and Saudi Arabia.

"It is with an understanding of the difficulties involved that I seek your views. Allow me to make very clear my position on the subject. I am intensely dedicated and committed to the American government's continued support of the only democratic government in the Mideast, namely the State of Israel. I confess no objectivity in the matter. The United States comes first in every respect, of course, but a deep-seated Jewish heritage has me involved in many activities in the support of Israel.

"Fortunately, the American Jewish community has never had a conflict between the country of which it is a citizen and the country which it feels obligated to support for emotional, political, and for many"—(and this is the point that struck me)—"self-preservation reasons."

Leading Jewish citizens feel that in light of the Holocaust and the foundation of Israel, it is a matter of their own self-preservation that they support Israel at all costs.

He goes on: "I do not expect elected officials to have the same strength of conviction as I and the American Jewish community. However, it would be impossible for me to support anyone who does not share some sense of understanding of the common interests that the United States and the State of Israel share. I could not, in good conscience, support a candidate for any office whom I do not believe to have some sympathy for this position."

Now I cite this letter because this is a fine man, an honorable man, a man I respect, whom I would be proud to claim as a friend. But what is the impact of six million Jewish citizens in this country, marshalled behind the Presidents of all of the Jewish organizations, willing to send half a million dollars from outside Illinois into the downstate Illinois district of Paul Findley to defeat Paul Findley, a Republican liberal Congressman of twenty years only because he had met with Arafat and urged a Palestinian homeland? Willing to send money to any candidate who would support the annexation of the West Bank and Gaza by Israel?

Those six million people, often placed in high positions in many areas, in our professions, in our businesses, in our colleges, have an immense clout with the Congress, and it is the power of that lobbying that explains why Congress, in December of 1982, voted more money for Israel despite what Israel had done in Lebanon and what Israel had done which caused President Reagan to have to commit U.S. Marines there to protect the Palestinians under the commitment that we had made to the Palestinians.

Now that describes the problem, and I don't expect that there's anyone in the room who doesn't recognize that the problem exists. But the question then comes, what are you and I doing about it? How can we allow the Congress of the United States to pass, without debate, that kind of action condoning Israel's violations of not just agreements with us, but our own law?

It's understandable why every Arab ambassador, why every Arab leader says, why do you do this in the United States, you who cut off aid to Turkey in 1975, when they used U.S. weapons to invade Cypus? How can you act like this?

We act because, whenever on a political issue, whenever there is no lobbying on one side, and a powerful lobby on the other, politicians will instinctively adhere to the force of that lobby.

U.S. political policy is very much like a pendulum. An excess of lobbying power can push it too far in one direction. If there's a vacuum of lobbying power on the other side, it's pushed even farther to excess. Ordinari-

ly, this excessive power is ultimately balanced by the development of a counter force, but in this country, as yet, no counter force has developed to the Israeli-Jewish community lobby, partly because the Jewish community has been successful in saying that anyone who speaks out against Israel, or who even describes the Jewish lobby as a Jewish lobby, is in effect anti-Semitic.

We, in this nation, with our conscience about the Holocaust, about the execution of six million Jews in Hitler's gas chambers, with a desire and sympathy for the underdog, which was understandable until 1967, as Israel came into existence and they fought for its survival, it's very difficult to swing back that pendulum until there is a lobby in existence to ask for equal justice for the Palestinians.

Now I don't suggest to you that the U.S.-Arab Chamber of Commerce should be a lobbying force. I understand the restrictions on an organization such as yours. But there is no reason why the individuals who lead the over 500 businesses that make up this organization cannot speak out as community leaders, and ultimately many of you as national leaders, to urge that there be a counter force to the Israeli lobby.

It's really too much to expect of the Arab-American community to demonstrate the same sophistication in lobbying ability that we see in the Jewish community today.

Arab-Americans are like Irish-Americans before them, or Italian-Americans or Greek-Americans or Japanese-Americans. In the first one, two or even three generations, the new arrivals are bent on building their own estates, putting their own children through college, working to establish dignity in the community.

I'm Irish-American, and if you look back on how the Irish were first treated when we came here after the potato famine in the 1840's and 1850's or how the Italians were first treated when they poured in at the turn of the century, or the Japanese and the Chinese immigrants to this country, you realize that it is several generations before an ethnic group can reach the degree of political sophistication that is necessary here today.

So leadership cannot be required of a community of first and second-generation arrivals in this country. Arab-Americans, after all, were really only able to say they were Arabs since about 1918. Before that they'd been dominated for centuries by the Turks, by the Ottoman empire; you can't expect the same democratic evolution of democratic governments in the Arab world among nations that have only been released from colonialism in the last several decades since World War II. Think how long it took us to arrive at our own institutions of the Anglo-Saxon heritage.

But there has to be a voice for justice for the Palestinians. There has to be a voice to say that the Arab cause is just, and that voice can only come, and should come, from those enlightened, privileged individuals in this country who have done business with the Arab world, and it seems to me that this group, above all others, owes a duty to speak out at the present time.

I want to quote you something from a member of the opposing party, Bobby Kennedy, at Capetown, South Africa. He said: "The first great danger is the danger of futility, the belief that there's nothing one man or woman can do against the enormous array of the world's ills, misery, ignorance, injustice and violence. Men have moved the world in the past, and so can we all. Few will have the greatness to bend human history itself, but each of us can work to change a small portion of events, and in the total of all those acts will be written the history of this generation. It is from numberless diverse acts of courage and belief that human history is shaped. Each time a man stands up for an ideal or acts to improve the lot of others or strikes out against injustice, he sends forth a tiny ripple of hope, and crossing each other through a million different centers of energy and daring, those ripples build a current that can sweep down the mightiest walls of oppression and resistance."

Now the reason, quite frankly, that many of us have not spoken out beyond our own range of friends and range of private acquaintances, is that, of course, we will then be under intense pressure from the Jewish community, highly placed. The position of the media may not only condemn what we say, but on many occasions deny us the right to be printed, or to be listened to on the radio or seen on television.

Moshe Arens was recently invited to debate me on the public television station in San Francisco. He politely declined. When a person on television in California comes out with the slightest criticism of Israel, he is immediately deluged, and the station is deluged, with threats from advertisers to withdraw advertising, from people calling in or writing in to say that the individual involved in expressing anti-Semitic views or is giving rise to anti-Semitic views or is giving rise to anti-Semitism by this kind of criticism of Israel.

When one of the great Jewish leaders of America, Phil Klutznik, former Secretary of Commerce, came back from the Mideast and said, I believe there ought to be a Palestinian homeland, we ought to negotiate with the PLO and there ought to be an Arab participation in the government of East Jerusalem, the word and the hue and cry came out from the Jewish community and organization that he himself had led. The word was: "Disown him."

Under those circumstances, it seems to me we should not complain that Congress is not doing what is right, that the President cannot accomplish his Mideast peace plan because the Congress will prevent him from cutting aid to Israel.

I want to suggest to you four specifics. I read to you the three questions that the Jewish leader asked me as a candidate for the Senate; it is this concentration on specifics that the politician abhors and trys to avoid. No politician wants to be asked, yes or no, are you for handgun control, are you for abortion, or are you for cutting aid to Israel. To be politic, by definition, is to offend no one, and when you have to answer yes or no questions that are controversial, you will offend one side or the other. The politician will never initiate controversy; it must come from the leadership in the country outside Congress.

Now I would suggest that over the next few months that you and I can reshape the history of this country in our relationships with the Arab world, if we insist, that each candidate running for public office, each representative that we have in Washington, answer four simple questions:

How will you vote? Will you cut aid for Israel, suspend aid for Israel, until they remove their troops from Lebanon? The President has asked them to remove their troops from Lebanon. He doesn't dare bring the issue before the Congress, because he knows Congress would support overwhelmingly the Israeli position.

Will you cut $100 million in aid to Israel for each new settlement that Israel establishes on the West Bank? Simple question. Do we have to finance those new settlements, that are in violation of Camp David, in violation of Resolution 242, in violation of the fourth Geneva convention? Our own State Department has said that permanent settlements on the West Bank are inconsistent with international law. Should we cut off aid to Israel until they abide by Resolution 242, and give up jurisdiction over the Golan Heights?

How many of you remember the words of Resolution 242, that if Israel is recognized to be secure within its pre-1967 boundaries, Israel must *withdraw* from the occupied territories.

What were the occupied territories? The Golan Heights, east Jerusalem, the West Bank, and Gaza.

In 1978, when Begin signed the Camp David accord, written into the Camp David accord—a solemn agreement—in three separate instances it was said: "These accords are based on Resolution 242 and all of its parts. "All of its parts" included withdrawal from the West Bank, Gaza, East Jerusalem, and the Golan Heights.

There was no way Begin could honorably agree at Camp David to those agreements if they were indeed, in truth, founded on Resolution 242. Begin has used the big lie technique just as Hitler used it. If the lie is big enough, no one will dare challenge it.

The lies? "We only intend to go 25 miles into Lebanon. We will withdraw from Lebanon."

Israel is now saying explicitly, we intend to annex the West Bank. Begin has said: "How can we relinquish something that we already own, the West Bank and Gaza."

Begin is laying the foundation for the next war in the Mideast, but we in the United States are even more guilty because we are financing it, and that next war, I think, can be mentioned to citizens in the vein, that very possibly it will be a nuclear war. That the Arabs, humiliated by their defeats in the various wars since 1947, are undoubtedly today attempting to achieve a nuclear capacity.

Begin is asking the United States today for the KC-130 aerial tanker. Why? Because that will give the Israeli Air Force the capacity to strike as far as Pakistan, if Pakistan should develop, as we believe they are attempting to do, a nuclear capacity in order to confront the Indians, with whom they have fought three wars in the last 40 years.

There's a tremendous amount at stake. For American leaders and American citizens to remain silent on these issues, and to refrain from entering into lobbying activity that can counter the excessive power of the Jewish community lobby today in America, would be a mistake.

I say this not in criticism of the Jewish community. It's understandable; it's a basic American right to lobby. But I think, with the privilege this group has, goes the duty at least as individuals, to attempt to build a counter lobby that will ask the same precise questions of politicians running for office, particularly, I might say, of Democratic candidates for the Presidency.

We have seen Democratic candidates for the Presidency, in the search for Jewish money, make outlandish statements and commitments. Take the man who defeated me, and who now sits in the United States

Senate. When our campaign started, a friend of mine, the President of a major corporation, said, "Pete, they're going to kill you with the death of a thousand cuts." What had I said? I said, "if we're going to have peace in the Mideast, we're going to have to stand up to and respectfully disagree with our Jewish community and give the President the freedom to negotiate a Mideast peace."

The ADL responded that that was fuel for anti-Semitism, for the Congress to disagree with the Jewish community, or its Jewish community lobby.

My opponent went to the Jewish leadership in Los Angeles and said, "I support the annexation of the West Bank and Gaza." The Jewish community got behind him as a friend for Israel, raised a considerable amount of money, and he has been elected to the United States Senate.

What politician, in the face of that power, is going to vote for a balanced policy in the Mideast unless there is a lobby on the other side? I plead with you to form such a lobby, to speak out, to take the cuts, because if we don't, I'm satisfied that we are going to let down our Arab friends, as we have already, and that their patience cannot be an eternal thing.

They have the right, when Palestinian and Lebanese civilians are killed with our weapons, to say that the United States should at least apply its own law . . . and cut off further shipment of weapons.

I would plead with you, and beg you, and it's the reason I came three thousand miles to give this speech. I think there's enough power in this room, and among your friends, to launch the counter lobby, and say, yes, we support Israel's right to exist within the pre-1967 borders. We support Resolution 242 that gives Israel the right to exist, but we impose Resolution 242 in all of its parts, that Israel withdraw from the occupied territories, that Israel comply with U.S. law, that we not finance the settlements on the West Bank, nor an army of occupation in Lebanon, nor a continuing denial of autonomy to the Arabs on the West Bank and in Gaza.

I can think of no greater cause for an American today than to engage in that particular lobbying effort.

Thank you very much. (Applause).

President LAWRENCE. We've just heard a great American, and he's given us a great challenge.

He's agreed to answer questions. Now I know that some of you may have to leave, but I think we cannot pass up this opportunity.

Mr. MCCLOSKEY. These need not be friendly or even polite questions.

MEMBER. Mr. Congressman, is it possible to get the Democratic and Republican parties to agree to take the Mideast out of domestic politics? You'll remember that Jim Forrestal tried that in 1948, and there's been at least one other attempt. Would that be a way to depoliticalize the national scene?

Mr. MCCLOSKEY. It would be a way, but I'm afraid it isn't possible.

I am a Republican. It's much easier for a Republican to have a balanced view than it is a Democrat.

Since the days of Roosevelt, the Democratic political coalition has essentially been made up of minorities, of organized labor, of the intellectual liberals, with a heavy base on Jewish campaign financing.

I don't know if you remember when Scoop Jackson ran for the Presidency, the statements he made in order to obtain the nomination.

Alan Cranston, for example, from my State of California, is a fine man, but Alan has accepted the Jewish lobby's position that if he is President, we will forgive Israel all its debts.

Let me make a comment on that last point. Much of what the Jewish community lobby does must be done secretly, and is done secretly. When they lobbied me most recently, in June of 1982, two very fine Jewish citizens from a very wealthy community, Los Altos in my district came to see me. Los Altos has about the same per capita income as Greenwich or Scarsdale here. I said, "What's on your agenda this year?" Now bear in mind that similar people were addressing 434 of my colleagues in the House and 100 in the Senate.

They said, we only want two things this year. We want no anti-aircraft weapons given to Jordan, and we want you to forgive Israel its debts owed to the United States.

Can you imagine the Jewish community going public with that one and saying, with a $200 billion deficit we want to forgive Israel's $8 billion indebtedness to the United States? Incredible. They couldn't do it publicly. And yet no sitting member of Congress has disclosed by public announcement, to my knowledge, that he's been lobbied in this manner.

We did forgive that $780 million, as I mentioned last December, but nobody publicly acknowledged it.

I don't think you can find a Democratic candidate for the Presidency today who would be willing to take a position to limit Israel. Possibly John Glenn. John Glenn is a former Marine, and I'm not honoring Marines, but we have a certain stupidity that causes us to enlist in the Marine Corps in the first place. But John Glenn, conceivably, might be willing to take such a position.

But as long as, among the Democratic candidates, there is this contesting for Jewish money by how much we can commit ourselves to the preservation of Israel, I don't think you'll see the Democratic party back away from that primary source of historic financing.

MEMBER. Mr. Congressman, to what degree can interest from Arab communities contribute to political action committees in the United States whose direction and goals are to work for a more balanced policy?

Mr. MCCLOSKEY. You mean Arab governments or the Arab community in the United States?

MEMBER. I mean the dollars coming from Arab countries, citizens in Arab countries. To what degree can those be funnelled effectively and legally through a political action committee domiciled in the United States?

Mr. MCCLOSKEY. I don't think they can directly be used, without violating the law. I think if any of us took money, as candidates for American office, from foreign countries, we'd be violating the law.

MEMBER. How can John Glenn stand up to the Israeli lobby as a member of the Democratic party, which fully endorsed the invasion of Lebanon at the Democratic convention in Philadelphia?

Mr. MCCLOSKEY. You remember Toby Moffitt, an Arab-American, who was running for the Senate in Connecticut and who went with me to Beirut in 1980, and Toby came up, in effect, supporting Israel's actions in order to try to be elected to the Senate from Connecticut.

I'm not saying that any politician can say what I am saying today and be elected in this country today. Paul Findley, a fine Congressman, lost on that issue alone in a cornbelt district in southern Illinois.

What I'm saying is that it is a fact of life in America that an elected politician cannot lead on a controversial issue until there is a vocal constituency.

If you did nothing more, for example, those Americans who believe as I do, then vow to match the financial contributions to any candidate who is asking for the annexation of the West Bank and Gaza, or of any candidate who is unwilling to cut off aid to Israel, that would do a lot.

There's an incredible constituency in this country today against foreign aid. At a time of a $200 billion dificit, you see Secretary Shultz urging, let's vote $14 billion for foreign aid. Well, Congress has passed the Foreign Aid bill over the last ten or twelve years only because of its including this sizable chunk of money for Israel. We give one-fifth of our foreign aid to a country of 3.5 million people, that is no longer a destitute country defending itself against a series of military onslaughts.

This is the most powerful military country in that part of the world. To give them continuing military aid is absurd, and I think the American people would say, let's cut off that $2.5 million aid to Israel.

We give more aid to families in Israel than we give to families in Appalachia.

But I do not see an answer to your question. The elected politician is unable to take the position that is right until a group such as this supports him.

I read Bobby Kennedy's speech to you because I was challenging business leaders to give politicians the courage to do what is right.

Do you remember a politician ever getting elected who said, "I want to cut Social Security benefits for elderly citizens, I want to cut food stamps, I want to cut benefits to State and Federal employees"?

Politicians are politic. They get elected for promising more, not for cutting. It's too much to expect, of a Republican or a Democrat.

Do you remember the great Social Security debate of the 1982 elections? Which politician did you hear urge that we reduce the cost-of-living benefits for the elderly people? Everybody in Washington knows, everybody in this country knows, that we're paying old people today five times what they put into the system, that we have to cut at least the automatic escalator. Yet no politician dared say it.

John Glenn, and some others, would have the courage to say what they believe if there was a constituency willing to support them and to say that it was appropriate and that he wasn't being anti-Semitic because he was suggesting cutting aid to Israel.

When I made the speech that I did, on the floor of the House, 30 of my colleagues came up to me—30—and said, "Pete, you're right, but we can't say so publicly."

GUEST. According to your knowledge, is it legal or not for the American Jewish community to force the American lobbies to publish their support?

Mr. MCCLOSKEY. Yes, sure. There's nothing wrong with, in the American political process, pointing to your opponent and saying he's financed by Arab money. Perfectly proper.

We have free speech in the country. The most incredible irony of this position is that the Jewish community now is trying to shut

off debate on the other side. The community that has so long stood for social justice and free speech and the right to express dissenting views does not want heard what they're doing. It claims that those who say that there's a Jewish lobby, or a Jewish lobby control in Congress, are in effect anti-Semitic. Baloney.

I have never held a public meeting in which Jewish constituents didn't come to that meeting and say, the oil lobby controls American, or the supernational companies control America. It is a perfectly reasonable ground for public debate. But by raising this spectre of anti-Semitism, they put a chill on public debate, where honorable people are afraid to speak out for fear of being condemned as being anti-Semitic. That is absolutely pure baloney, but it took some courage to start it.

I'm going to close now, because I know you have other business to take care of.

I hope, by laying down this challenge, the Board might conceivably consider laying out four such questions as I have defined, and possibly making it a point to ask all candidates for President what their positions are. You'll hear very few yes and no responses to those questions.

Thank you very much. (Applause)●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. McDADE (at the request of Mr. LOTT), from 4 p.m. today and the balance of the week, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HUNTER) to revise and extend their remarks and include extraneous material:)

Mr. CORCORAN, for 10 minutes, today.

Mr. HAMMERSCHMIDT, for 5 minutes, today.

Mr. FISH, for 10 minutes, today.

Mr. PORTER, for 10 minutes, today.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. ALEXANDER, for 60 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. DWYER of New Jersey, for 5 minutes, today.

Mr. STRATTON, for 5 minutes, today.

Mr. DICKS, for 5 minutes, today.

Mr. RICHARDSON, for 60 minutes, on May 12.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. RAHALL, to revise and extend his remarks and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,690.

Mr. PORTER, immediately following the special order of Ms. FERRARO today.

(The following Members (at the request of Mr. HUNTER) and to include extraneous matter:)

Mr. COUGHLIN.
Mr. PORTER.
Mr. BROOMFIELD in two instances.
Mr. GREEN.
Mr. ROBINSON.
Mr. PRITCHARD.
Mr. SMITH of New Jersey.
Mr. PURSELL.
Mr. KEMP in two instances.
Mr. LOTT.
Mr. CAMPBELL.
Mr. LENT.
Mr. LEWIS of California in two instances.
Mrs. HOLT.
Mr. SILJANDER.
Mr. HYDE.
Mr. RITTER.
Mr. MARTIN of North Carolina.
Mr. FIELDS in four instances.
Mr. LUJAN in two instances.
Mr. COATS.
Mr. RIDGE.
Mr. PHILIP M. CRANE.
Mr. LATTA.

(The following Members (at the request of Mr. GONZALEZ) and to include extraneous matter:)

Mr. FAZIO in two instances.
Mr. STARK in two instances.
Mr. EDGAR.
Ms. OAKAR.
Ms. KAPTUR.
Mr. YATRON.
Mr. HAMILTON.
Mr. DWYER of New Jersey.
Mr. FORD of Tennessee.
Mr. LIPINSKI.
Mr. SISISKY in two instances.

Mr. HARKIN.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 287. An act to establish the Harry S Truman National Historic Site in the State of Missouri, and for other purposes.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on May 10, 1983, present to the President, for his approval, a joint resolution of the House of the following title:

H.J. Res. 219. Joint resolution declaring the support of the U.S. Government for efforts of the U.S. Soccer Federation to bring the World Cup to the United States in 1986, designating the Secretary of Commerce as the official representative of the U.S. Government to the Federation Internationale de Football Assocation, and for other purposes.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 44 minutes p.m.), the House adjourned until tomorrow, Thursday, May 12, 1983, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1120. A letter from the Acting Administrator, U.S. Environmental Protection Agency, transmitting a draft of proposed legislation to amend and extend the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for 2 years; to the Committee on Agriculture.

1121. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of May 1, 1983, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 98-61); to the Committee on Appropriations and ordered to be printed.

1122. A letter from the Director, National Legislative Commission, the American Legion, transmitting the financial statement and audit for 1982, pursuant to 36 U.S.C. 1103; to the Committee on the Judiciary.

1123. A letter from the Comptroller General of the United States, transmitting a report on the Powder River Basin Federal coal lease sale (GAO/RCED-83-119, May 11, 1983); jointly, to the Committees on Government Operations and Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DELLUMS: Committee on the District of Columbia. H.R. 2637. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia (Rept. No. 98-100). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 1416. A bill to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1984 through 1986; with amendments (Rept. No. 98-101). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 2785. A bill to amend the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act relating to the scientific advisory panel and to extend the authorization for appropriations for such act; with amendments (Rept. No. 98-104). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 2602. A bill to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the United States Trade Representative for fiscal year 1984, and for other purposes; with amendments (Rept. No. 98-105). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 2681. A bill to make certain amendments to sections 4, 15, and 15B of the Securities Exchange Act of 1934; with amendments (Rept. No. 98-106). Referred to the Committee of the Whole House on the State of the Union.

Mr. PRICE: Committee on Armed Services. H.R. 2969. A bill to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, and for other purposes (Rept. No. 98-107). Referred to the Committee of the Whole House on the State of the Union.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 9. A bill to designate components of the National Wilderness Preservation System in the State of Florida; with an amendment; referred to the Committee on Agriculture for a period ending not later than June 1, 1983, for consideration of such portions of the bill and amendment as fall within its jurisdiction pursuant to clause 1(a), rule X (Rept. No. 98-102, Pt. I). Ordered to be printed.

Mr. UDALL: Committeee on Interior and Insular Affairs. H.R. 2510. A bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954 and section 305 of the Energy Reorganization Act of 1974, and for other purposes; with an amendment; referred to the Committee on Energy and Commerce for a period ending not later than June 22, 1983, for consideration of such portions of the bill and amendment as fall within its jurisdiction pursuant to clause 1(h), rule X (Rept. No. 98-103, Pt. I). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOLAND:

H.R. 2968. A bill to authorize appropriations for fiscal year 1984 for intelligence and intelligence-related activities of the U.S. Government, for the intelligence community staff, for the Central Intelligence Agency a retirement and disability system, and for other purposes; to the Committee on the Permanent Select Committee on Intelligence.

By Mr. PRICE (for himself and Mr. DICKINSON):

H.R. 2969. A bill to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, and for other purposes; to the Committee on Armed Services.

By Mr. FLORIO:

H.R. 2970. A bill to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in such act, and for other purposes; jointly, to the Committees on Energy and Commerce and Rules.

By Mr. BONKER:

H.R. 2971. A bill to amend the authorities contained in the Export Administration Act of 1979, and for other purposes; to the Committee on Foreign Affairs.

By Mr. PRICE (for himself and Mr. DICKINSON):

H.R. 2972. A bill to authorize certain construction at military installations for fiscal year 1984, and for other purposes; to the Committee on Armed Services.

By Mr. JACOBS (for himself, Mr. FORD of Tennessee, Mr. GUARINI, Mr. RUSSO, Mr. HANCE, Mr. ANTHONY, and Mr. JENKINS):

H.R. 2973. A bill to repeal the withholding of tax from interest and dividends; to the Committee on Ways and Means.

By Mr. MOAKLEY:

H.R. 2974. A bill to authorize appropriations for the Federal Trade Commission, to provide for congressional review of Commission rules, and for other purposes; jointly, to the Committees on Energy and Commerce and Rules.

By Mrs. BYRON:

H.R. 2975. A bill to amend title 17 of the United States Code to authorize certain nonprofit use of copyrighted works by volunteer fire companies and rescue squads; to the Committee on the Judiciary.

By Mr. CORCORAN:

H.R. 2976. A bill to increase voter participation by providing for free mailing of absentee ballots, improving tax credits for political contributions, and increasing certain campaign contribution and expenditure limitations, and for other purposes; jointly, to the Committees on House Administration, Post Office and Civil Service, and Ways and Means.

By Mr. EDWARDS of Oklahoma (for himself, Mr. DYMALLY, Mr. MARTIN of North Carolina, Mr. SILJANDER, Mr. NELSON of Florida, Mr. CAMPBELL, Mr. HALL of Ohio, Mr. PHILIP M. CRANE, Mr. SENSENBRENNER, Mr. DANIEL, Mr. BLILEY, Mr. EMERSON, Mr. QUILLEN, and Mr. RUDD):

H.R. 2977. A bill to amend the Internal Revenue Code of 1954 to improve Internal Revenue Service procedures concerning investigations and audits of churches, and for other purposes; to the Committee on Ways and Means.

By Mr. FISH:

H.R. 2978. A bill to establish the crime victim's assistance fund; to the Committee on the Judiciary.

By Mr. GREEN:

H.R. 2979. A bill to provide increased benefits under the medicare program, and for other purposes; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. GUARINI:

H.R. 2980. A bill to declare a portion of the Hudson River in Hudson County, N.J., to be not a navigable water of the United States, and for other purposes; to the Committee on Energy and Commerce.

By Mr. HYDE (for himself, Mr. ANNUNZIO, Mr. CORCORAN, Mr. PHILIP M. CRANE, Mr. DURBIN, Mrs. MARTIN of Illinois, Mr. MICHEL, Mr. O'BRIEN, Mr. PRICE, Mr. ROSTENKOWSKI, Mr. RUSSO, and Mr. SIMON):

H.R. 2981. A bill to exempt units of local government from the operation of the antitrust laws to the extent States are exempt from the operation of such laws; to the Committee on the Judiciary.

By Mr. KOGOVSEK:

H.R. 2982. A bill to exempt irrigation conveyance systems from fees and conditions under the Federal Land Policy and Management Act of 1976, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. LUJAN:

H.R. 2983. A bill to provide for the addition of about 20 acres to the Sandia Mountain Wilderness; to the Committee on Interior and Insular Affairs.

H.R. 2984. A bill to amend the Internal Revenue Code of 1954 to provide that certain married individuals are eligible for the deduction for retirement savings on the basis of the earnings of their spouse; to the Committee on Ways and Means.

By Mr. MOORHEAD:

H.R. 2985. A bill to amend the copyright law, title 17 of the United States Code, to provide for protection of ornamental designs of useful articles, to the Committee on the Judiciary.

By Mr. PRICE (for himself and Mr. DICKINSON) (by request):

H.R. 2986. A bill to repeal section 5(b) of the Subversive Activities Control Act of 1950; to the Committee on Armed Services.

By Mr. SHANNON (for himself and Mr. STARK):

H.R. 2987. A bill to amend the Social Security Act to provide for reform in the dis-

ability determination process; to the Committee on Ways and Means.

By Mr. STENHOLM (for himself, Mr. MITCHELL, Mr. HIGHTOWER, Mr. SIMON, Mr. LOEFFLER, Mr. JONES of North Carolina, Mr. DASCHLE, Mr. HANCE, Mr. STANGELAND, Mr. LEATH of Texas, Mr. MAVROULES, Mr. COLEMAN of Missouri, Mr. SAM B. HALL, JR., Mr. JEFFORDS, Mr. SKELTON, Mr. SKEEN, Mr. BEVILL, Mr. ROE, Mr. MCDADE, Mr. FROST, Mr. GUNDERSON, Mr. WORTLEY, Mr. ECKART, Mr. WEBER, Mr. VANDERGRIFF, Mr. LEWIS of Florida, Mr. ROBERTS, Mr. EVANS of Iowa, and Mr. BEREUTER):

H.R. 2988. A bill to clarify the eligibility of small agricultural cooperatives for assistance under section 7(b)(2) of the Small Business Act; to the Committee on Small Business.

By Mr. FIELDS:

H.J. Res. 264. Joint resolution proposing an amendment to the Constitution requiring the Federal judges be reconfirmed by the Senate every 10 years; to the Committee on the Judiciary.

By Mr. GONZALEZ (for himself, Mr. ST GERMAIN, Mr. WYLIE, and Mr. MCKINNEY:

H.J. Res. 265. Joint resolution to provide for the temporary extension of certain insurance programs relating to housing and community development, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. KEMP:

H.J. Res. 266. Joint resolution designating the week beginning September 4, 1983, as "Youth of America Week"; to the Committee on Post Office and Civil Service.

By Mr. BONKER:

H. Con. Res. 124. Concurrent resolution relating to U.S. participation in the sixth meeting of the United Nations Conference on Trade and Development; to the Committee on Foreign Affairs.

By Mr. DUNCAN:

H. Con. Res. 125. Concurrent resolution expressing the sense of Congress that the Tennessee Valley Authority should operate the Ocoee No. 2 hydro project on the Ocoee River in Tennessee so that water is not diverted from the riverbed for a minimum of 110 days per calendar year; to the Committee on Public Works and Transportation.

By Mr. SKELTON (for himself, Mr. WHEAT, Mr. WRIGHT, Mr. CLAY, Mr. YOUNG of Missouri, Mr. GEPHARDT, Mr. COLEMAN of Missouri, Mr. EMERSON, Mr. VOLKMER, Mr. TAYLOR, and Mr. PEPPER):

H. Con. Res. 126. Concurrent resolution providing for the commemoration of the 100th anniversary of the birth of Harry S. Truman; to the Committee on Rules.

By Mr. ANDERSON:

H. Res. 191. Resolution expressing the sense of the House of Representatives that the Director of the National Institutes of Health should give priority to finding a cure for lupus erythematosus; to the Committee on Energy and Commerce.

By Mr. GREEN:

H. Res. 192. Resolution expressing the sense of the House of Representatives that the Chrysler Corporation Loan Guarantee Board shall not waive or surrender any right of the United States with respect to warrants for Chrysler Corp. stock which were issued to the United States pursuant to the Chrysler Corporation Loan Guarantee Act of 1979; to the Committee on Banking, Finance and Urban Affairs.

MEMORIALS

Under clause 4 of rule XXII,

126. Mr. RUDD presented a memorial of the House of Representatives of the State of Arizona, relative to POW's and MIA's; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. FRENZEL introduced a bill (H.R. 2989) for the relief of Simon Marriott; which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS

The following registrations were submitted for the first calendar quarter 1983:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the first calendar quarter 1983:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor* ("*Period*" from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the fourth calendar quarter of 1982 were received too late to be included in the published reports for that quarter:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor*
	(*"Period"* from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

EXTENSIONS OF REMARKS

MEDAL OF MERIT RECIPIENTS

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FORD of Michigan. Mr. Speaker, last weekend I had the privilege of presenting my annual Medal of Merit for Outstanding Youth to 23 young people from throughout the 15th Congressional District. The range of voluntarism, achievement, and commitment of these young people is an outstanding tribute to their families, schools, and communities and I want to call this event to your attention.

I also want to take this opportunity to commend the 17-member citizens volunteer committee, chaired by Mr. Doug Ritter of Canton Township, for their dedication and commitment in the selection of tomorrow's leaders.

The 1983 Medal of merit winners are:

Augusta Township: Felicia J. Chestnut, 17, daughter of James and Mary Chestnut, for volunteering musical entertainment to service clubs and churches, and for serving in a student leadership role on school millage issues.

Belleville: Kimberly Ann Fields, 17, daughter of Dave and Sandy Fields, also a gifted musician-violinist, who has donated free musical recitals to the Kiwanis, Rotary, senior citizens and church groups.

Canton Township: Catherine Kelly Baldrica, 17, daughter of Daniel J. and Katherine A. Baldrica, for planning and preparation assistance to the Canton Public Library; and for a broad range of volunteer work with Health-a-Rama, her neighborhood civic association, class fundraisers, the Canton County Festival, and as a special math and French tutor.

Garden City: Brian Petrucci, 17, son of Eno and Virginia Petrucci, for help with Jaycee projects, the youth athletic association, Little League, and for his involvement with the City Charter ballot issue.

Colleen Elliott, 18, daughter of Carol and Robert Elliott, for donating two summers to assist ninth graders in her high school band, for making Easter bunny visits to shut-ins, and also for her fundraising with the Muscular Dystrophy Telethon.

David V. J. Powierski, 19, son of Casimir and Leola Powierski, for his exceptional work as a leadership trainer in the Boy Scouts, as Assistant Scoutmaster to Troop 765, and as an Eagle Scout.

Huron Township: Cheryl Simpson, 17, daughter of Mr. and Mrs. James Simpson, for her leadership in student government, scholarship and in athletic competition.

Livonia: Caroline Kert, 16, daughter of Harry and Corrine Kert, for distinguished musical accomplishments and for assisting underprivileged families in Detroit and Haiti.

Romulus: James P. Holbrook, 18, son of James E. and Josephine M. Holbrook, for his volunteer renovation of the Oakwoods Metro Park Nature Center (Sky Come Down Trail).

Marlene Carpenter, 17, daughter of George and Kathleen Carpenter, for donating considerable time to the tutoring of fellow students, and for assisting the C.R.O.P. fundraising program in Romulus, which helps needy people throughout the world.

Saline: Susan Tracy Stanbridge, 18, daughter of Cynthia Stanbridge, for her leadership and involvement in student government, the Saline High School FHA Beautification Project, and her volunteer work as a Teen Advisor with the Young People's Bereavement Support Group Committee.

Southgate: Cheryl A. Jones, 18, daughter of Elwyn and Pearl Jones, for working with the local beautification committee, and for her assistance in redrafting the school constitution during the recent merger of the two Southgate high schools.

Lisa Zmijewski, 18, daughter of Robert and Sharon Zmijewski, for scholarship and for Candy Striper volunteer activities with Wyandotte General Hospital.

Superior Township: Mark D. Yenkel, 20, son of Ray and Marilyn Yenkel, for providing personal leadership and counsel to youth, for numerous hours of work with his community ice hockey rink, and for his work with the Boy Scouts.

Cheryl Rogers, 15, daughter of Edward and Mildred Rogers, for serving as a bilingual tutor for her Mexican-born neighbor, and for acting as an aide at Cheney Elementary School.

Ida Williams, 16, daughter of Karl and Kathleen Williams, for her exceptional work with the Special Olympics and other projects assisting retarded children.

Taylor: Toni Marie Amato, 18, daughter of Carol and John Subeck, for raising $700 during White Cane Week in conjunction with the Taylor Lions Club, and for her numerous other volunteer activities.

Phillip J. Antrassian, 18, son of Vincent and Mary Antrassian, for fundraising success with the school athletic program, and for his participation in student government.

Van Buren Township: Tami Harkai, 16, daughter of Mr. and Mrs. Robert Harkai, for serving as co-chair of the local blood bank drive and for contributing articles to local newspapers about her fellow students and school events.

Wayne: Jacqueline F. Poindexter, 17, daughter of Bennie D. and Lucille W. Poindexter, for several contributions, including the 8-10 hours weekly she donates to the Project Head Start preschool program, and her voluntarism with her church's summer reading program.

Westland: James J. Williams, 18, son of Thomas P. and Mary A. Ward, for numerous contributions over several years in performing musical presentations for the disabled, bereaved and imprisoned, and for donating time as a music tutor.

Ypsilanti: Donna Agnes Porter, 17, daughter of John and Lois Porter, for providing entertainment and assistance to the elderly, including monthly birthday celebrations, and for involving many of her classmates in visitations for the sick and aged.

Ypsilanti Township: Penny P. Foster, 21, daughter of Lyle and Vera Foster, for outstanding problem-solving as a member of the Eastern Michigan University Student Senate, and for her voluntarism with the Little League.

Mr. Speaker, this is one of the most rewarding events of every year for me. I am proud to call this year's winners to your attention and am proud to honor them by placing their names in the CONGRESSIONAL RECORD.●

THE 18TH CONGRESSIONAL DISTRICT RESPONDS TO CONGRESSIONAL POLL IN RECORD LARGE NUMBERS

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. BROOMFIELD. Mr. Speaker, each year I mail a congressional questionnaire to the residents of the 18th Congressional District of Michigan in an effort to learn their thinking on important national issues.

Nearly 40,000 individuals replied this year—by far the largest response ever to this program. Significantly, nearly three-quarters of those who replied said they would oppose repeal of the scheduled 10-percent personal income tax cut effective July 1.

As in past years, my questionnaire also was distributed to high schools throughout the area. The replies of the young people who participated were tabulated separately and present an interesting comparison to the views of the adults who replied.

Because of the importance of the issues involved and the unusually large number of replies received, I am including a tabulation of the results at this point in the RECORD.

1983 CONGRESSIONAL POLL RESULTS

[In percent]

	Adults [1]		Students	
	Yes	No	Yes	No
1. Do you believe further cuts can be made in the defense budget without endangering our national security?	70	28	69	31
2. Should social security benefits be taxed in order to help sustain the system?	21	78	22	78
3. Do you support the President's call for a freeze on Federal spending to help reduce the deficit?	92	6	74	26
4. Would you favor a system of reciprocal tariffs that would treat Japanese and other foreign imports as U.S. exports are treated overseas?	87	12	85	15

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

1983 CONGRESSIONAL POLL RESULTS—Continued

[In percent]

	Adults [1]		Students	
	Yes	No	Yes	No
5. Would you favor repeal of legislation permitting the Internal Revenue Service to withhold 10 percent of dividend and interest payments?	77	21	58	42
6. Would you support a federally funded program to retrain unemployed workers in industries where jobs have been permanently lost to foreign competition?	46	51	66	34
7. Do you believe states with the highest unemployment should be given preference in the awarding of Federal contracts and grants?	73	26	82	18
8. Should Congress repeal the scheduled 10-percent personal income tax cut scheduled to take effect this summer?	26	72	41	59

[1] Balance equaling 100 percent undecided.●

A BILL TO EXTEND ANTITRUST IMMUNITY TO LOCAL GOVERNMENTS

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. HYDE. Mr. Speaker, today I am pleased to introduce a bill in response to the decision of the Supreme Court in Community Communications Co., Inc. against city of Boulder, handed down in January 1982.

The Boulder decision has refocused attention on the relationship between the Federal antitrust laws and local government activities. In the wake of Boulder, many municipal officials fear that the threat of treble damage antitrust liability could inhibit their performance of legitimate governmental functions.

By their very nature, municipal actions often tend to have a major impact on competition, and usually involve discretionary decisions which have exclusionary effects. Over the past 5 years, municipalities have been charged with a number of antitrust violations associated with a wide range of franchising, licensing, zoning, and other regulatory activities.

By way of background, in Parker against Brown, decided in 1943, the Supreme Court upheld a California State agricultural marketing program which had been challenged as a restraint of trade. The Court held that the Sherman Act was never intended by the Congress to apply to State action or official action imposed and directed by a State. The key to the Court's holding was the determination that "nothing in the language of the Sherman Act or its history * * * suggests that its purpose was to restrain a State or its officers or agents from activities directed by its legislature." In the 1975 case of Goldfarb against Virginia State Bar, the Supreme Court stated that "the threshold inquiry in determining if an anticompetitive activity is State action of the type the Sherman Act was not meant to proscribe is whether the activity is required by the State acting as sovereign." In that case, the Court held that the publication and enforcement of a minimum fee schedule by State and local bar associations was not required by State law or the State supreme court, and thus was not State action for the purposes of the Sherman Act.

The Boulder decision held that municipal action, even by a home rule city with complete authority in local matters, is not immune from the antitrust laws unless: First, it constitutes the sovereign action of the State itself or, second, is authorized by a "clearly articulated and affirmatively expressed State policy" of substituting regulation for competition. A general grant of home rule authority does not meet that second standard—"mere neutrality" is not enough, the Court said. The Boulder Court also refused to distinguish proprietary from governmental actions by the municipality. In a somewhat similar case decided 4 years earlier, city of Lafayette against Louisiana Power and Light Co., the municipality's actions had been proprietary rather than governmental and Justice Burger had suggested in a concurring opinion that governmental action should be immune from antitrust challenge. But the Boulder Court, while acknowledging that the Parker doctrine reflects Congress intention to embody in the Sherman Act the federalist principle of State sovereignty, expressly held that the Federal system "has no place for sovereign cities."

As I said at the outset, municipal officials are concerned that their legitimate exercise of both their proprietary and governmental responsibilities will give rise to treble damage antitrust liability. It is not surprising, therefore, that the National League of Cities and the U.S. Conference of Mayors are advising us that they favor an amendment to the antitrust laws to extend the Parker State action exemption to cities and other political subdivisions of the State. I am advised that the Office of the Clerk of the House of Representatives has forwarded to the Judiciary Committee a number of resolutions adopted by city councils and local bodies requesting a legislative remedy. Many of us have also been hearing from individual municipalities in our districts.

I am convinced myself that this is a problem of sufficient importance to merit the prompt attention of the Judiciary Committees of both the House and the Senate. I understand that Senator THURMOND is having legislation prepared for introduction in the other body. The bill which I am introducing today is my contribution toward getting the legislative process underway in the House of Representatives. My bill provides that a unit of local government shall be liable under the antitrust laws for any conduct within the authority vested in such unit by any law only to the extent that a State, if such State were authorized by any law to engage in identical conduct, would be liable under the antitrust laws for such identical conduct. This may not be a perfect solution to the problem, but I believe it is a useful start. I invite other Members to join me in this important initiative by cosponsoring this bill.●

TRIBUTE TO AN OUTSTANDING NEWSPAPER PUBLISHER, IRA CAHN

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. LENT. Mr. Speaker, I raise to call to the attention of my colleagues the achievements and accomplishments of an outstanding newspaper publisher in the Fourth Congressional District of New York, which I have the honor to represent.

I refer to Ira Cahn, publisher of the Massapequa Post, a newspaper serving some 8,000 families in the communities of Massapequa and Massapequa Park, and the Amityville Record serving the Amityville community. Ira Cahn founded the Massapequa Post in 1951. Throughout the more than three decades the newspaper has been published by Ira Cahn, it has been a strong and forceful voice for community betterment.

During those years, I have been a reader of the Massapequa Post and have long admired the high standards of journalism which have been established under Ira Cahn's supervision. This is in no small part due to the fact that Ira's lovely and talented wife Barbara, has served as the paper's managing editor during most of the years the Massapequa Post has been published. The newspaper has won more than 100 awards of journalistic excellence in every field of journalistic endeavor, and represents the very epitome of responsible community leadership and service.

Ira Cahn, now generally referred to as the dean of Long Island newspaper publishers and editors, has won substantial recognition from his peers. He has served as president of the New York Press Association, and is currently a member of the board of the Long Island Press Association. Always interested in the younger generation, Ira Cahn is an associate professor of community journalism at C. W. Post College in Greenvale, N.Y., and no better instructor in that field can be found.

Mr. Speaker, one would think that with all of these professional duties and responsibilities, Ira Cahn's days

would be fully occupied. But such is far from the truth. Few have devoted as much time to community and civic affairs as has Ira Cahn. For example, he has taken a most active interest in the history of the Massapequa area, and is a founding member of the Massapequa Historical Society. He also served as vice chairman of the bicentennial commission for the town of Oyster Bay.

In truth, Mr. Speaker, Ira Cahn is not only an outstanding newspaper editor and publisher, he is an outstanding citizen of this great Nation of ours. I know that my colleagues here in the House join me in offering our heartiest congratulations and our warmest best wishes to Ira and his lovely wife Barbara. Together, they have forged an exemplary record of community service and leadership which can serve as a most inspiring example for all of us.●

BIRMINGHAM, MICH., CELEBRATES GOLDEN ANNIVERSARY

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. BROOMFIELD. Mr. Speaker, next week the city of Birmingham, Mich., commences its celebration of the 50th anniversary of its incorporation. It has been my privilege to represent the city and its people throughout my years in the House of Representatives, and I wish to extend my sincerest congratulations and best wishes to them on their golden anniversary.

While the history of Birmingham as a city goes back 50 years, its real history extends back over 157 years when the first settlers built their cabins in the area. These were people who left the comfort, civilization, and confinement of the eastern States to seek opportunity and to build a new and better life for themselves and their families through hard work and true grit out west. These were the same people who eventually built a great nation that straddled a continent.

From this beginning, the history of Birmingham parallels the growth of our Nation. From the few log cabins along an Indian trail, a hard days travel from Detroit, Birmingham grew to become a small town that serviced the many farms in the area. In the 20th century with the improvement of roads and the means of travel, the face of Birmingham changed again to become first a bustling town and then the modern, attractive suburban community it is today.

While Birmingham today is part of the sprawling Detroit metropolitan community, it has been able to retain its own identity and historic charm.

The city today is one of nice homes, excellent schools, friendly people, and a good, responsive local government. It is a community of involved citizens taking an active role in helping each other and the community through a variety of clubs and organizations. It is a mature city that is aware and proud of its past and optimistic about its future.

Mr. Speaker, the people of Birmingham and their civic leaders deserve to be congratulated for their fine work in making Birmingham an excellent place to live. As the city readies itself for its golden anniversary celebration, I wish it continued success and prosperity in the decades to come.●

STATEMENT OF THE HONORABLE MARCY KAPTUR BEFORE THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS IN THE U.S. HOUSE OF REPRESENTATIVES, MAY 9, 1983

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Ms. KAPTUR. Mr. Speaker, I would like to insert a copy of the statement which I made before the Committee on Banking, Finance and Urban Affairs, on May 9, 1983, during the consideration of the International Monetary Fund quota increase request. My statement follows:

STATEMENT OF THE HONORABLE MARCY KAPTUR BEFORE THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS IN THE U.S. HOUSE OF REPRESENTATIVES, MAY 9, 1983

Mr. Chairman, I have spent a great deal of time thinking about the request for the IMF quota increase, and before we vote on this issue, I would like to explain my position. This is one of the more difficult votes with which I personally have been faced in my months in Congress. I intent to insert my full statement in the Record.

The extensive hearings involving witnesses on all sides of this issue, which I commend Congressman Neal, Chairman of the Subcommittee on International Trade, Investment and Monetary Policy, for holding, have aided me in my decision on this matter. I thank Congressman Neal and Chairman St Germain for their excellent work and for the excellent work of their staffs. I want to briefly share my ideas with the committee members.

I regrettably will not support the proposal to authorize an increase in the U.S. quota to the IMF. However, I do not want this to be interpreted as a vote against the American role in international development, but rather as a statement of deep concern that international financial institutions presently in place are not properly constituted to result in third world development that touches the masses of poor people in the host countries. No short-term financial band-aid in the form of IMF increases to provide so-called liquidity can begin to address the staggering long-term debt these nations have amassed as they embarked on development. Amendments being offered by several members to stretch-out repayments, though well-intentioned, are nothing more than attempts to make a "silk purse out of a sow's ear." No matter how hard we try to address the long-term debt issue, the IMF proves to be an inadequate institution.

First, I am disturbed by the fact that at best, the result of the banks and the IMF lending activities, as George Champion formerly from Chase Manhattan Bank stated, has been the creation of a heavy debt with little or no improvement in the living standards of the developing countries' needy people. Loaned funds, either directly or indirectly, should not be used for the expansion of recipient governments, nor for the purchase of military equipment, nor for investment in capital-intensive industries. Rather, loaned funds should aid people and small enterprises, including such entities as agricultural cooperatives, which address the real needs of the poor in developing nations. Unfortunately, it is common knowledge that IMF recommendations to developing nations have often adversely impacted on such development. As the Interreligious Task Force on U.S. Food Policy stated to the Subcommittee on International Trade, "by recommending policies that will restore a foreign exchange balance in the short-run, the IMF undermines the basis for long-term, self-reliant, needs-oriented development."

Essentially, IMF policy is a policy of staying the course. I believe that we must break the pattern of encouraging export-led development strategies for the developing nations. These strategies have resulted in the following scenario: 1) increased borrowing for longer periods of time; 2) massive debts; 3) IMF suggestions that these nations tighten monetary and fiscal policies; and finally 4) heightened political tensions and social unrest in host countries. Governments in developing nations must not have to resort the repressive economic policies in order to carry out IMF-encouraged financial arrangements.

I believe monetary and fiscal policies cannot be separated from development policies, and so we must work for major changes in global economic development and trade arrangements. Holding a conference, modeled after the original Bretton Woods Conference, that focuses on international fiscal and monetary policy and its relation to development policy, is crucial and timely. Most of our nation's current trade troubles—the falling exports, the disputes over other countries' trading tactics, the alleged decline of American industrial competitiveness—are the result of exchange rates fueling an overpriced dollar, lifted by high interest rates, as well as the problems of cash-rich banks that reacted to Mideast oil price hikes of the 1970s. The abnormally high dollar is doing irreparable harm to our economy—both to the export industries and to producers here that must compete with imports. Moreoever, it is devastating to debtor nations. Hence, the North and South must engage in a major dialogue to fundamentally alter current arrangements in the international fiscal and monetary systems, and address their relation to development policy. I will support all efforts to do this.

Finally, I believe that the major banks which loaned this money are entirely responsible for their own actions, and that greater regulation is not the answer. I believe these banks, on their own, should set up larger loan loss reserves. Their painful experience in the international lending

arena should be adequate impetus to do so. Unfortunately, the idea which Senator Dole (in the other body) floated of a progressive excise tax on deposits of commercial banks earmarked to the IMF to bolster its funds, while intellectually appealing, is not politically feasible. A useful albeit a modest proposal at first blush, would be to have the banks pay for the regulatory agency exams evaluating and commenting on their country risk, similar to a user fee. Under the current system, the U.S. government pays for the exams which the agencies perform on U.S. banks with significant foreign lending activities. The cost is not insignificant, and is borne equally by the U.S. taxpayers. We should see to it that the large banks which land abroad and benefit from the IMF, pay the Treasury the examination fee.

In conclusion, I oppose the request for the IMF quota increase for several reasons. First, I do not believe that the IMF lending activities address the problems faced by the poor in third world nations. Export-led development policies, encouraged by the IMF, have undermined the basis for long-term, needs-oriented development. Second, I believe that a worldwide conference is necessary to assess and alter international fiscal, monetary and development policies. I will support efforts to aid developing countries, not by increasing the IMF quota, but rather by pushing for a worldwide conference to work for major changes in global economic development and trade arrangements. Finally, I believe that the banks must be responsible for their own errors, and that the U.S. taxpayers should not be forced to pay for the mistakes of the large banks.

Mr. Chairman, I would like to thank you again for allowing me this time today to share my deeply-held views.●

BUSINESS PERSON OF THE YEAR

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. PURSELL. Mr. Speaker, I am sharing with my colleagues a success story of Mr. R. Dale Moretz, the owner of a small business in Jackson, Mich. Mr. Moretz accomplished the impossible of keeping a small business alive and employees on its payroll during the most severe recession in the history of Michigan. For this accomplishment, Mr. Moretz was named Michigan Small Business Person of the Year by the U.S. Small Business Administration.

Mr. Moretz, coowner of the Mid-American Products Corp., accomplished this impossible task by using wise management practices and by attracting U.S. defense contracts. According to Mr. Moretz, the defense contracts gave his company a higher priority in securing raw materials that were in short supply during the 1972 Arab oil embargo.

I offer my congratulations to Mr. Moretz and urge my colleagues to read of his accomplishment as outlined in the following news article printed in the Jackson Citizen Patriot.

(The article follows:)

BUSINESS PERSON OF THE YEAR

CO-OWNER OF JACKSON FIRM USED DEFENSE CONTRACTS TO KEEP WHEELS TURNING

(By Dan Spickler)

R. Dale Moretz of Jackson, named Michigan Small Business Person of the Year, showed how to keep a fledgling business alive during a recession.

When the going got tough after his company formed in 1972, particularly because of the Arab oil embargo, Moretz went after defense contracts. That made the firm a high priority for obtaining petroleum-based materials.

Moretz, co-owner of Mid-American Products Inc., 1603 Wildwood, was named the state's Small Business Person of the Year by the U.S. Small Business Administration.

"The selection is an honor, but I was really most proud when I was nominated, because you are nominated by your peers," Moretz said. Advisory councils made up of small business owners in each state made nominations to the SBA, and one winner was selected in each state. Moretz was given the award for Michigan.

Moretz has been active in the Greater Jackson Chamber of Commerce Small Business Council and has testified before state and congressional representatives about pending legislation. He is also a director of the Independent Business Association, a statewide group representing 2,000 small employers.

He has served on the White House Conference on Small Business and the Michigan Conference on Small Business.

The Jackson man will receive the award at a luncheon Monday, May 9, in Lansing as part of National Small Business Week, May 8-14.

Moretz, 41, of 1123 Woodbridge, was honored for his demonstration "that a small entrepreneur, with a good product and the application of sound management principles, can be successful even under the most trying circumstances," said Raymond L. Harshman, Michigan director of the SBA.

Mid-American Products, founded in 1972, started with a handful of employees and has grown to a diversified thermoplastic molding firm with 44 workers and annual sales approaching $2 million. It makes parts for aerospace, automotive, electronic and home appliance firms and numerous other applications.

Harshman said Mid-American demonstrated resourcefulness when, shortly after beginning business, it faced trouble with the oil embargo and the subsequent recession.

Moretz said the company survived by securing U.S. defense contracts, which grew to account for 40 percent of its sales volume.

"Now it's more like 25 percent," he said.

The defense contracts gave Mid-American higher priority in securing polymer raw materials that were in short supply due to the oil embargo.

Moretz is one of three owners of Mid-American. He grew up in North Carolina and graduated from the University of North Carolina in 1967.

Although he came to Michigan and to Jackson to start the plastics firm, Moretz said the state's business climate is still negative due to increased taxation and higher than average employee costs.

"I see the national economy improving, so naturally Michigan's economy will improve, but we're still in a very negative climate," he said.

As for Mid-American Products, however, Moretz said he expects his firm to continue to grow.

"I think the whole future of Michigan really depends on small business people," he said. "We make up the most employement in the state."

SBA defines a small business as one that employs fewer than 500 employees. Such firms represent 98 percent of the 13.3 million firms in the country. Small businesses account for half of the country's total employement, about 50 million people. Nine out of 10 of these small firms employ fewer than 10 people.

Of the roughly 2,500 businesses in Jackson County, 1,800 of them employ fewer than 10 people, according to the U.S. Department of Commerce study of Jackson issued in 1979.

James Barrett, president of Michigan Chamber of Commerce, recently reported that between 1960 and 1976, 79 percent of all new jobs created in the state were by firms classified as small businesses.

A recent SBA report concludes that small businesses retain employees to a greater extent than larger firms and that the recession was not as damaging to smaller firms because of better cost controls.

Despite record bankruptcies of 65,807 in 1982, a 38 percent increase over the previous year, entrepreneurs are breaking into the business world at a record pace. Incorporation of new businesses totaled about 560,000 in 1982, double that of a decade ago, SBA officials said.●

A "SALUTE" TO THE WORCESTER, MASS., DISTRICT MEDICAL SOCIETY AND UNITED WAY

HON. JOSEPH D. EARLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. EARLY. Mr. Speaker, last April 15, the district medical society in my home city of Worcester, Mass., initiated a program to give free medical care "as long as there's a need" to "recession-distressed patients" and their families who are now without health insurance. Dr. John P. Howe III, president of the district society, announced that more than 450 physicians have agreed to participate in this activity which will be conducted in cosponsorship with the United Way. I would like to express my wholehearted personal endorsement of this noble gesture and extend my congratulations and appreciation to everyone connected with it.

The loss of health insurance benefits, through no fault of their own, is one of the major tragedies being visited upon unemployed workers and their family members in every region of the country. Many authorities believe that widespread unemployment will continue to plague the Nation over an extended period and will affect several million Americans. The records around the country reveal that because they cannot pay, and because of pride, embarrassment, discourage-

ment, and other reasons, a very great number of afflicted individuals tend to avoid seeking needed medical treatment until an illness reaches an emergency, and sometimes an irreversible, stage.

The tremendous mental strain, physical harm, and declining morale being experienced by these distressed families is easy to imagine. No one understands the undermining potentialities and actualities of accelerating health deterioration in such a situation better than the doctors of medicine. But understanding and even good intentions are one thing; taking effective action is another. Such action requires organization, scheduling, the giving up of substantial compensation and family recreation time and unselfish cooperation between and among individuals and units. But above all else, it requires the actual application of genuine concern for a fellow human being and genuine compassion for the bad fortune of a neighbor.

Of course, Federal and State Governments and legislatures are trying to find ways and means to provide necessary health care to unemployed workers and their families. Unfortunately, these well meant efforts are too often regarded as being procedurally complex, lacking in the human touch and too long delayed for corrective impact upon a home crisis.

Mr. Speaker, some noted sociology writers have been emphasizing, over the past decade, their fears about a dangerously increasing withdrawal, among Americans, of any personal interest in the well-being of their neighbors residing in the same streets, in the same housing area, in the same community. The abstraction from a neighbor's difficulties; the wish "not to get involved"; the lack of response even in an obvious crisis, is becoming more and more the rule among Americans rather than the exception. This abstraction fosters a cool indifference to a neighbor's plight, which can lead to bias, which can lead to hostility, which can result in violence and much additional evil. It is a dread disease that can grow to epidemic proportions. It can sabotage the foundation unity of citizen effort which is essential to the reasonable accomplishment of community objectives for common progress and improvement in the quality of local life.

Beyond their immense contribution of free medical care for unfortunate fellow citizens, the members of the Worcester District Medical Society and the United Way have made an equally, if not more, important contribution to the revival and strengthening of our traditional neighborly spirit in our area. Such a revival can serve to restore trust and confidence and a high morale and a more general feeling of well-being and unity throughout a community. It can regenerate a true concern and compassion for a neighbor in distress which the Bible encourages us all to do second only to the primary directive to love God. The neighborly action of so many of our Worcester doctors could lead to the cure of more than just physical ills. It could inspire the spreading of greater good will among people in all neighborhoods everywhere which is the foundation of better understanding in a more peaceful country and world.

That is why I hope the generous gesture of our Worcester District Medical Society will be highly contagious and speedily imitated throughout the country.

That is why I will fully support this splendid program to "help thy neighbor."

That is why I believe the members of our district medical society and their associates merit a united "salute" from their fellow Americans.

Mr. Speaker, at this point, I would like to include an editorial about the district medical society's program that appeared in the April 19, 1983, issue of the Worcester, Mass., Evening Gazette. The article follows:

[From the Worcester (Mass.) Evening Gazette, Apr. 19, 1983]

RESPONDING TO CRISIS

The Worcester District Medical Society deserves praise for its program to help the jobless maintain adequate levels of medical care.

Some 450 physician members of the society have agreed to take part in a program designed for those who have lost health benefits because they have been out of work for an extended period. Doctors will see and treat patients who are referred through the First Call-United Way hotline.

In Worcester, as across the nation, doctors are finding that people who normally are covered by employers' health plans are being forced to forgo medical care when their coverage vanishes with a layoff notice or benefits run out. The program is planned to help out-of-work people and their families who do not immediately qualify for other aid programs. Similar programs have been set up in Michigan and other states where the jobless rate has been high, the American Medical Association says.

Worcester area hospitals, the city health department and the area pharmaceutical associations have been asked to lend their resources to the project as well. The program should be a boon to those in need.●

CONSTRUCTION DIFFERENTIAL SUBSIDY PAYBACKS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. BIAGGI. Mr. Speaker, the Subcommittee on Merchant Marine recently held an oversight hearing on the controversial issue of the payback of construction differential subsidies, which is presently the subject of a Department of Transportation rulemaking. The proposed rule would permit tank vessels—that have been constructed with subsidies and that can only operate in our foreign trade—to operate in our domestic trade upon repayment of the unamortized subsidies that are owed plus interest.

After hearing extensive arguments both in favor of and against the proposed rule, I and the great majority of the Members present at the hearing concluded that issuance of the rule would not be in the Nation's best interest. We, therefore, transmitted our views to the Secretary of Transportation to be considered during the rulemaking process.

Recently, several major newspapers have published editorials favoring issuance of the proposed rule. Those editorials appear to have been written by people not familiar with all of the facts of this controversy. For that reason I was pleased to see in the New York Times a response to that paper's editorial on the subject. In my opinion, it accurately and forcefully points out that adoption of the proposed rule will cost the Government money, will reduce our defense capabilities, and will result in a loss of jobs. I would like to share this response with my colleagues.

[From the New York Times, Apr. 27, 1983]

PROTECT UNSUBSIDIZED TANKERS

(By Richard T. du Moulin)

(The wirter is vice president of Ogden Marine, Inc.)

By endorsing the Department of Transportation proposal to permit subsidized tankers to return to domestic service (editorial April 14), you condemn the unsubsidized domestic tanker industry so important to this nation's movement of oil and to national defense. Let me review some facts.

Of the 10 million tons of unsubsidized tankers in our domestic trade, over 1.6 million tons are now at anchor—unemployed. Thousands of sailors are on the beach. Shipowners are having difficulty paying their mortgages, and shipyards are not receiving any orders for new ships. This is the true picture of the domestic, unsubsidized market.

Private and publicly owned shipping companies, many based in New York, have invested $5 billion in the past 10 years, without subsidy and without guarantee of profit. They are not oversubsidized—they are not subsidized at all. They are not over-regulated—they operate in a free domestic market protected only from foreign-flag ships.

Because of the depressed market, 1 to 2 million tons of old tankers will soon be scrapped. This is unfortunate since most are in good condition, and of the "handy size" preferred by the Navy for military support. The British used 34 such vessels to support their 10,000-man Falklands force. We would need hundreds to support our Rapid Deployment Force. By the way, most of these old tankers are faster than modern tankers, having extra-horsepower engines.

The Transportation Department is now proposing 2 to 4 million tons of U.S. tankers, built with Government subsidy to compete abroad, be allowed to repay that subsidy and return to the unsubsidized domestic

trade. This was never intended in the Merchant Marine Acts of 1936 and 1970, and would force out of service 40 to 60 modern unsubsidized tankers—a quarter of our fleet.

This payback of an estimated $200 million of subsidy is not what it seems. First, it's tax-deductible! Second, the Government loses tax revenue from owners and their crews who go out of business or are unemployed. Third, many owners will be forced into bankruptcy, leaving the Government with up to $1.5 billion of guaranteed debt. In the end, the Government and the taxpayers lose. Upon close examination, subsidy payback provides windfalls to only a few shipowners and is destructive and unfair to all other shipowners, shipyards, merchant seamen and the national defense.

I hope the Department of Transportation and the White House realize this and withdraw their proposal.●

ANOTHER REASON TO DENY ROMANIA MFN STATUS

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. SILJANDER. Mr. Speaker, President Reagan has set a June 30 date for the loss of Romania's most-favored-nation trading status. Each spring a sort of unofficial bargaining process begins when the Communist country's trading status comes up for review. MFN is used as a tool to encourage socialist countries to adopt more acceptable emigration and human rights policies. It waives trade restrictions with Soviet bloc countries with which we do not have a bilateral trade agreement if they show some steps toward improvement in those areas.

The President imposed the deadline on MFN because of a new education tax implemented by the Romanian Government in November. The tax makes emigration practically impossible by requiring that anyone desiring to emigrate repay the Government for all secondary and postsecondary education received. The tax is usually inflated and must be paid in Western currency. The catch is that no Romanian citizen is permitted to possess such currency. Romanians pay income taxes that are supposed to cover education costs, but if they wish to emigrate they must pay again.

Another crackdown of concern to those interested in human rights in Romania is the Government's increased vigor at enforcing an old typewriter registration law. Hand-written documents can be easily traced, so the typewriter is a vital tool for the human rights and religious rights movements in Romania. The law is being enforced with new enthusiasm mainly to keep Romanian pastors from duplicating religious documents.

Most recently, Ioan Teodosiu was released from a Romanian prison after a Christian organization in Pennsylvania paid his education tax. Mr. Teodosiu has traveled to the United States to tell Americans about what is happening to the Christians who live in Romania.

Everyone knows that human rights are violated in Communist countries every day, so it really is not surprising that the press took little interest in Ioan Teodosiu's story. The press usually finds it more newsworthy to report on human rights violations in countries friendly to the United States. However, Teodosiu is thankful because many individual Congressmen and Senators took an interest in his human rights and he is now in America.

Teodosiu was imprisoned in Romania for his role as a spokesman for the Romanian Christian Committee for the Defense of Human Rights, a group that is not sanctioned by the Romanian Government and, therefore, has no legal right to exist. At a press conference on April 15, he described some of the conditions in the Bucharest prison where he was held. According to Teodosiu, prisoners were kept in a cell 7 feet long and 3 feet wide, where no light could get in. He left his cell only for interrogations during his entire 3-month stay. The interrogations are a story in themselves.

During one session, Teodosiu was questioned for 60 consecutive hours. He was not permitted to eat, drink, or sleep, and was strapped into a special chair with an apparatus that forced his eyes open the entire time. While lights flashed on and off, he was told to confess that he was working with the CIA. If he confessed, his sentence would be less than 20 years in prison; if he refused, his sentence would be more than 20 years, or execution.

Prisoners were not permitted to sit down in their cells between 5 a.m. and 10 p.m. They received only a piece of bread and hot water—called tea—for breakfast, a bowl of hot water with some beans or grains of rice for lunch, and a cup of hot water in the evening. To keep warm, Teodosiu would turn on a current of cold water in his cell that served as a shower. The cold water was warmer than the surrounding air.

Teodosiu was released on March 9, and recently came to America. At the press conference, he thanked the Senators and Congressmen who were willing to call and write the Romanian Embassy on his behalf, because without their intervention he said he would now be the victim of an executioner's gun. However, Teodosiu is just one success story in a long history of Communist persecution in Romania. He said he went to sleep each night in prison listening to the screams of other prisoners. His story may not be all that newsworthy to the American press, but it must be told over and over again by others who care if anything is ever going to be done to silence the rest of those screams.

It is of interest to note that the Romanian Government is the most pro-Western, least pro-Soviet in the Warsaw Pact.

The following is the text of an interview with the Washington Times published on Monday entitled, "Romania Reportedly Destroying Christianity." I urge all my colleagues to read this so that they will once again remind themselves of what is going on in the largest prison in the world, Eastern Europe.

The article follows:

ROMANIA REPORTEDLY DESTROYING CHRISTIANITY

(Ioan Teodosiu, former leader of Romanian Christian Committee for Human Rights, on persecution of Christians in Romania.)

Romania is a Warsaw Pact nation which has suppressed its citizens nearly as severely as the Soviet Union. Recently, a tax was passed on emigration requiring repayment to the state of all funds for education. The payment is required in hard currency, which is unavailable to Romanians. Therefore, the tax had to be paid by relatives or governments abroad.

Ioan (John) Teodosiu, 29, former leader of the Romanian Christian Committee for Human Rights, was one of the best sources of information for Helsinki Commission reporting on persecution of Christians and other human rights violations. In December 1981, Teodosiu was arrested and charged with high treason, espionage and cooperating with the CIA. Due to pressure from the West, he was released only hours before his trial was due to go on in March 1982.

Finally, one year later, Teodosiu was permitted to emigrate with his wife and 9-month-old child after paying $7,400 to the government which was provided by a Christian organization, East Watch International of Erwinna, Pa.

Teodosiu reponded to questions asked by Washington Times correspondent Stephen Goldstein.

Q. How are Romanian Christians persecuted by the government?

A. Christians are an impediment to communism. Romania wants to destroy Christianity. They try to use the official leaders of the church against the members. They try to control seminaries, also.

The persecution takes two aspects. First, they control the church and its activities. Second, they control individuals within the church. If they can't use a person or a church, the government sets out to destroy the individual or church.

The party newspaper, Scintea, has a weekly column attacking religion and the dissidents. Since many Romanians hear the truth about the dissidents on Radio Free Europe, the regime wants to present its side. They even printed an interview allegedly with my wife and me although they never spoke to us.

They say that religious freedom exists according to the constitution but in reality, it does not. They believe that Christianity destroys communism by leading to an influx of Western ideas.

Q. How did the Romanian Christian Committee for Human Rights get started and what are its activities?

A. Hans Stuckelberger of Christian Solidarity International began a contact group

in Romania in 1978. They got a spokesman, Pavel Nicolescu, a pastor in Bucharest, but he had to leave in 1979.

After that, Radu Capusan and myself and more than a dozen others have centered our work in the town of Cloch. Capusan was forced to leave the country in December 1980, and I took over the leadership of the committee.

Our main activity is gathering information about the persecution of Christians and other dissidents. We have given information to Radio Free Europe and the Helsinki Commission although we are not affiliated with either of these organizations.

Although there are many nationalities, German, Hungarian and Romanian, in my country, as dissidents they are all imprisoned together.

Since I left the country in March, the membership is growing and working underground. I would say that the situation for dissidents is worse now then a few years ago.

Q. What were the circumstances of your arrest and dentention?

A. In June 1981, my brother was killed by the communists in what they said was an accident. After that, I became more active with the committee and sent human rights information to the West which the Securitate (Romanian secret police) knew about. On December 16, I was arrested and charged with high treason, espionage, and cooperating with the CIA. Actually, it was for providing the information on human rights abuses of the regime.

Q. How were you interrogated and what kind of treatment did you recieve in prison?

A. I was taken by the secret police for a continuous 60-hour interrogation without food or water. I was kept in a dark room, placed on a special seat where I couldn't move. An apparatus kept my eyes open to prevent me from sleeping. The light became alternately very bright, then very dark.

During this time, a voice on tape repeatedly told me to confess I was a member of the CIA, and other crimes I was accused of.

Afterwards, I was put in a small dark cell in which I could take only two or three steps. From 5 a.m. to 10 p.m., I was made to stand or walk in my cell. No exercise or fresh air or work was given to political or Christian dissidents. The winter was very cold and there was no heat. I took a cold shower to get warm! Our food for the whole day was two cups of hot water, 5 ounces of bread, and a bowl of rice soup.

I was beaten very strongly as part of the program for dissidents. The worst part of my confinement, that caused me the most pain, was hearing people screaming for help at night.

Q. Was your family threatened?

A. My five brothers and my wife went to the secret police and to the prison and contacted the West to try to find out what had happened to me. My brothers were threatened with prison and the secret police began following my wife and mother-in-law. Their houses were searched, and Bibles and tape-recorders were confiscated.

When I was released, I was told not to say anything about what happened or my relatives would "have problems". My whole family, expecially my brother David, have been active Christians.

Q. Is the emigration tax applied fairly?

A. After I paid the tax, I met several other emigrees who did not have to pay it. When I asked the secret police why I had to pay while others did not, they said they couldn't give me an answer that would satisfy me.

I know of four or five people who had to pay to leave the country, but I was the first to pay. Many intellectuals want to leave but can't affort the $20,000 or more it would cost them to pay for their professional degrees.

Q. Is psychiatric treatment used on religious and political dissidents as it is in the Soviet Union?

A. Yes. One case is that of Filip Iulius who claimed to represent Polish Solidarity in Romania and spent eight years in prison.

When his wife came to visit him, she said he was drugged. She couldn't recognize him in his changed state. He didn't want to eat.

He, along with other political and Christian dissidents, was put in the prison hospital and administered drug "therapy."

Paulina Dragu and her family were trying to emigrate. She was told to quit her job so she could receive a passport. She did, but didn't receive her passport. She went on a hunger strike and was put in prison as a parasite. She had a heart attack and was then put in the psychiatric ward.

These are just representative examples of the psychiatric treatment of dissidents in Romania.

Q. What is the current status of the church in Romania?

A. There is a revival going on, and there are many open churches. The church is growing, especially Medias in Transylvania.

After hearing communist ideology for many years, people want another source of truth and love.

The secret police and government are strongly anti-religion. They conduct house searches, Nazi style. They tamper with the cars of religious believers to make the drivers sick from the exhaust fumes coming into the car.

The secret police are buying new technology from the West to use against dissidents. Every pastor must report to the secret police once a week on Monday, any visitors or unusual events that happened in his church.

There are no baptisms allowed of children under 18.

Q. What has become of the Orthodox priest, Father Gheorghe Calciu?

A. He is one of 10,000 Orthodox priests who are not recognized by the government. He was influential with young priests and seminarians. He has spent 16 years in prison.

I was imprisoned with a man who shared a cell with Calciu. Some other "criminals" were instructed to kill Calciu to get reduced sentences, but they refused.

Q. What is the Helsinki Commission doing in Romania?

A. No one is commissioned in Romania. I contacted the American Embassy and Christian organizations. Some of the groups we worked with were: Student Struggle for Soviet (and East European) Jewry. The Committee for Human Rights in Romania; the North American Coalition for Human Rights in Romania.

But it is hard to get into Romania or get information because of the tension there. There are many informers—perhaps every third person—.

Q. Are there economic problems in Romania and what is being done about it?

A. Of course, there are economic problems as in all communist regimes. But there is nothing organized like in Poland.

One man, Nicolae Litoiu, 20 years old, wrote on the walls of a factory: "We want milk and bread". Ten thousand workers were called in to compare their handwriting to that on the wall.

Litoiu was accused of being a terrorist and received 25 years in prison for this act.●

HEALTH PLANNING BLOCK GRANT ACT OF 1983

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. SHELBY. Mr. Speaker, I rise to call to your attention to H.R. 2935, the Health Planning Block Grant Act of 1983, which I introduced this past Monday, May 9, 1983. I am pleased to note that two of our colleagues from the minority side have joined me as initial cosponsors of this legislation. I am pleased that the gentleman from Illinois (Mr. MADIGAN) and the gentleman from North Carolina (Mr. BROYHILL) saw fit to join in this effort.

Members should note that H.R. 2935 is precisely the same bill which passed this House last September 24 by a recorded vote of 302 to 14. For the purpose of refreshing our memories, H.R. 6173—as amended by H.R. 7040 on the House floor—was a bipartisan compromise to deal with the national health planning program in a rational and reasoned manner. This compromise was drafted and fully supported by both the chairman of the Health and Environment Subcommittee, Mr. WAXMAN; the chairman of the full Committee on Energy and Commerce, Mr. DINGELL; Mr. MADIGAN; Mr. BROYHILL; and me.

I am concerned that rapid increases in health care costs continue to bring significant increases in Federal outlays for our health care entitlement programs. Over the last decade, Federal medicare and medicaid outlays for hospital services alone have risen some 17 percent per year. Many economists believe that excessive investment in hospital construction and equipment is a major cause of the growth in hospital costs. In response to this, the Congress some 9 years ago enacted the Health Planning and Resources Development Act of 1984, Public Law 93-641.

This legislation created a system of State and local health planning agencies. It also required States to enact certificate of need legislation requiring State approval of hospital investment in new facilities, equipment, and services.

This health planning program came up for reauthorization last year. During 1982, our subcommittee held a series of hearings and received testimony from many varied witnesses.

As a result of the testimony presented in these hearings and subsequent discussions with key individuals, I was convinced that outright repeal of the health planning system without provision for some interim program, al-

though an ideologically desirable goal, was not feasible for the short term. Despite the fact that I have sponsored repeal legislation in both the 97th and 98th Congresses, I publicly acknowledge that some planning function may be necessary to help restrain health care costs growth in the immediate future.

Last year in our committee, we considered three varying approaches to the health planning question. My bill to outrightly repeal the planning system was not favorably considered. Mr. MADIGAN had a bill which would have created a block grant mechanism providing for an optional program of State certificate of need review. At the same time, our subcommittee chairman had his own bill which would have reauthorized and extended authorities for the existing title XV of the Public Health Service Act.

From these three quite distinct approaches to planning our committee was able to draft a balanced bill. As of last fall, the five sponsors of this bill believed this approach best addressed our immediate needs for a modest regulatory program.

As I stated above, the bill I have introduced this week is precisely the same bill passed by the House last September. The only alteration I made was to move the 2 authorized years back so that fiscal years 1984–85 are covered, rather than 1983–84 as in the original. Otherwise, I made no change in the House-passed bill.

H.R. 2935 would authorize grants to participating States to assist in the operation of certificate of need programs. These programs would be designed so that participating States would use State health plans as the decisionmaking basis for certificate of need review.

This bill also provides for discretionary grants for local health planning agencies. States could choose whether or not to use Federal funds to assist in the operation of local health planning agencies.

Further, the bill provides for a flexible transition period during which activities under the existing title XV of the Public Health Service Act and the new activities under this bill would be coordinated.

Finally, the bill contains a "sunset" provision under which this new section of title XIX would automatically be repealed following the end of the third fiscal year after enactment.

Mr. Speaker, I hope that this quick summary will assist Members of the House in their initial considerations of the health planning issue. I believe that we have given this program serious and considered attention. While I still retain some reluctance about continuing the health planning system, I believe that some Federal action is necessary to help restrain capital cost expenditures and their contribution to health care cost inflation. I urge your support for this bill, and hope that the distinguished chairman of our subcommittee will reconsider his position and become a cosponsor.

At this point in the RECORD I include a section-by-section analysis of H.R. 2935.

H.R. 2935—SECTION-BY-SECTION ANALYSIS

SECTION 1. Short title: "Health Planning Block Grant Act of 1982."

SEC. 2. Repeal of Title XV: Provides mechanism by which repeal of Title XV takes place on a State-by-State basis. Under the mechanism set forth in this Section, repeal will take place no more than 315 days after the date of enactment. During this period, on a State-by-State basis, funds appropriated under the new bill will be available for conforming actions under Title XV.

SEC. 3. Revision of State Certificate of Need Programs: Provides a flexible mechanism through which participating States are given varying periods of time to conform their Certificate of Need laws (to a maximum of nine months).

SEC. 4. Transition: Provides for an orderly transition period during which activities not inconsistent with the new Part D of Title XIX shall be allowed. Requires termination of Title XV requirements inconsistent with policies found in H.R. 2935. Repeals PHS Act grant cutoff required for States not conforming with Title XV CON program. Also provides for transfer of funds and equipment from existing HSAs to new Regional Health Planning Agencies should the particular State decide to participate in Subpart 3.

SEC. 5. Block Grants for Health Planning: PART D—HEALTH PLANNING BLOCK GRANTS

SUBPART 1—GRANTS TO STATES

SEC. 1941. Authorization of Appropriations: For payments under allotments, $432 million authorized for fiscal year 1984, $33.6 million authorized for fiscal year 1985.

SEC. 1942. Allotments: Provides for allotments to States on a population ratio basis.

SEC. 1943. Payments under Allotments: Provides for mechanism for payment of funds to participating States.

SEC. 1944. Use of Allotments. Allotments shall be used to develop and administer Certificate of Need program, and to develop a State Health Plan.

SEC. 1945. Application; Report on Intended Expenditures: Provides application mechanism for participating States. Also provides for report on intended expenditures and public comment period on such a report.

SEC. 1946. Reports and Audits: Provides for public reports and audits of State activities no less often than very two years.

SEC. 1947. Nondiscrimination: Provides for standard block grant nondiscrimination provisions as found elsewhere in Title XIX of the Public Health Service Act.

SUBPART 2—CERTIFICATE OF NEED PROGRAM REQUIREMENTS

SEC. 1951. Program Requirements: CON program to cover major medical equipment, institutional health services, and capital expenditures. Also provides for exemption of HMOs consistent with the existing exemption in Title XV. Also provides that States shall specify maximum amounts obligated under CONs, and for periodic review of such CONs.

SEC. 1952. Criteria for Review: CON decisions are to be based on State Health Plan for the State, and decisions on applications for CONs shall be based on the application's consistency with the State Health Plan. Provides for expedited application, review and approval process, including automatic approval on the meeting of certain conditions.

SEC. 1953. Procedural Requirements: Provides for hearings, administrative review and judicial review of administrative decisions.

SEC. 1954. State Health Plan: Describes coverage of the State Health Plan, requirements for the data on which it is based, and pre-issuance hearings.

SEC. 1955. Definitions: Mandatory Federal thresholds of $5 million for capital expenditures and equipment and $1 million for services are set. Provision is made for reduction of those thresholds to $1 million and $500,000 respectively. Definitions of these terms are provided.

SUBPART 3—GRANTS FOR REGIONAL HEALTH PLANNING AGENCIES

SEC. 1961. Grants: Sets up system of optional Regional Health Planning Agencies (RHPAs) within States which choose to participate. Provides for RHPA 15 percent match of Federal funds. Authorizations of $32 million for fiscal year 1984 and $33.6 million for fiscal year 1985 are made.

SEC. 1962. Designation of Health Planning areas: Provides mechnaism for Governors to designate areas in which RHPAs will operate.

SEC. 1963. Designation and Organization of RHPAs: Sets out requirements for RHPAs, including composition of governing board.

SEC. 1964. Functions of RHPAs: States that the functions of each agency will be to assist the designated State agency in developing the State Health Plan, and to encourage support for the State Health Plan. Specifies that RHPAs shall not exercise decision-making authority in the CON process.

SUBPART 4—TECHNICAL ASSISTANCE CENTER FOR HEALTH PLANNING

SEC. 1971. Secretary to designate a single center for technical assistance to State and regional health planning bodies. Provides that funds from sections 1941 and 1961 (not to exceed $1.5 million) may be spent in each fiscal year to support this program.

SEC. 6. Termination of Amendment: Provides that at the end of the third complete successive fiscal year following enactment of this Act, Part D of Title XIX is repealed.

SEC. 7. Effective Date: Amendments made by section 4(a)(1), 5 and 6(a) take effect on the date of enactment of this Act or October 1, 1982, whichever occurs later.●

ENCOURAGING, OVERLOOKED SIGNALS OF A NEW APPROACH TO DISARMAMENT

HON. JOEL PRITCHARD

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. PRITCHARD. Mr. Speaker, for the past several weeks the House has been focused on the most serious issue of our time, the threat of nuclear war. A nuclear freeze, arms control, arms reduction—these are serious and complicated issues. One of the most articulate and clearest of thinkers in this area is George Weigel, the scholar-in-

residence, for the World Without War Council in Seattle, Wash. Mr. Weigel has been of great assistance to me in understanding the many issues involved and in developing a constructive approach to move us closer to peace. For the benefit of all my colleagues, I would like to share Mr. Weigel's thoughts as they appeared in the April 27, 1983, issue of the Weekly, a Seattle newspaper.

ENCOURAGING, OVERLOOKED SIGNALS OF A NEW APPROACH TO DISARMAMENT

(By George Weigel)

For some years now, it has been clear that beneath the surface of the nuclear-strategy debate there was profound dissatisfaction with the prevailing orthodoxies, and what they meant for both arms control and weapons modernization. The nervousness and frustration have been evident only in a paragraph or two in Kissinger's or Brzezinski's memoirs, in between the number-crunching in the foreign-policy journals, in off-the-record conversations with both strategists and politicians. But they have been growing over time, fueled by both the failures of arms control and the unsatisfactory products (the B-1, the MX missile) of the force-modernization process. What was really needed was not more sophisticated hardware analysis; what was needed was a basic reorientation of the whole debate, leading to a new framework that pointed a way out of, rather than further into, the nuclear peril.

That reorientation may now be underway. The evidence is the Report of the President's Commission on Strategic Forces (the Scowcroft Commission) and, several weeks earlier, an extraordinary set of speeches by President Reagan about the possibility of developing defensive weapons. The Scowcroft Commission report addresses short- and medium-term strategic and military problems, while the Reagan proposals suggest a long-term realignment of the security relationship between the superpowers. Taken together, these two sets of ideas are quite suggestive of where the nuclear debate really lies, and may be going in the future.

The Scowcroft Commission was originally born out of bureaucratic and political embarrassment. Two presidents had failed to find a home for the country's new ICBM, the MX, in which billions of dollars had been invested over the past decade. Both presidents Carter and Reagan agreed that there was a serious problem in the theoretical vulnerability of land-based American missiles to a preemptive Soviet attack (a possibility because of the Soviets' combination of heavy missiles with multiple, independently targetable warheads). Both presidents tried to find a way to base the MX that would give them the missile in quantity (Carter wanted 200, Reagan 100), and in a "survivable" basing mode.

The quest for MX survivability soon became quixotic, even fiarcical. Short of digging up Nevada and Utah, there just wasn't any place to put the thing that, in and of itself, guaranteed the MX wouldn't be simply a bigger sitting duck than the Minuteman III missiles it was to replace. After a half-hearted attempt at selling Congress on a "Densepack" scheme that even two of the five Joint Chiefs of Staff found ludicrous, President Reagan turned to what has increasingly become the way real business is done in the federal government: a blue-ribbon presidential commission, in this case chaired by former National Security Adviser Brent Scowcroft, with such luminaries as Henry Kissinger, Harold Brown, Alexander Haig, James Schlesinger, Donald Rumsfeld, John McCone, and Lloyd Cutler each having a formal say in the commission's deliberations and report.

That report was released on April 6. Most of the media and congressional attention since then has been focused on its weapons-procurement recommendations: that the US shift, over the next decade, away from MIRVed missiles to a land-based deterrent composed of small, single-warhead ICBMs; and that, as an interim step and an arms-control bargaining chip, 100 MX missiles be emplaced in super-hardened Minutemen silos throughout the Midwest. What can get lost in all the attention paid to MX and "Midgetman," though, is the commission's impressive rethinking of the doctrinal bases on which both US arms control and nuclear-force modernization should take place.

The commission report includes several important new doctrinal departures:

1. The commission argues that the twin great threats of our time—the threat of nuclear war and the threat of totalitarianism—must be addressed concurrently, rather than as independent variables (the typical approach of both the core of the nuclear-freeze movement and the "dismantle the Soviet Empire" types on the Right).

2. The commission also argues that, in considering these necessarily linked threats, the real problem is war itself, not nuclear weapons. "There can be no doubt that the very scope of the possible tragedy of modern nuclear war, and the increased destruction made possible even by modern non-nuclear technology, have changed the nature of war itself. This is not only because massive conventional war with modern weapons would be horrendously destructive . . . but also because conventional war between the world's major power blocs is the most likely way for nuclear war to develop. . . . Simply put, it is war itself that must concern us, not nuclear war alone."

3. The key standard that, in the commission's judgment, should guide our strategic policy toward the Soviet Union is stability: a situation in which neither side could reasonably fear a crippling first strike from its adversary. What needs to be maintained, the commission argues, is deterrent stability that will set the baseline from which deep arms reductions can be negotiated. That stability has been unravelling for the past decade, because of certain kinds of force modernizations (primarily high-accuracy MIRVs) and because of arms-control approaches that have made MIRVing more, rather than less, desirable (for example, counting "launchers" rather than warheads in SALT I and II).

4. Re-establishing strategic stability means getting our arms-reduction proposals and our force modernizations into sync with each other. "Our arms-control proposals and our strategic-arms programs should . . . be integrated and be mutually reinforcing," according to the commission. "They should work together to permit us, and encourage the Soviets, to move in directions that reduce or eliminate the advantage of aggression and also reduce the risk of war by accident or miscalculation . . . the commission believes that other objectives should be subordinated to the overall goal of permitting the United States to move—over time—toward more stable strategic deployments, and giving the strong incentive to the Soviets to do the same." The commission, composed of former senior government officials, in effect recognized that the US had been working at cross-purposes with itself over the past decade, with neither arms control nor force modernization contributing to stability or reductions. One result of this disjunction was the MX missile; another was the MIRVing of Soviet heavy missiles. Getting our military policy and our disarmament policy into tandem is, no doubt, a formidable bureaucratic and political task; but the commission's public confession of past failures suggests that at least some senior strategists may just be willing to take on that job right now, given the multiple messes into which a disjointed policy has led us.

It is out of this deterrence/stability/disarmament framework that the commission proposed the development of Midgetman, coupled with a new START negotiating formula whose chief aim would be to get Soviet agreement on de-MIRVing. It is less clear how the MX fits into the commission's new doctrinal scheme, and one suspects that the commissioners did not really expect the controversial missile-without-a-home to survive the congressional appropriations process. The key question, of course, is whether congressional rejection of the MX deployment plan can be turned into a wedge for getting Soviet agreement at START on a sharp reduction in their own SS-18 and SS-19 forces (perhaps by maintaining MX research, development, and flight-testing while holding off on deployment).

The Scowcroft Commission, in sum, imaginatively addresses on side of the current nuclear-doctrine dilemma: how we get offensive nuclear weapons back under the kinds of controls that would lead to deterrent stability, and thus set the stage for serious reductions. President Reagan's speeches on defensive systems last month suggest the other side of the new doctrinal puzzle.

Like the Scowcroft Commission, Reagan's proposals have been grilled at the hardware level, with editorial cartoonists having a Darth Vader field day about "Star Wars" and all the rest. Without denying at all that there are serious technological problems with a spacebased defensive system in this century, however, it seems a shame that the doctrinal roots of the Reagan proposals aren't getting the attention they deserve. For what the president was saying, remarkably, was that there is no good way out of the nuclear peril without a fundamental alteration in the security relationship between the United States and the Soviet Union. One dimension of this alteration has to do with the possibility of moving from offensive to defensive weapons; the other, even more stunning, suggestion is that such defensive systems should be developed in concert with the Soviet Union. Had a President Mondale suggested the latter, two things would have happened within a week: nomination by some Democrats in Congress for a Nobel Peace Prize, and introduction by some congressional Republicans of an impeachment resolution. Yet in all the Star Wars blather, there has been virtually no public comment or discussion on the president's tacit admission that there is literally no way we can solve our own security problems without concurrently solving the security problems of our principal adversary.

The Reagan suggestions fit neatly into the redesigned offensive package proposed by the Scowcroft Commission. For the paradox of arms reductions, of the sort envisioned by the commission after de-MIRVing, is that

the superpowers could reach a point of low-level nuclear capability (say, 100 to 200 missiles on each side) where the dangers of first-strike in a crisis could reemerge, because of the temptation to preemptive military action that would not end the planet at the same time. What is obviously needed in the long haul, therefore, is a mix of offensive and defensive systems, so that no new windows of vulnerability, real or imagined, open up during the disarmament process. Maintaining stability during arms reductions, in other words, means having effective shields as well as less lethal swords. No one knows, at the moment, just what those shields would be: technological, political, or a combination of the two. But there seems to be little doubt that the president identified the crucial flip side of the arms-control coin.

So some serious intellectual progress has been made. But does it mean anything at the policy level? Several flies in the ointment are immediately apparent.

There is no present guarantee that agreement within the United States on pursuing the twin paths suggested by the Scowcroft commission and the president would automatically lead to agreement with the Soviet Union. Soviet intransigence at Geneva, on both START and the intermediate-range nuclear force negotiations, is at high tide. Zero-option, the most reasonable arms-reduction proposal, has been flatly rejected. So has a common level of intermediate-range forces in Europe. The Soviets are clearly counting on anti-American-emplacement sentiment in the NATO countries to win the day for them. Meanwhile, Gromyko and Arbatov continue to make highly volatile suggestions about Soviet missile emplacements in the Western Hemisphere. In short, agreement within our own house is only half the problem; we still lack the means, through negotiations or initiative pressures, to get a deal with the USSR. And if Andropov's hold on the reins is as unsteady as some have recently speculated, matters could only get worse as the demands of the Soviet military gain further currency in the Kremlin infighting.

There is also no guarantee that the kind of calm, steady, deliberate policy suggested by the Scowcroft Commission can get started, much less last, in the Congress. The House of Representatives, in particular, seems incapable of dealing with these issues on anything beyond the most surface of levels. Nor has the congressional leadership made up its mind to seek a set of bipartisan agreements on arms control and force modernization that would do for our strategic policy what was done for Social Security. Meanwhile, members of both parties' extreme wings see these issues as grist for the partisan mill—hardly a situation in which carefully calibrated decisions can take place.

Congress, though, is just a mirror of the continued divisions within the country. Lack of confidence in the administration's foreign policy is one part of the problem; lack of agreement on the nature of the Soviet threat is another. At the end of its report, the Scowcroft Commission made what amounts to a religious plea for consensus: "The commission unanimously believes that a new consensus—requiring a spirit of compromise by all of us—is essential if we are to move toward greater stability and toward reducing the risk of war. If we can begin to see ourselves, in dealing with these issues, not as political partisans or as crusaders for one specific solution to a part of this complex set of problems, but rather as citizens of a great nation with the humbling obligation to persevere in the long-run task of preserving both peace and liberty for the world, a common perspective may finally be found." For which, as Lincoln would have said, fondly do we hope, and fervently do we pray.

But the odds seem awfully long just now. The core elements of the nuclear-freeze movement are unbudging in their resistance to anything but a "freeze now" policy. The New Right is already convinced that Reagan has been captured by the Eastern establishment wing of the Republican Party. The neoconservatives, whom one might expect to have been interested in the kind of intellectual reordering of the debate that has been quietly taking place, look askance at any Reagan move that hint at something beyond attempts to dismantle the USSR. Meanwhile, we are embarked on another presidential campaign, an 18-month cycle in which issue-crudification is at its very worst.

So the recasting of the nuclear debate comes down, finally, from hardware through doctrine to civics. We know there is no good way out through more number-crunching. We know that our doctrine has led us astray, and the outlines of a better set of doctrinal principles are in sight. But the great question that remains is whether our society can get enough agreement within itself so that the polity can act. That particular window of vulnerability remains very widely open just now.●

AN OIL IMPORT TAX WOULD BE TIMELY

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. PORTER. Mr. Speaker, at first glance the seemingly incurable affliction known as OPEC would appear to be on the verge of being eradicated. The magic of the marketplace is finally catching up to the market manipulators of the Middle East. But before the euphoria of the cartel's demise begins to spread we must quickly prescribe a large dose of preventative medicine if we are to insure the recovery of the industrialized world.

Now is the time to levy a tax on imported crude oil. This fee would be both painless and flexible by being subject to adjustment in lieu of any market-related change in the price of crude. Furthermore, no new legislation is needed. The President has the power to impose such a fee under the Trade Expansion Act of 1962.

The price of oil would be higher with a fee than without, but only temporarily. Through the following market responses, future price increases would be severely curtailed.

First, OPEC would lose its market leverage and would eventually pay for the import fee through lower prices. When faced with the choice of cutting production or price the feuding fiefdoms have had difficulty controlling their productive appetites.

Second, the fee could be used to encourage non-OPEC production of oil. A large part of OPEC's current dilemma is attributable to the huge growth in non-OPEC sources of production. The President, using his discretionary authority, could waive the fee on imports from secure neighborhood sources such as Mexico and Venezuela. The short-term benefits to those debt-ridden countries' shaky treasuries would be substantial, while the long-term goodwill engendered by such an act would help soothe strained United States-Latin relations.

Third, a fee would help to sustain domestic oil, natural gas, and coal production, while helping to maintain our great gains in conservation. The events of the past decade have shown that oil's great elasticity deems conservation a continued must.

The middle of a devastating recession, it can be argued, is not the time to raise taxes. Nevertheless, the overwhelming benefits from a diminished dependence on foreign oil and a widespread reduction in price outweigh all other considerations. Among the benefits are:

First, economic recovery in the industrialized world. Lower inflation, lower interest rates, lower balance of payment deficits, together with a shift of payments from oil to productivity increasing investment and consumption of durable goods will lead to higher employment and growth in the economies of the West.

Second, poorer nations would be granted a reprieve. Burdened by extortionary oil import payments, the half-starved, lesser developed nations of the world would be able to free vital foreign exchange earnings for desperately needed investment, consumption, and debt service—at a much lower interest rate.

Third, the Soviet Union would suffer a severe setback. Soviet energy exports account for almost 80 percent of its hard currency earnings which are needed to buy Western grain and technology. According to Wharton Econometrics, for every $1 a barrel decline in OPEC crude the Soviets lose $750 million a year in earnings. With domestic oil production virtually stagnant, the Kremlin would be forced to place an even tighter squeeze in its shaky Eastern bloc allies, demanding that shipments be paid for in hard currency instead of rubles. More importantly, any reduction in hard currency earnings makes it more difficult for Moscow to continue its massive arms buildup without placing unbearable strains on its people.

Fourth, lower prices increase our security. Together with the added windfall taxes from domestic producers on the difference between world and U.S. prices, the billions in oil import fees could be used to pay for filling the de-

pleted strategic petroleum reserves and for the Rapid Deployment Force, created to protect the Persian Gulf.

Above all, we must avoid the temptation to bask in the glory of the current glut and trust it will continue. Most experts believe the current situation to be only temporary. Worldwide economic growth together with the never-ending military conflicts plaguing the Middle East would easily place OPEC in the driver's seat once again.

Time and time again we have foolishly failed to protect ourselves from the whims of outside forces. The time to act is now, for if we do not, we will become a nation destined only to react to crises rather than a people courageous enough to prevent them.●

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1982

● Mr. FIELDS. Mr. Speaker, the Academy of Country Music has honored Houston's own KIKK-FM as Country Radio Station of the Year, a long overdue honor for one of the finest music stations anywhere.

KIKK's staff of 66 present fine music, news and sports, 24 hours a day. Their FM station was rated No. 1 in the Houston Arbitron cumulative ratings last winter; in any given week, nearly 600,000 Houstonians tune in to KIKK.

KIKK is owned by Viacom International. Its vice president and general manager is Mr. Nick Trigony. May they continue their tradition of public service and enjoyment to the people of Houston.●

INTERNATIONAL REGULATION AND SUPERVISION

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. ST GERMAIN. Mr. Speaker, yesterday, the Committee on Banking, Finance and Urban Affairs reported favorably, by a rollcall vote of 27 to 14, H.R. 2957 which combines in one bill provisions relating to the Export-Import Bank, the International Monetary Fund, and the multilateral development banks. Of special significance is the fact that the committee has recommended the strengthening of supervision of U.S. bank international lending and by its adoption of title II entitled "International Economic Recovery," has commenced the process of improving the effectiveness and consistency of the regulation and supervision of all international banking activities. This title is a concise version of House Joint Resolution 208, cosponsored by 28 committee members, concerning which I addressed the House on March 17 and made the subject of my March 22 letter to the President in connection with the upcoming Williamsburg economic summit.

The complexity of international regulation and supervision is well illustrated by a recent editorial appearing in the Financial Times of London, England. The editorial referred to together with my response follows:

[From the Financial Times, Apr. 19, 1983]

SNUB FOR U.S. REGULATORS

With the international banking system still in fragile condition there is bound to be some disquiet at the sight of Congress slugging it out with the U.S. bank regulatory authorities over the form of future curbs on foreign lending by American banks.

By Western European Standards the package of measures for tighter supervision and control put forward recently by the heads of the Federal Reserve Board, the Federal Deposit Insurance Corporation and the Comptroller of the Currency looked anything but tame. In addition to tougher monitoring of country risk and increased disclosure, the proposed guidelines covered new rules for accounting for fees on loans and a systematic approach to providing against questionable foreign loans—all this within the context of closer co-operation with foreign central banks and the International Monetary Fund.

Yet the Senate Banking Committee had little hesitation last week in dispatching the regulators unceremoniously with instructions to turn their guidelines into legislative form. When the House Committee on banking, finance and urban affairs conducts its hearings this week, hawkish noises can also be expected.

INCAUTIOUS

A big increase in the IMF authorization is widely felt in the U.S. to amount to a bail out for the banks, whose incautious lending to Mexico, Brazil, Argentina and others helped precipitate the problems to which the IMF is addressing itself. Few politicians are keen to be seen to rescue the banks—never a popular cause in the U.S.—without extracting an appropriate price.

Congressmen can scarcely be blamed for treating the regulators with something less than total respect. Much of the present malaise in banking stems from the growth of the Eurocredit market, which has resulted in excessive dollar lending by non-American banks, and the growth of the inter-bank market, which created the dangerous illusion among bankers during the period of petrodollar recycling that the maturity of loans could be lengthened at will.

The central bankers did not respond to these structural changes in the system with the natural conservatism and concern on which they pride themselves; and they cannot escape a share of the blame for the deflationary impulses that financial fear has now imposed on the world economy.

That said, there is indeed something worrying about a much increased role for Congress in banking supervision. The bankers may not have shown much prescience in sovereign lending; but there is no reason to believe that politicians are likely to be any better at making qualitative judgments about country risk. There is good reason, though, to be concerned about anything that threatens to curb the increase in the flow of resources to developing countries. Rigid statutory limits on country lending could well have that effect.

DISCRETION

Statutory ceilings on country lending might reduce the flexibility which is essential in trade financing. However, they would probably not have provided total protection against problems on the scale that the banking system now faces: some bad debts are inevitable. Moreover, the fixing of specific limits could well be accompanied by the political friction in relation to individual countries.

On balance, the case for leaving judgments about credit in the hands of bankers is more persuasive, even if past history appears to lend it only modest support. But it remains to be seen how much discretion any future legislation would concede to the American regulatory authorities. Ideally, statutory measures should add strength to the arm of the regulators in preventing a repeat of the present problem and imposing a more realistic approach among the banks to both provisions and disclosure.

They should also be seen within a wider framework. The problems of the world banking system have already led to increased co-operation between central banks over supervision, and indeed between private bankers who have set up the Institute of International Finance in Washington to identify potential liquidity problems. It would be unfortunate if Congress were to embark on legislation that reduced the capacity of American regulators to respond flexibly to the demands of international co-operation.

[Response letter]

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS,
Washington, D.C., May 10, 1983.

EDITOR,
Financial Times, Bracken House,
London, England.

DEAR SIR: I could not help but raise an eyebrow at the concluding remarks in your April 19, 1983 editorial, "Snub for U.S. Bank Regulators". You said, "The problems of the world banking system have already led to increased cooperation between central banks over supervision." Though I have not seen evidence to this effect, I hope your observation is accurate. You went on to say, "It would be unfortunate if Congress were to embark on legislation that reduced the capacity of American regulators to respond flexibly to the demands of international cooperation." If cooperation, flexible or otherwise, substantially characterized the relationship among the world's bank regulators, I could fully share your concern about U.S. legislative actions. What concerns me, however, and should concern you too, is the apparent confusion among our bank authorities and what that reveals about the past and portends for the future.

I personally place a very high priority on the need for international supervisory cooperation. However, regarding how successful national authorities have been in the past in this respect, I concur with the finding of the Treasury and Civil Service Committee of the British House of Commons: ". . . in view of the evidence that banks unduly relaxed their traditional standards of prudence in their international risk lending without

being brought into line by the official supervisory authorities, we are not wholly satisfied with present arrangements for bank supervision." (Committee Report, March 15, 1983, p. xli)

The coordinating group for the banking authorities of the Group of Ten Nations and Switzerland, the Basle Committee on Banking Regulations and Supervision Practices, is often cited as a model of international cooperation. I find it difficult to understand such praise. The Committee meets in secret and its deliberations are confidential. Moreover, what little is known of the Committee's decisions suggests something quite different from a unified international perspective.

The Basle Committee is most often praised for the "Concordat of 1975". However, even regarding this the Committee's most significant action, there appears to be substantial disagreement. The Federal Reserve implied one interpretation of the "Concordat" in its 1980 request for comments on proposed reporting requirements to implement the 1978 International Banking Act. Regarding the Federal Reserve's interpretation, the Bank of England commented:

"In their present form these proposed requirements seem to us to imply an approach to supervision which runs counter to a basic principle agreed to by the Governors of the G-10 Countries and Switzerland in 1975—namely that the primary responsibility for supervising banks incorporated in a particular country rests with the central bank or other regulatory authorities of that country."

Regarding that same interpretation, the Deutsche Bundesbank commented:

"But the principles of the 'Concordat' endorsed by the Central Bank Governors of the G-10 Countries and Switzerland in 1975 should be applied, according to which the primary responsibility for supervising banks with establishments abroad rests with the supervisory authorities of the country in which the parent bank has its registered office."

And, the Swiss National Bank wrote:

"According to the principles worked out by the Committee and approved by the Governors in 1975, primary responsibility for the supervision of a foreign branch, subsidiary or agency, doubtlessly lies with the host authority."

Thus, we have four central banks and four different interpretations of a principle upon which agreement had purportedly been reached five years earlier! Clearly, and I trust you agree, supervisory cooperation is in need of improvement. Please rest assured that if the U.S. Congress legislates in this area, it will do so to encourage cooperation and not to hamstring it.

Sincerely,

FERNAND J. ST GERMAIN,
Chairman.●

COACH PAUL WOMACK'S RETIREMENT

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. LEWIS of California. Mr. Speaker, on May 20, 1983, the Redlands Terrier Benchwarmers are sponsoring a testimonial dinner in honor of Coach Paul Womack's retirement as head coach of Redlands High School. I would like to take this opportunity to recognize and commend Coach Womack for his years of dedicated service in guiding and instructing our children.

Coach Paul Womack began his career as an assistant coach at Redlands High School in 1957 and later became the head coach in 1964. He will be leaving behind an impressive record that few to follow will be able to match. To his credit he has 125 winning games, 10 Citrus Belt League championships, 14 C.I.F. playoff games, 3 trips to the C.I.F. semifinals, and even a championship game.

Paul Womack has coached in over 250 high school football games and was named Shrine Bowl Coach in 1974. Over 3,000 young men have learned to play football under the supervision of this man and 96 have received college scholarships. He has dedicated his life to our youth and I believe he deserves our gratitude and thanks. He has taken our children, disciplined their minds and developed their bodies, and made them into men.

Mr. Speaker, I take great pride in commending to my colleagues Coach Paul Womack for his years of unselfish service. I believe he has taught us all the meaning of the words "leadership" and "dedication" and because of him, Redlands High School is a better educational institution.●

THE TIME TO ACT IS NOW

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday May 11, 1983

● Mr. FIELDS. Mr. Speaker, as the debate and discussion continue on the issue of natural gas decontrol, I am disheartened to hear many of my colleagues advocating recontrol of gas prices. I fear such price recontrol will only lead to future supply shortages for the years ahead and will discourage further exploration and production of domestic natural gas reserves.

Although we are currently experiencing a surplus in the natural gas marketplace, this phenomenon is only temporary. Unless we act to restore some semblance of rationale to the gas market, we will be faced with even greater shortages than experienced in the seventies. With the current glut of gas in the market, there is no better time for us in Congress to act on this crucial issue. During this period of slack demand and excess supply, the time is now to provide economic balance and equilibrium to the gas market.

The only meaningful method of achieving a rational market is complete and total decontrol of all gas. Consumers of natural gas can no longer bear the economic burden associated with the 20-plus pricing categories of natural gas. These economic distortions have caused the premature development of high cost gas reserves as well as the continued flow of expensive imported gas from countries such as Canada and Algeria.

Economic theory dictates that the most efficient use of any resource is the orderly development of least costly reserves first. In other words, let us develop the less expensive gas first and then move to steadily produce and develop more expensive gas when the market demands this gas and when the market can absorb the cost of this gas, free from any Government-imposed subsidy. And so, the choice is ours to make. One which for many may be politically difficult but should be undertaken nonetheless on the premise that we are acting in the best interest of our country. Continued Government-controlled and dictated prices of natural gas has not ever been and will not ever be in the best interest of our Nation. We must strive to provide economic equity and balance to the natural gas market.

Toward this end, I bring to the attention of my colleagues three recent editorials, all of which advocate the decontrol of old gas. The New York Times, the Wall Street Journal, and the Washington Times all perceive the wisdom of moving toward a free market for natural gas. I commend these articles to my colleagues and urge their close consideration.

Thank you Mr. Speaker.

The articles follow:

[From the Wall Street Journal, Apr. 21, 1983]

THE PRICE OF PRINCIPLE

Let's say you're a poor person who drives a car, or let's say you're a rich person, a congressman, who feels sorry for a poor person who drives a car. Under either of these circumstances, which would you rather have—gasoline priced at $1.30 a gallon or at $1.05 a gallon?

There are two answers. The poor person, of course, wants the cheap gasoline because he knows a bargain when he sees it. But the congressman might very well have preferred the $1.30 pump price because he has principles. Now we know all of you out there—rich and poor—are saying, "You've gotta be kidding! What kind of principle is that?"

It's the famous principle of energy-price control, of course. The energy-price control principle holds that . . . aw, why don't we just skip it. All you have to know is that in January 1981, President Reagan lifted the remaining price controls on oil, the price went up for a while, producers sold off their inventories and then the price of gasoline went south. The congressfolk with the courage of their price-control principles had predicted $2 gasoline. It must have killed them to see those Camaros roaring into gas stations to chow down on cheap unleaded.

Yesterday brought yet more bad news for the principled price controllers of Congress. The Senate Energy Committee voted 10-8 to reject a proposal to keep a price lid on what is known as "old" natural gas. This vote is the first step in what will be a long fight over natural gas deregulation.

The principled price-control people say deregulation will blow the lid off prices. The other side, the people who brought you cheaper gasoline prices, say this:

That so-called "old" natural gas is what drillers found before 1977. In 1978, Jimmy Carter, the most principled energy-price controller since the discovery of fire, got Congress to pass the Natural Gas Policy Act, a legal jungle fixing prices on 17 categories of gas. There was no way producers could make money drilling for cheap gas, so they stopped looking. Then they sat on the cheap old gas they already had and ran straight for their larger profit opportunities—purchasing and selling expensive "deep" gas, LNG or imported gas whose prices weren't so well disciplined.

The result of that: higher gas prices. The result of that: Factories switched to cheaper, decontrolled oil. The result of that: Homeowners' gas prices rose even more because fewer factories were sharing overhead costs. The result of that: Principled congressmen said, "We'll never decontrol natural gas!" a motion now seconded by a good many gas producers who have learned to love the price control route to easy money.

But we think consumers would like decontrol better. Producers would sell their inventories, then they'd drill out our huge amounts of relatively cheap gas reserve, the industry would slug it out for markets based on price and the poor would know a good deal when they saw it.

The system is known as the free market. It, too, is a principle.

[From the New York Times, Apr. 26, 1983]

OLD GAS CAN'T SAVE CONSUMERS

Many who favor a free market for natural gas nonetheless gag on decontrolling the "old" gas that was discovered before 1977. Their view may wreck President Reagan's plan for deregulation on its first test in the Senate Energy Committee this week.

The hesitations are understandable. Decontrol of old gas is not necessary to gain some economic benefits from decontrolling newer gas. But there are good political reasons and solid economic ones for leaving the Administration plan intact.

First the easy argument: Dropping old gas from the decontrol bill would probably allow the owners of old gas to kill any deregulation this year.

There is now widespread agreement that the system created by the Natural Gas Policy Act in 1978 has allowed prices to skyrocket without creating efficient incentives to find more gas. But there is no consensus on what to do next.

The Reagan plan amounts to a clever compromise. It would eventually decontrol all prices, creating a single gas market and generating incentives to develop the best sources. But the transition to decontrol would still be restrained to make sure that pipelines got adequate supplies and that gas prices stayed competitive with coal and oil. If old gas is jetisoned from the compromise, its producers will probably block any legislation.

Now the harder part of the argument: From consumers' perspective, the decontrol of old gas would be, at worst, irrelevant. The price of gas at the burner will never again be markedly lower than that of competitive fuels. But without any legislation, it could actually be higher.

Under the present system, old natural gas—about half the total being sold—is under permanent controls; newer gas is being decontrolled in stages. The hope was that this would hold down consumer prices by providing a market mixture of old and new gas. In fact, this protection for old gas only encouraged pipelines to bid up the price of the relatively small supply of totally decontrolled gas from deep wells.

Remembering the shortages of the mid-70's, pipelines paying as little as 28 cents per 1,000 cubic feet for old gas sought to assure their supplies by contracting to pay $8 or $9 for deregulated gas. Thus nearly all the benefits of keeping old gas cheap have gone to producers of expensive newer gas. The system also perversely destroyed incentives to develop gas at intermediate prices from shallow wells. Locked into contracts at $8, pipelines can't switch to supplies available for $4.

There is a narrow logic for decontrolling all new gas without lifting controls on old gas: it would yield some production efficiencies without much effect on the price to consumers at the end of the pipeline. But conversely, the decontrol of all gas would not further harm consumers, would add efficiencies and would advance the political prospects of the entire package. It would provide a windfall for owners of old gas, but at the expense of the owners of now-decontrolled gas, not consumers.

It sounds complicated, and it is, but consumer interests are not now at risk. Legislators choosing sides should know they are choosing only among producers.

[From the Washington Times]

A NATURAL (GAS) CLIFF-HANGER

Uh-oh. The hopes and dreams of millions of consumers may be dashed if a Senate committee does what some members threaten. This would be to emasculate the administration's natural gas regulatory reform bill. The way they'd do it is to remove the provision that would decontrol the price of "old" gas.

The hopes and dreams we're talking about are for plentiful supplies, far into the future, of this cleanest-burning, most efficient of fuels. But you can't get there from here if you keep pricing the stuff below what people are willing to produce it for. Yet, perversely, federal regulation of natural gas now does just that.

If the Republican-controlled Senate Committee on Energy and Natural Resources drops old-gas decontrol from the bill, imagine what kind of snowball-in-you-know-where chance there will be of getting it restored in the Democrat-dominated House.

What we'd end up with is a sham, a largely pointless tinkering with the byzantine, self-defeating, regulatory structure the Carterites left us with in 1978. That's when, in "reforming" regulation already on the books, they defined "old gas" as what was in wells developed before 1977, which they declared forever subject to federal price ceilings.

New gas—i.e., from post-1977 wells—was allowed to rise in price gradually toward the equivalent world-oil price. This recognized the economic fact of life—that people won't spend truckloads of money searching for new gas if the government insists on artificially holding the price below that of competing fuels such as petroleum.

But if the Carter decontrol of new gas is scheduled for completion in 1986, why worry about old gas? After all, producers have already incurred the costs of developing the pre-1977 wells. Why will they need any extra incentive to produce gas from them, since they're already getting, under regulation, a price that equals cost plus a reasonable profit, adjusted for inflation?

Two reasons. The first you hear a lot about. It's common sense. What would you do if you have old gas that you can get only a government-set profit on and the possibility of developing and selling new gas, on which you're permitted a bigger profit? You'd concentrate on selling gas from new wells, which is just what producers are doing. Thus, the ceilings on old gas, meant both to insure below-market prices for the stuff and to keep producers from making "windfall" profits on the old gas, actually distort the market, inducing the greater production of new, higher priced gas.

The second reason price ceilings on old gas, in tampering with natural market forces, defeat everybody's purposes, goes beyond common sense—to a knowledge of the physics of gas production. Nothing mind-bendingly complicated, mind you; but simply this:

As you produce gas from most wells, the pressure put there by nature declines. As the pressure declines, so does the rate at which you can produce the gas. Finally, you reach a point where the cost of producing any further gas will equal the price you can sell it for—and unless you got your head screwed on wrong, you abandon the well.

If the market—or the Government—lets you get a higher price for the gas, you can afford to keep the well operating, even though it's yielding you less gas per day. That is, even though it's costing you more to produce gas from it.

What's this mean to consumers and to U.S. supplies of natural gas? A study released only last month finds that about 52 trillion cubic feet of natural gas could be added to our nation's reserves of "old" gas if Congress will only take its foot off the price.

Since we use about 17 trillion cubic feet of natural gas a year, ripping the price lid off old gas now would add about four years' worth of supplies to our reserves. This doesn't include the untold gobs of new gas that total decontrol will yield down the road as producers finally are liberated from investment and profit restraints.

The payoff to consumers is not only more natural gas available to them, and more of that produced by Americans in America, but lower energy prices in general. More natural gas "made in America" means comparatively less demand for oil, since the two fuels are interchangeable for many purposes. This will exert a perfectly lovely downward pressure on world oil prices. In other words, it's really the same as producing more oil at home every time foreign producers cut their oil production in order to try to prop up oil prices.

Decontrol of "old" natural gas in the United States is the worst thing that could happen to the foreign oil cartel. Don't you love it?●

JUSTICE ASSISTANCE ACT OF 1983

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. COUGHLIN. Mr. Speaker, yesterday the House approved H.R. 2175, the Justice Assistance Act of 1983, which I was pleased to support. This bill would establish an Office of Justice Assistance to administer a modest program of grants for anticrime and criminal justice programs.

Eighty percent of the $170 million authorized for this purpose would go to the States on a formula basis requiring a 50-percent State match. The funds could be used only for a number of specified purposes which have proven effective in fighting crime. These include programs aimed at arson and career criminals, programs to relieve prison overcrowding, and programs designed for juvenile offenders. I am particularly pleased that one of the specific program categories for which the Federal funds may be used is community and police anticrime activities.

Neighborhood watch and town watch programs are local volunteer citizen efforts to reduce crime. The number of these organizations is growing steadily and the declining statistics on street crime suggest that they are having an impact. When functioning in cooperation with local law enforcement authorities, neighborhood and town watch programs are proving to be a valuable community asset. Yet they have little in the way of funding. H.R. 2175 would allow these groups to receive funds through their States to maintain and improve their services.

In addition to the 80 percent of the $170 million available for State grants, 20 percent would be used for national programs. One candidate for such funding might be the National Association of Town Watch, an organization whose executive director is Matt A. Peskin of Wynnewood, Pa. The National Association of Town Watch is working with citizen groups and law enforcement officials throughout the country to promote the town watch concept, to help interested citizens to organize new watch programs, and to share the experiences of existing programs in Montgomery County, Pa., and elsewhere.

That effective neighborhood and town watch programs are organizing throughout the Nation is in some measure due to the dedication, energy, and resourcefulness of people like Matt Peskin. The relatively small amount of anticrime assistance authorized by H.R. 2175 could strengthen their efforts enormously.●

DOES PROSPERITY CAUSE INFLATION?

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. KEMP. Mr. Speaker, my goal in life is to conquer root canal economic theory. These theories of austerity come in all shapes and sizes, but they have one thing in common: Stick it to the poor working man and woman and those who hope to achieve a better life for themselves and their family.

In Washington the root canal theory is usually embodied in the Phillips Curve tradeoff between inflation and unemployment. And every time an old guard conservative decides to fight inflation with higher unemployment, an old guard liberal comes along and says we should fight unemployment with inflation. The result has been unprecedented unemployment and inflation, simultaneously, something the Phillips Curve used to say cannot happen.

I have said, and I say it again today, that the idea is pernicious that you fight inflation with unemployment. I think it is an idea that is threatening the democracies of the West. I also believe that inflation is no answer to unemployment.

The supposed tradeoff between unemployment and inflation is something this body has to reject sooner or later. I want to commend the following essay to my colleagues by M. S. Forbes, Jr., one of the most outspoken political and economist journalists writing today. If we follow Mr. Forbes advice and pursue stable monetary and sound fiscal policies, I believe we can achieve the ultimate goal of full employment without inflation.

DOES PROSPERITY CAUSE INFLATION?

(By M. S. Forbes, Jr.)

This recent headline generated by Martin Feldstein, chairman of President Reagan's Council of Economic Advisers, underscores one of the glaring flaws of economics today, a theoretical shortcoming that has cost the economy, and investors, dearly—and could do so again.

It's the notion that there is a tradeoff between inflation and unemployment: If you want to bring down inflation, the price is high unemployment; conversely, if you want to reduce unemployment, you will get more inflation. Martin Feldstein reflects the notion well when he says: "One of the reasons (inflation won't come roaring back) is that we will have a moderate recovery. . . . A slower-than-average recovery strikes me as really very good in that it will keep the inflation rate from heating up."

In other words, good times cause inflation; bad times, stabler prices.

CURVE BALL

The tradeoff is known to economists as the Phillips Curve, and they were taught in school that policymakers should strive for an acceptable mix between the two. This meddling didn't "smooth out" economic cycles; instead, it sapped the economy's vitality. Neither the government nor the Federal Reserve can bring about "equilibrium," for reasons brilliantly explained in our cover story.

The Phillips Curve, fallacious though it may be, dominates the economic thinking even of those who might mistake the name for a baseball pitch.

For example, carefully read bond-market commentaries: If the economy appears buoyant, bond experts are bearish. Economic activity is equated with higher interest rates. If the economy looks sluggish, they're bullish.

Men like Federal Reserve Chairman Volcker and his probable successor, Alan Greenspan, share Feldstein's Phillips Curve mentality. That's why Volcker is loath to nudge interest rates down until he is convinced the recovery will be anemic. Too strong a bounce-back, he repeatedly intones, will "rekindle inflationary expectations."

This thinking has its roots in the Great Depression, a shattering experience which convinced thinkers that an economy would sputter if left to its own devices. Thus, to prevent stagnation, government would stimulate activity through increased spending, through manipulating interest rates.

So economists saw the economy as an engine—it wouldn't work without fuel, the fuel being money pumped in by Uncle Sam or the Federal Reserve.

To economic experts, then, inflation is a sign that people have too much money in their pockets; inflation, after all, is "too much money chasing too few goods." Stagnation and recession, on the other hand, mean people have too little money.

The stagflation of the 1970s—when we had both high inflation and high unemployment at the same time—should have prompted deep soul-searching. How could people simultaneously have too much money (inflation) and too little money (stagnation)? Experience may be a hard teacher to practical people in the everyday world, but theorists simply fault the world, not their philosophies, when things don't go according to the textbook.

IGNORING HISTORY

Contrary to what the Volckers and Feldsteins of the world may think, history shows prosperity doesn't cause inflation, and bad times don't mean lower interest rates. Most countries boomed as never before in the 1950s and through the mid-1960s with minimal inflation. The steep recession of 1980–82 saw real interest rates zoom.

One hopes Alan Greenspan, should he be appointed Volcker's successor, will be strong enough to overcome his education, that he will realize vigorous economic activity isn't a cause of inflation; that he will have the courage to examine the successful monetary systems of the past to see what their common denominator was. (Hint: It's a four-letter word.)●

INCREASING CRIMINAL PENALTIES FOR WASTE DUMPERS

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. EDGAR. Mr. Speaker, JAMES J. FLORIO, our colleague from New Jersey, has taken a leadership role in the Congress for many years to tight-

en up the criminal provisions of the laws governing solid and hazardous waste.

For example, corporations now face fines up to $1 million—the highest fine for any Federal crime—for knowingly endangering an individual with toxic waste, as one result of Mr. FLORIO's previous work.

Currently, Mr. FLORIO is the author of legislation that soon will be voted on in the House that will put more teeth in the law. For example, the maximum prison sentence will be doubled, from 5 to 10 years, for anyone who knowingly endangers the health or life of another during the improper treatment, storage, transportation, or disposal of hazardous waste.

An editorial in the Philadelphia Inquirer yesterday made an excellent case why the Congress must approve Mr. FLORIO's amendments to the Resource Conservation and Recovery Act (RCRA). In order to bring it to the attention of my colleagues, I include the editorial in the RECORD at this time.

[From the Philadelphia Inquirer, May 10, 1983]

FLORIO'S BILL ON TOXIC WASTES

A bill sponsored by Rep. James J. Florio to increase criminal penalties for illegal hazardous waste dumping, and to provide for more effective enforcement, is expected to come before the House Energy and Commerce Committee this week. It should be approved and advanced for early action on the House floor.

The Florio bill would amend the 1976 Resource Conservation and Recovery Act, which is up for renewal this year. A Bucks County chemical company and its owners were recently indicted by a federal grand jury on charges of dumping hazardous wastes in violation of the act, but enforcement generally in the Philadelphia area, as nationwide, has been spotty at best. While that may be attributable largely to the highly publicized reluctance of the U.S. Environmental Protection Agency under the Reagan administration to effectively enforce laws related to hazardous waste dumping and cleanup, weaknesses in the law are also at fault.

Proposed changes by Rep. Florio would close loopholes such as one that apparently allows legal evasion of responsibility for improper dumping of hazardous substances in certain circumstances when chemical firms contract with independent haulers. Revisions also would increase the number and authority of enforcement personnel in EPA. Maximum prison terms for violators would be increased from five to 10 years. Penalties would apply specifically to persons involved in improper treatment, storage and transportation of hazardous wastes as well as to those who actually dispose of them.

A change in command at EPA won't automatically resolve all of its problems. Effective legal safeguards against hazardous handling of toxic wastes at every step, and strong enforcement in every part of the country, are required.

Congressman Florio, who has won national recognition, and deservedly so, for his leadership in strengthening the nation's legal arsenal to protect the public from toxic wastes, recognizes that existing law must not be the last word on the subject. His proposed amendments would sharpen the enforcement provisions.●

BANKRUPTCY FILINGS RISE DRAMATICALLY

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FIELDS. Mr. Speaker, Federated Department Stores, which owns Foley's in Houston (14 stores, annual sales $598 million) and Sanger Harris in Dallas (14 stores, annual sales $330 million) has told me of the interest it shares with others in the retail industry in bankruptcy reform.

Since the new bankruptcy code became effective on October 1, 1979, personal bankruptcy filings have risen dramatically, and now run at an annual rate of approximately 450,000 or 200 percent of the rate for the 12 years prior to 1979. Although some of this increase is attributable to inflation, unemployment, lawyer advertising, and other factors, much is due to the fact that an increasing number of debtors are seeking chapter 7 or straight bankruptcy relief when a chapter 13 court supervised repayment plan would be more appropriate.

One study has estimates that of the $6 billion scheduled in bankruptcy in 1981, at least $1 billion was unnecessarily discharged.

Losses of this magnitude hurt the consumer credit industry by adversely affecting consumers who do pay their debts through higher interest charges and by restricting availability of unsecured credit.

There seems to be a growing consensus in the Congress that consumer reform legislation must be enacted by the 98th Congress. In the House of Representatives three different consumer bankruptcy reform bills have been introduced: First, H.R. 1169 by Representative MARILYN LLOYD; second, H.R. 1147 by Judiciary Committee chairman, PETER RODINO; and third, H.R. 1800, by Representative MIKE SYNAR.

Each of these bills represents a different approach. H.R. 1800 appears to be the least controversial. Among other things, it deals with credit card loading up by some debtors in anticipation of bankruptcy; creates standards for courts to follow in confirming repayment plans, and provides for court counseling of consumer debtors respecting their rights and protections. It also eliminates the future income, or threshold test and deals with the special problems of farmers caught in grain elevator bankruptcies.

Federated Department Stores, Inc., is one of America's largest employers—124,000 employees; 508 stores in 30 States; $7.7 billion in annual sales. We are pleased to have this multibillion-dollar diversified retail firm, which was founded in 1928, playing so important a role in the economic life of Texas.

Hopefully some version of bankruptcy reform will be passed in this Congress. I urge my colleagues to join in enacting bankruptcy legislation.●

NCEE

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FORD of Tennessee. Mr. Speaker, the National Commission on Educational Excellence (NCEE), appointed by the Secretary of Education to evaluate and report on our Nation's educational system, has spoken. The words are clear and the message is unmistakable. They send out resounding signals that should reverberate deep inside every responsible American who has concern for our children, who are the future of our country.

The NCEE report, entitled "A Nation at Risk: The Imperative for Educational Reform," is a frightening revelation of the astounding neglect suffered by the educational system in our country—a country which we regard as the greatest nation in the world. The Commission warns:

American education has deteriorated so drastically in the past two decades that our very future as a Nation and a people is threatened.

If an unfriendly foreign power had attempted to impose upon America the mediocre education performance that exists today, we might well have viewed it as an act of war.

There is shoddiness and a national sense of frustration as more and more young people emerge from high school ready neither for college nor for work.

These are indeed strong and troubling words, spoken unanimously by the 18-member Commission consisting of some of the topmost intellects from the educational community and other distinguished professions.

Yet, however frightening these words may be, President Reagan's response to the report is even more frightening. The President would offer a Band-Aid approach to a massive hemorrhage. He blames the problem on the Federal presence in education. His answer if not more Federal money, but prayer in the schools, tuition credits, vouchers, educational savings accounts, and the dismantling of the Department of Education.

It is hard to fathom a response to such a callous and irresponsible statement.

The road to educational excellence will not be paved by money alone. However there is no doubt that the Commission's recommendations for

educational reform call for greater spending for education.

In his January state of the Union message, the President acknowledged a gap in the educational areas of science and mathmatics. Yet, he sent forth to congress a budget for fiscal year 1984 whch proposes a $2 billion cut in spending for education, 12 percent below the 1983 level. Last year, the President proposed a 30-percent cutback in education spending, a proposal so ridiculous that it was almost completely ignored by Congress.

Mr. Reagan has continued to call for abolishing the Department of Education in his budget messages to Congress, and has reiterated that call in response to the NCEE report. What the President proposes is to build up our educational system by tearing down the very foundation upon which it rests.

Contrary to what Mr. Reagan thinks, the National Commission itself has concluded that "the Federal Government has the primary responsibility to identify the national interest in education. It should also help fund and support efforts to protect and promote that interest. It must provide the national leadership to ensure that the Nation's public and private resources are marshaled to address the issues discussed in this report".

In response to the NCEE report, I have cosponsored the following bills that will help to address the problems which beset our Nation's educational system.

House Concurrent Resolution 118. This bill would reaffirm Federal support for public education from the elementary through postsecondary levels.

H.R. 2483, The National Defense Education Act of 1983. The act calls for a full-scale national commitment to mathmatics, science, engineering, and foreign language education. The bill provides a multiphase package of competitive grants to primary, secondary, and postsecondary schools to improve their technical and foreign language programs, and scholarship aid to students who are interested in pursuing careers as teachers of math, science, and foreign languages.

H.R. 2708, foreign language for national security. This bill would authorize funds to conduct intensive language training and encourage more language classes in our elementary and secondary schools and in institutions of higher education.

House Joint Resolution 203, State commissions on teacher excellence. This bill would continue the efforts of the National Commission on Educational Excellence and seeks to increase the quality of our Nation's school systems. It calls for States to establish temporary commissions on teacher excellence to evaluate the preparation, certification, and retention of teaching professionals.

I ask that my colleagues sincerely and thoughtfully reflect upon the Commission's call for educators, parents, and public officials to all assist in bringing about needed educational reform in this country. The task which we face will not be easy; and the costs will be high in terms of time, energy, commitment, and money. But it is a task that we can ill afford to ignore.

I would like to submit for the RECORD an April 27 Washington Post article which provides excerpts from the NCEE report.

As stated so dramatically by the NCEE, "Excellence costs. But in the long run mediocrity costs far more".

RISING TIDE OF MEDIOCRITY THREATENS OUR VERY FUTURE AS A NATION

(Excerpts from the text of the National Commission on Excellence in Education's open letter to the American people, "A Nation at Risk: The Imperative for Educational Reform.")

Our nation is at risk. Our once unchallenged preeminence in commerce, industry, science and technological innovation is being overtaken by competitors throughout the world

This report is concerned with only one of the many causes and dimensions of the problem, but it is the one that undergirds American prosperity, security, and civility. We report to the American people that, while we can take justifiable pride in what our schools and colleges have historically accomplished and contributed to the United States and the well-being of its people, the educational foundations of our society are presently being eroded by a rising tide of mediocrity that threatens our very future as a nation and a people.

What was unimaginable a generation ago has begun to occur—others are matching and surpassing our educational attainments. If an unfriendly foreign power had attempted to impose on America the mediocre educational performance that exists today, we might well have viewed it as an act of war. As it stands, we have allowed this to happen to ourselves. We have even squandered the gains in student achievement made in the wake of the Sputnik challenge. Moreover, we have dismantled essential support systems which helped make those gains possible. We have, in effect, been committing an act of unthinking, unilateral educational disarmament.

Our society and its educational institutions seem to have lost sight of the basic purposes of schooling and of the high expectations and disciplined effort needed to attain them.

This report, the result of 18 months of study, seeks to generate reform of our educational system in fundamental ways and to renew the nation's commitment to schools and colleges of high quality throughout the length and breadth of our land. * * *

INADEQUACIES

We conclude that declines in educational performance are in large part the result of disturbing inadequacies in the way the educational process itself is often conducted:

Secondary school curricula have been homogenized, diluted and diffused to the point that they no longer have a central purpose. In effect, we have a cafeteria-style curriculum in which the appetizers and desserts can easily be mistaken for the main courses. Students have migrated from vocational and college preparatory programs to "general track" courses in large numbers. * * *

Twenty-five percent of the credits earned by general track high school students are in physical and health education, work experience outside the school, remedial English and mathematics, and personal service and development courses, such as training for adulthood and marriage. * * *

The amount of homework for high school seniors has decreased (two-thirds report less than one hour a night) and grades have risen as average student achievement has been declining.

In many other industrialized nations, courses in mathematics (other than arithmetic or general mathematics), biology, chemistry, physics and geography start in grade 6 and are required of all students. The time spent on these subjects, based on class hours, is about three times that spent by even the most science-oriented U.S. students. * * *

A 1980 survey reveals that only eight states require high schools to offer foreign language instruction; none requires students to take the courses. Thirty-five states require only one year of mathematics, and 36 require only one year of science for a diploma. * * *

Expenditures for textbooks and other instructional materials have declined by 50 percent over the past 17 years.

In England and other industrialized countries, it is not unusual for academic high school students to spend eight hours a day at school, 220 days per year. In the United States, by contrast, the typical school day lasts six hours and the school year is 180 days.

Too many teachers are being drawn from the bottom quarter of graduating high school and college students. The teacher preparation curriculum is weighted heavily with courses in "educational methods" at the expense of courses in subjects to be taught. * * *

The average salary after 12 years of teaching is only $17,000 per year, and many teachers are required to supplement their income with part-time and summer employment. * * *

Despite widespread publicity about an overpopulation of teachers, severe shortages of certain kinds exist: in the fields of mathematics, science, and foreign languages; and among specialists in education for gifted and talented, language minority and handicapped students.

Half of the newly employed mathematics, science, and English teachers are not qualified to teach these subjects; fewer than one-third of U.S. high schools offer physics taught by qualified teachers. * * *

RECOMMENDATIONS

We recommend that state and local high school graduation requirements be strengthened and that, at a minimum, all students seeking a diploma be required to lay the foundations in the five new basics by taking the following curriculum during their four years of high school; (a) four years of English; (b) three years of mathematics; (c) three years of science; (d) three years of social studies; and (e) one-half year of computer science. For the college bound, two years of foreign language in high school are strongly recommended in addition to those taken earlier. * * *

We recommend that schools, colleges and universities adopt more rigorous and measurable standards, and higher expectations,

for academic performance and student conduct, and that four-year colleges and universities raise their requirements for admission. * * *

Standardized tests of achievement (not to be confused with aptitude tests) should be administered at major transition points from one level of schooling to another and particularly from high school to college to work. The purpose of these tests would be to: (a) certify the student's credentials; (b) identify the need for remedial intervention; and (c) identify the opportunity for advanced or accelerated work. The tests should be administered as part of a nationwide (but not federal) system of state and local standardized tests.

We recommend that significantly more time be devoted to learning the new basics. This will require more effective use of the existing school day, a longer school day, or a lengthened school year. * * * School districts and state legislatures should strongly consider 7-hour school days, as well as a 200- to 220-day school year. * * *

Students in high schools should be assigned far more homework than is now the case . . . . Instruction in effective study and work skills should be introduced in the early grades and continued throughout the student's schooling. * * *

Persons preparing to teach should be required to meet high educational standards, to demonstrate an aptitude for teaching and to demonstrate competence in an academic discipline. * * *

Salaries for the teaching profession should be increased and should be professionally competitive, market-sensitive and performance-based. Salary, promotion, tenure and retention decisions should be tied to an effective evaluation system that includes peer review so that superior teachers can be rewarded, average ones encouraged and poor ones either improved or terminated.

School boards should adopt an 11-month contract for teachers. This would ensure time for curriculum and professional development, programs for students with special needs and a more adequate level of teacher compensation.

School boards, administrators and teachers should cooperate to develop career ladders for teachers that distinguish among the beginning instructor, the experienced teacher and the master teacher.

Substantial nonschool personnel resources should be employed to help solve the immediate problem on the shortage of mathematics and science teachers. Qualified individuals, including recent graduates with mathematics and science degrees, graduate students and industrial and retired scientists, could, with appropriate preparation, immediately begin teaching in these fields. * * *

Incentives, such as grants and loans, should be made available to attract outstanding students to the teaching profession, particularly in those areas of critical shortage. * * *

The federal government, in cooperation with states and localities, should help meet the needs of key groups of students such as the gifted and talented, the socio-economically disadvantaged, minority and language minority students and the handicapped. * * *

The federal government's role includes several functions of national consequence that states and localities alone are unlikely to be able to meet: protecting constitutional and civil rights for students and school personnel; collecting data, statistics, and information about education generally; supporting curriculum improvement and research on teaching, learning and the management of schools; supporting teacher training in areas of critical shortage or key national needs, and providing student financial assistance and research and graduate training.

The federal government has the primary responsibility to identify the national interest in education. It should also help fund and support efforts to protect and promote that interest. It must provide the national leadership to ensure that the nation's public and private resources are marshaled to address the issues discussed in this report.

This commission calls upon educators, parents and public officials at all levels to assist in bringing about the educational reform proposed in this report. We also call upon citizens to provide the financial support necessary to accomplish these purposes. Excellence costs. But in the long run mediocrity costs far more. * * *

[Source: The National Commission on Excellence in Education]

A NATION AT RISK

The indicators

International comparisons of student achievement, completed a decade ago, reveal that on 19 academic tests American students were never first or second and, in comparison with other industrialized nations, were last seven times.

Some 23 million American adults are functionally illiterate by the simplest tests of everyday reading, writing and comprehension.

About 13 percent of all 17-year-olds in the United States can be considered functionally illiterate. Functional illiteracy among minority youth may run as high as 40 percent.

Average achievement of high school students on most standardized tests is now lower than 26 years ago when Sputnik was launched.

The College Board's Scholastic Aptitude Tests (SAT) demonstrate a virtually unbroken decline from 1963 to 1980. Average verbal scores fell over 50 points and average mathematics scores dropped nearly 40 points.

College Board achievement tests also reveal consistent declines in recent years in such subjects as physics and English.

Many 17-year-olds do not possess the "higher order" intellectual skills we should expect of them. Nearly 40 percent cannot draw inferences from written material; only one-fifth can write a persuasive essay; and only one-third can solve a mathematics problem requiring several steps.

Average tested achievement of students graduating from college is also lower.

Business and military leaders complain that they are required to spend millions of dollars on costly remedial education and training programs in such basic skills as reading, writing, spelling and computation. The Department of the Navy, for example, reported to the commission that one-quarter of its recent recruits cannot read at the ninth-grade level, the minimum needed simply to understand written safety instructions. Without remedial work they cannot even begin, much less complete, the sophisticated training essential in much of the modern military.

The recommendations

Content: We recommend that state and local high school graduation requirements be strengthened and that, at a minimum, all students seeking a diploma be required to lay the foundations in the Five New Basics by taking the following curriculum during their 4 years of high school: (a) 4 years of English; (b) 3 years of mathematics; (c) 3 years of science; (d) 3 years of social studies; and (e) one-half year of computer science. For the college bound, 2 years of foreign language in high school are strongly recommended in addition to those taken earlier.

Standards and expectations: We recommend that schools, colleges and universities adopt more rigorous and measurable standards, and higher expectations, for academic performance and student conduct, and that 4-year colleges and universities raise their requirements for admission.

Time: We recommend that significantly more time be devoted to learning the New Basics. This will require more effective use of the existing school day, a longer school day, or a lengthened school year.●

IN SUPPORT OF H.R. 2174

HON. MICHAEL BILIRAKIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. BILIRAKIS. Mr. Speaker, on Monday, May 9, airline delays prevented me from being present to vote in support of H.R. 2174, the Federal Antitampering Act. I am pleased that this important legislation, which would make it a Federal crime to tamper with consumer products, mislabel products or make plausible threats to carry out tampering, was passed by this body.

The Tylenol tampering tragedy opened many eyes to the necessity for legislation of this nature. Those who would deliberately cause loss of life through tampering should receive severe penalties, which this legislation provides.

Additionally, I also want to voice my support of H.R. 2357, the Congressional Award Act, H.R. 2173, Contract Services for Drug Dependent Federal Offenders and S. 653, which will establish a Foundation for Advancement of Military Medicine.●

TRIBUTE TO RABBI HILLEL COHN

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. LEWIS of California. Mr. Speaker, on Friday evening, May 20, 1983, the members of Congregation Emanu El will join with others from the San Bernardino community in paying tribute to the 20 years of dedicated service provided to them by Rabbi Hillel Cohn. I would like to take this opportunity to personally recognize and commend my friend Rabbi Cohn for his unselfish contributions of time and energy to both the Jewish

and the Christian community of San Bernardino.

Rabbi Hillel Cohn has served as rabbi of Congregation Emanu El in San Bernardino since 1963. A native of Germany, he was brought to the United States as an infant by his parents who were refugees from Nazism. Rabbi Cohn received his undergraduate degree (bachelor of arts) in political science from UCLA in 1959 and his rabbinical training was taken at Hebrew Union College in Cincinnati where he was ordained as a rabbi in 1963 and from which he received the master of arts and bachelor of Hebrew letters degrees. While studying for the rabbinate he served congregations in California, Iowa, and Ohio and also served as chaplain to Jewish inmates at Marion Correctional Institution of the Ohio State prison system.

Rabbi Cohn has been active in many community organizations in the San Bernardino area. He has served as president of the San Bernardino Area Mental Health Association and Family Service Agency. He has served on the boards of such organizations as the Inland Area Urban League, Planned Parenthood Association, Inland Adolescent Clinic, Kiwanis Club, American Red Cross, Arrowhead Social Planning Council, Arrowhead United Way, County Council of Community Services, and San Bernardino Community Hospital. He was appointed a member of the Adult Detention Commission for San Bernardino County and served in that position from 1974-78. From 1979 to 1982 he was a commissioner of the Juvenile Justice Commission and Delinquency Prevention Commission of San Bernardino County. Rabbi Cohn also serves as a member of the committees which approve research on human subjects at Patton State Hospital and San Bernardino County Hospital. He is a member of the president's advisory committee of Loma Linda University.

The rabbi has served as general chairman of the San Bernardino United Jewish Welfare Fund campaign. He established the program of resettling Soviet Jewish refugees for the San Bernardino area. He has also served as president of Paradise Lodge No. 237 B'nai B'rith.

From 1975 to 1977 Rabbi Cohn served as a member of the executive board of the Central Conference of American Rabbis and from 1973 to 1977 served as national chairman of the committee on resolutions of the CCAR. He has held all of the elected offices in the Pacific Association of Reform Rabbis and was its president during 1979. He is also a member of the Reconstructionist Rabbinical Association, the Board of Rabbis of Southern California (and a member of its media committee), National Association of Temple Educators and the San Bernardino Clergy Association. The rabbi serves as auxilary chaplain at Norton Air Force Base. He has served on the faculties of the University of Redlands, Calif., State college, San Bernardino, and San Bernardino Valley College.

In 1964 and again in 1975 Rabbi Cohn was awarded the Emanuel Gamoran Memorial Award of the National Association of Temple Educators for the best religious school curriculum design in the country. He has also been selected as the Outstanding Young Man of the Year for San Bernardino by the Jaycees, received the Scroll of Honor award of State of Israel bonds and has received commendations by San Bernardino city and county governments.

Rabbi Cohn has written for numerous publications. His sermons have been published repeatedly by the American Rabbi and he has edited a number of educational and liturgical texts. In 1977 he delivered the invocation here at a session of Congress. He is a frequent participant on KABC radio Religion on the Line and religious television broadcasts. He lectures frequently to church, community, and educational groups.

Mr. Speaker, I take great pride in commending to my colleagues Rabbi Hillel Cohn for his years of unselfish service to all the people of our community. I consider myself very fortunate to have Rabbi Cohn as a personal friend and I know his tireless hours of work have made San Bernardino a better place in which to live.●

A TRIBUTE TO "MO" MORLEY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Ms. OAKAR. Mr. Speaker, I would like to take this opportunity to pay tribute to Mr. Howard W. "Mo" Morley. The U.S. Department of Labor announced his retirement on April 1, 1983. Mr. Morley was area director of the Cleveland Central Office of the Office of Federal Contract Compliance programs. He completed a distinguished career, in both the military and the Federal civil service, that spanned over 42 years.

Beginning in 1941, Morley spent 22 of those years as a naval aviator before finally closing the book on his military career in 1963. He retired from the Navy with the rank of captain. His career in the Federal Equal Employment Opportunity (EEO) program began later that year, and during the next 20 years "Mo" served as a Compliance Officer—6 years—and Deputy Chief—9 years—with the Department of Defense, and the final 5 years as Area Office Director with the Department of Labor. Morley received five outstanding performance awards during this time, as well as a special achievement award in 1979.

At his retirement dinner, held at the Guv'nor Pub in Cleveland on April 7, the awards continued. A certificate of meritorious service to "Mo" from myself along with resolutions from both the city of Cleveland and the State of Ohio, honoring his many years of distinguished service, were presented to him at the dinner attended by more than 100 of his friends, fellow workers, and well-wishers.

Morley intends to sharpen up his golf game and to do some part time consulting work for a law firm in Cleveland.●

FIGHTING COMMUNISM IN CENTRAL AMERICA

HON. J. KENNETH ROBINSON

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. ROBINSON. Mr. Speaker, editorials have appeared recently in two Virginia dailies, the Richmond Times-Dispatch and the Winchester Star, opposing legislation pending before this body to prohibit U.S. support for military or paramilitary operations in Nicaragua.

As ranking minority member of the House Permanent Select Committee on Intelligence, I should like these commentaries brought to the attention of our colleagues through insertion in the CONGRESSIONAL RECORD at this point:

[From the Richmond Times-Dispatch, May 8, 1983]

ASSURING LIBERTY'S SUCCESS

In his inaugural address, President John F. Kennedy vowed that the United States would be the standard-bearer in freedom's fight against tyranny, promising that "we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe to assure the survival and the success of liberty." That lofty rhetoric sputtered into a fiasco in South Vietnam, whose war against communism proved to be too high a price, too heavy a burden and too grueling a hardship for the United States to bear. Now Congress is balking at paying the price, bearing the burden and meeting the hardship of fighting communism in Latin America. The latest manifestation of this repudiation of the Kennedy promise was the House Permanent Select Committee's vote against further American financial and military aid for the guerrillas fighting the Marxist government of Nicaragua.

Now, it can be argued that American-backed forces in South Vietnam and in Central America were not and are not the most unimpeachable champions of liberty ever to appear among mankind. But in this imperfect world, there are few nations that practice the American version of democracy. Even so, there was more hope for liberty in non-communist South Vietnam, and there is more hope for liberty in non-communist Latin America, than there can ever be under

communism. Certainly the "survival and success of liberty" are not assured in any country by allowing it to fall under communist domination.

The United States recognizes this in Afghanistan, where anti-communist insurgents are waging a fierce and determined fight against a Marxist government protected by Soviet tanks and rifles. It would be fatuous to pretend that the insurgents are ardent exponents of Jeffersonian democracy. Yet, the United States is providing them with weapons and ammunition, as it should be doing. On the same day the House committee voted against continuing aid to Nicaraguan guerrillas, The New York Times dispatched a story saying the United States had increased it covery assistance to Afghan insurgents.

Demonstrably, the present government of Nicaragua, which seized power by force, is a foe of liberty. It promised the people of that hapless nation relief from the repressions of a right-wing dictatorship but has given them, instead, more repression. Moreover, it has become a base and haven for Marxist guerrillas seeking to topple the government of El Salvador. Those Nicaraguans who are now willing to fight to rescue their country from the clutches of communism would seem to be as deserving of American support as the guerrillas who are fighting to rout communism from Afghanistan.

Congress should reject the House Committee's recommendation and authorize the continuation of aid, covert or overt, to Nicaragua. If the United States is not prepared to redeem President Kennedy's pledge in Latin America, where in the world would it be willing to do so?

[From the Winchester Star, May 6, 1983]

PRESIDENT IS RIGHT

The House Intelligence Committee this week defied the Reagan Administration and voted along party lines to prohibit by law any United States involvement with guerrilla forces fighting the Communist government of Nicaragua. The vote of nine Democrats against five Republicans followed five hours of closed committee deliberation and a last minute warning from CIA Director William C. Casey that forcing the CIA to stop supporting the guerrillas inside Nicaragua could lead to a "blood bath".

In our judgment, the nine Democrats were wrong. The Nicaraguan government which came to power, not by election but by bullets, is a Marxist dictatorship seeking to export communism to its neighboring countries. President Reagan, we think, is right in attempting to prevent such action.●

SMALL BUSINESS WEEK

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BARNARD. Madam Speaker, when it comes to innovation and hard work, I do not know of anyone who is doing a better job than the small businesses of our Nation.

Even during the recession, 1981 was a record year for new business starts. In my Sun Belt area, there was even an increase in 1982.

Statistics are nice, of course, but behind the numbers are dozens of men and women. Behind the numbers are countless hours of hard work and creativity that turned those ventures into success.

In my district in Georgia, for instance, there is a businessman named Tom Griffith. More than a dozen years ago, Tom got a loan to open one convenience store, the Golden Pantry. Tom did not have much of a formal education, but he had the skill and the insight to know what customers needed—and he provided that.

Now he has expanded his 1 store into a chain of 150 stores—and he has his eye on expanding into South Carolina.

I could tell you the stories of dozens of other men and women in my district, and they all exhibit the same traits of pluck and luck, energy, and enthusiasm.

As the economy is recovering, I am convinced that small business is going to lead in that recovery. I, for one, applaud their efforts.●

TRIBUTE TO SIX WASHINGTON ARTISTS

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FAUNTROY. Mr. Speaker, a major review of the works of six Washington artists-painters Richard Dempsey, Lois Jones, Delilah Pierce, James Porter, Alma Thomas, and graphic artist James Wells, held at the Evans-Tibbs Collection is taking place this spring. Located at 1910 Vermont Avenue NW., the Evans-Tibbs Collection is a nonprofit tax-exempt organization primarily formed to preserve and exhibit works of art by and bibliographic material on African American artists. Located one-half block south of Washington, D.C.'s historic U Street corridor, the museum and research center are currently housed where Lillian Evans Tibbs lived. As an internationally acclaimed lyric soprano known professionally as Madame Evanti, Mrs. Tibbs sponsored many artists and art activities during her life. The six Washington masters exhibition is one of many such activities held by the collection in continuance of that tradition.

The six artists have lived in Washington for many years. Of this group Miss Thomas and Mr. Porter are now deceased. The important achievements made by each artist have been individually recorded in various publications over the years. However, a review of their work through a catalog exhibition specific to them as a group has never occurred. In filling a gap, this exhibit reveals their collective achievements in the visual arts. What is exciting is that these six managed to survive during a period when visual artists in the United States had a limited audience and the Afro-American artist in particular, had occasional if not rare outlets for artistic expression and review.

Our six Washington masters produced work not only reflective of the Afro-American perspective but survived artistically utilizing the most basic skills of self-promotion and professional growth. While none of these artists could have survived on sales alone, each utilized his or her teaching abilities to earn a living and to communicate respect for the profession to a younger group of artists now emerging. Moreover, socioeconomic conditions before 1960 not only fostered full-time jobs as educators, but also fostered internal support activities. At one time or another, each of these artists participated in Saturday workshops or studios as they were known. One of these was the Atelier run by Lois Jones and fellow artist Celene Tabary. This studio fostered professional exchanges as well as provided a social outlet for the artists. Equally important during this period was the development of Howard University's Art Department which depended so heavily on these talents, and the evolution of the Barnet-Aden Gallery which gave many of these artists first commercial exhibitions.

The contributions of the six are so great individually and collectively, that we must develop a sense of how they have been influenced by their environments. Like many Washington artists, our six masters, while influenced by a range of experiences, have spent a significant portion of their lives in an environment shaped under the classical design vocabulary. Washington's geometric street plan and its uniform building heights and designs have influenced their art. Significantly, the four living continue to create under these environmental conditions and as such there is a reason to suspect that their work provides clues about our behavior in this environment.

Richard Dempsey spent his early years in California under the influence of muralist and sculptor Sargent Johnson (1887-1967). Arriving in Washington during the New Deal, the east coast cityscapes consisting of row houses are reflected in his abstract art. Dempsey recalls the rear of homes that have provided the imagery in this art. In all of Dempsey's work there is concern for time and place as fourth dimensional pictorial qualities where color and line placement is based directly on where the work was done and at what time it evolved. Dempsey is therefore documenting time, place, and feelings in his work.

Born in Boston, Lois Jones attended the Museum of Fine Arts school on a

4-year scholarship from 1922-27. On request from Prof. James Herring at Howard University, she joined that department of art in 1930—a position she would hold for the next half century. A general education board grant (1937-39) allowed her to pursue further study at the Academy Julian in Paris. It was in 1941 that Jones won the Robert Woods Bliss Landscapes prize in oil painting from the Corcoran Gallery. Interestingly enough, a friend and fellow entered the painting and when the identity of the true artist was revealed there was some discussion of recalling the award in much the same manner that Afro-American artist Edward Bannister had been treated in Philadelphia at the 1876 National Centennial. By the early 1940's and through the suggestions of Dr. Alain Lock, Jones documented the Afro-American personality. She developed the Jones-Tabary studio representing the first Afro-American artist atelier or school where art ideas and techniques were exchanged. Her primary focus today is her documentation of the icons of Afro-America both in the United States and the Caribbean and is her design legacy.

Born in Washington, D.C., Delilah Pierce studied at Howard in the late 1930's with James Porter. In 1962 Pierce received an Agnes Meyer Fellowship to study and travel in several African countries. The realities of an American of part African ancestry visiting Africa was significant for it not only represented links to ethnicity in a historical sense, it provided for Pierce an opportunity to become one of a handful of African-American artists to travel to Africa and to do so before it became popular in the late 1960's. In doing so, Pierce was exposed to color esthetics and environmental design influences that would emerge in her late work as abstract surrealism to be called Post Modern Expressionist where color is as important as form. It is this expressionism that offers a fresh stylistic evolution essential to the artistic leadership Pierce is about to exert.

James Porter was an art historian and artist. His early life was marked by enormous success as a painter of scenes and portraits. His important literary work "Modern Negro Art" was published in 1943. The result of these scholarly activities was the development of an important group of documents which for the first time reported as well as interpreted the contributions of Afro-American artists. In fact, many of his publications continue to be the most complete account of an artists' work and as such so many cannot avoid referencing him in their research. In 1962-63 Porter traveled throughout west Africa. Work influenced by this travel documented the reacquaintance with Africa that many were indulging in during the late 1960's, concurrent with the rise in African sociopolitical expansion. As a result, this later work is of extreme cultural importance.

Alma Thomas moved to Washington in 1907. Like James Porter her enrollment at Armstrong Technical High School in Washington was significant. She developed her interests in art, architecture, and drawing under the philosophical guidance of organizer and first principal Wilson Bruce Evans whose belief in "work with the hand, the mind, and the spirit," set the atmosphere for the training available to his students. The work that Thomas pursued reflected this training philosophy. By the time she had retired from the public school system in 1960, Alma Thomas began to exhibit widely. Thomas was invited by Prof. James Porter, who directed Howard's Gallery of Art to exhibit a retrospective of her work. Late in life Thomas received her greatest recognition with exhibitions at the Whitney Museum and the Corcoran Gallery. Thomas donated a large body of her work to the National Museum of American Art which gave her a major retrospective last year.

Known as a master printmaker, James L. Wells' early religious training permanently influenced his art. In 1921, the 135th Street Branch Library in New York City sponsored his first exhibition, and later that year, the Alpha Phi Alpha fraternity also sponsored an exhibition of his art. These early exhibitions gave Wells encouragement. Wells first explored the raising interest in African imagery in his work paralleled the emergence of a cultural renaissance in the Afro-American community centered in Harlem. During his nearly 40 years as professor of graphics at Howard University, Wells' greatest achievement has been the leadership he has shown as the dean of printmaking in an institution where so many have developed their individual printmaking techniques under his guidance and encouragement. Wells' ever present concern with African themes, and on themes of man's reflection and isolation in a changing world are evident. His work forms a cohesive body of design statements, richly African-American, and a historical record for all humanity.●

RABBI ALFRED GOODMAN HONORED AT RETIREMENT PARTY IN COLUMBUS, GA.

HON. RICHARD RAY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. RAY. Mr. Speaker, it is a great honor for me to recognize an outstanding citizen upon the occasion of his retirement. Rabbi Alfred L. Goodman is being honored at a retirement party on Saturday, May 14, 1983, at the Columbus Country Club in Columbus, Ga.

Rabbi Goodman is that rarest of human beings—he can combine the majesty that makes people instinctively want to follow him in crowds, with the humility that makes people trust him and open up to him. His qualities of leadership are known not only throughout the Jewish community in Columbus, but also throughout the entire city, and across the State of Georgia.

Although he is retiring, his influence will continue to be felt. A spirit of involvement such as he has is not canceled simply by the passing of a chronological milepost. He will stay involved, and all the citizens of Columbus will be better for it.

Rabbi Goodman was born in Cleveland, Ohio, and educated in the public schools there. He is a graduate of Western Reserve University in Cleveland, Ohio, and the Jewish Institute of Religion in New York City, where, in 1945, he was ordained. In 1970, Rabbi Goodman was awarded a doctor of divinity degree from the Hebrew Union College-Jewish Institute of Religion.

Rabbi Goodman began his career in 1944 at the Temple Beth Israel in Lima, Ohio. After 2 years of military service, he returned to Temple Beth Israel and stayed until 1950, when he moved to Temple Israel in Columbus, Ga. In August 1983, Rabbi Goodman will retire after 33 years of service to Temple Israel.

Rabbi Goodman is currently serving as the president of the Family Counseling Center in Columbus, Ga.; the Jewish chaplain for the Warm Springs Foundation, Warm Springs, Ga.; executive board member of the Georgia Council on Human Relations; and the auxiliary chaplain at Fort Benning, Ga.

These are only a few of the organizations that Rabbi Goodman has been associated with throughout his many years in Georgia. He is truly a man to be admired and emulated and I am happy to take this opportunity to wish him an enjoyable and productive retirement.●

THE PONTIAC FIERO: QUALITY MADE IN AMERICA

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. CARR. Mr. Speaker, the American auto industry is facing enormous challenges. How the industry meets those challenges means a great deal to our Nation's economic strength and to the jobs of hundreds of thousands of Americans. For cities such as Pontiac,

Mich., the largest city in my district, that response is particularly critical.

That is why I am pleased to bring to the attention of the House the commitment by the Pontiac Motor Division and the United Auto Workers to produce a new automobile with the most up-to-date technology and with the best quality workmanship and management. The Pontiac Fiero, and the commitment to quality which will go into it, are described in this editorial by Neil Munro of the Oakland Press.

[From the Oakland Press, May 1, 1983]

FIERO PLANT OFFICIALS TAKE UP QUALITY CHALLENGE

(By Neil Munro)

An impassioned response has come to questions raised in this space about quality problems with American cars.

You'll recall that a surprising number of readers are wary of U.S.-built vehicles on that score and that data indicates their quality—while vastly improved in the last couple of years—still falls somewhat short of the competition overall.

Now, in a letter to The Press, the top union and Pontiac Motor Division officials at the new Fiero plant promise flatly that the cars they will build will be better than, not merely as good as, the imports from Japan.

UAW shop committee chairman Gerry Lewis and plant manager Ernie Schaefer vow that "the people in our plant are committed to making it happen."

They add "now that we (union and management) have gotten our act together, we're going to give all our competition a run for their money. The Pontiac Fiero, built right here in Pontiac by Pontiac people, is going to be competitive both in terms of quality and price."

Lewis and Schaefer also say they've invited all of you who responded to the why-aren't-cars-selling question to visit the plant and "talk to the people about the quality of our new Fiero."

These guys are laying it on the line. They're serious.

There is no reason they can't do what they say they're going to do.

For one thing, the Fiero will be powered by the Pontiac-built engine that has benefited so enormously from Japanese-style quality control methods.

The division, you may remember, now employs the same man, an American, ironically, who taught the Japanese how to do it.

It has been demonstrated many times that American workers and managers are fully capable of turning out Japanese-level quality.

The Wall Street Journal tells, for example, of a Japanese-owned Sharp Electronics television and microwave oven plant in Memphis, Tenn., which meets their high standards.

Their secret is simple. They demand quality and get it. The workers are pleased with the Japanesee management style and are proud of what they do.

The story is not the same for some of Sharp's competitors.

For example, a supplier of plastic TV parts to the Sharp plant says "they demand jewelry. There just is not any comparison between the quality Sharp demands and that demanded by RCA and Zenith."

That tells you a lot.

If Sharp can do it in Memphis, the folks who run the Fiero plant can do it in Pontiac.

They intend to, and it would be foolish to doubt their resolve.

The "bottom line" obviously is that American automakers no longer have the option of turning out products of lesser quality than those turned out by the Japanese.

Too many would-be buyers are no longer in a mood to put up with it.

To be a success, to keep the workers on the job, the Fiero is simply going to have to be as good or better than the competition.●

PERSONAL EXPLANATION

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. COATS. Mr. Speaker, Due to the death of former Congressman E. Ross Adair, I was not present on the House floor for the sessions of Monday, May 9, or Tuesday, May 10.

Had I been present, I would have voted as follows:

"Aye" on H.R. 2357, to provide for an increase in the number of members of the Congressional Award Board;

"Aye" on H.R. 2173, to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to authorize additional appropriations;

"Aye" on H.R. 2174, to amend title 18 of the United States Code to prohibit certain tampering with consumer products;

"Aye" on S. 653, to amend title 10 of the United States Code to establish a Foundation for the Advancement of Military Medicine;

"Aye" on House Resolution 184, a bill providing for consideration of H.R. 2175, the Justice Assistance Act of 1983;

"Aye" on agreeing to the Speaker's approval of the Journal;

"Aye" on the amendment by the gentleman from Pennsylvania to add programs to help fight crimes against the elderly;

"Aye" on final passage of H.R. 2175, the Justice Assistance Act of 1983;

"Aye" on House Resolution 185, a bill providing for consideration of H.R. 2587, to authorize appropriations to the Department of Energy for civilian research and development programs;

"Aye" on House Resolution 183, a bill providing for consideration of H.R. 2066, to authorize appropriations to the National Science Foundation for fiscal years 1984 and 1985.●

INTERFAITH CONFERENCE OF METROPOLITAN WASHINGTON HONORS DAVID KREINDLER

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. BARNES. Mr. Speaker, the Interfaith Conference of Metropolitan Washington is honoring David Kreindler, who is retiring after 2 years of exceptional service to the organization. Mr. Kreindler, approaching his 80th birthday, is a resident of my district in Maryland.

I have often had the privilege of working with the Interfaith Conference, and am pleased to have this opportunity to place their letter of appreciation to David Kreindler in the CONGRESSIONAL RECORD for the information of the Members of the Congress:

There is much talk these days about voluntarism. The spirit of voluntarism in the service of humanity takes many forms. One of them is epitomized by David Kreindler, retiring this month as the volunteer accountant for the Interfaith Conference of Metropolitan Washington and for the Coalition for the Homeless.

The Interfaith Conference brings together the religious leaders of the Protestant, Jewish, Roman Catholic, and Islamic faith communities in the Metropolitan Washington area, for interfaith dialogue and joint action on issues of social justice. The Coalition for the Homeless works as an advocate for the homeless.

Mr. Kreindler retired after 50 years as general manager and comptroller of a major hotel and moved to Washington to be near his family. In his late 70's, he stepped forward 2 years ago to help the Interfaith Conference. He brought our financial records into a more complete set of books with hundreds of hours of volunteer labor and has maintained the conference's books in perfect order. When the Coalition for the Homeless was spun off by the conference 16 months ago, he became its bookkeeper as well.

Now, as he approaches his 80th birthday, Mr. Kreindler is once more "retiring." He can never be replaced, only succeeded. The Interfaith Conference and the Coalition for the Homeless are deeply grateful to him for his selfless labors. We hold him up as a shining example of how a person's faith and interests can combine to satisfy both himself and the larger needs of society, and we give thanks to God for him.●

JOHN P. HRZICH: POLICEMAN OF THE YEAR

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. SOLARZ. Mr. Speaker, this week the House of Representatives began debate on the Justice Assistance Act of 1983. Once enacted into law, the legislation will provide $170 million in grants to States and localities for anticrime programs, activities to control arson, to deal with career criminals, to respond to serious crimes by juveniles and the like. This is a worthy effort, and I intend to do all that I can to insure that this legislation passes the Congress in a timely fashion.

Ultimately, the success of our programs to control crime rest on the shoulders of a few individuals who have the courage and the commitment to make the fight against crime their profession. I am talking, of course, about our Nation's police. All too often their contribution, a contribution more important than all others, receives an insufficient amount of recognition. From time to time, community groups help bring to the attention of the public efforts by policemen which really should not go without notice. I am pleased to bring to the attention of my House colleagues one such instance.

On Thursday, May 12, Police Officer John P. Hrzich will be honored by the Greenpoint Lions Club, the Greenpoint Merchants Association, and the New York State Assembly as the 1983 Policeman of the Year. Police Officer Hrzich, after 10 years of valiant and meritorious service, is winning the kind of recognition that he, as a dedicated public servant, richly deserves.

Mr. Hrzich is a lifelong resident of New York City. He attended Martin Van Buren High School where he lettered in baseball and basketball. After high school, John worked for 6 years at the Chase Manhattan Bank, though his tenure was interrupted by a 2-year absence during which he served in the military.

His Army career lasted from 1967 to 1969; he served 1 year in Vietnam. During this period, he was awarded the Army Commendation Medal. Wishing to further his education, he enrolled at the New York Institute of Technology, from which he graduated in 1976 with a B.S. degree in behavioral science.

On April 30, 1973, Mr. Hrzich realized a dream: He received appointment as a probationary officer in the New York City Police Department. During his 10-year career, he received three departmental decorations. Among these, he was awarded the Meritorious Service Medal for capturing an armed burglar on a crowded street—he did so while endangering his own life for the benefit of his community.

This has been the hallmark of John Hrzich's career: Sacrificing himself, putting his life and his livelihood on the line, for the benefit of others. For this reason, the organizations in Greenpoint which are taking time to honor him deserve to be honored themselves.

We as a society owe so much to our courageous police officers. And we as citizens, who owe so much to this courageous few, should seize every opportunity to respond, at least with a thank you, for the great work they do.

As the Congressman from Greenpoint, I salute Officer Hrzich for his service as 1983 Police Officer of the Year.●

SMALL BUSINESS WEEK

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Ms. SNOWE. Mr. Speaker, National Small Business Week is an appropriate time for us to reflect on the important contributions small businesses and small business people make to our society and our way of life. It is also a time to focus our attention on some of the problems facing the small business community and to concentrate our efforts on finding ways to alleviate them.

As President Reagan has correctly pointed out, small business is the cornerstone of our free enterprise system. Small businesses account for nearly 40 percent of our gross national product; they employ over half of the American work force; and they provide an overwhelming majority of the new jobs created each year in this country. The small business sector is the source of many of our most creative ideas and new inventions. In fact, according to the National Science Foundation, small businesses provide 25 times more innovation per research dollar than larger firms. In addition, the small business community provides invaluable opportunities for women and minorities to fulfill their goals of economic self-reliance.

Since America's small businesses play such a vital role in our society, we cannot afford to turn our backs on the problems that many are now facing. Small firms, with their narrow profit margins and limited capital reserves, have been particularly hard-hit by recent high interest rates, economic recession, and overly restrictive Federal regulation.

We must take steps now to create a more favorable climate for the small businesses of this country. We have already made progress in lowering the rates of interest and identifying burdensome Federal regulations. We must now pursue this course in order to allow the small business people of this country to make the best possible use of their creativity, imagination, and hard work. Such an effort is absolutely critical to the future health of our economy and our society in general.●

A SALUTE TO OUR CIVIL SERVICE SYSTEM

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. GUARINI. Mr. Speaker, I rise in tribute to the civil service system, which has supplied our communities and Nation with an army of dedicated servants of the people.

On January 4, 1983, Public Law 97-420 of the 97th Congress, in joint resolution, adopted the following, designating January 17, 1983 as Public Employees Appreciation Day:

Whereas public employees have made great contributions to American society in many areas including health care, crime prevention, science, transportation, agriculture, housing, energy, and the national defense;

Whereas public employees are the often forgotten individuals who make government run smoothly;

Whereas professionals in the public work force provide continuity and security in government operations in times of national emergency and stress;

Whereas the merit system of employing public employees has provided our Federal, State, and local governments with the finest public work force in the world; and

Whereas the Congress of the United States recognizes the dedication, talents, and contributions made by public employees at all levels of government; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, that January 17, 1983 is designated as "Public Employees' Appreciation Day" and the President is requested to issue a proclamation inviting the Governors of the several States, the chief officials of local governments, and the people of the United States to observe that day with appropriate ceremonies and activities.

The U.S. civil service system is celebrating its 100th anniversary this year, while in New Jersey the 75th anniversary is being celebrated.

To further honor these dedicated employees, I have asked the U.S. Postal Service to issue a commemorative stamp, which would pay tribute as well as being inspirational.

The New Jersey State Civil Service Commission is composed of Eugene J. McCaffrey, Sr., president, and commissioners S. Howard Woodson, Jr., of Trenton, Mercer County; Charles M. Walther, Jr., Upper Montclair, Essex County; Barbara Claman, of West-

field, Union County; and Philip Matalucci of Middle Township, Cape May County.

An important arm of assuring the proper administration of laws and regulations to the employees in New Jersey is its excellent New Jersey Civil Service Association, whose officers are: president, John Lazzarotti of Mount Holly; first vice president, Charles King of New Brunswick, second vice president, Olga Sachenski of Clark; third vice president, Richard D'Elena of Delran; fourth vice president, Paul Kalnas of Phillipsburg; fifth vice president, Thomas Tammaro of Vineland; sixth vice president, Virginia Clancy of Monmouth; recording secretary, Carol Cash of Burlington; treasurer, Theresa Long of Williamstown, financial secretary, Isadore G. Padula, Jr. of Belleville; sergeant-at-arms, William Carter of Jersey City.

The presidents of the local councils of the New Jersey Civil Service Association are Essex No. 1, Tally Talbot; Hudson No. 2, Frank Basillo; Passaic No. 3, Charles Arangio; Mercer No. 4, Norman Leavens; Bergen No. 5, Agnita Hastings; Morris No. 6, Betty Lisovsky; Middlesex No. 7, Ann Montanti; Union No. 8, Olga Sachenski; Monmouth No. 9, Virginia Clancey; Camden, No. 10, William James; Kearny No. 11, Raymond Duger; Ocean No. 12, Mary McDonald; Hunterdon No. 15, Andrew Weiman; Burlington No. 16, Richard D'Elena, Warren No. 17, Paul Kainas, Cumberland No. 18, Thomas Tammaro; Cape May No. 19, Andrew Cipaldo (acting); Sussex No. 29, Edward Sanders; Salem No. 21, Mary Spaulding.

The watchdog of the civil service in New Jersey is the Shield, a viable newspaper, which was founded in 1935 by Irving "Steve" Brody, a former Hudson Dispatch reporter. He was covering the State House in Trenton at the time he began the paper.

After Brody's death in 1948, Milton E. Goldman, who had been advertising manager of the Shield assumed command of the paper. He died in 1979.

Editor of the Shield, since 1947, is Leo W. Steiner, who has been a newspaperman for the past six decades.

The Shield staff is composed of Beatrice Z. Goldman, publisher, Leo W. Steiner, editor, Caye Bolte Jehn, staff writer and graphic arts coordinator, Stephen R. Goldman, general manager, Jack Hasbrouck, assistant editor, Russell T. Jehn, circulation manager, and Madeline Goldman, office administrator.

Civil servants have manned our hospitals, operated our vehicles, provided programs of social, cultural, recreational, historical, and economic enrichment.

They have fed our Nation, they have participated in America's battles, in its social, economic, religious, and historical growth. They have given thousands of hours and millions of dollars in voluntary efforts to aid causes aimed at relieving human suffering.

They have worked in the causes of peace, knowing that this is the noblest work of God-fearing men and women. They have worked for the success of our State and Nation, knowing that if they make this a great land to live in, reflecting our energy and strength and vitalities throughout the world, then and only then, will the cause of freedom, human dignity, and freedom of opportunity be strengthened.

The Shield, in its editorial of April 2, 1983, reminds us:

> The dramatic adoption of Civil Service for the national public workforce—a direct result of the murder of President Garfield by a disappointed office seeker—showed in the clearest of terms how the U.S.A. was shocked by the powerplay of job seeking and job rewards for political services. As an antidote America wanted merit, competence, as shown in competitive examinations.
>
> States, counties, municipalities, school districts joined the procession—all by popular referendum, thus proving that what the people wanted was not politics as usual but appointees to public jobs who deserved their appointments because of their competence, not because they could line up votes or contribute large sums of money for campaign purposes or even worse, to line pockets.

It is my privilege to prepare this tribute in time for the New Jersey Civil Service 72d Annual Convention, which will be conducted at Atlantic City from May 21 to May 25, 1983.

I am asking all my colleagues in the House of Representatives to join me in this salute to my fellow New Jerseyites who will spotlight their diamond jubilee at the convention, while joining their fellow civil service workers on a Federal level, working in the system, which has helped America work so effectively for the past 100 years.●

JUDICIAL REFORM

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FIELDS. Mr. Speaker, today I am introducing a proposed amendment to the Constitution requiring that Federal judges be reconfirmed by the U.S. Senate every 10 years.

Mr. Speaker, presently Federal judges, once appointed, serve life terms. The only constitutional mechanism for removal of these judges is impeachment. And as we all know, impeachment is a long and arduous process which historically has been exercised on only nine occasions, resulting in actual removal from office of only four judges.

In the absence of any other effective formal procedure for dismissal, Federal judges have been elevated to a stature unprecedented and unequaled by any other Federal official. Unfortunately, as a consequence, there is no procedure for removal of a judge who may be senile, disabled, dishonest, or in any other way unfit to fulfill his or her constitutional responsibilities.

According to article III of the Constitution, Supreme and inferior court judges are appointed to their office for a term of good behavior. I certainly recognize and compliment the wisdom of the framers of the Constitution who, by separating judicial officials from the political process, preserved and defined the principle of separate but equal branches of Government. However, I continue to believe that this separation has resulted not in a more effective judicial system but rather in a greater disparity between the various branches of Government. The life tenure of these judges has made them less, not more accountable for their actions and decisions.

Furthermore and more significantly, is the increasing use by judges of their judicial power as a forum for legislating social policy. Our judicial system was established to interpret law, not to formulate national policy. However, in the last several years, many of our Federal judges have taken to backdoor legislating on such controversial issues as school prayer, abortion, and school busing.

I sincerely believe that neither this legislative body nor the American public can stand by and watch this transgression of constitutional authority. National policy decisions should not be formulated in our courts but rather should be duly deliberated and decided by the people's elected Representatives in Congress.

Mr. Speaker, I urge expeditious consideration of this legislation so that our Nation can once again be assured of three separate but equal branches of Government.●

DEBT CEILING RULE

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. ROSTENKOWSKI. Mr. Speaker, I take this opportunity to inform my colleagues that the Committee on Ways and Means will be considering legislation tomorrow to further extend the temporary limit on the national debt.

I wish to serve notice, pursuant to the rules of the Democratic Caucus that when this measure is reported from the committee, it is anticipated that we will seek other than an open rule.●

STUDENTS AT KINDER ELEMENTARY SCHOOL IN MIAMISBURG, OHIO, RAISE MONEY TO RESTORE STATUE OF LIBERTY

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. HALL of Ohio. Mr. Speaker, the Statue of Liberty will be 100 years old October 28, 1986, and millions of schoolchildren are raising money to help restore this landmark for her birthday. This is particularly appropriate because it was the pennies of our schoolchildren which paid for the statue's pedestal a century ago.

I would like to bring to the attention of my colleagues one special effort to raise money for this cause by the students in Florell Shaffer's second grade class at Kinder Elementary School in Miamisburg, Ohio, within my district.

Kinder is the oldest school building in Miamisburg, located in the center of the city. Many parents of Kinder's students are out of work; yet, the 25 students in the class have so far raised a total of $152.16 to pay for Miss Liberty's repairs.

What makes this effort even more special is that the diverse backgrounds of these children have given them an unusually personal understanding of the statue and its message to millions of Americans who sought freedom on our shores.

An article in the April 1, 1983, issue of the Dayton Daily News tells the story. The text follows:

STUDENTS PITCHING IN FOR STATUE'S RESTORATION

(By Mary Sikora)

The Statue of Liberty is falling down ... well, at the least it needs extensive repairs. And students in Florell Shaffer's second-grade class at Kinder Elementary School in Miamisburg want to be part of its restoration.

Five of the second-graders—Phet Phong, Jimmy Osborne, Casey Holp, Robert Gibson and Aaron Sparks—have put in considerable time researching the statue's history, making posters and collecting the money needed to help repair the New York harbor landmark.

Mrs. Shaffer said that the students read of the statue's plight in their edition of Scholastic News.

Phet Phong, a Laotian citizen, and Robert Gibson asked her if they could help save it, she added.

"The teacher asked us," Phet explained, "'Do you want to draw a poster to hang up and do you want to go around collecting money?' I asked Robert and Aaron (Sparks), then we went out to collect money."

It really wasn't that simple but, before long, the students set a goal of $100 to send on to the statue repair fund. They solicited the help of their other classmates. They made posters. They decorated small cups for money collection and, every day, they made the rounds of the classrooms at Kinder in their search for donations.

One of the big contributors was classmate Jimmy Osborne. "I told my family about it and they all gave money," he said, adding that he brought in a total of $10.10.

Casey Holp helped make the posters placed throughout the school. She said that the students read as much as they could about the statue and learned that, not only had France given it to the United States as a gift in the 1870s, but the statue's base was made possible by gifts from American school children.

She further explained that the second-graders discussed the present state of affairs and decided that "we were afraid if we didn't repair it, that France would get mad."

Last week, the students surpassed their goal and collected more than $126. "It's big—a big amount of money," Phet said with a self-satisfied grin.

The money and bookkeeping were taken care of by school secretary Arlene Suttman, Mrs. Shaffer said, adding that "She has been our accountant and helped the children keep the records straight.

"Schools have done similar things, but it's the first time a class of mine did something like this," she said. "I never dreamed—I thought maybe (they'd collect) $25. I think it's really kinda neat."●

ECONOMIC INJURY DISASTER LOANS

HON. CHARLES W. STENHOLM

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. STENHOLM. Mr. Speaker, in September of last year, a 38-county area in west Texas was declared a disaster area for purposes of offering assistance to legitimate small businesses indirectly injured by a natural disaster. Severe hail and rain storms earlier in the year had led to the declaration. Because economic intervention was necessary, the assistance that was ordered into the area included economic injury disaster loans, also known as EIDL's—pronounced idles.

As you know, EIDL's are provided by the Small Business Administration to firms that have suffered economic damage when normal free market forces are disrupted by a declared natural disaster. For example, when crops are damaged in such a disaster, gins, implement dealers, and others not assisted by direct FmHA aid qualify for EIDL's if their business is adversely affected by poor crop performance.

To qualify for assistance, an entity must meet size standard regulations (13 CFR 121) to insure that only small concerns are assisted. Agricultural co-ops, however, are not considered businesses by the SBA. Instead, despite obvious differences, SBA officials have said that:

Co-ops are nonprofit in the same sense that the American Heart Association is nonprofit.

Therefore, they can receive such aid only if each and every member of the co-op completes the SBA's form 355 and is certified as being small.

To anyone who understands the nature of agricultural co-ops and the statute establishing them—the Capper-Volstead Act, Public Law 67-146—it is clear that the SBA's requirements can often inequitably disqualify a co-op from EIDL assistance. For example:

Some co-ops have hundreds of members, many with only a tenuous relationship with the financial structure of the co-op itself, and it is unreasonable to require that each member provide financial statements to substantiate size; if 149 out of 150 members comply, the co-op remains ineligible.

Some members are passive, being landowners who are co-op members only because their tenants desire to market crops through a cooperative. Frequently, these landowner/members are substantial investors who do not, themselves, qualify as small; their affiliation, however peripheral, makes the entire co-op ineligible for an EIDL.

Therefore, for two gins located in the same town, having the same size and scope of operation, the result is that one gin, privately owned, receives a loan, while the other, cooperatively owned, cannot qualify.

In the past, some SBA regional offices have recognized these problems and have waived the every-member size standard requirement. Because the Small Business Act is unclear in its application to co-ops, however, size standard provisions were applied unevenly. Under its interpretation of the law, the present administration refuses to waive these paperwork requirements or change the regulations governing EIDL assistance.

For these reasons, I am today introducing legislation to amend section 7(b)(2) of the Small Business Act to clarify the standards of eligibility of farm co-ops for EIDL aid, for the purpose of preventing uneven or inequitable applications of this statute. This legislation would provide the necessary technical language to exempt farm co-op members from the size standard determination when being considered for an EIDL and would apply only to EIDL's.

I also believe it is important to note what this legislation would not do. First, it would not exempt the co-op itself from the requirement to meet SBA size standards. The waiver of size standard requirements would apply only to the members of a small agricultural co-op that otherwise would qualify for an EIDL.

It would not encourage corporate reorganization into cooperative form, since board members would have to resign or not be involved in the operation of the co-op; it prevents this type of abuse by still requiring size determination of a co-op's principals—such as board members or other governing officers.

It would not waive size standard determination for SBA assistance under

otherwise normal free market conditions; for aid other than disaster assistance, the SBA could still require size standard compliance by all co-op members.

Mr. Speaker, last year was not the first time and west Texas is not the only area in which the SBA's interpretation of an unclear law has resulted in the unjust disqualification of cooperatives from small business assistance. Now is the time to rectify this problem and the legislation I am submitting does so in a way that is fairest to all concerned: It will eliminate redtape, redress a present inequity, and speed relief to small businesses owned by hard-pressed farmers who are already suffering in today's weak economy.●

BEYOND THE FREEZE

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. LANTOS. Mr. Speaker, my friend and distinguished colleague, Mr. GORE, a recognized authority on strategic issues, recently made a valuable contribution to the debate on our Nation's future in an article called "Beyond the Freeze."

The article was published in the May 9 issue of the Washington Post, and I commend it to the attention of my colleagues.

BEYOND THE FREEZE

(By Albert Gore, Jr.)

The House freeze debate, mobilizing scores of congressmen on both sides and delaying many other urgent actions, demonstrated that preventing nuclear war has become a premier mainstream concern.

For decades, the public by and large left strategic issues to the executive branch. No one in government, least of all Congress, foresaw the stunning growth of the freeze idea, particularly at a time when bread-and-butter issues were becoming more intense.

What took place was a kind of chain reaction. After the glow of détente began to fade, Americans slowly realized that U.S.-Soviet relations were deteriorating. Soviet military power continued to develop and, in Afghanistan, the Soviets drove home to a new political generation the fresh lesson that they were prepared to use naked power.

Most Americans still believed our leaders would manage disagreements with the Kremlin in a fashion to avoid any flirtation with nuclear war. But the Reagan administration's bellicose anti-Soviet rhetoric, combined with its careless and often uninformed references to nuclear war, gave rise to a fear that the distance between political conflict and nuclear catastrophe was narrowing.

There remained an abiding faith that good old American technology would come up with the design for invulnerable nuclear forces and with the means to use them to intimidate the Soviets at minimal risk to ourselves. That idea also died a hand death, as successive schemes for basing the MX were unveiled and dismissed, and as MX proponents made clear its importance to them as the centerpiece in nightmare scenarios for "nuclear war fighting."

The freeze concept was born in the minds of analysts conversant with nuclear strategy and exasperated by the failure of traditional approaches to arms control. It was an idea simple, audacious and available at a time when the American people realized that humanity was in profound danger.

Whether or not its intellectual premises have been vindicated, freeze forces have challenged the foundations of orthodoxy and shown that the freeze compares favorably to the Byzantine scenarios that led to "dense pack" and "racetrack" before it. They have forced the experts to revisit the essence of the issue: not how best to design imaginary geopolitical scenarios but how best to save civilization from the horror of nuclear destruction.

Sophisticated critics of the freeze resolution seized upon qualifications made in the debate as evidence that the idea and the movement behind it suffered an intellectual and moral defeat. But that the freeze remained unacceptable to the president in a sense confirms its victory. The final vote in the House was therefore the closest we can come to a vote of no confidence.

Were this to be the only outcome, we would now be facing a bleak prospect: yet another president at bay, and unable to lead; a country polarized and unable to support coherent policy; the Soviets at liberty to develop their strengths and play on our weaknesses.

Fortunately, however, something else has occurred. The House has realized that the freeze was not an end in itself but a proposal for a new beginning. Moreover, there now appears to be a consensus that in this new beginning we must try not only to reduce the number of nuclear weapons in the world but also to ensure that nuclear relationships are kept stable. All sides of the debate seem to realize we must eliminate the conditions that would make either superpower fear the other has the means and, therefore, may be harboring the ambition, to carry out a nuclear coup: a first strike that would leave the victim with choice of submission or suicide.

The president, perhaps to his own surprise, now finds himself approaching the sames idea, albeit from his own perspective. Because Congress proposed to choose between his conduct of arms control and the audacious freeze, it was imperative for him to make his conduct in arms control and arms planning more persuasive. That led him to expand the charter of the Scowcroft Commission to encompass arms control, and to embrace its recommendations, even though they are in many ways contrary to his original goals.

I believe, along with many of my colleagues, that the long-term recommendations of the report are correct. Arms control and nuclear weapons decisions needs to be integrated into a common strategy focused on the pursuit of stability. Stability requires that neither the United States nor the Soviet Union possess the means to conduct even a theoretically advantageous first strike. Insofar as the development of increasingly more numerous and accurate MIRVed warheads leads toward first-strike capabilities, we must reverse that trend. We can do so by moving toward less threatening nuclear forces with fewer warheads on each side compared to the number of missiles silos on the other side, ideally in a transition orchestrated through arms control.

The president still wants the MX, although he asserts that its deployment is now needed as part of a strategy for achiving the longer-term objectives of the commission report. How this can be so, he has not demonstrated. He correctly sees the idea of a small, single-warhead ICBM as a way to move toward nuclear stability, but the Pentagon suggests that this idea is a price it is willing to pay only under duress, in order to get the MX.

The president asserts that he intends eventually to blend these ideas into a new approach to START, but he states that his existing proposals in Geneva are completely consistent with the Scowcroft recommendations, which they are not.

Once again, the initiative and the burden fall to the Congress and especially to the House. There, a vote in favor of the president's proposals is far more difficult, given all that has happened, than in the Senate. But the Congress, too, has changed. Because of the freeze, there is now some of the same sense of nuance and detail in nuclear matters that formerly was reserved for tax laws and highway construction bills.

Ronald Reagan now has what no other president has had: a Congress that is able to engage in a dialogue on the problems of the nuclear age and that is motivated to support a line of march that makes sense.

Last Monday, two letters—one from a group of senators, the other from a group of representatives—went to the president. Consistent on basic points, they say that agreement is possible with the president on the basis of the Scowcroft Commission report, but that Congress must have at the beginning and at critical points along the way (1) his assurances of support for the report and (2) evidence that he is moving vigorously on arms control and on serious technical questions hanging over MX and the single-warhead ICBM.

The self-education of the House was the result of a political imperative. It makes possible, together with the Scowcroft report and the president's endorsement of it, the beginning of a second round of informed and constructive debate. This debate must turn on a crisply defined objective: stability through arms control. It provides the basis for a durable bipartisan consensus. That, too, should be counted as a victory for the freeze.●

A TRIBUTE TO HEAD COACH JOHN GURSKI

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. YATRON. Mr. Speaker, it is a distinct privilege to bring to the attention of my colleagues in the U.S. Congress, the achievements of Mr. John Gurski, who is retiring this year as head football coach at Wilson High School.

In recognition of John's outstanding record and achievements as head coach for 19 seasons, many of his admirers, friends, colleagues, and students will be hosting a dinner in his honor to be held June 12 at Stokesay Castle. It is my pleasure to pay tribute to John through these remarks.

Under Coach Gurski's direction the Wilson High School Bulldogs have brought distinction and a high level of success to this school and the community. As head football coach, John's teams have a record of 144 wins, 41 losses, and 3 ties. He was named coach of the year last season by his fellow coaches in the Lancaster-Lebanon League and of Berks County.

For 4 consecutive years he has led his team to the championship of section 1 of the Lancaster-Lebanon League. His 1981 team was ranked third in Pennsylvania. In the last three seasons his teams have attained the outstanding record of 43 wins and 2 losses. His 1980 and 1981 teams tied the Wilson High School record set by the 1978 and 1979 teams for the longest winning streak with 22 consecutive wins. The 1978 team coached by Mr. Gurski finished with an undefeated record of 11 and 0 and was ranked No. 1 in the Middle Atlantic ratings and No. 4 in the State. His 1967 and 1969 teams were also undefeated with 10 and 0 records and they won the championship of the Tri-County Football League. His 1974 team was cochampions of this league. John Gurski was also named coach of the year in 1969 and 1978 by the Reading Eagle and Reading Times newspapers. He also achieved the honor of being selected as one of the east coaches of the Pennsylvania Big 33 game played at Hershey in 1970 and the P.I.A.A. Big 33 game played in Wilkes-Barre in July 1980.

Coach Gurski began his career at Coal Township High School where he served as assistant football coach and head wrestling coach. He then became the head football coach at Minersville High School, which he left to become head football coach at Wilson High School. He had achieved 100 wins as a head football coach by 1971 and reached this goal at Wilson High School in 1977. In 1974, he was selected as the Coach from the State of Pennsylvania to be the recipient of the Master Coaching Award presented by the National Football Clinic in Atlantic City, in recognition of his outstanding achievements.

Mr. Gurski graduated from the University of Pennsylvania with a degree in economics and received his masters degree in education from Bucknell University. He received honorable mention All-American honors in college football. Coach Gurski has always stood as an inspiration to the members of his teams, who have sought his advice and have learned from his years of service and excellence.

He will be sorely missed by his players and all those who love the sport of football. I know that my colleagues will join me in paying tribute to John Gurski on the outstanding job he has done in coaching and working with young people. He is a man of principle and determination, a man of compassion and dedication—truly a remarkable American. It has been an honor to bring his achievements to the attention of this body and to have the opportunity to wish him success in all his future endeavors.

TRIBUTE TO JOE PARKER

HON. NORMAN SISISKY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. SISISKY. Mr. Speaker, today I rise to share with my colleagues the achievements of a very special person, Mr. Joe Parker.

Joe Parker had a vision. As a child, he dreamed that his poor, crime-ridden neighborhood could be a safe, respectable community. He dreamed that the decaying houses of his city of Portsmouth, Va., could become homes that families would be proud to own.

But Joe Parker was more than a dreamer, he was a worker and an achiever. Through this one man's force of will, one of the city of Portsmouth's worst neighborhoods, Mount Hermon, has become a national success story.

Joe Parker distrusted urban renewal, fearing it would destroy black neighborhoods and merely shift ghettos from one site to another.

Instead, he inspired his neighbors, making them believe in the resurrection of their community. He motivated them by example, telling them that belief was not enough, that they had to work to make things possible.

Today, that community serves as a monument to Joe Parker's energy and commitment. Mount Hermon boasts 150 new single-family homes, 40 rehabilitated homes, a new 90-unit cottage development for the elderly and handicapped, and a 296-unit family apartment building.

In all, Mount Hermon has 600 new residential units. Yet the figures cannot show the new streets, and the fierce pride taken by each resident in their own home and in their community. Theirs is not a typical Government operation. In this community, the residents run the program themselves. Thanks to Joe Parker's efforts, 75 percent of the original families stayed to rebuild.

To work the miracle, Joe Parker persuaded the city to apply for Federal urban renewal funds to help his neighbors rebuild. The private investors were willing to take a chance because of Joe Parker's drive and vision. In all, $16.9 million came from community funding.

In 1980, Joe Parker received an award for the community's design from the U.S. Department of Housing and Urban Development. Communities across the Nation called upon him for help in rejuvenating their own communities.

We lost Joe Parker not long ago. He passed away at the age of 55. He will be sorely missed by his family, by his community, and by those of us who worked with him. But he has left behind a fitting tribute, Mount Hermon. Thanks to Joe Parker, it is a living community, with a sense of pride and purpose.●

AN INFORMED VIEW ON CENTRAL AMERICA

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. LOTT. Mr. Speaker, I recently had the opportunity to read the views of our former colleague, Bob McClory of Illinois, concerning problems in Central America.

He writes of the difficulties involved in having congressional committees oversee covert intelligence operations. As a former member of the House Select Committee on Intelligence, he knows his subject intimately. I believe our colleagues can benefit from reading his sage advice.

At this point, I wish to insert in the RECORD, "Congress Should Act With Restraint on Central American Issue," by Robert McClory.

CONGRESS SHOULD ACT WITH RESTRAINT ON CENTRAL AMERICAN ISSUE

(By Robert McClory, Former Member of Congress from Illinois)

Well-grounded fears of an ever-increasing involvement in the political and military battles being waged in Nicaragua and El Salvador are giving rise to demands for the Congress to assume a larger role in covert intelligence decisionmaking.

From the time, the Central Intelligence Agency was established in 1947 until 1974, covert (or secret) projects of our intelligence agencies were undertaken with no accountability whatever to the Congress.

In 1974, the Hughes-Ryan amendment was attached to the Foreign Assistance Authorization bill which required the CIA to report all covert projects to a total of eight House and Senate Committees. Restrained by that kind of requirement, covert actions came virtually to a standstill.

The action taken by the Congress in 1980 reducing the reporting requirement of the intelligence agencies to the two Select Committees on Intelligence, i.e., the House and Senate Select Committees on Intelligence, was intended as a permanent solution to the problems of excessive or ill-conceived "covert" projects.

The specific statutory authority adopted at that time imposes upon the President of the United States the requirement to report all covert activities to these two Congressional Committees "in a timely fashion." Former President Carter interpreted this language to permit him to postpone the reporting of the abortive hostage rescue mission of 1980 until after that covert project

had ended in a stark and humiliating disaster. Despite the tragedy and Carter's inexcusable delay in informing the Members of the House and Senate Intelligence Committees, several members who are sharply critical of President Reagan's present reporting practices were noticeably silent when Carter's representatives finally tried to explain why the mission had been so poorly planned and so miserably executed.

Still, there was no demand then, as there appears to be now that Congressional oversight of covert actions should be subject to approval or "veto" by one or the other of the Congressional intelligence committees.

Too often members of the intelligence committees of the House and Senate are plagued by one or two members who utilize their committee positions for publicity or political ends. This should be particularly noticeable today while great national attention is focused on covert actions in Central America which seem to be largely misunderstood and where the "cover" of some of those participating in the covert actions has been blown by media zealots who regard the public's right to know above the need to protect the identity of those whose safety is endangered by media exposure.

It is or should be no secret that numerous covert actions may be deemed necessary in order to protect our vital national security interests. That responsibility is necessarily vested in the President and the Executive Branch of our government. Any temporary public, Congressional, or media dissatisfaction with decisions relating to our national security should not justify substituting judgments formulated by a committee of the Congress (the legislative branch) for what is necessarily an executive department prerogative.

Some may even question the wisdom of the establishment of the two intelligence committees in the House and Senate. It might be preferable to vest that entire authority in the Executive Branch and then hold the Executive accountable for intelligence failures and abuses. A temporary Congressional committee could then investigate and report its findings. This was the purpose of the Pike and Church Committees which the Congress created in 1975.

A more logical oversight committee for keeping a constant check on the CIA is the President's Foreign Intelligence Advisory Board (PFIAB), currently headed by the very capable Anne Armstrong, former Ambassador to Great Britain and former Presidential Assistant. Such other members of PFIAB as Allan Greenspan and Eugene Rostow are fully competent to review proposed covert actions and probably better able to do so than are the members of the Congressional intelligence committees, all of whom have other committee assignments to attend to.

Individual or committee inspired letters protesting a proposed covert project can be fraught with potentially dangerous consequences as occurred a little over a year ago when erroneous information from such a letter was "leaked" to a newsman. We should be thankful that Qaddafi (who was erroneously identified as the subject of a covert action) did not retaliate militarily or with a terrorist mission.

Another abortive effort to frustrate policy positions in Central America occurred when a "staff report" was published following the initiative of a few members of the House Intelligence Committee. This may have strained relations between the Committee and the CIA but it did nothing to advance our national interests.

The more recent suggestion is for a Congressional "veto" or the substitution of the judgment of the House or Senate Intelligence Committee for what is clearly a responsibility reposed in the President and the intelligence agencies of our nation. Such is not the law today, and it seems unlikely that a Committee of the Congress could fulfill such a role.

Several additional observations seem to me to be pertinent. First, there is the question as to why a policy should be implemented by covert as opposed to overt action. The CIA and other intelligence agencies have a great preference for secret, undercover activity. Even when overt and aboveboard military or economic aid would have broad public acceptance, the intelligence community seems bent on concealing its actions.

Still, in other instances, the beneficiaries of our aid frequently insist that the aid must be furnished clandestinely. When this develops—as it does—we are left with no alternative but to help our cooperating friends or allies in the manner in which they choose to be aided. That attitude could explain some not so covert actions taking place today in which the American public and the President may be overtly supportive.

At any rate, committees of the Congress can do little or nothing to ease this dilemma as I learned the hard way as a Member of the House Select Committee on Intelligence since its creation in 1976 and until my retirement from the Congress in January of this year.●

PASSAGE OF THE NUCLEAR FREEZE A MISTAKE

HON. RICHARD RAY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. RAY. Mr. Speaker, while I think that the nuclear freeze resolution has been improved by the 40-plus hours of congressional debate which have been devoted to it, I am still of the opinion that its passage by the House of Representatives is a mistake.

In my judgment, this is not just the right time in our history to approve a nuclear freeze resolution.

The action that we take is important not only for the provisions it contains, but also for the signal that it sends. History tells us that both Tokyo and Berlin closely monitored congressional debate on national defense in the years preceding World War II. Encouraged by the strength of the "peace movement" and by the defeat of numerous rearmament measures, the Axis powers seriously misread America's will and resolve. The consequence was World War II.

I fear that this House is sending the Soviet Union much the same message that it sent Germany and Japan in the late 1930's. Only recently, Mr. Andropov has proposed to the President that warheads as well as missiles should be counted in the START talks as a means of determining a balance between Soviet and NATO nuclear forces. The Soviet Union seems now to be reluctantly moving toward the conception of reducing arms and not simply strengthening them. I am convinced that this program is the direct result of their perception that the United States has the will and the strength of purpose required to maintain an adequate and creditable deterrent.

There are other problems with a freeze. First among them is verification. It is relatively easy to determine whether or not a nation has specifically reduced the arms and weapons systems it promised to cut back. A freeze is a different proposition. It is very difficult to examine the whole spectrum of a defense complex as intricate as that of the Soviet Union and guarantee that it is maintaining a status quo.

This problem in verification must be measured against the backdrop of the Soviet record of breaking every international agreement they have entered since Yalta.

Mr. Speaker, I honestly believe that we are not debating the question of world peace. All of us are dedicated to that goal with equal fervor and commitment. The difficulty here concerns the best way of getting there.

I firmly believe that mutually agreed upon reduction talks conducted in an atmosphere of respect provide our most viable option. I intend to work as hard as I can to achieve that goal in my service on the special panel appointed by the Armed Services Committee on disarmament. No one will work harder than I will to this end but I think we are making a mistake today and I cannot support House Joint Resolution 13.●

COMMEMORATING ITALIAN-AMERICAN WEEK

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. RITTER. Mr. Speaker, I am happy to announce that this week is being celebrated as Italian-American week in Allentown, Pa., and I, as the Representative of the Lehigh Valley, would like to extend that Italian-American week throughout our Lehigh Valley cities, townships, and boroughs. To culminate the celebration of this week's activities, a special concert presented by the I Paesani Italian Singers and Dancers of the Lehigh Valley, will feature tenor Walter Rinaldi, soprano Patricia Jensse, and accompanist Carl Suppa in a special celebration of America's favorite Italian music "From Verdi to Volare." The event, to be held in Allentown's Symphony Hall on May 14, will be a fitting way to end the week-long celebration dedicated to a people

who have contributed much to the greatness of our Nation.

I have the pleasure of representing an area in Pennsylvania which is ethnically diverse. The steel mills, slate quarries, cement factories, foundries, truck assembly lines, and other industries attracted settlers from many parts of the world. They came seeking a better life and chance to start anew in a land filled with hope and promise. Their toil and sweat helped to build a community that was proud and strong. In doing so, they ingrained in their children the knowledge that hard work and dedication paid off, but they also instilled in them an undying love for their heritages. This is what will make May 14 so special. It is a celebration of Italian-American history and culture, of friendships and good times—an event which will be remembered for some time to come.

The Italian-American community throughout the Lehigh Valley can boast of many favorite sons who have risen to the top in their fields. they are the products of a strong foundation laid by the generations that preceded them. Italians began arriving in the Lehigh Valley in the late 19th century and continued coming until the time of the Great Depression. It was not surprising to find many members from the same region or towns in Italy living in close proximity to one another in the Lehigh Valley.

Bethlehem inherited a large number of artisans, who contributed to the growth and welfare of the city. Some became small shopowners dealing in groceries, clothing, and other dry goods. Others became barbers, tailors, and bankers, creating a strong merchant class. Many of these shops became meeting places for recently arrived immigrants to talk of the land they left behind and the dreams they brought with them. Their hard work and desire to get ahead epitomizes the classic American dream; this was the message that was handed to the next generation, and what a generation that was.

I wish I could, for the benefit of my colleagues, list the many Americans of Italian descent who have blessed the Lehigh Valley with their personal, professional, business, political, and artistic success. They range from distinguished professionals to the Nation's top automobile industry executive to successful businessmen and union leaders who have given greatly to our economy and our communities, to nationally renowned artists, to champion athletes, to religious leaders, and to distinguished elected officials—judges, State representatives, and mayors. These many people who have risen to the top in their fields had the benefit of building on the strong foundations laid by the hard work of their forebearers.

We in the Lehigh Valley are proud of the I Paesani singers and dancers and their dedication in preserving the rich and colorful heritage of Italy. The term "I Paesani" means fellow townspeople and is a fitting name to a group whose members' ancestors, no doubt, came from the same villages and towns in Italy. Today, many of their names do not reveal the heritage they honor and love. Yet, when they appear on stage with the men in black trousers and white shirts complemented with a red scarf and the women adorned in their peasant blouses with brightly colored skirts, one can close their eyes and dream of the land which has given the world the vision of a perfect civilization.

I salute the many Americans in the Lehigh Valley of Italian heritage and am proud to share in the commemoration of Italian-American week in the Lehigh Valley. You have contributed to the greatness of our community and individually you have passed on to your children the values of strong family, work ethic, honesty, and integrity. May God bless you.●

LETTER EXCERPTS FROM SISTER RAQUEL PINAL, OF OCOTAL, NICARAGUA

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. MILLER of California. Mr. Speaker, Sister Margaret Cafferty of San Francisco recently delivered a very moving eulogy at the funeral of our late colleague, Phillip Burton. In her eulogy, Sister Cafferty talked about the continuing violence and disorder in Central America, and particularly about the situation in Nicaragua.

Sister Margaret based her remarks on the letters of another member of her order, the Sisters of the Presentation, Sister Raquel Pinal, P.B.V.M., who is living and working in Ocotal, Nueva Segovia, Nicaragua.

The words of Sister Raquel's letters communicate the sense of intimidation and disorder which the continuing war in Nicaragua brings to the innocent citizens of that country. Her letters also illustrate the personal courage of dedication of this dedicated person who is risking her life daily.

These letters contain more than a message of courage. They contain, too, a message of concern about the covert actions which our own Government is undertaking in Nicaragua, actions which have the effect of worsening the crisis and increasing the jeopardy of thousands of innocent victims. This message should be read and weighed by every Member of this body before we vote on further military aid and on legislation to terminate such covert actions.

Following are excerpts from the letters of Sister Raquel from December 14, 1982, January 13, 1983, March 22, 1983, and April 13, 1983. They were prepared by Sister Margaret.

DEAR MARGARET: * * * Crimes and kidnappings at the border continue almost daily. * * * The couple that hosted the delegation of religious last September in Esteli were both kidnapped (with five others) cutting coffee. The others managed to escape. We know these two have been tortured. This particular couple are very lovely and very dedicated. Had worked in the cursillo movement for years, at present are on the diocesan council. * * * They could have been home with their families and grandchildren. Instead they responded (as we do each Sunday—and go with an armed guard) to pick the coffee that has fallen on the ground. In that the counter-revolutionaries have succeeded—scared off our professional pickers.

We definitely have an undeclared war going on here now. It is getting closer and closer to us physically. The counter-revolutionaries were all over the hills where we were for Easter. Twenty people from our area were kidnapped. The people are understandably frightened. Our frontier units are just heroic. Our own Ocotal Batallion has been at Jalapa for two months: 6 dead, 28 wounded—the last two were kids aged 13 and 15. I have learned to rage within myself—and ask God to help me forgive all those responsible. * * *

Meantime, Nicaragua goes on paving streets, e.g., to the Mercado in Ciudad Sandino, promoting community gardens in the empty Managua lots (so people won't go hungry), building roads, putting in telephones where there never were any, etc. And the poor who appreciate it really appreciate it. It's in their eyes, in their smiles. * * * if I die of a broken heart * * * it won't be because of a loved one, but rather because of the violence of the jealous outsider. * * *

You can't help think many thoughts, so I share the following * * * I hope, if anything happens, that I go bravely, not like a coward. As far as I am concerned, if anything should happen, just promise me you'll raise a big stink for Nicaragua—my life is too precious for me to give it away so lightly and I don't * * * No, it's been marvelous, especially since I turned forth. * * * Believe me, I shall sing and dance to the Lord in gratitude for the resurrection he granted me in Nicaragua.●

THE APARTHEID POLICIES OF SOUTH AFRICA MUST END

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. TORRICELLI. Mr. Speaker, this past week the House Committee on Foreign Affairs took up consideration of the foreign aid package for fiscal year 1984. As part of our recommendation, the committee established a set of legally enforceable fair employment standards for U.S. firms op-

erating in South Africa to combat apartheid policies. The fair employment principles adopted by the Foreign Affairs Committee were inspired by the standards drawn up by Rev. Leon Sullivan. The Sullivan principles are currently adhered to voluntarily by many American firms in South Africa. The committee's action prescribes penalties for noncompliance. On May 10, 1983, an article by Reverend Sullivan appeared in the Washington Post. It discusses the history and progress made by the acceptance of the Sullivan principles by some American firms and focuses on the course to take in the future. The article poignantly portrays the injustice and inhumanity of apartheid and poses important steps that can be taken to end this brutal practice of the South African Government. In light of the Foreign Affairs Committee's recent action regarding the Sullivan principles I commend Reverend Sullivan's essay to my colleagues.

[From the Washington Post, May 10, 1983]

IT'S TIME TO STEP UP THE PRESSURE ON SOUTH AFRICA

(By Leon H. Sullivan)

(The writer, pastor of the Zion Baptist Church in Philadelpia in 1977 drew up the Sullivan principles, a code of employment practices for American firms operating in South Africa.)

The so-called Sullivan principles that I initiated six years ago were intended to bring the actions and influences of American companies in South Africa to bear against the racist practices and apartheid laws of that country. It was my hope that the principles would initiate similar efforts by multinational companies from other parts of the world, thereby creating a global multinational campaign in South Africa against the racial injustices that have existed there for 300 years. It was also my intent that the principles would serve as a catalyst to help change segregation practices in other private and public places throughout the country.

I have attempted to make it clear from the beginning that the principles are not the total solution to the South African problem, and that even if they were implemented to the optimum, the principles alone could not end apartheid. Apartheid is a ruthless, inhumane system of practices and laws deeply embedded in the world's most racist society, and in order for apartheid to be completely eradicated, it requires the combined efforts of many forces, including governments, companies, churches, unions, the United Nations, those who believe in justice within the country, and world public opinion. But it is my firm opinion that the multinational corporations have a major role to play. In the past they have been the main beneficiaries of cheap labor and profits from this evil and unjust system and among its main supporters. It should be the responsibility of these companies to help change that system. Otherwise, they have no moral justification for remaining in South Africa, and should be compelled to leave the country.

The principles were never intended to be a camouflage for corporation to hide behind, but were meant, along with other thrusts, to help end race discrimination and apartheid in South Africa. It was hoped this could be done by peaceful means, without the need for devastating war and the loss of millions of lives and the pedictable involvement of most of the rest of the world, particularly the superpowers, that could lead to an atomic confrontation.

Though progress is still limited in comparison to the enormous size of the problem, the principles are beginning to work. Starting from where we began six years ago, at a near "zero" base where blacks were not even legally considered "employees" in that country, some significant changes are occuring:

Throughout South Africa, plants are being desegregated in spite of the laws.

Blacks and other nonwhites are being upgraded for the first time, to administrative and supervisory jobs.

Blacks are supervising whites, for the first time, in South Africa.

Blacks and nonwhites are being trained for skilled jobs in ever increasing numbers.

Black representative registered and unregistered trade unions are now beginning to be recognized.

Technical schools training blacks and other nonwhites are being built.

Black businesses, in increasing numbers, are being initiated.

Equal pay for equal work is beginning to be instituted.

Companies are beginning to improve the quality of life for blacks and other nonwhites outside the workplace: in housing, health care, and education.

For the first time, some company executives are beginning to lobby for an end to all racial discriminatory laws and the apartheid system.

Also, the principles have led the way in the initiation of similar codes of conduct for companies operating in South Africa from around the world, including a group of South African companies that employ nearly 1 million workers, most of them black.

In conjunction with the principles, the Arthur D. Little Co. has formulated the most stringent and comprehensive measurement requirements for fair employment and social responsibility practices ever developed for multinational corporations operating in a foreign country.

As a result of the principles, the last six years have marked the beginning of a revolution in industrial race relations in South Africa.

Unfortunately, even considering these beginnings, the vast changes necessary are not happening fast enough. The necessity for greater changes—visible, broad, effective and quick—is imperative. No one is more aware than I that the principles and other codes must be pushed harder for greater and faster results. It is my view that if the principles and codes of other nations are enforced and vigorously implemented and monitored, they can work for change, but in order to bring this about, more pressure is needed on the companies for fuller and swifter compliance.

In my opinion, the voluntary support of the principles has been effective, but is not getting the desired results quickly enough. More enforcement is needed. As I have testified before congressional committees on several occasions: "the full compliance with the principles of *all* American companies with operations in the Republic of South Africa should be made mandatory by the United States government, and backed up with embargoes, tax penalties, sanctions, loss of government contracts and any other effective means."

There are 150 American companies operating in South Africa that have not as yet signed the Sullivan principles, and against those companies there should be immediate divestment actions by stockholders, institutions, pension funds, government bodies and other fiduciaries. These companies represent 20 percent of the investments of American companies in South Africa.

Of the remainaing 150 companies that have signed the principles, one-third are receiving "failing grades" in compliance, according to the annual Arthur D. Little report. These companies should be contacted by stockholders and fiduciaries and asked for written assurances they will do better in the coming year, accompanied by a plan for doing so. Otherwise there should be targeted divestment actions against those companies. Companies receiving "passing grades" according to the Little Report should be urged by stockholders to remain in their top categories, or face divestment.

American companies employ less than 1 percent of the workers in South Africa. For these efforts on the part of multinational companies to be broadly visible and effective, participation will have to be global. I have traveled abroad and have urged divestment actions against foreign companies in South African subsidiaries that are not living up to their codes. I have appealed for strong government action by the nations and their parliaments as pressure against company noncompliance.

Foremost, I see the necessity for the recognition of the rights of association for black workers, and the recognition of their representative registered and unregistered trade unions, thereby empowering black workers to speak out for their rights on the job, as they will one day speak out for their rights in society. The growing strength of the black worker is one of the greatest hopes for peaceful change in South Africa.

It is clear that the main problem in South Africa is not just fair employment practices, or equal opportunity, or better schools, as important as all these needs are. The main problem is freedom, including the end to influx control, and end to the incredible homeland policy, and full political equality for the black population. Therefore, beyond the principles, it is my position that until apartheid ends and full equality is achieved for blacks, there should be no new expansion in South Africa by American companies, no new bank loans to the South African government, and no sales to the South African police or military.

Perhaps the Sullivan principles and the other codes in the world will only do so much, and only go so far. Perhaps the only way South Africa can be fundamentally changed is by massive conflict and a devastating war. But I believe that attempts must be made to find peaceful means for change if it is still possible.

If these world multinational company efforts are aggressively initiated, and broadly and effectively applied and closely monitored, they will have to make a difference.

None of us can be sure the total goals of the principles will ultimately be attained; but things are beginning to happen in South Africa as a result of the principles. They are a catalyst for social change in South Africa.

In this endeavor, powerful support will be needed beyond the companies, including unrelenting and much clearer commitments to racial justice in South Africa from the presi-

dent of the United States, Congress and other government leaders and nations. But I have faith that with God's help, and with all the forces for human justice—within and without South Africa—aggressively pursuing their aims, there is still hope for a nonviolent solution to the elimination of apartheid. Considering the awesome consequences and magnitude of death and destruction and international upheaval should these efforts fail, somehow we must succeed.●

LEWIS LEHRMAN: LET US TALK MONEY AT WILLIAMSBURG

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. KEMP. Mr. Speaker, the economic summit meeting this month in Williamsburg, Va., provides an unparalleled opportunity to begin to end the worldwide economic misery which began with the breakdown of Bretton Woods, the last stable international monetary system, in 1971.

One of the foremost advocates of such international monetary reform has been Lewis Lehrman, who was both a distinguished academic and a successful entrepreneur, before becoming an equally dynamic political leader. In an article in today's Wall Street Journal, Lehrman writes:

The evidence is compelling that reconsideration of the world monetary system is overdue. One need only review the history of the last few years in America, Britain, Germany and France, as their economies declined under the weight of the monetary and interest rate disorders engendered by central bank money market manipulation.

The failure of attempts to solve an international problem with national methods is apparent, Lehrman argues: Diligently pursued austerity programs have left 35 million workers unemployed in the major industrial countries. "And so the West sways between expansionist central bank credit policies that lead to the euphoria of inflation, and austerity policies of credit contraction, which lead to the despair of unemployment, and spiritual poverty"—a tradeoff which "has impoverished us all." The economic contraction and monetary instability leads directly to protectionist tendencies which worsen the problem.

Lehrman continues:

The truth is that there is only one economy. It is the integrated world economy. Therefore, national economies need a monetary coordinating mechanism. And that is why an integrated world economy needs a common monetary standard, which is the best neutral international coordinating device. But no national currency will do; only a world currency will work. That is why having national currencies convertible to gold—an international money—has worked in the past and will work again.

Without such a mechanism, Lehrman concludes:

We shall never restore sustained price stability, long-term capital markets at low interest rates, and the investment boom which alone can lead to reasonably full employment. Only the U.S. can take that lead. We must begin at Williamsburg.

Mr. Speaker, I commend this excellent article to my colleagues and thank Lew for his leadership on this vital issue.

The article follows:

LET'S TALK MONEY AT WILLIAMSBURG

(By Lewis E. Lehrman)

Williamsburg is an economic summit without an agenda. That shouldn't be surprising, for the West today has no coherent economic order—unless you count austerity and sacrifice.

Recently, I returned from a trip to European capitals. Central-bank officials and ministers of trade did acknowledge the profound problems of monetary disorder, exchange-rate fluctuations and their protectionist effects. Yet, while the French government now calls for a return to the Bretton Woods system—profoundly flawed itself but certainly more effective than the present float—no minister with whom I spoke believed international monetary problems would be formally discussed at Williamsburg. This pessimism about the possibilities of reform is striking, coming only six months after Treasury Secretary Regan called for a monetary conference.

The issue of international monetary reform and the new arguments for different systems of fixed exchange rates arise from the failures of the managed currency float of the past 10 years. During this period, economies of the West declined and protectionism intensified. Ideas of reform originated in the 1960s, with the purpose of curing the primary defect of Bretton Woods—the reserve currency status of the dollar, which led to a permanent balance-of-payments deficit in the U.S. These ideas have not yet been sufficiently considered. Now is the time to do so.

The evidence is compelling that reconsideration of the world monetary system is overdue. One need only review the history of the last few years in America, Britain, Germany and France, as their economies declined under the weight of the monetary and interest rate disorders engendered by central bank money market manipulation.

In Britain in 1979, Margaret Thatcher's Conservatives campaigned against the Keynesian credit policy of the Bank of England and the sterling depreciations of the Labor government. Mrs. Thatcher's campaign called for a stable currency, economic growth, low interest rates and financial order. After nearly four years of austerity and an unapologetically monetarist central banking policy, Britain still has 13 percent unemployment. Output is no higher than four years ago. Meanwhile, the pound's value fell from $2.50 to $1.45—beneath the lowest level under the Labor. The cost of credit, the touchstone of economic growth, hovers at real rates of 8 percent to 10 percent, depending on the quality of the borrower, even as the public-sector borrowing requirement has diminished as a percentage of GNP.

FRANCE'S CURRENCY COLLAPSED

In France, Francois Mitterrand's Socialist campaigned in 1981 against the credit and budget austerity of President Giscard. They promised a statist industrial program of economic expansion. However, Mr. Mitterrand's conventional neo-Keynesian policies of government spending and credit expansion led to the collapse of France's currency. The trade deficit grew to $14 billion a year and domestic inflation intensified. Now, the new Mitterrand policy of austerity, designed to deal with the crisis is, of all things, Thatcherite monetary targeting joined to the most draconian inequity of all—wage and price controls aimed at lowering real wages. Despite the stringency of the Mitterrand austerity, interest rates have risen and unemployment is over 9 percent. He has repudiated the very goals of economic expansion and job growth for which his government was elected.

In Germany in 1982, Helmut Schmidt's Social Democrats also presided over rapidly rising unemployment occasioned by the government-sponsored Bundesbank policy of credit austerity, monetary targeting and high interest rates. By the summer of 1982, Mr. Schmidt's coalition fell apart as his Free Democrat allies, sensing repudiation, switched affiliation to the Christian Democrats. What made Hans Dietrich Genscher and his Free Democrats jump ship was massive defections from the Schmidt economic policy, as measured by opinion polls. Germans of both parties rejected the policies of austerity.

Capitalizing on discontent with austerity, Helmut Kohl's CDU negotiated a deal with the FDP and shrewdly called for early elections in March 1983. They won those elections by a decisive margin, campaigning for a program of economic recovery.

In the U.S., President Reagan came to office in 1980 after a brilliantly successful campaign based on job creation, new investment, stable money, lower interest rates and economic growth. It is true that inflation has come down. And it is true that, unlike most of his Western European counterparts, Mr. Reagan has significantly reduced marginal tax rates. But the real cost of credit for homes and business is still unacceptably high. Industrial production does not yet exceed 1979 levels. There are still over 11 million unemployed.

The credit policy of Fed Chairman Paul Volcker has brought down inflation while producing one of our greatest recessions, a world banking crisis, and a political setback for the Republicans in November 1982. But the policy of monetary austerity, and the recession it caused, was not President Reagan's program of 1980. It was instead the policy of the Fed and the Office of Management and Budget. Like Mrs. Thatcher, Mr. Reagan unwittingly fell into the trap of his advisers who advocated credit austerity.

And so the West sways between expansionist central bank credit policies that lead to the euphoria of inflation, and austerity policies of credit contraction, which lead to the despair of unemployment and spiritual poverty. In a larger sense, and to some practical extent, this stop-go economics has improverished us all. European and American workers are punished by Socialists and Conservatives for the "sin" of wanting wages that keep up with inflation.

In the meantime, because of unemployment, Western governments are preoccupied with the balance of trade—an all-time fallacy. The specter of protectionism is on the rise. But our disorders in the world trading system cannot be cured by GATT or by trade agreements. Those disorders are monetary in origin. Protectionism thrives on competitive exchange-rate policies, brought about by the abrupt currency depreciation

and appreciations of well-meaning but uncertain central bankers and politicians.

Many central bank officials in Europe speak with pride about the new austerity. They look with equanimity on the 35 million unemployed of the OECD countries. The question is: Must policy makers put 2.5 million people out of work in Germany, 3 million in Britain, 11 million in the U.S.—in order to reduce inflation? Surely those who still believe in the future of the Free World and in the American dream must answer: No, there is a better way. Only national and international monetary reform can cure our monetary disorders.

It was the German monetary reform of 1948, based on a new convertible currency—a deutschemark tied to gold—that along with deregulation produced the German Miracle. It was the creation in 1959 of a convertible gold franc, which brought forth the savings and investment, that made the Fifth Republic of De Gaulle rich enough to create both nuclear defense and national prosperity. The gold convertibility of the dollar, and multilateral convertibility in Europe—the hallmarks of the Bretton Woods system—created the conditions for postwar prosperity. But the Bretton Woods system had the great flaw of being based on the official reserve currency status of the dollar.

SYSTEM IS IN DEEP TROUBLE

The monetary order of Bretton Woods was never reformed in this repect. As a result, when the dollar collapsed in 1971, Bretton Woods collapsed too, just as Prof. Jacques Rueff and Robert Triffin forecast in 1959.

There is no major country yet willing to look at the fundamental flaw of the international economic system: the notion of political leaders that national economic and monetary policy can be made independent of the world economy.

The truth is that there is only one economy. It is the integrated world economy. Therefore, national economies need a monetary coordinating mechanism. And that is why an integrated world economy needs a common monetary standard, which is the best neutral international coordinating device. But no national currency will do; only a world currency will work. That is why having national currencies convertible to gold—an international money—has worked in the past and will work again.

Even Mrs. Thatcher was recently quoted as saying: "It's absolutely vital for us to jointly pursue policies which enable us to get and keep interest rates down and to keep inflation down." There is such a policy. The policy of convertible currencies, linked to an international monetary standard, is the only one which has worked reasonably well in the past. The policy is imperfect, as are all human institutions; but a system of fixed exchange rates which is the incidental by product of the real international gold standard is the least imperfect of the international monetary systems we know. Without such a free-world monetary order we shall never restore sustained price stability, long-term capital markets at low interest rates, and the investment boom which alone can lead to reasonably full employment.

Without a reformed monetary system of multilateral, unrestricted convertibility of the major Western currencies into gold, we shall continue in a topsy-turvy world, oscillating between autarky and entropy. Incredibly, Socialists will talk of reducing the real wages of workers to increase profits and end trade imbalances, as they do now in France. And self-styled anti-Keynesian Conservatives will rely on neo-Keynesian central bank credit expansion to create economic booms in order to end austerity and get reelected.

The international monetary system is in deep trouble; we won't just muddle along much longer. The time to deal with the so-called "structural" problems of our monetary order is now. If we do, we can once again create conditions of rapid non-inflationary growth. If we don't make the reforms, sooner or later the world economy will founder.

Only the U.S. can take the lead. We must begin at Williamsburg.●

UNCTAD RESOLUTION

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. BONKER. Mr. Speaker, I am today introducing a concurrent resolution relating to U.S. participation in the sixth meeting of the United Nations Conference on Trade and Development (UNCTAD), which will take place in June in Belgrade, Yugoslavia. The purpose of the resolution is to highlight American interests in UNCTAD and to place the Congress on record regarding various issues UNCTAD will address next month.

The Western industrialized countries have tended to view UNCTAD as another acronym in the alphabet soup of U.N. agencies. The developing nations, on the other hand, attach considerable importance to this organization. The developing countries sparked the creation of UNCTAD in 1964. They regard it as the principal world forum for debating international economic matters. UNCTAD has played a pivotal role in shaping the agenda for North-South economic discussions, and is, in fact, a barometer for judging the developing nations' attitudes toward key international trade, monetary and development issues.

The United States has a vital stake in the economic health of the developing countries. They represent a larger export market for American commodities, goods and services than Western Europe; the level of their imports from the United States is four times that of Japan. The developing nations are also the only source of supply for a number of raw materials critical to our industries. They are becoming an increasingly important source for our finished products.

UNCTAD has wielded significant influence in the economic dialog between the First and Third Worlds, and has taken a surprising number of actions in the last 19 years that affect the conduct of U.S. foreign economic relations today.

One hundred and thirty-three countries participated in the first UNCTAD meeting in 1964. At UNCTAD I, 77 developing nations joined together in support of a common program. This block was christened the Group of 77. The G-77, as it is called in U.N. parlance, often sets the agenda for U.N. conferences.

The second UNCTAD conference, held in 1968, adopted a resolution urging the industrialized nations to contribute at least 1 percent—now 0.7 percent—of their annual GNP to development in the Third World. This figure is the benchmark against which the Third World judges the First World's commitment to development.

The 1972 UNCTAD meeting gave birth to the concept of the least of the less-developed countries, or LLDC's, whose annual per capita income is $340 or less. Two years later, the Congress drew upon this notion for the new directions mandate in the U.S. Foreign Assistance Act: Our foreign aid should be directed toward meeting the basic human needs of the poorest of the world's poor.

The U.N. General Assembly's sixth special session in 1974 endorsed the developing world's call for a new international economic order (NIEO)—an idea spawned at UNCTAD's II and III. The NIEO continues to serve as the Third World's international economic platform. NIEO has, in turn, generated calls for other, new international orders, such as the new world information order being debated in UNESCO.

In addition to these products, which have become common currency in discussing global economic matters, the generalized system of preferences (GSP), the integrated program for commodities (IPC), and the Common Fund—which seeks to stabilize price fluctuations for selected commodities—and the codes of conduct on line (shipping) conferences, the transfer of technology, and restrictive business practices are all children of UNCTAD. Whether the United States chooses to acknowledge the decisions and standards set by UNCTAD, the developing countries use these yardsticks to measure our actions in the international economic arena. Our increasing dependence upon the global economy and particularly upon trade with the Third World argue in favor of the United States pursuing a constructive dialog with the developing nations in UNCTAD.

The extent to which the U.S. economy is linked to those of the developing nations is readily underscored by the following:

U.S. exports to the Third World have tripled during the last 5 years;

Our exports to developing nations exceed our exports to all of industrialized Europe and are four times greater than our exports to Japan;

Developing countries buy nearly 40 percent of U.S. manufactured exports, and some 6 percent of all our manu-

facturing jobs produce for exports to the Third World;

About 2 million American jobs are generated by all U.S. exports to developing nations;

One out of every 10 acres of our farmland produces solely for food exports to the developing world, and over the past 10 years, the Third World has increased the amount of farm products bought from the United States by 35 percent: From $2 billion to more than $14 billion;

We import roughly 50 billion dollars worth of commodities annually from the nonoil producing developing nations; and

The United States depends upon the Third World for 100 percent of our national rubber needs, 96 percent of our tin—essential to the electronics industry—88 percent of our bauxite—vital to our aircraft industry—and 75 percent of our cobalt—needed by the steel and nuclear industries.

Healthy economies in the developing countries serve our national interest. As these nations develop, they become larger and better customers for our farm and industrial products, larger and better markets for American investments, and more accessible and reliable sources of raw materials essential to our economy and national defense. In short, our growing economic interdependence with the developing countries would dictate that we not sit on the sidelines in Belgrade next month, but that the United States assume a forthcoming, positive, and active role in the debate over issues of vital importance to both the developed and developing nations.

Mr. Speaker, the resolution I am introducing encourages U.S. cooperation, not confrontation with the more than 160 countries that will gather at UNCTAD VI. However, some proposals on the UNCTAD VI agenda are simply incompatible with our interests. We do not, for example, agree with the need to create additional international institutions, nor are we in a position at this time to commit massive amounts of resources to new commodity price support programs. Moreover, there are items on the agenda that are clearly outside the organization's mandate. While we must resist such measures, there are a number of areas in which the United States can make a positive contribution.

The resolution urges the U.S. delegation to UNCTAD VI to pursue a constructive exchange of views with the developing countries on world trade, monetary and development issues, and to resist decisions that are the responsibility of other international organizations, such as the GATT, the IMF, and the World Bank. The operative sections of the resolution urge the President: First, to pursue consultations with our allies and other like-minded states for the purpose of formulating common positions for and to seek practical and mutually beneficial solutions at UNCTAD VI; second, to designate a high-level U.S. delegation to represent us at UNCTAD VI; and third, to instruct our delegation to engage in broad and serious discussions with other countries on the state of the world economy, major problems and issues affecting both industrialized and developing nations, and to explore solutions which will enhance global peace, prosperity, and development.

The state of the world economy has changed drastically since the last UNCTAD session in Manila in 1979. UNCTAD VI should be viewed as an opportunity to review the events of the past 4 years, to explore areas of common concern to the First and Third Worlds, and to seek mutually beneficial solutions. The actions taken at UNCTAD VI could have profound consequences for vital U.S. interests. It is incumbent upon the United States to play a leading role in the debate in Belgrade next month.●

BOLD INITIATIVE ON SEMICONDUCTOR TARIFF POLICY

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. STARK. Mr. Speaker, on May 5, the Semiconductor Industry Association testified before the Ways and Means Trade Subcommittee on H.R. 1953, a bill I have introduced to eliminate the tariff on six items of the Tariff Schedules of the United States (687.70, 687.72, 687.74, 687.77, 687.81, and 687.85).

The bill is designed to improve the competitiveness of the U.S. semiconductor industry by reducing tariff and personnel costs and to induce Japan to reciprocate. As the SIA witness, Mr. Roger C. Damm, Motorola's director of sector business planning, testified:

It is estimated that the benefits of duty elimination for our customers and the semiconductor industry would amount to roughly $100 million annually. As compared with some other recent proposals for U.S. Government support to U.S. electronics producers through research projects funded by the Government, duty elimination is a much more efficient and equitable method for achieving similar objectives. Instead of creating more bureaucracy, it eliminates some existing bureaucracy.

Mr. Speaker, because of the importance of this industry and the importance of ensuring its future competitiveness with Japan, I would like to include at this point in the RECORD the full text of the SIA's testimony:

STATEMENT OF ROGER C. DAMM, DIRECTOR OF SECTOR BUSINESS PLANNING, MOTOROLA, INC.

SIA has been and remains a strong advocate of free market competition. We welcome a world with no barriers or distortions to trade in our products, where individual companies are free to compete solely on the basis of their individual competences. At the same time, we recognize that we are a long way from that ideal and that our industry needs to continue to work actively with the U.S. Government toward this objective. SIA believes that the elimination of U.S. semiconductor duties as proposed by Representative Stark in H.R. 1953 would be a constructive step in the right direction.

Members of this Subcommittee will recall the recent U.S.-Japanese agreement to accelerate the full MTN tariff reductions on semiconductors, which took effect in 1982. This agreement was a major negotiating accomplishment made possible only with your support. At the time of that negotiation, SIA urged that the two governments commit to the additional step of duty elimination. We understand that Japan balked at that idea and has indicated it is unwilling to negotiate further tariff reductions unless the European Community reduces its 17 percent duty on semiconductors (which it refused to do during the MTN). While we understand Japan's concern about that high tariff barrier, we do not believe that a European policy that inflicts damage on its own semiconductor consumers should determine United States and Japanese tariff levels.

Unless Japan's negotiating position changes we think it will be difficult if not impossible for the United States to negotiate further tariff reductions on semiconductors. By setting an example ourselves we believe there is a good prospect Japan can be induced to also unilaterally eliminate its tariff. The Japanese Government has been under great pressure to further open the Japanese market, which undoubtedly will continue in the face of the deteriorating bilateral United States trade balance with Japan. Their response has been a series of "liberalization" packages consisting mainly of tariff cuts and relaxation of technical barriers. We believe that one component of a future package can be semiconductor duty elimination if the United States indicates it will unilaterally eliminate its tariff.

U.S. duty elimination alone would make 40 percent of the world semiconductor market duty-free. If Japan follows that will rise to 65 percent. With Europe as the only significant exception to duty-free trade, it is quite possible that internal pressures would develop from European semiconductor consumers to join the United States and Japan. Certainly, a 17 percent components cost disadvantage in highly competitive industries like computers and telecommunications will cause concern in European nations that already are lagging behind foreign competition.

From the standpoint of future negotiations on semiconductor tariffs with Europe or Japan, United States duty elimination would maintain United States negotiating leverage because it would not be bound in the GATT. Thus the United States could return the duty back to 4.2 percent at any time without cause for retaliation. This lack of binding in the GATT also may be another inducement for Japan to act unilaterally if we do.

Beyond promoting freer trade in semiconductors there are two sound national interest reasons for duty elimination.

First, it would improve the competitiveness of our customers by lowering their costs as the tariff savings are passed through to the U.S. market. This would be an advantage in the kind of intensive international competition our customers face due to the targeting of their industries by Japan and other nations.

Second, it would improve the world competitiveness of the U.S. semiconductor industry in at least three respects. Most U.S. producers perform final assembly of semiconductors offshore and pay duties under 806-807. To some extent those duty savings would be retained by U.S. firms for use in research and investment, at a time when the industry's capital requirements are high. Savings would also be realized from the elimination of the substantial duty-related paperwork burden and similar savings would occur for the Government. Finally, lower semiconductor prices are likely to generate additional customers and business revenues.

I don't believe that duty elimination will cause any significant manufacturing operations to move offshore. The effective duty is too small to be the decision factor on plant location. Other factors are far more critical. In fact, the increasing capability to automate production is leading some companies to do more final assembly in the United States. In our own case, we are nearing completion of a state-of-the-art manufacturing plant in Chandler, Arizona.

It is estimated that the benefits of duty elimination for our customers and the semiconductor industry would amount to roughly $100 million annually. As compared with some other recent proposals for U.S. Government support to U.S. electronics producers through research projects funded by the Government, duty elimination is a much more efficient and equitable method for achieving similar objectives. Instead of creating more bureaucracy, it eliminates some existing bureaucracy.

An inevitable question that arises is how SIA can propose duty elimination while complaining about the damaging effects of Japan's targeting practices in the United States market as detailed in our recent study—the results of which have been presented to you on other occasions. The answer is simple. The 4 percent tariff clearly has not had any effect in deterring such practices. When Japanese producers cut 64K RAM prices from $25-30 per unit to about $5 per unit in a little over a year, or when exchange rates shift by 20-40 percent in a short period of time, a 4 percent duty is irrelevant. Besides an MFN duty is a very dull tool for dealing with problems caused by a single country. Such particular problems are better pursued in a more focused manner, as we have been doing most recently in the context of the United States/Japan high tech group.

Mr. Chairman, SIA asks the Committee to give urgent consideration to Representative Stark's bill or the equivalent thereof and to act favorably upon it.●

HUGH AND DOROTHY DE LACY: LIFELONG ACTIVISTS FOR SOCIAL JUSTICE

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. PANETTA. Mr. Speaker, I would like to take this opportunity to pay tribute to the lifelong struggles of two of my constituents, Hugh and Dorothy De Lacy, who have spent many many years working in the causes of freedom, equality, and social justice.

The De Lacy's struggle extends back to the ravages of the Great Depression and the valiant but unsuccessful effort to prevent fascism from triumphing in Spain. During the 1940's, Hugh and Dorothy worked for the causes of full employment, peace, and prosperity—Dorothy as an organizer and activist, Hugh as a city councilman in Seattle and Member of Congress from 1944 to 1946. In the late 1940's and 1950's, their commitment to the goals of world peace, an end to the nuclear arms race, and racial integration was tested by the dark forces of McCarthyism. Their continued dedication to the struggle in the face of the most severe obstacles serves as a continuing inspiration to all of us who know the De Lacy's. Their work has continued to this day, taking the form of activism and fundraising on behalf of local political causes in the Santa Cruz area.

Mr. Speaker, Hugh and Dorothy De Lacy's lifelong activism is evidence of a faith in progress and in our democratic system which we can all share and admire. The causes to which they have dedicated their lives—peace, jobs, an end to race and sex discrimination, a halt to the costly and dangerous arms race—are causes for which we are still working today. The struggle of the De Lacy's, their commitment and their integrity, reinforce our own faith and conviction that the cause of social justice will triumph in the end. I commend their work, and I join in their hope and their belief in a better tomorrow for all of us.●

TAX REFORM AND THE OIL INDUSTRY

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. STARK. Mr. Speaker, last Thursday and Friday, the Ways and Means Oversight Subcommittee held 2 days of hearings on the special tax subsidies available to oil producers.

One of the best pieces of testimony was provided by Mr. Robert S. McIntyre, director of Federal tax policy for Citizens for Tax Justice.

It is clear, Mr. Speaker, that this Nation could afford both guns and butter, if everyone paid their fair share of taxes. But oilmen, who love to wrap themselves in the flag of national security and energy independence, do almost nothing to support the National Treasury.

Mr. McIntyre's testimony shows once again the truth of FDR's statement in his second inaugural:

We have always known that heedless self-interest was bad morals; we know now that it is bad economics.

The most economically inefficient and morally corrupt part of the United States Tax Code is the section on oil. Mr. McIntyre describes oil taxation as the greasy situation it is. I would like to enter portions of his excellent statement at this point in the RECORD.

A look at the annual reports to stockholders of some of the publicly held independent producers provides fascinating, concrete insights into the benefits they have gained from their political investments. The nine randomly chosen companies in the accompanying chart, for example, earned a total of $476 million in 1982, but only three of them paid any federal income taxes at all. As a group, they received a net tax refund of $17.5 million. Of the nine, five paid no federal income taxes in 1981, and four of these paid nothing in 1980.

These companies are not likely to be paying taxes in the future either. Many of them note that they are carrying excess deductions and credits forward for use in later years. For example, Mesa Petroleum says it has $129 million in "loss" carryforwards and $29 million in investment tax credit carryforwards; Inexco has $164 million in excess deductions and $9 million in excess credits. Some of the companies took advantage of "tax leasing" last year to make use of the overflow of tax concessions. For example, Mesa sold tax breaks for $19 million in 1982; Lear Petroleum sold an unspecified amount. Last year's Treasury report on leasing found that, through the end of 1981, crude oil producers had sold tax breaks for $164 million (and this figure does not include another $138 million in sales by petroleum refiners).

Last December, at the request of Representatives Pease and Dorgan, the staff of the Joint Committee on Taxation took a look at the 1981 taxes of five large crude oil producers. The companies studied were Occidental Petroleum, MAPCO, Superior Oil, Natomas, and Louisiana Land & Exploration, which together earned $3.9 billion world-wide before-tax in 1981, and about $1 billion in the United States. Overall, the staff found a federal income tax rate on domestic income of 3.1 percent, including, apparently, Occidental's zero rate and Louisiana Land's 10 percent rate.

1982 FEDERAL INCOME TAXES (OR REFUNDS) FOR NINE RANDOMLY SELECTED INDEPENDENT OIL PRODUCERS

Company	Pretax income (millions)	Federal income tax (millions)	Effective tax rate (percent)
Mesa Petroleum Corp.[1]	$195.5	0	0
Louisiana Land & Exploration Co.	111.3	($19.7)	−17.7
Apache Corp.	44.4	.2	.4
Adobe Oil & Gas Co.[1]	37.4	1.9	5.0
Inexco Oil Co.[1]	26.7	0	0
Felmont Oil Corp.	22.7	3.0	13.3
Dyco Petroleum Corp.	21.7	(2.9)	−13.2
Damson Oil Corp.[1]	10.0	0	0
Lear Petroleum Corp.[1]	6.3	0	0
Total	476.0	(17.5)	−3.7

[1] Zero Federal tax in 1981.

Note: Pretax income refers to net income before Federal income taxes (but after deducting any State or foreign taxes paid). Federal income tax refers to taxes actually paid, that is, "current" Federal taxes (and does not include so-called deferred taxes, which are taxes not paid due to various shelters.

Source: 1982 annual reports.

Currently, the federal government faces a fiscal crisis. Huge deficits as far as the eye

can see threaten to keep long-term interest rates high and abort whatever recovery we experience this year. Much of the blame for those deficits rests on the special-interest politics that dominated tax writing in much of the 1970s and especially in 1981. Corporate "tax expenditures," which were only $7 billion in 1970, are estimated to total $56 billion this year, and $83 billion by 1986. In fiscal 1983, the federal government will provide $1.60 in corporate loopholes for every dollar it collects in corporate income taxes, up from 60 cents on the dollar in 1979 and only 20 cents on the dollar in 1970. At the same time that the business tax base has been eroded, "bracket creep" and rising social security taxes have pushed up taxes on average Americans, most of whom will continue to pay a higher share of their income in taxes than they did in 1980 despite the so-called "across-the-board" tax reductions of 1981.

Many members of Congress are now searching for ways to increase federal revenues that make the tax system more rather than less fair. That is, they would like to raise money, while avoiding further increases in the tax burdens on middle-and lower-income Americans.

As the 1982 tax act proved, such a result can be achieved, but only by targeting tax hikes on those taxpayers who currently are failing to contribute adequately to the support of the government. These hearings, therefore, come at an auspicious time, since one industry that we know is not paying its fair share of income taxes is the independent oil producers.

The stated purpose of these hearings is to evaluate whether continued tax breaks for oil income make sense in the current environment (or indeed if they ever made any sense). In light of the pressing need to raise revenues and to improve tax fairness, the burden should be on the proponents of these tax loopholes to justify their retention.

What do defenders of oil loopholes offer to support the special tax concessions? Typically, they have three things to say: First, they argue that exploring for oil is a risky business. Second, they say that independent oil producers are fine examples of American entrepreneurship. And, third, they maintain that tax shelters are essential to attract sufficient capital to the oil business.

What these arguments boil down to is just one assertion: that the marketplace on its own provides insufficient return to encourage drilling for oil. Or, put another way, the bottom-line defense of oil tax breaks is apparently that a dollar's worth of oil is worth more than a dollar.

Economist Arnold Harberger once calculated that the various oil tax breaks made it profitable to spend $1.95 to drill $1 worth of oil. A 1968 Treasury study found that the depletion allowance at that time was costing average taxpayers more than $9 for every dollar in added oil reserves. A recent Congressional Research Service study (April 13, 1983) found that effective tax rates on independent oil producers are still "negative," that is, profits are higher after-tax than before-tax (a fact reflected in the chart above).

One need not be a hide-bound free-market capitalist to wonder why it makes sense to encourage spending more money to drill for oil than the oil is worth. Such activities are usually called "waste."

1. For a fuller examination of the tax-shift policies of the past several years, and how they have hurt both tax fairness and the economy, we recommend CTJ's new book, Inequity & Decline, just published by the Center on Budget and Policy Priorities.

What waste means in these circumstances is that the tax laws encourage the diversion of capital funds toward oil and away from other investments. It's easy to understand why U.S. Steel prefers to buy Marathon Oil rather than invest in modern steel plants, but it's not so easy to understand why the federal government wants to provide incentives for such activity.

A closer look at the two major oil-specific tax breaks—percentage depletion and the expensing of intangible drilling costs—raises further questions. For example, without expensing for IDCs, risky exploratory drilling would be encouraged, since dry holes would be entitled to an immediate write-off in any case. By extending the same treatment to successful wells, the tax laws discourage exploratory drilling in favor of punching new holes in old fields. Percentage depletion, which is only available for successful wells, has a similar impact.

Some have suggested that now might be a bad time to raise oil taxes, since falling oil prices have created difficulties for some producers. This is a false argument. Added income taxes will not affect those producers which have no income. What we are talking about is requiring those companies which are profitable to contribute a fair share of their income to help support the federal government. This does not seem too much to ask.

These hearings could help give the Ways and Means Committee and the Congress an opportunity to close or narrow oil tax loopholes that for years have proven to be both extremely expensive and economically counterproductive. Scaling back or phasing out percentage depletion, requiring intangible drilling costs to be amortized over the useful life of productive wells, extending the depreciation period for oil refineries to 10 years (instead of the current five years), tightening the rules on oil foreign tax credits further, and so on are the kind of steps we suggest. They could contribute to a 1983 tax bill that protects middle- and lower-income Americans from further increases in their tax burdens, while at the same time moving back toward federal fiscal responsibility.●

TERESA HEFFERNAN IS HONORED AT MATER DEI HIGH SCHOOL

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. PATTERSON. Mr. Speaker, I invite my colleagues to join me in commending a constituent of mine who has been a major positive influence in the lives of many students at Mater Dei High School.

Teresa Heffernan is being honored on May 26, 1983 for her 25 years of dedicated service to Mater Dei High School. Mrs. Heffernan has contributed greatly to the home economics department by her pioneering spirit in the dissemination of education through the various forms of media and by demonstrating her patience and challenging spirit in opening this field to the young men at Mater Dei.

Mrs. Heffernan has exemplified the spirit of Mater Dei to both faculty and students by her continued loyalty, support, and service. She has shown great concern for each individual student's growth, interests, and values as deemed necessary to shape their educational goals. Mrs. Heffernan's dedicated efforts on behalf of the youth of Mater Dei have earned her the highest respect from all of those who have had the pleasure of working with her.

For her outstanding dedication on behalf of both the students and fellow teachers of Mater Dei High School, Teresa Heffernan is to be commended. Mr. Speaker, it is with pride that I ask my colleagues to join me and my community in honoring Teresa Heffernan for her 25 years of dedicated service.●

WATSONVILLE'S DEBT TO BILL JOHNSTON

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. PANETTA. Mr. Speaker, I would like to pay tribute today to Bill Johnston, who is retiring after a distinguished tenure as mayor of Watsonville, Calif.

Bill Johnston has served the citizens of Watsonville in various capacities for over 30 years. First as a member and leader in various community service groups; then as a city councilman; and finally elected mayor by wide margins for three 4-year terms, Bill has contributed enormously to Watsonville's development, to its growth and its progress. Watsonville's residents have taken a new pride in their city under his leadership, because he has always understood and relied on the basic qualities that make Watsonville what it is—energetic, hard working, and independent.

Mr. Speaker, Bill Johnston exemplifies the best traditions of public service. He has dedicated himself to the interests of the Watsonville community, and the community and its citizens have prospered as a result. His contribution will be felt for a long time to come, and his record will continue to serve as a model and an inspiration for all of us.

I would like to take this opportunity to wish Bill the greatest success and happiness in all his future endeavors, and to hope as well that we will continue to benefit from his wisdom, his experience, and his guidance.●

PROFESSOR WILLIAM J. QUIRK TESTIFIES ON IMF BEFORE HOUSE BANKING SUBCOMMITTEE

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. CAMPBELL. Mr. Speaker, on April 27, William J. Quirk, professor of law at the University of South Carolina, testified before the Subcommittee on International Trade, Investment and Monetary Policy of the House Committee on Banking, Finance and Urban Affairs. I believe his remarks make very interesting reading, and I would like to take this opportunity to share his statement with my colleagues:

STATEMENT BY WILLIAM J. QUIRK, PROFESSOR OF LAW, SCHOOL OF LAW, UNIVERSITY OF SOUTH CAROLINA

Mr. Chairman, and members of the committee, I am honored to accept your invitation to appear before you today.

Over the past 10 years the West has given away its wealth to Reds, Arabs and Third Worlders in the greatest transfer of capital in the history of the world. We have given away some $800 billion of accumulated wealth and all the figures are not in.

To be sure, they were not called gifts when they were made—no Congress appropriated the foreign aid—they were called loans and they were made by international bankers. The bankers had figured out a way to profit from brokering away the West's wealth.

They had two cover stories—called "Détente" and "Recycling." What was "Détente"? The American public was highly skeptical about détente; but, since Congress never appropriated any money or passed any laws, and since there was no apparent cost, the opposition had nothing to grab onto. To the Russians it was not vague at all—it had a very clear and concrete purpose. In the late 1960s, after 50 years of Party rule, the Soviet economy was bust. In 1968 the Red tanks rolled into Prague to snuff out the beginnings of freedom. The Reds knew that economic freedom had to lead to political freedom and, ultimately, the overthrow of the Party. At the same time, they had to raise standards of living and increase military spending. The solution was "detente"—the importation of Western technology and credit—at no cost, since they were not going to pay back the loans; and at no risk to Party rule, since the new technology was simply grafted onto the centrally planned economy. Lenin said the capitalists would sell him the rope with which he would hang them. Brezhnev wanted the rope on easy credit.

It could not be done constitutionally—no Congress could vote funds to give welfare to Russia, but David Rockefeller thought it could be arranged. With the bankers providing the money, the Comecon debt to Western bankers rolled from $8 billion in 1973 to $80 billion in 1981. David Rockefeller, in 1979, explained his theory: "Just because a country is technically called Communist doesn't mean a capitalist institution such as the Chase bank can't deal with them on a mutually beneficial basis; and, indeed, we do deal with most of the so-called Communist countries of the world on a basis that has worked out very well, I think, for both of us."

The bankers' money financed the Soviet armaments build-up. Any dollar you give your enemy frees up his other resources and permits him to spend more on missiles. In some cases, the military aid has been direct. Chase loaned $150 million dollars to construct the Kama Ford truck plant. The world watched these trucks move the Red Army into Afganistan. The multi-billion dollar Hula Katowice steel works in Poland is served by one railroad—the railroad heads straight East. Mr. Thomas Theobold, head of citibank's international division, puts the issue simply: "Who knows which political system works? The only thing we care about is: can they pay their bills?" Taking a page from Mr. Theobold's book and putting things simply—the simple phrase that comes to mind is economic treason.

Then there was OPEC and "Recycling." Again the public was in the dark and the Congress was by-passed. In 1973, the Arabs decided to go out of the oil business and into the tax collection business. They sought to extend their corner on oil to all of the West's capital and real wealth. The bankers financed the tax collection. Poor countries couldn't pay their tax, so the banks loaned money to Zaire so it could pay its tax to the Arabs, who then deposited their tax collections back in the banks. That set up a classic debt merry-go-round or Ponzi scheme. Each year the banks had to lend Zaire more for that year's tax collection, plus interest on the old principal. Every Ponzi scheme depends on new money, and new money in accelerating amounts as the debt snowballs. The figures show we are now in the last stages. In 1978 the total volume of international debt of developing nations was $340 billion; in 1982 it was $640 billion. Already we hear the IMF appropriation will not be enough. Third Worlders say the only insurance company that would be enough is the U.S. treasury.

In 1972, the Arabs received $24 billion from the rest of the world; in 1982, they received $230 billion. The Saudis—with a lifting cost of 50 cents a barrel—were collecting $40 a barrel. Since all oil prices followed OPEC up in the United States, the cost of oil went from $20.3 billion in 1972 to $225 billion in 1981. The extra cost came to $820 per person or $3,300 for a family of four. An incredible foreign tax imposed upon Americans and financed by the banks (the price of oil bases on the 1952-60 standard—adjusted for CPC—is $6.46 per barrel). The extra-territorial tax was imposed upon us not only by OPEC, but by non-OPEC producers who followed the cartel price—the Mexicans, the British, the Russians. The United States, which in 1972 had the world's highest standard of living, was tied with France for tenth in 1982.

Recycling and Détente are closely related. Recycling, essentially, is a price support system for oil. The banks guaranteed that OPEC would receive the cartel price. The main beneficiary is the world's largest producer of oil—the Soviet Union. In 1982 the Soviet's received $16 billion in oil revenues; in essence, a Russian tax on the west. Oil provided 60 percent of Moscow's hard currency reserves. A drop in the price of oil to market levels would be a severe blow to the Reds. The Administration, however, does not grasp the opportunity. Instead, it is engaged in a coordinated effort to keep the price of oil up. One example is the IMF appropriation before you which will provide funds so the poor countries can continue to pay the cartel price for oil. The IMF even provides direct support to the OPEC cartel. Venezuela, the Wall Street Journal reports, will soon apply for funds; Ecuador already has an IMF agreement. Nigeria may soon appear. The absurdity of providing funds to OPEC countries to tide them over a bad time should be clear to any reasonable person. U.S. policy, instead of financing the cartel, should be aimed at destroying it, which would give American business a strong boost without inflation. If Venezuela has a debt problem, let them sell some oil at market prices; same for Nigeria.

By financing the OPEC oil tax beginning in 1973-74, the bankers killed U.S. business with a double blow—first the oil tax itself and then to finance it, they shipped the money overseas—creating a shortage of money at home and driving interest rates up. In 1972, the rate on prime commercial paper was 4.7 percent and mortgages were 8 percent.

At the same time the bankers were rolling over Poland, Romania, Yugoslavia, Hungary, and Argentina, they—in 1982 alone—drove 50,000 American businesses into bankruptcy. The owners of established businesses could not make them go at 20 percent interest and $40 a barrel oil. The results were devastating: in the 1970s American labor lost 30-40 million private sector jobs; 70 percent of private sector jobs existing in 1970 were gone by 1980. The bankers turned down meritorious domestic borrowers with the simple, unanswerable question: "Why should I lend money to you when I can make so much more lending to Mexico."

The United States has undergone "deindustrialization," which means that low-capital service industries—like McDonalds—boom (service is now two-thirds of GNP). On the other hand, capital intensive industry can't make it; a basic one, steel, is dead; and another, autos, is dying. Clearly, you cannot have a serious country without a steel industry. Economists said that American management and labor could not compete with foreign competition and that was it.

Businessmen, such as W. P. Tippett, chairman of American Motors, said it was not a straight deal; you could not "compete against government-subsidized foreign competition." Which was true enough, but Mr. Tippett missed the real irony—that we were giving the foreigners the money to subsidize the competition against us; we provided the subsidy used against ourselves. The recipients of the banker's largesse, say Brazil, has zero capital cost because there was never any payback.

Back to the debt merry-go-round—with interest piling upon interest, and the tremendous increase in rates, in a short time the figures were outlandish. Mexico owes $250 million a week in interest alone. Brazil the same. Those figures should be remembered when the Administration tells us that an economic recovery will solve the debt problem. The bankers always have a theory about how the debt will be repaid. One theory was that sovereign governments never default. Another was the famous umbrella theory under which the Soviet Union would pay off any debt of the satellites. Now we hear the economic recovery will save the day.

The debt rolled on, in June 1982, according to Secretary Regan, the poor countries owed the bankers $265 billion. Counting in loans from Western governments and international agencies, by the Regan figures, the

poor countries owe $500 billion. The American Express private capital model projects developing country debt at $1 trillion in 1986; it projects debt service payments due the banks in 1986 at $345 billion. Last year, of $140 billion bank payments due, about a third, $45 billion, was not paid. In 1983, bank payments of over $220 billion are due. In 1983, Mexico alone has $43 billion due.

Both the Reds and the Third Worlders expect more in the future; the Reds have budgeted in a new $70 billion from the West for Comecon by 1986. The Russians don't care how the West pays—it can use the IMF as a front to funnel money to Rumania, Yugoslavia, Hungary and, probably soon, Poland—but it has to pay.

The first real issue now is the future payments. The outstanding debt is largely gone; the money is not coming home. The policy decision now is do we give away more money to our enemies? The continuing erosion of Western wealth to keep in power Communist governments who threaten our liberties is suicidal.

The second real issue is who will bear the losses from the existing bad loans. The bankers—who made them—are desperately trying to "socialize" the loss by shifting it from themselves to the American taxpayer. The Administration has signed on to this effort to take yet another bite out of the middle class American. The banks made a simple business mistake—they took a gigantic short position against the dollar as we headed into disinflation and a strong dollar. They placed a large bet on inflation and lost. Now they want some partners. The whole scheme was set up to evade constitutional procedures and congressional approval, but now it has gone bad the taxpayer should pay for it. Capitalism, of course, does not work if bad management is unrestrained.

The banks made mistakes in the hundreds of billions and now say we're too big, if we go down we bring the house down; you've got to bail us out. In selling to us the IMF appropriation, the Administration has followed the old Roman precept, "If reason will not persuade, let fear compel." Trade will collapse, grass will grow in the streets. All because the bankers will have to own up to their losses. The loans are bad now and yet they continue to balance the books. Major financial institutions cannot be based on fictitious assets. The banks, like the Emperor in the Hans Christian Andersen story, are highly vulnerable to any small boy in the crowd.

It is not in the national interest to give away any more money. The banks have been holding up the oil prices and interest rates. If they recognize their losses, we may end up with 6 percent interest and $6 a barrel oil. There's nothing wrong with American business and labor that would not be cured by 6 percent interest and $6 a barrel oil. An end to over-expensive oil is what the West's idling factories have needed for 10 years. Between 1948 and 1973 the gross world produce quadrupled. Since 1973 we have been on a slow walk.

The Administration offers more of the same—more bankruptcies, more unemployment and more zero growth. They say, let's keep the same people in charge who've gotten us this far—the big banks, Volcker's Fed, the IMF—give them a little more money, let them manage it.

The Administration offers the IMF solution—which starts with a first payment of $8.4 billion. A main thrust of the Administration is that this is a jobs bill. American workers, they say, will benefit. This is accurate only in a very peculiar way—if you believe that it makes sense to give poor countries money so they can buy goods from you. If that is reasonable it should be done domestically rather than internationally. The insincerity of this argument is also plain since the IMF, who is supposed to lead us out of the wilderness, premises its programs for poor countries on cutting back imports and increasing exports.

It is bad morality to pretend that institutions and countries which are bankrupt are not bankrupt. Obviously, loaning more money to overburdened debtors is not a solution. The Schumer Plan is, I think, a thoughtful approach to the problem. It is similar to what is already required under Financial Accounting Standards Rule 15 (FASB) for Troubled Debt Restructurings. It would not require an immediate write off, but would affect future earnings. A major problem with the IMF approach is that, once funded with taxpayers' money, the IMF is beyond congressional control. I would recommend adding to the Schumer Plan a requirement that, if the IMF intends to make any loan to a Communist or OPEC country, it must first secure congressional approval.

In conclusion, the banks have been acting adversely to the interests of the United States and continue to do so. If they are candid with this committee, they must admit that the bad loans can be made good only by a major reinflation. Only then can the banks float off the rocks on a rising tide of a debased currency—a tide which may drown the rest of us. Inflation would, of course, shift the loss from the banks to the holders of money and other liabilities issued by the banks and government. High inflation and high oil prices will aid the banks, but they will be disastrous for the United States and the West. The country should not be dragged into the hole the bankers have dug for themselves. Thank you for your consideration.●

SOME HARD TRUTHS ABOUT THE SOVIET UNION

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. MARTIN of North Carolina. Mr. Speaker, I wish to insert in the RECORD an article by Seweryn Bialer, one of the country's preeminent specialists on the Soviet Union.

To have a sincere devotion to arms control and peace without a practical understanding of the grim realities of world politics is as dangerous as having a one-sided emphasis on military power. This is a fault of many in the freeze movement and was exposed in our lengthy, vigorous debate on the freeze.

I ask my colleagues to note Dr. Bialer's comment that massive nuclear power is really all the Soviet Union has, and that, consequently, meaningful arms control will be very difficult to achieve.

[From the Washington Post, May 8, 1983]

THE SOVIETS REALLY NEED THEIR NUKES

(By Seweryn Bialer)

In the great debate over nuclear weapons and how to control them, one key fact gets too little attention: The Soviet Union depends on its nuclear arsenal not only to protect itself and to threaten others, but for its very status as a great power. Without nuclear weapons, the Soviet Union would not be a superpower.

Perhaps we shy away from this fact because its implications are so depressing. Obviously, if the Soviet leaders believe that they depend on nuclear weapons for their international status, they are unlikely to consider giving them up. This state of affairs cannot be wished way.

More depressing still, the nuclear revolution that has transformed international politics gives the Soviet Union considerable advantages over the West in the competition for global influence. The very "unusability" of nuclear weapons makes them more useful to the Soviets than they can ever be to us.

Nuclear weapons are much more than weapons. They are the overriding political and psychological factor in Soviet-American relations, and in today's global politics generally. The fact that nuclear weapons exist has created an international situation without precedent in history.

The existence of nuclear weapons has also given the United States and the Soviet Union a set of compelling common interests, beginning, of course, with their mutual need to avoid a nuclear war. But common interests are far from either superpower's only interests.

If avoiding a nuclear war and the confrontations that could lead to one was both superpowers' fundamental goal, their chances for success would be very high.

Even if the nuclear arms race continues indefinitely, one can argue—however ironically—that both sides believe they are accumulating new weapons to avoid the sort of strategic imbalance that could tempt one superpower to attack the other.

But the prevention of a nuclear holocaust and the survival of humanity is not the only fundamental goal of either America or of Russia. Both have other international ambitions, and the Soviet Union has an unsatisfied hunger for global influence that pushes it toward a highly activist foreign policy.

It's no use shying away from this uncomfortable fact. Soviet nationalism and pride, history and ideology, its military might combined with the docility of its population, its late arrival on the superpower stage all encourage this activism. The Soviet Union is still in the ascending stage of its international ambitions.

In this stage the Soviet leadership is hoping it will be able to turn Western Europe away from its alliance with the United States. The Soviets are committed to support radical changes in the Third World, even if this involves direct and indirect Soviet military engagement. While the overriding Soviet goal is to protect its own Russian-Soviet system and its "internal" and "external" multinational empire, its key tactical aims as a latecomer to the "game" of global politics are offensive.

For the United States, this is clearly the descending stage of political, economic and military ambitions. America now views the international system with the attitudes of a status-quo power. Its long-term policy direction is best expressed in "containment"—a

concept with basically defensive connotations.

American key goals are the preservation of the independent industrial democracies, which requires a balance of at least strategic parity with the Soviet Union; the defense of vital economic and strategic American and allied interests in such areas as the Persian Gulf, which requires the preservation or creation of a conventional Soviet-American balance in some regions of the world; and finally, the preservation—at best—of the existing configuration of forces in the Third World. Where change cannot be avoided, the U.S. wants gradual evolution, not revolutionary upheavals.

This is a dangerous situation. Although each superpower wants to achieve its goals without using nuclear weapons—that is, in the rational way—this may not prove to be so easy. The asymmetry of goals which each superpower pursues and the fact that one is still ascendant while the other is retrenching increases the perils of an unintended escalation of their conflict to the threshold of nuclear war.

To put it simply, the nuclear revolution in weaponry and warfare and its military, political and psychological consequences give the Soviet Union a better opportunity than the United States to achieve its international goals without a nuclear war. This is true for four reasons:

First, nuclear weapons act as a great equalizer of the actual, conventional military potential of the Western and Soviet alliances, and therefore are a guarantor of the security of the Soviet Union. Far from being an equal, the Soviet Union and its bloc are far behind the Western alliance in conventional military potential.

At the beginning of the 1980s the combined gross national product (GNP) of the industrial democracies was more than three times larger than the combined GNP of the Warsaw Pact countries. (This is about the same relationship that existed between the West European and Soviet economic military potential on the eve of World War II, and is only marginally different than the comparative potential of NATO and the Warsaw Pact in the 1950s). Technologically, recent studies have shown that the lopsided superiority of the West is at least as great today as it was in 1953, the year when Stalin died.

But nuclear weapons—strategic, theater, and tactical—act as a great equalizer of the military potential and actual strength of the competing blocs, who without them are not equal at all. Once strategic parity has been achieved, it provides a degree of security to the Soviet Union that it never enjoyed in the past.

And of course, nuclear weapons enhance the psychological-political effectiveness of any threat from Soviet conventional forces on Soviet borders or in remote corners of the globe.

Second, the nuclear revolution led to the the once-justified but now pernicious concept of an American nuclear umbrella over Western Europe, and the "bigger bang for the buck" military policy of the United States. The idea of an American umbrella led to much lower levels of conventional military spending by the industrial democracies than at any time in their 20th-century history. The idea of "more bang," and the attendant American preoccupation with the nuclear balance, led to a deterioration of conventional U.S. forces and to the dissipation of the American military-industrial base. And of course, these changes occurred at a time when Soviet conventional forces were growing steadily. The resulting superiority of mobilized conventional strength gave the Soviets freedom of military action below the level of nuclear war.

Third, the Soviet leadership is able to exploit the balance of terror more effectively than the United States can because of the nature of the Soviet political system. Soviet leaders do not feel great pressure from public opinion in formulating their military and foreign policies and calibrating their use of military threats towards their opponents. At the same time, Soviet leaders can manipulate the legitimate fear of nuclear weapons in the populations of the industrial democracies. This asymmetry lets the Soviet leadership reap the political rewards of nuclear parity and leaves them freer to employ military threat or actual military forces.

Fourth, the nature of Third world conflicts and of popular aspirations in the developing countries favors military conflicts and revolutions—best suited to Soviet purposes—rather than gradualism and the evolution of democratic institutions that America would prefer. When nuclear parity eliminates the danger of retribution to their own homeland and empire, the Soviets can engage in low-risk and low-cost adventures to help accelerate the "historical process" in the Third World.

On the other hand, any American attempts to intervene to preserve the status quo are likely to require large-scale involvement at a high cost. The unpopularity of such interventions, the difficulties of making them work, and the danger of their escalation into confrontations with the Soviet Union makes them extremely difficult for the United States to undertake.

So nuclear weapons give the Soviets clear advantages. Of course the present balance of nuclear terror also presents the Soviet Union with terrible dangers. But it would be foolish to ignore the fact that the same balance of terror also gives the Soviet leaders opportunities for global assertiveness that are unprecedented in the entire history of the Soviet Union.

On the other hand, the advantages created for the Soviet Union by the nuclear revolution do not assure the success of Soviet policies. Those advantages may well be balanced by the Soviets' problems: internal weaknesses, difficulties inside the East European empire, and the Soviets' inability to match their military capabilities with the political, economic and cultural power that could produce practical advantages for the U.S.S.R. around the world. The restoration of an effective American-West European alliance could also help frustrate Soviet ambitions.

In the area of strategic weapons, the Soviet leadership's oft-proclaimed desire for arms control and stability is at least as sincere as President Reagan's repeated statements of interest in nuclear arms reduction. But if nuclear weapons were ever abolished or decisively reduced in number, it is the Soviet Union that would really suffer—militarily, politically and psychologically. This is an important reason why the total elimination of nuclear weapons is an unattainable goal, and why even their substantial reduction will be very difficult to achieve, though we must strive to achieve it.●

THE SITUATION IN GUATEMALA—PART I

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. OBEY. Mr. Speaker, recent news about Central America has focused on El Salvador and Nicaragua. But Guatemala is another key country in that troubled region and it is important that we understand the developments taking place there as we debate U.S. policy toward Central America.

In March 1982, a military coup brought the Rios Montt government to power. At first there was hope that the new government would be an improvement over the previous brutal regime, but that hope was short lived.

While killings and disappearances seemed to recede in the cities, reports of official violence against civilians and massacres in the countryside began to appear frequently. Throughout 1982 and the first part of this year, respected organizations such as Amnesty International, the U.S. Catholic Conference, and Americas Watch, among others, have been describing the terror and death carried out by Guatemalan forces against Indians and peasant farmers, including men, women, and children.

Unfortunately the administration decided to play down these reports and increased support for a government making war on its own people. It increased U.S. foreign aid to the Rios Montt regime, including $10 million in nondevelopment economic aid, and allowed the Guatemalan Government to purchase military equipment for the first time since 1977. In late 1982, President Reagan met with Rios Montt in Central America and said that the Guatemalan President was getting a "bum rap" from human rights critics. Several months later, however, the Reagan administration itself had to protest to the Guatemalan Government the death of a USAID worker and friends at the hands of Guatemala's security forces. The reality of the regime's brutality had finally hit home.

I would like to place in the RECORD at this time summaries of several reports describing the situation in Guatemala.

AMNESTY INTERNATIONAL REPORTS MASSACRES IN NEW GUATEMALAN SECURITY DRIVE

Guatemalan forces massacred more than 2,600 Indians and peasant farmers in a new counterinsurgency program launched after General Efraín Ríos Montt came to power in March this year, Amnesty International said today (Monday, October 11, 1982).

Military and newly formed "civil defense" units destroyed entire villages, tortured and mutilated local people and carried out mass executions in at least 112 separate incidents

between March and July, the worldwide human rights movement said.

Reports still coming in show the pattern has continued in more recent months. Amnesty International said exact details of all the incidents were hard to establish but it believed the death toll was probably higher than the figures reported to it so far.

In one Indian village in Quiché province on April 5 troops were reported to have forced all the inhabitants into the courthouse, raped the women and beheaded the men, and then battered the children to death against rocks in a nearby river. Raids elsewhere on the same day left some 100 people dead in the village of Mangal and 35 at Covadonga.

In other localities, people were burned alive in their huts, hacked to death by machete and machine-gunned. Amnesty International said information about other atrocities was still coming in.

Government forces have cleared all local people from several areas where insurgents were reported, killing many and driving others away.

Guatemalan officials maintain that the dead are guerrillas who died in clashes with government forces or civilians killed by guerrillas. But Amnesty International said its information repeatedly pointed to government responsibility for a program of mass killing of unarmed civilians in rural areas.

Amnesty International previously reported the existence of a government-run assassination program under former President Romero Lucas García in which "death squads" eliminated suspected opponents of the government, many of them in Guatemala's cities. "Now," said an Amnesty International official today, "wholesale massacres are reported from the countryside."

The victims have included pregnant women, small children and the elderly. In a house-to-house operation in Quiché province in May, armed agents killed 25 children between the ages of 4 months and 14 years, 15 women and 3 men.

The Amnesty International statement coincides with the movement's annual "Prisoners of Conscience Week" whose theme this year is human rights violations in rural areas around the world.

Bishops' President Urges Administration To Withhold Military Aid to Guatemala

Washington.—The President of the National Conference of Catholic Bishops has urged the Administration to withhold military assistance to Guatemala until "substantial and verifiable" proof is given that the pattern of violent repression of human rights in that country has ended.

Archbishop John R. Roach of St. Paul and Minneapolis said Church sources and other reliable witnesses in Guatemala have stated that human rights abuses, especially campaigns of intimidation and displacement directed against the Indian population, have increased dramatically in the last six months.

This contradicts statements by Administration sources suggesting that Guatemala's human rights record is improving.

"Our impression is entirely different," Archbishop Roach stated.

"It is not our role either to judge the intentions of the present Guatemalan government or to assess its true ability to control events throughout the country," the Archbishop said, "But we must insist that the extensive data available to us suggest that the previous pattern of violations has altered in recent months only by becoming worse.

"We respectfully urge the Administration, therefore, to withhold any further military assistance to Guatemala until substantial and verifiable proof is given that the pattern has been truly broken."

The present Administration has indicated its desire to renew U.S. military aid to Guatemala, which ended in 1977. A military training program has been requested for fiscal year 1983, and considerable military aid for Guatemala was included in the proposal for the Caribbean Basin Initiative.

The bishops of the United States reiterated their longstanding opposition to military aid to Guatemala in a Statement on Central America issued in November, 1981. The statement said U.S. diplomacy in Guatemala should be directed towards enhancing the protection of human rights and assisting the meeting of basic human needs.

During the past year they have made statements of solidarity with the Catholic Bishops of Guatemala, who said last May that the level of assassinations in their country has reached the level of genocide.

An Americas Watch Report

Summary and Findings

It is the view of the Americas Watch, based on direct testimony and other relevant information that we have gathered, that the human rights situation in Guatemala has not improved, but, if anything, has deteriorated since November, 1982. We arrive at this conclusion for the following reasons:

1. The Guatemalan Government's counterinsurgency program, begun in early 1982, has been continued and expanded by the Rios Montt government and remains in effect at this time.

2. A principal feature of this campaign is the systematic murder of Indian noncombatants (men, women and children) of any village, farm or cooperative, that the army regards as possibly supportive of the guerrilla insurgents or that otherwise resists army directives.

3. Although civilian men of all ages have been shot in large numbers by the Guatemalan army, women and children are particular victims; women are routinely raped before being killed; children are smashed against walls, choked, burned alive or murdered by machete or bayonet.

4. There is growing evidence that civilian males, including teenagers are being conscripted, under threat of death into "civil patrols," which are controlled by local army commanders. A principal function of the civil patrols is to kill other civilians suspected of being "subversive" or otherwise objectionable to local army commanders.

5. Incidental to its murder of civilians, the army frequently destroys churches, schools, livestock, crops, food supplies and seeds belonging to suspect villages, cooperatives or private farms. An apparent purpose, and clear effect is to deprive entire villages and farm communities of food necessary for survival.

6. Unable to live in their villages or on their farms, or to survive in the mountains to which they flee, an increasing number of Guatemalan Indians (estimated at between 70,000 and 100,000) have sought refuge in southern Mexico. The Guatemalan army has created a free-fire zone along its border with Mexico and routinely pursues and tries to kill many refugees to prevent them from reaching Mexico.

7. Through the period of our visit to southern Mexico in March, 1983, Guatemalan ground and air forces have repeatedly crossed into Mexican territory to intimidate refugees and to carry out surveillance of refugee camps. During our delegation's visit, one armed Guatemalan force crossed several kilometers over the border near the Chajul refugee camp and another force opened fire at refugees at the Puerto Rico refugee camp.

8. The Guatemalan armed forces make extensive and conspicuous use of helicopters, mortars and incendiary bombs in attacking rural villages in destroying and burning crops, and in harassing refugees seeking to escape, and routinely use helicopters for surveillance of refugee camps in Mexico.

9. The Guatemalan government continues to execute prisoners (11 men since January 1, 1983) tried in secret by special courts whose procedures and composition *prima facie* violate its international treaty obligations.

10. It is widely known within the refugee community, and among displaced Indians in Guatemala, that the principal supplier of such helicopters—and the principal supporter of the Rios Montt government—is the United States.

Recommendation

These findings indicate that the Rios Montt government continues to engage in a consistent pattern of gross violations of internationally recognized human rights. Accordingly, as U.S. law prohibits military assistance to such governments, Americas Watch calls for the immediate suspension of all existing military sales and the withholding of requested military assistance to the Guatemalan government. Continued U.S. military and diplomatic support for the Rios Montt government will lead, and in fact, is already leading the Guatemalan people to view the United States as an accomplice to the massive and unspeakable human rights violations that are being committed by the Rios Montt government.●

FLORIDA ATTORNEY GENERAL URGES ACTION ON LEGISLATION TO DEAUTHORIZE THE CROSS-FLORIDA BARGE CANAL

HON. BUDDY MacKAY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. MacKAY. Mr. Speaker, on April 21, 1983, I introduced H.R. 2695, a bill to deauthorize the Cross-Florida Barge Canal.

This bill is supported by the Governor of Florida, as well as the elected cabinet of Florida. As the Congress begins to consider this legislation, I wanted to share with my colleagues the text of a letter I have received from the Honorable Jim Smith, attorney general of Florida, which outlines the legal situation in which the State of Florida currently finds itself with

regard to the canal. In his letter, he points out the need for swift action on this bill.

I insert the text of this letter at this point in the RECORD and strongly urge my colleagues to review it. I believe it very succinctly outlines the legal reasons for passing H.R. 2695.

DEPARTMENT OF LEGAL AFFAIRS,
OFFICE OF THE ATTORNEY GENERAL,
Tallahassee, Fla., May 3, 1983.

Hon. BUDDY MACKAY,
U.S. Congressman,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN MACKAY: I am aware that bills have been introduced in both houses of Congress which would deauthorize the Cross-Florida Barge Canal Project. There are several matters which need to be considered in relation to this proposed legislation. Therefore, this letter is being sent to each member of Florida's Congressional delegation.

As you know, in 1971 President Nixon ordered a halt to construction of the canal project. After extensive studies, which included consideration of an alternative completion route, the U.S. Army Corps of Engineers in 1977 recommended against completion of the canal because of an unfavorable cost benefit analysis. That same year the Governor and Cabinet of Florida, sitting as the head of the Florida Department of Natural Resources, adopted a resolution recommending that Congress deauthorize the canal.

In 1979, in anticipation of deauthorization, the Florida Legislature enacted Chapter 79-167, Laws of Florida. This law will become effective only if the canal is deauthorized. Some of the salient features of the 1979 legislation are:

It requires preparation of a land management plan which will decide future uses of lands now owned by the Canal Authority (a state agency composed of the Governor and Cabinet which owns most of the lands acquired for the canal project).

It provides for sale to the federal government of a large area which includes most of Lake Ocklawaha (Rodman Pool) and lands along the Oklawaha River which were to have become Eureka Pool. These lands are to be sold at fair market value for inclusion in an expanded Ocala National Forest. Their use must be consistent with the land management plan for that area.

The Florida Department of Natural Resources is empowered to acquire by purchase, exchange or eminent domain the fee simple interest in lands to be included in the Ocala National Forest where the Canal Authority originally acquired less than the fee.

Lands determined to be surplus by the management plan are to be offered for sale at fair market value—first to the original owner, then to the county, then to the public at auction.

The six counties of the Cross Florida Canal Navigation District—Duval, Clay, Putman, Marion, Levy and Citrus—are to be refunded with interest the ad valorem tax revenues contributed to the Canal Authority for land acquisition. (The principal amount of the counties' contribution was $9,340,720.94. Principal and interest now total some $32 million and is accumulating at the rate of 8 per cent per year.)

The primary mechanism for repaying the six counties is the sale of surplus Canal Authority lands.

As a result of recent circuit court decisions in Florida, this orderly plan for disposition of Canal Authority lands, and even the possibility of completion should Congress choose that, are threatened by further delay. In May, 1982, the circuit court in Marion County held in suits filed by eleven former land owners that the canal project has been effectively abandoned and that the former owners of land should be revested with title. Appeals of those judgments are now pending before the Fifth District Court of Appeal in Daytona Beach. Although we firmly believe that legal precedent is against the circuit court's rulings, one cannot discount the possibility that the judgments may be affirmed. However, we do not anticipate having a decision from the Fifth District Court of Appeal for at least several months.

Since those cases were tried, Florida Power and Light Company has filed suit in Marion County seeking to recover title to over nine thousand acres of land the Canal Authority owns in fee simple. Of this, 3,248 acres are under or around Lake Ocklawaha, and 5,900 acres boarder the Oklawaha River in the proposed Eureka Pool area. All of this land is environmentally sensitive and is part of the area proposed for inclusion in the Ocala National Forest. Unfortunately, we expect the circuit court will follow its previous rulings at the trial of this case which is now scheduled for June 24, 1983.

The implications of the courts' decisions in these cases are serious. First, if all or most of the Canal Authority lands are returned to private ownership, the protection of sensitive ecological resources contemplated by the 1979 legislation, or any degree of restoration, will be vastly complicated if not made impossible. Present and future recreational uses may also be thwarted. Further, should Congress decide to complete the Canal, it is obvious enormous duplicative expenditures would be necessary if the land reverts to private ownership.

The circuit court also decided that the former land owners were entitled to the land upon their repayment of the 1960s purchase price, not current fair market value. The effect of this may well be to deprive the six counties of the navigation district—Duval, Clay, Putnam, Marion, Levy and Citrus—of some portion of the amount they are to be paid under the 1979 legislation. Although the land management plans are not complete, there appears to be just sufficient land available for sale at fair market value to repay the interest. It is doubtful however that these lands are appreciating at the rate of eight percent per year. Thus, the longer deauthorization is delayed the more difficult it will be to repay the counties. If the land should revert to previous owners for the 1960s prices, full repayment to the six counties and their taxpayers will not be possible.

I trust you will find this helpful in your decision regarding the canal. I believe that delay in resolving the fate of the canal will further complicate an already complex situation. Therefore, your prompt action on this bill is highly desirable. If I may provide you any more information, please call on me.

Sincerely,

JIM SMITH
Attorney General.●

PRESIDENT REAGAN PAYS TRIBUTE TO THE MEMORY OF JOHN M. ASHBROOK

HON. DELBERT L. LATTA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. LATTA. Mr. Speaker, I would like to submit for the RECORD a stirring eulogy to the memory of John M. Ashbrook given by President Reagan on May 9, 1983, at Ashland College, Ashland, Ohio.

Though the first anniversary of John's untimely death has just passed, his memory and his commitment to Ashland College and quality education throughout this country endure.

The President also used this occasion to give the Nation an update on his economic program.

The text of the President's speech follows:

REMARKS OF THE PRESIDENT AT THE JOHN M. ASHBROOK MEMORIAL DINNER

THE PRESIDENT. Thank you. [Applause]. Thank you, Fred, Dr. Schultz, Jean Ashbrook, and distinguished guests, we are here this evening to honor a man who, though he died at a tragically young age, garnered himself a remarkable record of public service as a state assemblyman, a distinguished congressman, a candidate for the United States Senate and, for a brief time, a candidate for the presidency of the United States.

There is sadness and surprise in recounting these titles of office either held or sought by John Ashbrook. Sadness, of course, because a man who made such an enormous contribution to American political life is now gone. Surprise, because all of us who followed closely the career of John Ashbrook remember him for his youthful and vigorous advocacy of traditional American principles. When he entered the state legislature, he was 28, the second youngest member at that time of that body. When he went to Congress, he was 32, the second youngest member of that body. And when he died, a candidate for the United States Senate, he was only 53.

It was never quite possible to say of John Ashbrook that he was typical—even though he was very much one of a breed of midwestern congressmen, those who over the course of several decades fought a long, hard, and frequently losing battle against the encroachments and intrusions of big government. As early as 1960, John Ashbrook warned against "unbridled national power with a resultant loss of individual freedom and local autonomy." He warned against "the state planners, the economy wreckers, the spenders and the destroyers of local government." He was a founder and chairman of distinguished conservative organizations including the American Conservative Union. In standing up for these views, he was remarkably consistent—his lifetime voting record garnered him a 97 out of a possible 100 percent on the conservative voting scale.

Yes, John Ashbrook was one of those honored few, those officeholders in the fifties and sixties who warned against the current trends and fashions, who predicted that someday the massive spending schemes and

higher and higher taxes of the federal government would stall and depress the American economy, immobilize state and local government and endanger personal freedom.

But if John Ashbrook was a rock solid conservative he was also a conservative who broke the mold. He hardly fit the image of the stuffy or parochial reactionary some tried to attach to him. A graduate of Harvard, an adept and effective public speaker, the concise eloquence he brought to his views made the liberal establishment take notice. And, most important, he was willing to take the kind of chances that few older and more traditional members of his party would ever have dared. He even challenged an incumbent President of his own party when he felt that President needed to be reminded of his original mandate.

In John Ashbrook's youth, his erudition, and his willingness to challenge long-established political precedents, we saw a new kind of Republican, a new kind of conservative. It was in this sense that he was ahead of his time, a forerunner of many conservative officeholders to come.

And the voters of Ohio, even those who didn't agree with him on every point, saw in him a man to be trusted, a leader who had clearly charted out the future and knew the direction he wanted it to go. Even those who view the world from a different political perspective can honor this man's utter devotion to principle, and his understanding of the essence of political leadership. John Ashbrook knew that the first duty of public life is to responsibly speak the truth—even if the moment's fashion is against the truth. For it's through such consistency and coherence, such constant attention to principle, that the public trust is eventually won and a political consensus mobilized.

In many ways, John Ashbrook symbolized the beginnings of a new conservative movement in America. As he grew in prominence, so did the movement he helped to lead. In the 50's and 60's, it was labeled a lost cause, in the 70's it was thought of as another pressure group, and in the 80's many could argue it was the dominant force in American political and intellectual life. [Applause].

We mourn John Ashbrook's loss to this movement and to his country. But as his longtime friend and fellow activist in that movement, William Rusher reminded us: Surely our highest consolation is knowing that John Asbrook did live to see his political principles victorious and his public career vindicated. [Applause].

Yet we do this memory and ourselves a disservice if we too exclusively identify John Ashbrook's political principles with one man, one party, or one political movement. Through all of his writings and speeches, it was John Ashbrook's insistent claim that opposition to the cult of state power—the cult that has so badly infected our century—was deeply and irrevocably part of America's past and that the principles of limited government was America's greatest contribution to constitutional and political history.

He spoke movingly of America's traditional values and how too often in recent years we as a nation had drifted from those values. At the beginning of his second term in 1963, John was one of the senior members of a special five-man committee investigating the Ku Klux Klan and its involvement in the murder of civil rights workers in the South.

"The minute I walk into those hearings," he said, "it is like entering another world where all of the values which are meaningful to me, law and order, respect for your fellow human being, justice go out the window—(where) traditional values are scoffed at."

It was a long-standing American consensus based on these traditional values that John Ashbrook struggled to reinstitute in this country, a struggle we continue today.

And in searching for the solution of our social or economic problems today, we can speak of a matrix, a formula that unlocks the solutions to many different problems. And I believe it is in the political wisdom and the social consensus that began this country, the consensus that still abides here in the heartland of America and was so evident in the career of a John Ashbrook, it is this consensus that holds the key to our modern dilemmas.

From their own harsh experience with intrusive, overbearing government, the Founding Fathers made a great breakthrough in political understanding: They understood that it is the excesses of government, the will to power of one man over another, that has been a principal source of injustice and human suffering through the ages. The Founding Fathers understood that only by making government the servant, not the master, only by positing sovereignty in the people and not the state can we hope to protect freedom and see the political commonwealth prosper.

In 1776, the source of government excess was the crown's abuse of power and its attempt to suffocate the colonists with its overbearing demands. In our own day, the danger of too much state power has taken a subtler but no less dangerous form. Out of the best of intentions, government has intervened in areas where it is neither competent nor needed nor wanted by the mass of Americans. [Applause].

There is no better example of the wisdom of limited government and the price paid by societies that forgot that wisdom than the economic problems we've encountered in recent years. The notion that government planners could fine-tune the economy from Washington led to a vicious cycle of boom and bust, periods of high inflation followed by periods of high unemployment.

Ohio has suffered from the practice of Washington-based meddling more than almost any other state. Today, because of this vicious cycle and following decades of growth in government, there are 13 percent unemployed in your state. And in states [1] like Canton, the rate is as high as 17.5 percent and in Youngstown, 20.1 percent.

These are not just statistics. They represent human hardship and suffering, they stand for unhappy families with lifetime savings eaten up and dreams for the future destroyed.

Now all of us hope, of course, that the unemployment situation will ease much more quickly than current predictions suggest. But if past recessions were the rule, unemployment will remain a lagging indicator in an otherwise brightening economy so the unemployed will be among the last to feel the benefits of the recovery.

But those who have for so long preached the benefits of bigger government should be asked to acknowledge that the economic conditions that led to recession and unemployment were created by years of growth in government and the climate of government expansion and interference. When this administration took office, federal spending had tripled in the preceding 10 years and taxes had doubled in the preceding five years. The national debt was hitting a trillion dollars—social spending had quadrupled in one decade. The budget for the Department of Health and Human Services became the third largest entity in the world, just behind the national budgets of the United States and the Soviet Union. One social program, food stamps, had grown from a $70 million experimental program in 1965 to an $11.25 billion program in 1981—an incredible 16,000 percent increase.

The government was draining off America's productivity and placing an enormous drag on the economy. Higher and higher taxes and inflation were discouraging work, risk, and the willingness of business and labor to invest time or money in economic expansion.

Now this tremendous slowdown in the economy was more than a statistical event. It hurt those who could least afford to be hurt. Particularly hard hit were those traditionally lower income groups that make up such a high percentage of the unemployed. Minimum wage laws—with no allocation made or allowance made for young people doing marginal work—kept many young people from gaining the entry level positions that mean invaluable job training and eventually fulltime careers.

Or take the slowdown in economic progress made by those with low incomes. As pointed out in a recent article by Charles Murray in The Public Interest magazine, the great expansion of government programs that took place under the aegis of the Great Society coincided with an end to economic progress for America's poor people. From 1949 until just before the Great Society got underway in 1964, the percentage of American families in poverty fell dramatically—from nearly 33 percent to only 18 percent. But by 1980, with the full impact of the Great Society's programs being felt, the trend had reversed itself and there was an even higher proportion of people living in poverty than in 1969.

The simple truth is that low inflation and economic expansion in the years prior to the Great Society meant enormous social and economic progress for the poor of America. But after the gigantic increases in government spending and taxation, that economic progress slowed dramatically. If we had maintained the economic progress made from 1950 through 1965, black family income in 1980 would have been nearly $3,000 higher than it was.

The great social spending schemes failed for the vast majority of poor Americans. They remain trapped in economic conditions no better than those of a decade-and-a-half ago. The poverty programs failed precisely because they grew without regard for the burden they and other social programs were imposing on the overall economy. As social spending multiplied, economic growth slowed, and the economy became less and less able to generate the jobs and incomes needed to lift the poor out of poverty. Not to mention the fact that inflation stimulated by government growth hit the poor the hardest—the hardest especially by devaluating the payments of those on welfare.

The growth of government programs did little for the poor, they were sometimes even counterproductive. From 1965 to '74 for example, the Federal Urban Renewal Program spent more than $7 billion and ended a total failure, destroying more housing units than it replaced. The federal regulations and grants of the Model Cities Pro-

[1] Cities.

gram in the late 1960's spent more than $2.5 billion and didn't halt urban decay. But all of these programs—while they did fund jobs for an army of federal bureaucrats and consultants, put a huge burden on the productive sector of the American society. It was the working people who had to pay the taxes, carry the burden of inflation and get thrown out of work when the inevitable economic slowdown occurred.

Today because of our attempts to restrict and cut back on government expansion and to retarget aid toward those most in need, and away from those who can manage without federal help, the working people of America are directly benefiting. We have brought inflation down from double—I can't get that out—double-digit—[laughter]—I stumble over inflation all the time. [Laughter, applause]. But it was double-digit levels. And now for the last six months, it has been less than one-half of one percent. [Applause]. I have less trouble saying that. [Laughter]. For a family on a fixed income of $20,000, the improvement in inflation has meant about $1,700 more in purchasing power. And because of our tax program a median-income family of four in 1983 will pay $700 less in federal income taxes. And if they try to do anything about that third tax cut, I sleep with a veto pen under my pillow. [Applause].

But beyond all this, however, cutting back on government instrusions into the marketplace and its drain on the economy has meant the beginning of a solid recovery.

Auto production is up 40 percent in the first quarter over the same time a year ago. And in March, new home sales were up over 50 percent, building permits were up more than 70 percent and building starts were up by 75 percent over the same time last year. [Applause]. Consumer confidence has had its best monthly gain in nine years, all the way to 77 percent as measured by the Conference Board. We now have the lowest prime interest rate in 4½ years, inflation is better than the double-digit figures of a few years ago and the stock market is healthy again.

And this need not be a temporary recovery. If we can continue to cut the growth in spending, if we can continue to hold the line on taxes, consumer and business confidence will remain high and the recovery will be sustained over a long period of time. Once again, America's working people will know that hard work, saving and sound investment will pay off for them and their children in the future. And this will mean far more to the lower income groups that have been so badly hit by unemployment and inflation than all the government programs of the past. It will mean economic growth and expanding opportunity over a long period of time. Instead of having government trying to redistribute a shrinking economic pie, that pie will be expanding and everyone will have a chance at a larger share.

But if we are to continue this progress, we must resist that well-intentioned statism of those who urge even more spending and higher taxes. The British political philosopher, Michael Oakeshott, has warned us about the dangers of government that tries to do too much: "To some people, government appears as a vast reservoir of power which inspires them to dream of what use might be made of it. They have favorite projects of various dimensions which they sincerely believe are for the benefit of mankind. They are thus disposed to recognize government—an instrument of passion, the art of politics to enflame and direct desire."

Well, here I would submit is the central political error of our time. Instead of seeing the people and their free institutions as the principle means of social and economic progress, our political opposition has looked at government and bureaucracy as the primary vehicle of social change. And this marked the on-slaught of special interest politics, the notion that every noble social goal is the business of government, that every pressure group has its claim on the tax dollars of working people, that national legislation means brokering and bartering with the largest share going to the most powerful of the noisiest political constituency.

This is the antithesis of fair government, of democratic rule and orderly government. As Mr. Oakeshott has observed, it is the conjunction of utopian dreaming and government power that degenerates into tyranny. Even beyond the raids on the national treasury, the huge deficits, the high inflation and taxation—the very abuses that brought down so many empires and nations in the past—this trend toward well-intentioned but overwhelming government also diminishes personal freedom and the autonomy of those branches of government closest to the people.

Even two centuries ago, the founding fathers understood this. They anticipated the danger. John Adams wrote that government tends to run every contingency into an excuse for enchancing power in government. And Thomas Jefferson put it more directly when he predicted happiness for America but only "if we can prevent the government from wasting the labors of the people, under the pretense of taking care of them . . ."

Now, some, of course, mistake this to mean the negation of government. Far to the contrary, it is by clearly restricting the duties of government that we make government efficient and responsive. By preventing government from overextending itself we stop it from disturbing that intricate but orderly pattern of private transactions among various institutions and individuals who have different social and economic goals. In short, like the founding fathers, we recognize the people as sovereign and the source of our social progress. We recognize government's role in that progress but only under sharply defined and limited conditions. We remain aware of government's urge to seek more power, to disturb the social ecology and disrupt the bonds of cooperation and interchange among private individuals and institutions through unnecessary intrusion or expansion.

When new management takes over a failing business or a coach tries to revitalize a sports team, both will frequently find that the key to success is cutting out the extraneous or extravagant, while returning to basics and emphasizing those resources that have been traditionally successful.

Well, this is precisely what we're trying to do to the bloated federal government today: Remove it from interfering in areas where it doesn't belong, but at the same time strengthen its ability to perform its constitutional and legitimate functions. In the area of public order and law enforcement, for example, we're reversing a dangerous trend of the last decade. While crime was steadily increasing, the federal commitment in terms of personnel was steadily shrinking. This administration has reversed this trend by adding more than 1,000 new investigators and prosecutors to law enforcement rolls and we have redirected our resources for a frontal assault on drugs and organized crime. Or take our federalism proposals: We want to cut back on federal intrusions to local and state governments, and so those local and state governments can be more responsive to the people.

Or take the national security area, where we're trying to make up for years of neglect when spending declined from 40 percent of the budget in 1970 to less than 24 percent in 1980. And let me take a moment here for an important aside. During the past 10 years, the Soviet Union has improved, developed and deployed more than a dozen large new ICBM systems while the United States has been thinking about developing one, much smaller Intercontinental Ballistic Missile.

The debate over a new ICBM and our entire strategic triad has cost the country millions of man hours and billions of dollars and it still hasn't been decided.

I wanted to get some answers, once and for all. So I created a blue-ribbon, bipartisan commission this past January to study the strategic forces of the United States. The commission conferred with over 200 experts and consulted closely with the Congress and produced a thorough report that made three basic recommendations. First, that we continue with our strategic modernization program; second, that we build and deploy the MX missile and develop a single—simple, single-warhead missile; and, third, that we continue ambitious arms control negotiations that promote nuclear arms stability and reduction of nuclear arms. [Applause].

Eighteen senior officials from the three previous administrations, including six former Secretaries of State and Defense, agree that all three parts of this commission's recommendations are essential to the future security of our country. The National Security Council agrees. The Joint Chiefs of Staff agree. And I agree.

But I more than agree. I believe with every fiber of my being that these steps are essential to ensuring arms control progress and our nation's future safety and security. Only when the Soviets are convinced that we mean business will arms control agreements become a reality. We're not building missiles to fight a war; we're building missiles to preserve the peace. [Applause].

And that's why the Congress must act soon on these recommendations, especially the MX. If the Congress rejects these proposals it will have dealt a blow to our national security that no foreign power would ever have been able to accomplish. I call on the Congress to support this bipartisan program, a program that combines vigorous arms control with the modernization of our strategic forces.

Now, discussion of Justice Department personnel or economic statistics may seem a long way from the insights of Michael Oakeshott or the lofty thoughts of the founding fathers. But I would argue that John Ashbrook would never have found it so. For him, conservatism was not so much a political pressure group as it was a modern reflection of the insights and wisdom that began the American Republic.

His career as a public servant is testimony to this kind of enlightened conservatism. John Ashbrook believed in study and thought. He was close to Ashland College, he did all in his power to encourage the growth of conservative think tanks and policy groups.

But he was a practical man as well. In the face of redistricting and an unfavorable political climate for conservative candidates,

he won 11 consecutive terms in the House of Representatives. He believed in political action—he was among those select few who began the Draft Goldwater movement in 1963 and stunned the political world by succeeding a year later.

I first came to John's district at a dinner here with Bill Buckley the spring after that election. He was not discouraged. John looked at the Goldwater campaign as a first step toward the eventual triumph of his political principles. Those principles are in the ascendency today in large part due to his efforts. [Applause.]

We owe it to him, to ourselves, to our children to stand by those principles, to persevere until—as it was said that night in 1964 in San Francisco by the presidential candidate John Ashbrook had worked so hard to nominate—"until our cause has won the day, inspired the world, and shown the way to a tomorrow worthy of all our yesterdays."

Thank you all and God bless you. [Applause].●

STATEMENT FOR THE RECORD BY REP. MANUEL LUJAN, JR.

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. LUJAN. Mr. Speaker, I am introducing a bill today to provide for the addition of about 20 acres to the Sandia Mountain Wilderness within the Cibola National Forest of New Mexico.

This legislation is similar to a bill which I introduced in the 97th Congress, and was opposed by the Department of Agriculture because of misinformation about a proposed flood control project in the designated wilderness area.

When the Endangered American Wilderness Act of 1978 was being considered and subsequently enacted by Congress, approximately 20 acres of the then proposed Sandia Mountain Wilderness were excluded to provide for ultimate construction and maintenance of a flood control project immediately above the city limits of Albuquerque, N. Mex.

Since that time the city of Albuquerque, on close study after citizen groups questioned its basis and value, discarded the proposed flood control project. Because the project will not now be built, there is no longer any reason for excluding this acreage from the wilderness area.

The area proposed for wilderness designation is referred to as Sunset Canyon, which lies literally in the backyard of many residents of Albuquerque.

At the present time a structure called a diversion dam exists in the canyon. It was built in 1964 for flood control and has been maintained only once since then. Further maintenance work is now in the process of being approved by the Forest Service regional office in Albuquerque, but this consists mainly of silt removal in order to keep the channel open. Such maintenance would in no way interfere with a wilderness designation.

This proposed wilderness area is directly behind an area known as the Glenwood Hills subdivision in Albuquerque. The homes in the area back up to the area I am proposing for the wilderness area.

The flood control requirement came about because of the housing development, which was built in the 1960's. In 1974 a bond issue was passed for flood control, but none of the money was specifically allocated to enlarging this dam. Then in 1976 the Glenwood Hills Homeowners Association was informed by the Forest Service that the city planned to build a new dam in Sunset Canyon. It was to have been about 30 feet high at grade level and 50 feet from the basin floor. The catch basin was to be riprapped and a road built high on the hillside to go over the top of the dam structure.

This planned action was protested and the Forest Service requested the city to reconsider its plans. In March 1980 the city council passed a resolution whereby the city's policy is to upgrade the existing structure and line the North Glenwood Hills Aroyo channel with concrete.

My bill will insure that no greater action is taken by the city. It will preserve the existing character of the area and prevent destruction of the canyon. I will work for early passage of this bill and I will be requesting hearings shortly.●

COUNTRY OVEN BAKERY NAMED SMALL EMPLOYER OF THE YEAR FOR 1983

HON. BEVERLY BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mrs. BYRON. Mr. Speaker, I would like to take this opportunity to congratulate the Appalachian Center and Country Oven Bakery of Oakland, Md., for being named the Small Employer of the Year for 1983 through the President's Committee on Employment of the Handicapped.

The Country Oven Bakery began operating in 1980 with the assistance of a HUD block grant. Since then, the bakery has become virtually self-sufficient, and has established an excellent reputation in the Garrett County community.

Of the nine employees, seven are handicapped. The bakery has given them an outlet for their energy and enthusiasm, and also an opportunity to succeed in business and to contribute to the community. The Country Oven Bakery is a tribute to their determination, dedication, and talent, and I am sure that there is even more success in its future.

Executive director Charlotte Griffith, bakery supervisor Maureen Sweitzer, and employees Helen Ravenscroft, Teri Roy, Trina Bray, Margie Bell, Mildred Crone, Paul Miller, Rich Buckingham, and Mary Lucas are all to be commended for this outstanding achievement. I hope that their fine example will inspire other handicapped individuals throughout the country.●

ETHIOPIA IN NEED OF FOOD AID

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FRANK. Mr. Speaker, Ethiopia is experiencing its most severe drought since 1973. An estimated 3 million people, in the Gondar, Tigray, Welo, and Eritrea regions, are in desparate need of emergency food relief.

During the 1972-73 drought, 200,000 people and millions of livestock perished. This year, 90 people and nearly 200,000 cattle have already died in the Gondar region alone. With the government's treasury strained, emergency stockpiles nearly depleted, logistical headaches, and attendant health problems, Ethiopia has been forced to turn to the world community for assistance.

The Agency for International Development has already granted food requests from Catholic Relief Services and the World Food Program, both of which have been operating in the impacted areas. Another request is still pending and more supplies may be requested in the future.

I urge my colleagues to read the following article from the Baltimore Sun which provides a useful overview of the crisis. For those who wish to further involve themselves in this unfolding tragedy, I would suggest a letter to the Director of the Agency for International Development in support of humanitarian and food relief requests.

[From The Sun, May 2, 1983]

ETHIOPIA, IN GRIPS OF SEVERE DROUGHT, HAS "CRITICAL" NEED OF FOOD, SUPPLIES

(By Ian Steele)

EBINAT, ETHIOPIA.—From the air, the country is the color of scorched parchment stretching as far as the eye can see beyond the Simien mountains. A vast network of slate-gray riverbeds testifies to prospects for irrigation and bountiful harvests, but on the ground this year is nothing.

Drought has robbed the northern provinces of their crops and watering places and hundreds of square miles of cornfields and rangelands have merged into a virtual desert stretching from the Sudan to the Red Sea.

Tens of thousands of people have become totally dependent on foreign food aid deliv-

ered to relief stations and refugee camps. Help for uncounted thousands more, who live beyond the nation's airstrips and roads, is nowhere in sight. An estimated 3 million people are said to be in serious need of food and, in some places, water.

For most of the northern country the rains came too early, too late or not at all last year, and the little corn that did break ground failed to mature. Even before the harvest, which is due about now, thousands of families have abandoned their fields and pegged their survival to towns and refugee camps.

The World Food Program has estimated a 250,000-ton national grain deficit for 1983, but says American satellite projections of a 2 million-ton shortfall are probably more accurate.

The government has declared a state of emergency, and Trevor Page, head of the program's emergency service in Geneva, and other foreign observers believe the drought to be worse than the one in 1972-73, when about 200,000 people and millions of livestock perished.

"We just know the situation is critical, but we just don't know how critical," said Martin Moch, the program's senior adviser in Addis Ababa, the Ethiopian capital. Mr. Moch says that the country's limited transportation system had defied efforts to reach the most distant northern settlements, and says estimates of casualties and needs were based conservatively on an outdated population count of 31 million people.

Here on the flat, dusty outskirts of Ebinat in the southeastern Gondar region, a relief station set up for a few hundred refugees last October has become a permanent settlement for 10,000.

People have walked for up to a week to get here, carrying a few personal possessions and their youngest children on their backs. They have stripped the landscape of vegetation, and gathered every rock within the radius of a mile to build low stone corrals and brush shelters against the sun and dust. No one knows when they will be able to leave.

In their brown, tattered robes, they move across the landscape in grim camouflage with their surroundings, collecting firewood for cooking and foraging for a few goats and donkeys. As the camp has grown older, larger and more demanding on the environment, the daily trek for these basics has grown from a few hundred yards to a round trip of several miles.

The Ebinat River, which has been the camp's only source of water, is so polluted from overuse that government relief officials have restricted access for drinking only.

There have been no medicines or medical personnel at Ebinat since it opened, and every second child appears to have an eye infection, sores or respiratory problems. There is little movement in the camp. Families conserve their energy huddled beneath their shelters, and apart from the low, constant whimper of small children, a visitor is struck by the eerie silence of the place.

The maximum food ration in camps like this across the north this year is 66 pounds of grain and 11 pounds of milk and soys meal for a family of five. That is the equivalent of about 360 grams of protein a person per day, against the 400-gram minimum United Nations agencies say is necessary for survival in drought conditions. The ration ignores the fact that a family of 5 is only average in Ethiopia and that the allowance must sometimes be shared among 9 or 10.

There are said to be 450,000 severely drought-affected people in the Gondar region, and government officials say they have counted 600,000 people in similar circumstances in Tigray, 566,000 in Welo and more than 530,000 in Eritrea, where the situation is complicated by continued fighting between government and rebel forces.

A drought report and letter requesting emergency food aid that was distributed to foreign embassies in Addis Ababa last October has drawn a limited response, and the nation's current emergency food reserve in the capital stands at about 15,000 tons of grain provided through the World Food Program and the United Nations Food and Agriculture Organization.

However, the emergency in Gondar alone could swallow the nation's emergency stockpile, and Adane Mumuye, chief of the government's Relief and Rehabilitation Commission in Gondar, has requested 15,000 tons of wheat and 3,700 tons of powdered supplements and vegetable oils to carry his 450,000 people for the next six months alone. He says that even if he receives his quota, he will only be able to reach 60 to 70 percent of those in need.

"We don't have the trucks and we can only supply those who come to the relief stations," he said. "Those people have to travel two to four days on foot, and the weak cannot make it."

The death toll directly attributable to drought in Gondar so far this year is about 90 people and 177,000 cattle. By Mr. Adane's projection, between 135,000 and 180,000 people could perish in Gondar this year if food is not forthcoming.

Shimelis Adugna, the Relief Commissioner in Addis Ababa, said that the Communist states that supported the overthrow of Emperor Haile Selassie in 1974 have given next to nothing in the way of assistance. He said the military government of Mengistu Haile Mariam was hopeful that the United States would forget differences and help fill the food gap.

He said he was certain that Western governments would have responded more generously if Ethiopia were not a socialist state. Since the revolution, he said, the nation had averaged only $8 per head of population in foreign aid, compared with a $22 average for other developing countries with similar problems.

U.S. aid and humanitarian assistance to Ethiopia slowed to a trickle when the revolutionaries seized American property in 1974 and refused to pay compensation. The Dutch, who also have a strong record of foreign aid to developing countries, have similar claims outstanding, and Italy's contribution this year has been facilitated only by the settlement of its claims by a National Compensation Commission that was established recently in Addis Ababa.

Ethiopia's treasury is feeling the pinch of a military budget that according to the U.S. State Department drains 27.8 percent of its annual gross national product for arms against Somalia in the Ogaden region and rebel armies in Eritrea.

HIGH SCHOOL HONORING STUDENTS' ACADEMIC ACHIEVEMENTS

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. WHEAT. Mr. Speaker, tomorrow Hickman Mills High School is honoring the outstanding academic achievements of its students. At a ceremony at the school the students will receive awards ranging from scholastic scholarships to perfect attendance. I would like to take this opportunity to commend those students. These young men and women have not been content with the mediocre, but have demonstrated perseverance and dedication in the pursuit of excellence. The awards are the culmination of their excellent achievement.

But the meaning of excellence is found not in its accomplishment, but in its pursuit. Excellence is a quality acquired not at the end of the race and not at the starting line. Excellence is attained in slow degree that requires fierce dedication, persistence, and determination. I know that these exemplary students learned that valuable lesson.

It is true that American public education faces constant criticism, sometimes deservedly so. But it is also true that American public schools have undertaken a unique challenge—to educate all Americans and to give every student the opportunity to pursue excellence. I am encouraged to see that these students at Hickman Mills have made the most of that opportunity. I would also like to commend the efforts of Principal Douglas M. Lawrence and the school's faculty.

The awards issued will remind each and every student of the rewards of the dogged pursuit of excellence. I am proud to acknowledge their achievements and I wish them the best of luck in their future endeavors.

AT LAST A NUCLEAR FREEZE

HON. THOMAS J. RIDGE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. RIDGE. In 1945, the United States led mankind into the atomic and nuclear age. The United States is the only country that has ever used such weapons. The United States has a special responsibility, a moral imperative, to do whatever it can to put that destructive genie back in the bottle.

During the course of the debate on the House floor, a debate consuming several weeks, I monitored practically every minute of dialog, talked to sever-

al experts, read numerous studies and reports, and attempted to answer one basic question: Does the United States in May 1983 have a credible nuclear deterrent capability? In other words, if the Russians and the United States entered into a complete bilateral freeze on production and deployment of nuclear weapons, would this country find itself at a strategic and military disadvantage during the course of subsequent arms reduction talks?

I conclude that the answer is "No." Each country has an identifiable advantage with various elements of its nuclear capability. Neither country has a superior position overall. It is my belief that deterrent does not mean parity. We have sufficient nuclear capability to deter the Soviet Union from initiating a nuclear conflict and will be able to maintain that capability during the next several years.

From time to time Congress will be called upon to review different weapons and delivery systems in order to insure that such deterrent is not lost simply through the passage of time. We cannot wait indefinitely for bilateral agreements freezing and/or reducing nuclear weapons, but we can be assured that our efforts to do so in the next few years can be done from a position of real strength.

Working together, a bipartisan group of Congressmen—Republicans and Democrats alike—succeeded in writing specific language into the freeze resolution to do two critically important things:

First, to state explicity that is a bilateral, not a unilateral freeze, that is, we do not freeze unless and until the Russians do; and,

Second, to guarantee our right to on-site inspections within the Soviet Union to see for ourselves that they are doing all that any agreement requires them to do.

Critics of the freeze also argued that such a resolution would tie the hands of the President and his negotiators. That criticism is unjustified, in my view, because I do not know of a single Member of Congress—whether for or against the freeze—who believes that the United States should be represented at a bargaining table by 435 negotiators. And that is what we would be doing if we were to lock our negotiators into specific positions ahead of time as a result of individual votes taken in the House.

The nuclear freeze is intended as a statement—as a symbol—of the U.S. willingness and desire to call a halt to the nuclear arms race. It is not a treaty—the Senate, not the House, approves treaties. It is not a diplomatic instruction—those come from the White House or the State Department. No, the nuclear freeze does not tie the hands of the President or his negotiators. In my view, in fact, it strengthens their hands by sending them to the bargaining table with pretty persuasive evidence of how strongly the American people and their elected representatives feel about reducing the danger of nuclear war.

Finally, some observers have suggested that the freeze resolution was weakened during the long congressional debate be the many amendments the House added to it. On the contrary, I do not believe those amendments weakened the freeze, I think they strengthened it. I think it was important to clear up some of the many ambiguities in the documents as it was originally drafted.

During the first day or two of the debate, even the chief sponsors of the freeze resolution admitted that in many ways they themselves could not agree on how the freeze would work, or which weapons systems they mean for it to apply to in actual practice.

All too often, I think, Congress is too vague about what it really intends in the legislation it passes. So the bipartisan effort to make the freeze resolution a bit more precise was, in my view, a critically important effort to strengthen it.

Above all, however, the most important thing about this whole debate is that here in America, in May 1983, we have taken the first step toward reducing—and hopefully removing—the threat of nuclear war from the face of the Earth.●

NO DISCRIMINATION AGAINST NONWORKING SPOUSE

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. LUJAN. I am today introducing legislation which would increase from the current level of $250 to $2,000 the amount of nonworking spouse can invest in an individual retirement account.

In my legislation, the married couple can invest up to $4,000 in an IRA, $2,000 for each partner. It would encourage savings and provide an incentive for an additional $1,750 in tax deductions from income. There is no reason to discriminate against the nonworking spouse by limiting the amount of money that can be invested. The only condition in this bill is that the working spouse must earn at least the amount being invested in the IRA. As an example, if the working spouse earns only $3,500 in a taxable year, that is the maximum that can be invested in the IRA by both partners. It is my belief that the IRA is a very important tool in assisting a person in providing for the future. With the state of various retirement systems, this would insure the investor of a comfortable future with funds he or she invested earlier in life.●

DEFENSE SPENDING: I

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, May 11, 1983, into the CONGRESSIONAL RECORD:

Futuristic talk of particle beams and other exotic weapons has animated debate on the year's most controversial issue, defense. However, the main argument centers on money.

The present defense buildup really began when the Carter administration initiated a program to address the post-Vietnam neglect of our military. A firm consensus emerged in the Nation on the need to strengthen our Armed Forces. The growth of Soviet military power and the increasing military demands on the United States in the world combined to pose the central question for our defense policy today: not whether we should toughen up our defenses, but how much we should spend on a buildup and what we should buy.

President Reagan's answer has been to expand and accelerate the spending plans formulated by President Carter. For the period from 1984 to 1988, President Reagan has requested more than $1,800 billion in defense budget authority. If approved, this will result in a real rise of 50 percent in defense spending over the previous 5 years.

The cost of the President's defense plan is attributable in part to a new definition of the American military's role in the world. His basic strategy envisions simultaneous military action on several fronts, including a major war against the Soviets in Europe and a simultaneous conflict with them in the Persian Gulf. Such a strategy means more spending for larger conventional forces. Furthermore, the Reagan administration wants strategic modernization. Both these policies have helped swell the percentage of the Pentagon's budget going to procure military hardware. Ambitious procurement programs will modernize our Army divisions, supply four new tactical Air Force wings, and provide a 600-ship Navy and several new strategic systems by the end of the decade.

In 1981, President Reagan's defense proposals sailed through Congress. In 1982, he pushed through another big increase in defense spending. As the economy languished in recession, however, the consensus behind the buildup began to erode. Stagnant business activity and high unemployment have reduced tax revenues and raised Federal outlays for jobless benefits. There

have been fears that large deficits could prevent sustained economic recovery. Experts wonder if the defense budget has been thoroughly reviewed or if the economy can absorb the buildup in so short a time.

The defense buildup probably will not have adverse effects as long as our economy is not recovering from the recession. If the economy recovers strongly, however, the civilian sector could begin to take up capacity and credit. This competition for capacity and credit could lead to shortages of capital, manpower, and materials. Some crowding out of private investment is likely, and cost increases in the defense sector may spill into the larger economy and cause a resurgence of inflation.

The defense budget has always frustrated Congress, and indications are that the frustration will last. In practice, Congress has been able to exert only limited influence on defense policy. Members of Congress are seldom privy to the kind of information required to evaluate a weapon system. Much of Congress action on the defense budget takes place after the military has already decided that a weapon system should be built.

One problem making consistent funding of defense difficult for Congress is the volatility of public opinion. Congress tends to fund defense in roller-coaster fashion—big increases in some years and drastic declines in others—depending on public thinking at the time. This problem may arise again in connection with the Reagan defense program. Americans now seem to be more concerned about the economy and rising Federal deficits, and they want Congress to cut the defense request.

This public opinion is reflected in changes that the Pentagon constructed defense budgets too hastily and that almost all of the weapon plans conceived during the past three administrations were included despite their ineffectiveness. To the extent that these charges are believed, Mr. Reagan will find it hard to convince the public that his defense programs make sense.

Another problem Congress constantly faces is explosive growth in the cost of defense systems. Waste in some programs and cost overruns due to delays and steeply rising prices are aspects of the problem. The Reagan administration tried to contain this cost growth, but the most recent report on its procurement initiatives is not encouraging. The defense sector is so inflationary that cost increases are beginning to stymie the progress we have made in strengthening our conventional forces. Also, many weapon systems that should be canceled because of cost survive because of the jobs they create. The effect of these jobs should not be underestimated. By nature, Congress likes to spread defense contracts around to as many places as possible. After it approves a weapon system, management, labor, and the system's friends in government fight to keep the program alive. During the 1970's, Congress chose to kill few weapon systems.

The search for defense savings leads Congress into another problem: an old, established pattern of cutting first and most the funding for spare parts, fuel, ammunition, depot repair, and other elements of the operations and maintenance accounts—items affecting military readiness. Cutting these items yields the biggest near-term budget savings, but these items are essential to fighting a sustained conventional war. Thus, readiness suffers and our forces are not as prepared as they should be.

Congress will face a new problem as procurement and modernization take a larger share of the defense budget. It will be hard for Congress to cut the readiness-related accounts, as it has in the past, since these moneys will be needed to maintain the new weapon systems being delivered. We approach what many experts call an outyear dilemma in which Congress either must cut ongoing procurement programs or must face a very serious erosion of military readiness.●

REV. LEON SULLIVAN SAYS IT IS TIME FOR A MANDATORY FAIR EMPLOYMENT CODE FOR AMERICAN FIRMS OPERATING IN SOUTH AFRICA

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. SOLARZ. Mr. Speaker, since 1977, the Reverend Leon H. Sullivan, pastor of the Zion Baptist Church in Philadelphia has led a valiant and tireless campaign to encourage American firms operating in South Africa to voluntarily adopt a fair employment code that would eliminate discriminatory, racist, and unjust practices toward their black employees. But for some time Reverend Sullivan has been saying, to all who would hear, that it is now time to mandate a fair employment code for U.S. firms operating in South Africa and to impose heavy penalties on firms which would continue to discriminate or exploit their black workers.

Yesterday in the Washington Post, Reverend Sullivan published an Op-Ed piece eloquently explaining why he now favored the adoption of a mandatory code and why he supports legislation that I had introduced—H.R. 1693—which is cosponsored by 44 of my colleagues.

In testimony before the House Foreign Affairs Committee last year, Reverend Sullivan urged quick action on a mandatory code. He expressed dismay that while some 146 companies has signed the Sullivan code, another 142 U.S. firms operating in South Africa had not. In addition, over one-third of the signatory companies had failed to make any progress in implementing the six principles of the code:

Nonsegregation of the races in All Eating, Comfort, Locker Rooms, and Work Facilities

Equal and Fair Employment Practices for All Employees

Equal Pay for All Employees Doing Equal or Comparable Work for the Same Period of Time

Initiation and Development of Training Programs that Will Prepare Blacks, Coloreds, and Asians in Substantial Numbers for Supervisory, Administrative, Clerical, and Technical Jobs

Increasing the Number of Blacks, Coloreds, and Asians in Management and Supervisory Positions

Improving the Quality of Employees' Lives Outside the Work Environment in Such Areas as Housing, Transportation, Schooling, Recreation, and Health Facilities.

Mr. Speaker, since many of my colleagues are deeply concerned about the plight of South Africa's blacks who suffer under the most systematic, legally enshrined system of discrimination, known as apartheid, I ask that Reverend Sullivan's article be reprinted in today's CONGRESSIONAL RECORD. I would also like to take this opportunity to say that this Nation owes a debt of gratitude to Reverend Sullivan and his supporters for the tremendous work that they have done over the years to improve the condition of South Africa's 24 million black inhabitants.

May I also urge my colleagues to join me in cosponsoring H.R. 1693 and in working for the passage of legislation in this House which would indicate to the world that the United States is willing to act against the day-to-day horrors of the apartheid system.

[From the Washington Post, May 10, 1983]

IT'S TIME TO STEP UP THE PRESSURE ON SOUTH AFRICA

(By Leon H. Sullivan)

The so-called Sullivan principles that I initiated six years ago were intended to bring the actions and influences of American companies in South Africa to bear against the racist practices and apartheid laws of that country. It was my hope that the principles would initiate similar efforts by multinational companies from other parts of the world, thereby creating a global multinational campaign in South Africa against the racial injustices that have existed there for 300 years. It was also my intent that the principles would serve as a catalyst to help change segregation practices in other private and public places throughout the country.

I have attempted to make it clear from the beginning that the principles are not

the total solution to the South African problem, and that even if they were implemented to the optimum, the principles alone could not end apartheid. Apartheid is a ruthless, inhumane system of practices and laws deeply embedded in the world's most racist society, and in order for apartheid to be completely eradicated, it requires the combined efforts of many forces, including governments, companies, churches, unions, the United Nations, those who believe injustice within the country, and world public opinion. But it is my firm opinion that the multinational corporations have a major role to play. In the past they have been the main beneficiaries of cheap labor and profits from this evil and unjust system and among its main supporters. It should be the responsibility of these companies to help change that system. Otherwise, they have no moral justification for remaining in South Africa, and should be compelled to leave the country.

The principles were never intended to be a camouflage for corporations to hide behind, but were meant, along with other thrusts, to help end race discrimination and apartheid in South Africa. It was hoped this could be done by peaceful means, without the need for devastating war and the loss of millions of lives and the predictable involvement of most of the rest of the world, particularly the superpowers, that could lead to an atomic confrontation.

Though progress is still limited in comparison to the enormous size of the problems, the principles are beginning to work. Starting from where we began six years ago at a near "zero" base where blacks were not even legally considered "employees" in that country, some significant changes are occurring:

Throughout South Africa, plants are being desegregated in spite of the laws.

Blacks and other nonwhites are being upgraded, for the first time, to administrative and supervisory jobs.

Blacks are supervising whites, for the first time, in South Africa.

Blacks and nonwhites are being trained for skilled jobs in ever increasing numbers.

Black representative registered and unregistered trade unions are now beginning to be recognized.

Technical schools training blacks and other nonwhites are being built.

Black businesses, in increasing numbers, are being initiated.

Equal pay for equal work is begining to be instituted.

Companies are beginning to improve the quality of life for blacks and other nonwhites outside the workplace: in housing, health care, and education.

For the first time, some company executives are beginning to lobby for an end to all racial discriminatory laws and the apartheid system.

Also, the principles have led the way in the initiation of similar codes of conduct for companies operating in South Africa from around the world, including a group of South African companies that employ nearly 1 million workers, most of them black.

In conjunction with the principles, the Arthur D. Little Co. has formulated the most stringent and comprehensive measurement requirements for fair employment and social responsibility practices ever developed for multinational corporations operating in a foreign country.

As a result of the principles, the last six years have marked the beginning of a revolution in industrial race relations in South Africa.

Unfortunately, even considering these beginnings, the vast changes necessary are not happening fast enough. The necessity for greater changes—visible, broad, effective and quick—is imperative. No one is more aware than I that the principles and other codes must be pushed harder for greater and faster results. It is my view that if the principles and codes of other nations are enforced and vigorously implemented and monitored, they can work for change, but in order to bring this about, more pressure is needed on the companies for fuller and swifter compliance.

In my opinion, the voluntary support of the principles has been effective, but is not getting the desired results quickly enough. More enforcement is needed. As I have testified before congressional committees on several occasions: "the full compliance with the principles of all American companies with operations in the Republic of South Africa should be made mandatory by the United States government, and backed up with embargoes, tax penalties, sanctions, loss of government contracts and any other effective means."

There are 150 American companies operating in South Africa that have not as yet signed the Sullivan principles, and against those companies there should be immediate divestment actions by stockholders, institutions, pension funds, government bodies and other fiduciaries. These companies represent 20 percent of the investments of American companies in South Africa.

Of the remaining 150 companies that have signed the principles, one-third are receiving "failing grades" in compliance, according to the annual Arthur D. Little report. These companies should be contacted by stockholders and fiduciaries and asked for written assurances they will do better in the coming year, accompanied by a plan for doing so. Otherwise there should be targeted divestment actions against those companies. Companies receiving "passing grades" according to the Little Report should be urged by stockholders to remain in their top categories, or face divestment.

American companies employ less than 1 percent of the workers in South Africa. For these efforts on the part of multinational companies to be broadly visible and effective, participation will have to be global. I have traveled abroad and have urged divestment actions against foreign companies in South African subsidiaries that are not living up to their codes. I have appealed for strong government action by the nations and their parliaments as pressure against company noncompliance.

Foremost, I see the necessity for the recognition of the rights of association for black workers, and the recognition of their representative registered and unregistered trade unions, thereby empowering black workers to speak out for their rights on the job, as they will one day speak out for their rights in society. The growing strength of the black worker is one of the greatest hopes for peaceful change in South Africa.

It is clear that the main problem in South Africa is not just fair employment practices, or equal opportunity, or better schools, as important as all these needs are. The main problem is freedom, including the end to influx control, an end to the incredible homeland policy, and full political equality for the black population. Therefore, beyond the principles, it is my position that until apartheid ends and full equality is achieved for blacks, there should be no new expansion in South Africa by American companies, no new bank loans to the South African government, and no sales to the South African police or military.

Perhaps the Sullivan principles and the other codes in the world will only do so much, and only go so far. Perhaps the only way South Africa can be fundamentally changed is by massive conflict and a devastating war. But I believe that attempts must be made to find peaceful means for change if it is still possible.

If these world multinational company efforts are aggressively initiated, and broadly and effectively applied and closely monitored, they will have to make a difference.

None of us can be sure the total goals of the principles will ultimately be attained; but things are beginning to happen in South Africa as a result of the principles. They are a catalyst for social change in South Africa.

In this endeavor, powerful support will be needed beyond the companies, including unrelenting and much clearer commitments to racial justice in South Africa from the president of the United States, Congress and other government leaders and nations. But I have faith that with God's help, and with all the forces for human justice—within and without South Africa—aggressively pursuing their aims, there is still hope for a nonviolent solution to the elimination of apartheid. Considering the awesome consequences and magnitude of death and destruction and international upheaval should these efforts fail, somehow we must succeed.●

MEDICARE REFORM BILL INTRODUCTION

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. GREEN. Mr. Speaker, today I am introducing the Medicare Reform Act of 1983, which seeks to extend coverage under the medicare program. I am pleased to be the sponsor of this bill, which is aimed at providing more services to senior citizens and designed to reduce the cost of the program by including some preventive measures. I hope that my colleagues in the House will give this legislation serious and thoughtful consideration. In the past, I have introduced and seen passed provisions of my bill extending coverage. This bill is a continued effort to enact reforms in our system.

I realize that many of us here today are concerned about the Federal budget and are trying to balance fiscal restraint with adequate funding levels for social services and health care. I feel, however, that health care for seniors is not an area in which we are spending unnecessarily. Our seniors are a resource and, as their numbers grow with our demographic changes, are an active and important part of our Nation. Because their health is vital to them and to their participation in all sectors of society, I think it

is important for us to aid seniors in paying for health care. They, more than any other sector of our population, utilize health care services more frequently and extensively. The cost of this health care is fast becoming prohibitive. My bill would include coverage under the program for the fitting, prescribing, and cost of eyeglasses, hearing aids, and dentures. It also provides coverage for dental work, annual physical examinations, and routine foot care. It liberalizes the requirement for reimbursement for home health care and includes "routine chore services" as part of a home health program, as well as eliminating the $60 deductible under part B of the program and authorizing reimbursement for orthopedic shoes.

Over the long term, many of my proposals would decrease costs for the program by decreasing the need for hospitalization. For instance, if the medicare program covered annual physical exams, beneficiaries would be more likely to go have the exam, which would result in inexpensive early detection and treatment of a problem instead of requiring more serious and extensive treatment later. We would keep the program from institutionalizing people who do not have the capacity to live totally independently but who do not need the 24-hour care of a costly institution by liberalizing home health requirements. Coverage for routine foot care and orthopedic shoes could, again, reduce costs over the long run by preventing the occurrence of problems which have the potential to become more serious later in life and, in the end, put more financial strain on the system.

I do feel that this is an area in which we have a responsibility to provide support, and I am hopeful that we shall give some time to discussing this issue during the 98th Congress.●

THE 75TH ANNIVERSARY OF SOUTH PHILADELPHIA HIGH SCHOOL

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FOGLIETTA. Mr. Speaker, today I want to commend the students and Alumni of South Philadelphia High School on this the 75th anniversary of the school.

Few schools in this Nation, let alone in this city, have contributed more to every sector of our society. This list of graduates who have made their marks on the canvas of America's landscape is awesome, to say the least.

The arts, government, science, medicine, business, the field of education and the field of sports—all have been profoundly influenced by the sons and daughters of South Philadelphia High School.

As they gather on May 11, 1983, to celebrate those 75 years of glory and triumph, we can only hope that the next 75 years are as generous to the Philadelphia area and to America as were the previous 75.

Again, Mr. Speaker, I offer my congratulations.●

THREE CELEBRATE 25 YEARS IN PRIESTHOOD

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. DYSON. Mr. Speaker, it is with great pleasure that I recognize three dedicated Catholic priests in the First District of Maryland, all of whom will be celebrating the 25th anniversary of their ordination to the priesthood on May 31, 1983.

A native Washingtonian, Father Paul F. Liston attended St. Paul's (now Mackin) High School, Catholic University, and Christ the King Seminary in St. Bonaventure, N.Y. He was ordained to the priesthood by Cardinal Patrick A. O'Boyle on May 31, 1958, at St. Matthew's Cathedral.

Following ordination he was assigned to St. Hugh's Parish, Greenbelt, and was transferred to Blessed Sacrament in 1962. He was on the faculty of Cathedral Latin School from 1964 until 1971 when he was appointed a chaplain in the campus ministry at American University, with residence at Annunciation Parish.

After a year of sabbatical study from 1979 to 1980, Father Liston was assigned to St. Francis Xavier Parish, Washington, as associate pastor. He was appointed pastor of Holy Face Parish, Great Mills, in 1981.

Father Richard J. Smola, a native of Cleveland, Ohio, attended John Carroll University there and St. Mary's Seminary in Baltimore. He was ordained to the priesthood by Cardinal Patrick A. O'Boyle on May 31, 1958, at St. Matthew's Cathedral.

Father Smola's first assignment was to St. Ignatius Parish, Oxon Hill; and he has also served as an associate pastor at St. Peter's, Washington; St. Mark's, Hyattsville; Holy Angels, Avenue; St. Ambrose, Cheverly; and Holy Redeemer, Kensington.

In 1974 he was assigned as pastor to Holy Face Parish, Great Mills, and in 1976 was appointed the vicar for St. Mary's County. In 1981 he became pastor of St. Aloysius Parish, Leonardtown, and dean of St. Mary's County.

Father Francis J. Murphy was born in Jersey City, N.J., and attended schools in New York City and St. Pius X College, Saranac Lake, N.Y. He received his seminary training at Regina Cleri Seminary, Saskatchewan, and was ordained by Cardinal O'Boyle on May 31, 1958, at St. Matthew's Cathedral.

He was an associate pastor at St. Anthony's Parish for 3 years following ordination, then joined the faculty of Cathedral Latin School, where he was chairman of the religious education department. He remained there until 1967, and from 1963 until 1967 was also assistant director of the Archdiocesan Confraternity of Christian Doctrine Office.

From 1970 until 1973 Father Murphy was on the faculty of the University of San Francisco, and on returning to the Washington Archdiocese was appointed director of the Archdiocesan Office of Education, a post he held for 3 years. In 1975 he was appointed director of the Archdiocesan Office for Research, Planning and Development, and in 1977 was named assistant to Bishop Eugene Marino on the Archdiocesan Evangelization Coordinating Committee.

In 1978 he accepted a 1-year appointment as a visiting professor at the University of San Francisco, and in 1980 he became administrative assistant to the president of the National Catholic Educational Association.

Following an appointment as associate pastor of Blessed Sacrament Parish in 1979, Father Murphy was named administrator pro tem of St. Mary's, Bryantown. Since June of 1982 he has been on the faculty of Holy Name College, Oakland, Calif.

Each of these priests has devoted 25 selfless years to the church, and it is with deep appreciation that I congratulate them on their long record of service to humanity.●

BILATERAL FOREIGN AID: THE CHINESE LESSON

HON. JACK KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. KEMP. Mr. Speaker, it is always gratifying to have other nations follow our example of generosity. Unfortunately, in the field of foreign aid there appears to have been a problem in translation.

The People's Republic of China, a vast and underdeveloped Communist economy has initiated a bilateral foreign aid program. On the eve of his visit to Yugoslavia, Communist Party Secretary Hu Yaobang has announced a foreign aid package of $120 million to that nation. The Financial Times reports that the aid package is being used as a foreign policy tool to "pave the way for a cordial reception." While this is normally one of the aims of foreign aid, I question the financing mechanism being used by the PRC.

Many of our colleagues will recall that the PRC has recently begun borrowing substantial amounts from the World Bank, including the interest-free, 50-year loans disbursed by the International Development Association. In 1983, this lending will amount to $260 million, with about half in the interest-free category. In other words, the PRC will borrow, free of interest with 50 years to repay, exactly the funds which it is using to "pave the way" for Mr. Hu.

It may surprise many of our colleagues to know that they are financing the PRC's foreign aid program. It may further surprise them to know that their generosity is about to increase. The supplemental appropriation bill reported out of the Foreign Operations Subcommittee includes an extra $245 million for IDA. This is in addition to the $700 million already provided for fiscal year 1983.

Of course, not all of these additional IDA funds will be provided for relending in foreign aid programs. The World Bank's Monthly Operational Summary for March indicates that funds will be made available for improving facilities for mining, petroleum production and petrochemicals, all of which are owned by nationalized industries and compete directly with our domestic, privately owned industries.

So that my colleagues may review the lessons to be drawn, I ask that the Financial Times article be printed in the RECORD.

[From the Finance Times, May 10, 1983]

CHINA LENDS YUGOSLAVIA $120 MILLION ON EVE OF HU VISIT TO BELGRADE

(By Aleksander Lebl in Belgrade and David Buchan in London)

China has taken the unusual step of making Yugoslavia a short-term hard currency loan of $120m, thereby helping pave the way for a cordial reception in Belgrade today of Hu Yaobang, its top party leader, on the second leg of his East European tour.

Hu's first trip abroad in his new capacity as general secretary of the Chinese Communist Party is clearly designed to reward nonaligned Yugoslavia and maverick Romania for maintaining friendly ties with Peking, even during the worst of Sino-Soviet hostilities. It also seems aimed at sounding out reaction to current reconciliation moves between China and the Soviet Union.

The Chinese official is confining his trip to Yugoslavia and Romania, where he held weekend talks with President Nicolae Ceausescu. But senior members of his entourage are due to go on to the other five East European countries that are close allies of Moscow.

China has now joined 15 Nato and neutral governments in the West, as well as Kuwait, in giving Yugoslavia financial loans and trade credit extensions worth $1.3bn to help it overcome its debt servicing crisis. Peking, like the rest apparently judges Yugoslavia to be a valuable buffer between Nato and the Warsaw Pact.

Unlike the Western countries, whose aid to Yugoslavia is in the form of government agreements, the Chinese loan is a short-term deposit with the Yugoslav national bank.

This move follows on a trade protocol signed by Mr. Mijat Sukovic, the Yugoslav Vice-Premier, in Peking in March. This calls for a substantial increase in two-way trade, from only $50m last year to a surprising $1.2bn in 1984. Yugoslavia has also agreed to reconstruct Chinese factories in Tientsin, in return for oil which China is owed in barter deals from the Middle East and Africa.

Cutting Yugoslavia's oil import bill settled in hard currency is a Government priority. On his trip to Belgrade in March, Mr. Nikolai Tikhonov, the Soviet Prime Minister, promised a 20 per cent increase this year in Soviet oil shipments under the bilateral clearing arrangement between the two countries.

In fanning out across Eastern Europe, Chinese officials are also giving their version of remaining obstacles to Sino-Soviet rapprochement. At a Bucharest dinner in his honour late last week, Hu made only an oblique reference to past hostilities with the Soviet Union by thanking Romania for invaluable support in China's defence of "just norms of international relations and of relations between Communist parties."

In an interview with Tanjug, the Yugoslav news agency, however, Hu said that Indochina, where Moscow and Peking are backing rival claimants for power in Kampuchea, was "obviously" the main obstacle. He also criticised the "military occupation of one socialist country by another," an apparent reference to the Red Army's presence in Afghanistan.

RABBI LANDSBERG—FIFTEEN YEARS OF DEDICATED SERVICE

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. DWYER. Mr. Speaker, it is an honor and privilege to call to the attention of my colleagues the many achievements of Rabbi Alfred B. Landsberg who is celebrating his 15th anniversary at Temple Emanu-El in Edison, N.J.

Rabbi Landsberg is a humanitarian in the truest sense of the word. He has made a vast contribution not only to the synagogue, but to our community as well.

He has served twice as president of our local clergy association and has also presided over the Rabbinic Association of Middlesex County, N.J.

Among his special interests is his work as chaplain of the Woodbridge State School where his example and guidance have enhanced student life.

At Temple Emanu-El, he is a most caring and responsive rabbi, serving his congregation with a sense of purpose and compassion for people that is truly inspiring.

Our community is celebrating Rabbi Landsberg's 15 years of dedicated service and showing our appreciation through "A Gala Evening of Song," a most fitting tribute to a man whose unselfish efforts and spiritual guidance have been a gift to us all.●

SACRAMENTO'S LARRY WREYFORD

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. FAZIO. Mr. Speaker, I rise today in the House of Representatives to pay tribute to Larry Wreyford, an Air Logistics Command management specialist at McClellan Air Force Base. I am pleased to announce that Mr. Wreyford has recently been honored with the Department of Defense Individual Value Engineering Award for fiscal year 1982. This award honors a valued engineering proposal that will save the Air Force nearly $110 million in equipment and fuel costs over a 2-year period. The plan proposes switching support generators, now used to generate power for bomber and cargo aircraft on the ground, to the same use for fighter aircraft. These generators burn 38 gallons of fuel an hour, but Wreyford found that generators burning 7 gallons per hour would produce adequate power for the bomber and cargo aircraft. The fighter aircraft, which have greater power demands, will make more efficient use of these generators, and new fuel efficient generators can be purchased for the bomber and cargo aircraft.

Congress is now engaged in a crucial debate over the adequacy of our Nation's defense capabilities, a debate that is often overwhelmed with discussions of weapons research and development, and the procurement of billion dollar weapons systems. This timely recognition of Larry Wreyford serves to illustrate the important role that our people in operations and maintenance play in securing our Nation's defense. We can look with pride on the contribution of Larry Wreyford in insuring that the funds appropriated by Congress are used to build a defense that is second to none in strength and efficiency.

Mr. Wreyford has compiled a distinguished record of service to his country, beginning in World War II as a B-17 pilot and continuing for 21 years in the logistics field, before retiring in 1963. Mr. Wreyford began a second career in 1964 at McClellan Air Force Base, where he has advanced steadily to his present position of program manager for aircraft ground support generators and other equipment. Larry Wreyford has set a high standard of cost consciousness in Government service for his colleagues and all Federal employees to emulate.●

"YOU'RE LOOKING GOOD CHAPPIE" WESTCHESTER COUNTY, N.Y., DEMOCRATS HONOR "CHAPPIE" POSILLIPO

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. OTTINGER. Mr. Speaker, I rise today to call to the attention of my colleagues the distinguished career of Anthony "Chappie" Posillipo, who is retiring after 15 consecutive years as supervisor of the town of Rye, N.Y. I am proud to be among those who will honor Chappie at the annual Westchester County Democratic dinner on May 21 at the Rye Hilton in New York.

During his administration, Chappie always satisfied both the desires and needs of his constituents. Under Chappie's 30 years of leadership, the town of Rye has grown and matured, yet has maintained the personal and orderly character of a small New England village. With Chappie's guidance, the town of Rye has become the home of sophisticated shopping centers, the beautiful Rye Town Hilton, and most recently, the new world headquarters for the General Foods Corp. He has brought prosperity and pride to the people of Rye.

When Chappie Posillipo picked up the gavel of town supervisor, he laid aside the mason tools he had used for more than 30 years. At the age of 11, he had to abandon his plans to enter the priesthood and assume the head of a household of six sisters and one brother. His father was a master stonemason and Chappie followed in his footsteps by apprenticing to his father's union local 48.

In a few years, Chappie was an adroit mason. Having grown up attending mass in a small one-room basement chapel, Chappie supervised the construction of the Corpus Christi Church, which stands today as a monument to Chappie's dedication to helping his fellow citizens and his skills in planning and masonry.

Steadily, Chappie moved up the leadership of his union and at 18 years of age was elected corresponding secretary of the local in 1926. In 1937 he was elected as the union's full-time business agent and financial secretary and held these positions until his election as town supervisor in November 1953. He then resigned the position of business agent, but has continued to this day as the financial secretary of local 48. Many times, Chappie has used his mediating abilities and knowledge of industrial relations to resolve difficult labor problems in Westchester County.

Yet, for all his time devoted to work, Chappie found time in his youth to be both athlete and sports manager. In the early 1930's his management of the Corpus Christi Church teams built them into a semi-pro club that had a working arrangement with the New York Yankees as a farm club. So successful were their games that Chappie agreed to design a 2,000-seat ball park with an advanced night lighting system.

Any tribute to Chappie suffers from the fault of leaving out so many of his accomplishments. In Westchester County, Chappie's work on behalf of others and his popularity are legend. I can only conclude by saying, as Chappie has always been fond of saying to the legions of people whose lives he has touched, that you, Chappie, are indeed "looking good."●

WORKING TOGETHER FOR EQUALITY

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mrs. HOLT. Mr. Speaker, today I would like to take the time to recognize recent actions of the Human Rights Commission of Howard County condemning hate groups and their activities. As a representative of a portion of Howard County, I would like to commend the commission for its important work and voice my strong opposition to activities of hate groups across the country. This resurfacing of racial and ethnic hatred surely represents the baser side of humanity. A side of mankind we cannot afford to ignore and just hope it will go away.

I feel we in the State of Maryland are taking some positive steps toward reducing the incidence of hate group activities. The Maryland General Assembly has increased the penalties for certain hate group activities and made many of them felonies. The commission in its resolution also offered several constructive ideas as to how the Howard County government can reduce the activities of hate groups. For instance, the resolution calls upon the county executive and county council to enact legislation that prohibits distribution of hate group literature on county-owned or supported property and makes such actions grounds for dismissal for county employees.

I encourage the county executive and county council to take the necessary steps to insure that this legislation is passed. In addition, I would encourage other Members of this body to work with local elected officials and concerned citizens to combat the repulsive acts perpetrated by these vicious hate groups.●

VICTOR POPOVSKY

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. HARKIN. Mr. Speaker, I am honored and obligated to raise my voice on behalf of a family denied the right to emigrate freely from the Soviet Union, contrary to the Universal Declaration of Human Rights. The Soviets are a signatory to this and the Final Act of the Helsinki Accords, which guarantees expeditious handling of requests to emigrate. Their behavior in the case of Victor Popovsky and his family of Sukhumi, Georgia, contravenes this international agreement.

Almost 8 years have passed since the Popovskys and their six children first applied for visas to leave the country. This request was unjustly denied. The reason was that Mr. Popovsky's passport stated his nationality as "Russian," despite the fact that his birth certificate shows his mother is of Jewish origin. Regardless of this national classification, Mr. Popovsky and his family should be allowed to live in the country of their choice. Bureaucratic subterfuge is being used to deny the Popovskys this internationally recognized human right.

I extend my hand toward Victor Popovsky and his family. May the Soviet Union abide by the treaties it has signed and allow them to emigrate.●

ANTI-SEMITISM IN NICARAGUA

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. PHILIP M. CRANE. Mr. Speaker, as the House continues to deliberate our policy in Central America, I would like to call to the attention of my colleagues a little known but nonetheless disturbing element in the increasingly restive situation in Nicaragua. To those who consider the Sandinistas a group of gentle agrarian reformers interested in social justice, their treatment of the populace exposes them for what they are—totalitarians, replete with repression every bit as bad as any other totalitarian state behind the Iron Curtain.

Mr. Speaker, the Sandinistas' persecution of minorities and denial of religious freedom should be as disturbing to our liberal, elitist friends in this country as to freedom-lovers. In a zeal to hold to account the Government of El Salvador, which at this very moment is battling an assault on democracy mounted from the capital of

Nicaragua, many individuals seem to have lost their perspective.

I have just received, and would like to insert in the RECORD at this point, a profoundly disturbing report which contains the following statement by Rabi Morton Rosenthal, Latin American director for the Anti-Defamation League of B'nai B'rith, concerning the overtly antisemitic aspects of the Sandinista takeover in Nicaragua:

Nicaraguan Jews say that the main reason for their flight is the fact that they were treated in a discriminatory manner by the revolutionary government. They claim that their properties were among the first to be confiscated; Jews who owned factories and stores were summarily ejected from the homes and places of business and the properties turned over to workers. Many accusations were made against them, without proof. Often, their individual safety was threatened.

After the earthquake, the Jewish community built a synagogue to replace that which had been destroyed. In September 1978, the doors of the synagogue were torched by Sandinista supporters while the congregation was worshipping. Now, the synagogue is a Sandinist building with propaganda posters covering the religious symbols at the front entrance and anti-Zionist posters on the walls.

To any student of history, this development should come as no surprise. Collectivist-statist totalitarians of every stripe, be they Fascist, Nazi, or Communist, have consistently persecuted Jews and other minorities. The Sandinistas clearly fall into the same category as all the memorable thugs in history who taught them everything they know when it comes to the commission of crimes against humanity.●

TRIBUTE TO MR. STEVE OWENS

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1983

● Mr. BERMAN. Mr. Speaker, I rise today to call to the Members' attention the distinguished service given to the community of Mission Hills, Calif., by Mr. Steve Owens. Mr. Owens has given freely of his time and energy in the last year as president of the Mission Hills Chamber of Commerce.

During his term as president, Steve Owens has brought a greater sense of political knowledge and awareness to the Mission Hills Chamber of Commerce. Members have had opportunities to become more familiar with the issues of utility rate increases, immigration, gun control, and crime through his efforts. Steve Owens has also worked to create a closer relationship between the chamber and local schools and community groups. He helped to organize area cleanup efforts, and assisted in the refurbishment of a building in nearby Pacoima. And, of some note in this time of austerity, he guided the chamber through 1982 with a balanced budget.

Steve Owens' commitment to the community does not stop there, however. He serves as a member of the board of directors of the United Chambers of Commerce, as the advisory group legislative chairman of the North Valley Occupational Center, and on the Police Athletic League Association, the San Fernando Valley Board of Realtors, the Valleywide Committee Executive Board, the San Fernando Valley Business and Professional Association, the Parent and Teachers Association, and the Holy Cross Hospital Century Club.

Steve Owens has been honored by the San Fernando Valley Board of Realtors, and, in 1977, was named Man of the Year by the Mission Hills Chamber of Commerce. He has served as a director, as vice president and as secretary before becoming president of the chamber in 1982.

It is a pleasure, Mr. Speaker, to join with the members of the Mission Hills Chamber of Commerce in commending Steve Owens for his outstanding year of service as president. I would like to take this opportunity to extend to him my personal congratulations, and best wishes in all of his future endeavors.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, May 12, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 13

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on S. 137, to permit the continued issuance of mortgage revenue bonds after December 31, 1983, and S. 1061, to revise certain IRS provisions relating to the tax treatment of bonds guaranteed by certain Federal agencies.
SD-215

* Labor and Human Resources
Business meeting, to mark up S. 772, proposed Smoking Prevention Health and Education Act, S. 1129, proposed Community Volunteer Service Act, S. 564, proposed U.S. Academy of Peace Act, Senate Concurrent Resolution 22, expressing the sense of the Congress with respect to implementing the objectives of the United States Decade of Disabled Persons (1983-92), an original bill authorizing funds for fiscal years 1984, 1985, and 1986 for the Education for the Handicapped Act, and an original bill authorizing funds for fiscal years 1984, 1985, and 1986 for the Rehabilitation Act.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

MAY 16

9:00 a.m.
Judiciary
To hold hearings on the substance of S. 66, proposed Cable Telecommunications Act.
SD-226

9:30 a.m.
Finance
Health Subcommittee
To hold hearings on the administration's budget proposals for fiscal year 1984 to revise beneficiary cost-sharing requirements under the medicare and medicaid programs.
SD-215

10:00 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To resume hearings to examine the effects of coal slurry pipelines on the rail industry, shippers, and consumers.
SD-253

Labor and Human Resources
Aging Subcommittee
To hold hearings to discuss the progress made in the treatment of Alzheimer's disease.
SD-430

MAY 17

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold oversight hearings on the International Monetary Fund's gold reserves.
SD-538

Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To hold hearings on S. 285, to designate certain lands in New Mexico as the Bisti Badlands Wilderness, S. 626, to designate certain lands in Arizona as the Aravaipa Canyon Wilderness, S. 862, revising certain provisions of the Omitted Lands Act of 1962 with respect to omitted lands along the Snake River in Idaho, and S. 1042, to convey certain lands in Lane County, Oreg.
SD-366

Rules and Administration
To hold hearings on S. 85, to provide for public financing of U.S. Senate general election campaigns, S. 151, to limit contributions to U.S. Senate campaigns by certain multicandidate political committees, S. 732, to increase individual and party participation, to provide for the adjustment of contribution limits, and to allow candidates to control expenditures made on their behalf, S. 810, to provide for certain adjustments in campaign contribution limits, and other pending legislation.
SR-301

10:00 a.m.
Environment and Public Works
To hold hearings on the water resources provisions of S. 267, to facilitate the development of interstate coal pipeline distribution systems by granting the Federal power of eminent domain to those interstate pipelines which are determined to be in the national interest.
SD-406

Judiciary
Business meeting, to consider pending calendar business.
SD-226

10:30 a.m.
Select on Intelligence
Closed briefing on intelligence matters.

SENATE—*Thursday, May 12, 1983*

(Legislative day of Monday, May 9, 1983)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. Our prayer today will be offered by Rabbi Efry Spectre, from the Adat Shalom Synagogue, Farmington Hills, Mich., who is sponsored by Senator CARL LEVIN, of Michigan.

PRAYER

Rabbi Efry Spectre offered the following prayer:

Our God and God of our ancestors:

As this august legislative body, the U.S. Senate, once more assembles we call to mind at this season Your giving of the Law thousands of years ago to the Children of Israel at Mount Sinai.

Ever conscious that You have decreed us made in Your image, and seeking anew some understanding for applying meaningfully that concept, we remind ourselves that, with all the possible attributions of glory and power which might invoke Your Name, You have chosen to identify Yourself in those Ten Commandments as "the * * * God Who brought You forth out of * * * the House of Bondage."

O Lord, may these Senators, our great country's leaders, in like manner find the fortitude within them to make this their touchstone—that the law issuing forth from these revered Chambers find its source and inspiration in the ideal of responsible freedom. May we be worthy, thereby, to walk with You in Your "ways of pleasantness" and know Your "paths of peace." Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

PROPOSALS FOR THE SENATE'S BICENTENNIAL

Mr. BAKER. Mr. President, the 200th anniversary of the Senate is less than 6 years away. With this singular event in view, the Senate in 1980 established a Study Group on the Commemoration of the U.S. Senate Bicentenary. I was privileged to serve on that 16-member panel along with the distinguished minority leader, the chairman and ranking member of the Rules Committee, and our colleagues Senators WARNER, GORTON, and PELL. We were joined by former Senators Hugh Scott, Milton Young, and Wendell Anderson, as well as the Secretary of the Senate, the Librarian of Congress, the Archivist of the United States, and three scholars of national distinction.

In December 1982, the study group issued its final report with 14 specific recommendations including ceremonial events, exhibitions, conferences, and publications. The study group requested that each current and former Member and officer of the Senate have the opportunity to comment on the report. Those comments now have been received and appended to the report.

Mr. President, the study group also recommended that its final report be published as a Senate document to insure widest possible dissemination to the American public. Accordingly, Mr. President, I ask unanimous consent that the final report of the Study Group on the Commemoration of the U.S. Bicentenary be printed as a Senate document, and I also ask unanimous consent that it be printed in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The document is as follows:

FINAL REPORT: STUDY GROUP ON THE COMMEMORATION OF THE UNITED STATES SENATE BICENTENARY

BACKGROUND

On March 5, 1980, Senator Robert C. Byrd introduced for himself and for Senators Howard Baker, Ted Stevens, and Harry Byrd, Jr., Senate Resolution 381 which provided for the establishment of a Study Group on the Commemoration of the United States Senate Bicentenary. The sponsors expressed their desire to observe the Senate's 200th anniversary in 1989 in an appropriate manner. Senator Byrd suggested publications, ceremonial observances, conferences, and exhibits. Senator Stevens added that he believed current members of the Senate have the responsibility "to make certain that the institution of the Senate, as such, is recognized, and that this anniversary date is appropriately brought to the attention of the public." By creating the Study Group well in advance of the bicentennial, the Senate could also capitalize on the economics of careful advance planning, draw as much as possible on existing resources, and keep expenses to a reasonable minimum.

The Senate agreed to S. Res. 381 on August 1, 1980 and amended it on January 28, 1982 (S. Res. 285) to extend the Study Group's reporting date to December 31, 1982. The Study Group held three meetings in Washington, on March 24, September 14, and December 2, 1982. Members of the offices of the Senate Historian and Senate Curator, under the jurisdiction of the Secretary of the Senate, served as staff to the Study Group, further minimizing operating expenses. Staff consulted with representatives of the Library of Congress and National Archives, with professional historians, museum curators, and filmmakers, and with those involved in planning for the 200th anniversary of the United States Constitution and formation of the federal government. In this latter connection, the Senate passed S. 2671 on October 1, 1982 providing for a sixteen-member presidential commission "to promote and coordinate activities to commemorate the bicentennial of the Constitution."

RECOMMENDATIONS

The Study Group recommends a coordinated program of publications, ceremonial events, conferences, and a film to inform the nation on the role of the Senate in the workings of the federal government, from its historical beginnings through two hundred years of growth, challenge, and change. Throughout its deliberations, the Study Group considered the most appropriate means for the Senate to inspire and support such commemorative activity. It is the strongly held view of the Study Group that the Senate promote only those meritorious projects that could not be undertaken more effectively by individuals and organizations independent of the Senate. By beginning planning now, the Senate can also minimize the costs of these important undertakings while maximizing their results.

These recommendations are of several types. First are the recommended projects requiring specific additional funding. They include a biographical directory of the Senate's members from 1789 to 1989, a guide to the Senate's records at the National Archives, microform publication of selected heavily-used 18th and 19th century Senate records, two bicentennial conferences, exhibits for display in the Capitol and throughout the nation. Second are recommended projects that can be undertaken within the Senate through existing resources. These include a Senate historical almanac, a guide to locations of all former senators' manuscript collections, and a single volume collection of memoirs of Senate officials since 1789. Other projects, such as a documentary film on the Senate's history and functions, the issuance of a commemorative postage stamp and medals, and exhibits at the National Archives and Library of Congress, can be conducted independently of the Senate.

PROJECTS REQUIRING SPECIAL FUNDING

(1) *Biographical Directory of the United States Senate, 1789-1989.*—The Study Group proposes a single, up-to-date comprehensive biographical guide to the more than 1,750 individuals who have served in the Senate since 1789. This guide would replace and expand upon the now out-of-print "Biographical Directory of the American Congress, 1774-1971." Although that directory appeared in eleven editions since 1859, its format had become unwieldy and prohibitively expensive, and there are no plans to update or reprint it. That publication also

suffers major shortcomings: it provides information on members only prior to and after their service in Congress, with no reference to their committee chairmanships or legislative accomplishments; it also lacks citations to biographies and other books by and about members. The proposed biographical guide would incorporate this additional information as well as newly written profiles of members who have arrived since 1971.

The Study Group proposes a 600-page directory containing 200-500 word sketches and bibliographical citations for all senators serving in the first one hundred Congresses. The Study Group considered and rejected a proposal to commission scholars to write new accounts of all former senators similar to those for approximately 500 members appearing in the "Dictionary of American Biography." This would entail great expense and would tend to duplicate articles in the Dictionary, even though many of them, prepared in the 1930s, are dated.

Should the House of Representatives decide to undertake a similar revision for its ten thousand former members, these projects could be easily coordinated.

This project could readily take advantage of the Senate's existing computer facilities. The Senate Historical Office maintains a computer data file with information on books and articles on most former senators. Enrichment of this data file with biographical information should prove to be a simple and cost-effective operation.

(2) *Guide to Senate Records at the National Archives.*—The Study Group proposes the preparation and publication of a guide to the approximately twenty thousand linear feet of non-current permanent records of the United States Senate at the National Archives. Dating from 1789, these materials are fundamental sources for the study and understanding of the Senate's history and role in the legislative process and of the general history of the American people. They are a basic component in the Senate's institutional memory.

Currently there is no useful guide to this important collection. As an outgrowth of the Study Group's belief that these records constitute a vital portion of the nation's documentary heritage, action was initiated after the Group's March 1982 meeting to institute a preservation program for deteriorating 18th and 19th century records. The National Archives submitted a comprehensive plan under which it would contribute 25 percent of the rehabilitation costs. The Senate approved this plan, and funding was made available through the Supplemental Appropriations Act for Fiscal Year 1982. A guide to the full collection would greatly promote its use.

The National Archives can utilize its present computer system to facilitate the necessary revision and updating of its preliminary inventory to Senate records, published nearly four decades ago. That agency estimates this project could be accomplished over a five-year period at a cost of $90,000 per year.

(3) *Exhibitions and Ceremonial Events.*—The Study Group recommends a series of exhibits to be installed in the Capitol or Senate office buildings. The first would highlight notable events in the first century of the Senate's history through display of a wide selection of original documents. A second exhibit would focus on works of American graphic artists depicting the Senate's formative years to the present. Drawings, engravings, architectural renderings, and photographs could all play a prominent role in illustrating the Senate's legislative, cultural, social, architectural, and artistic heritage. Since 1975, the Senate Commission on Art and Antiquities has acquired over two hundred engravings of the Senate that originally appeared in mid-to-late 19th century periodicals. This collection as well as the extensive photographic resources of the Senate Historical Office, will be invaluable to the development of this exhibition.

With the selection in the late 1950s of Henry Clay, Daniel Webster, John C. Calhoun, Robert M. LaFollette, Sr., and Robert A. Taft as outstanding former senators and the subsequent commissioning of their portraits for the Senators' Reception Room, a special gallery was created near the Senate chamber. Because it is one of the most popular rooms in the Capitol, it is proposed that a series of exhibits, which chronicle the periods in which these members served, be installed adjacent to the portraits in the Reception Room. The exhibit cases, although somewhat limited in size, would feature memorabilia related to the subjects as well as noteworthy documents and graphics.

Traveling Exhibitions: The Study Group recommends further consideration be given to circulating throughout the country exhibits based on special displays that are scheduled for installation in the Capitol building during the bicentennial period. Exhibits telling the story of the Senate through the works of American graphic artists and political cartoonists would lend themselves to this format.

The Study Group recommends that March 4, 1989 be observed in a joint session in the House of Representatives chamber. April 6, 1989 marks the two hundredth anniversary of the day the Senate achieved its first quorum and got down to business. The Senate could convene either in the Old Senate Chamber, or in its present chamber, on that date for a brief ceremonial program. Additional ceremonies associated with the signing and ratification of the Constitution might be planned for Independence Hall in Philadelphia.

(4) *Microfilm Publication of Key Senate Records.*—The National Archives recommends four specific projects for microfilming Senate records. The first would involve completing a longstanding plan to film the records of the precedent-setting first fourteen Congresses (1789-1817). The remaining projects (see appendix) were suggested because they involve records of greater historical interest that complement existing filmed collections of Executive and Judicial Branch records. The Study Group recommends that the filming of the first fourteen Congress' records be given a higher priority than the other three projects, but believes that all are worthy of Senate funding.

The records of the first fourteen Congresses have great precedential value and have been used extensively in research on constitutional, legislative, and administrative topics. Most of the earliest documents of the Executive and Judicial branches have already been microfilmed. In contrast, Senate records for the period have been filmed only in part. Filming Senate records for the first fourteen Congresses would prevent further wear and tear on materials vitally important for an understanding of our nation's history, besides making them more widely accessible to the American public.

PROJECTS REQUIRING NO SEPARATE FUNDING

(5) *Senate Historical Almanac.*—During its two hundred year existence, the Senate has been at the heart of the nation's political and constitutional development. Its 1,800 members have confronted a full range of public issues, from the profound to the ephemeral, with varying degrees of imagination and success.

The Study Group proposes a historical almanac that will capture in a chronological narrative the major issues, events, and personalities that have illuminated the Senate's past. Consisting of two sections, the almanac would include brief descriptions of major legislative confrontations, as well as of the development of institutional customs and precedents. The second section would provide lists, charts, and tables compiled within the Senate Historical Office in response to frequently asked questions related to characteristics of members' service and legislative performance.

The almanac, scrupulously non-partisan in substance and tone, would be published in an inexpensive paperbound edition of approximately 120 pages for widespread public distribution through members' offices.

In this connection, the Study Group wishes to take notice of a recent publication of the Library of Congress' Congressional Research Service, "Major Acts of Congress and Treaties Approved by the Senate, 1789-1980" (September 1982, 255 pages, Report No. 82-156 GOV).

(6) *A Guide to the Research Collections of Former United States Senators: 1789-1982.*—The Study Group is pleased to observe that the first volume in the projected series of bicentennial publications will soon be available. Work on the guide to the research collections of former senators has been underway for the past five years. The Senate Historical Office has surveyed 350 institutions believed to hold senatorial manuscripts and memorabilia, and has located information on more than 1,400 of the 1,659 former members. The result of the extensive search will be contained in a volume of approximately 500 pages to be published at the end of 1982. Included will be detailed information on locations of all known senatorial papers, oral histories, portraits, photographs, and memorabilia.

Arranged alphabetically by senator, the guide will provide a useful starting point for anyone contemplating research on the Senate and its many members. Several appendices will list senators by state with party affiliations, birth and death dates, and dates of Senate and House service. Another appendix lists individual repositories by state and city along with the senators whose collections they hold.

(7) *Staff Memoirs: The Senate From Inside.*—The Study Group recommends a single-volume publication that would bring together selected reminiscences, including letters, diaries, memoirs, and oral histories, of long-time Senate staff members. These long-serving staff, some of whose Senate careers spanned more than sixty years, bring a unique perspective to the institution through their close-range observations. The letters and diaries of three men alone encompass almost a century and a half of the Senate's history: Lewis Machen, 1809-1860; Isaac Bassett, 1831-1895; and Carl Loeffler, 1889-1949. For recent years, the Senate Historical Office has conducted an oral history program with former staff members, including Floyd Riddick, Parliamentarian Emeritus; Darrell St. Claire, former Assistant Secretary of the Senate; and several other senior staff whose Senate service predated World War II.

The single-volume edited publication would include annotations and appropriate

illustrations to enhance its usefulness and interest to scholars and the general public. Consisting exclusively of primary materials gleaned from public and private manuscript and oral history sources, the book would be approximately 400 pages in length.

(8) *Senator Robert C. Byrd's History of the United States Senate.*—The Study Group recommends the publication of the collected addresses on the history and traditions of the United States Senate, which Senator Robert C. Byrd began in March 1980. Carefully researched and cast from the party leader's unique perspective, these addresses are, in the Study Group's estimation, worthy of separate publication and wide distribution.

Projects recommended for further study (The Study Group strongly supports the objectives of proposals in this category, but lacks unanimity on the manner in which they would be accomplished).

(9) *Minutes of Democratic and Republican Party Caucuses.*—Since the beginning of this century both major Senate parties have held formal caucuses and have kept minutes of those sessions. Over the past twenty years these minutes have become more detailed, often including verbatim transcriptions. Although not official Senate records, the minutes are important documentary resources for an understanding of Senate operations and of great interest to researchers. The Republican party has generally granted access on a case by case basis, particularly for records more than two decades old.

The Study Group considered a proposal to publish, in edited form, party minutes more than twenty years old. It was argued that this would make them available to a wider audience than just those who could afford to travel to Washington and that participating senators would have the opportunity for review before publication.

After careful consideration, the Study Group found itself divided on this proposal, with some contending that the minutes were never intended to be made public, regardless of age. The Study Group believes this is a matter appropriate for determination by the Senate leadership. Although the Group makes no specific recommendation, it does not wish thereby to relegate this proposal to a secondary status.

(10) *Conferences and Symposia.*—The Study Group recommends that the Senate sponsor a minimum of two conferences between 1984 and 1989 related to development of the Senate's constitutional responsibilities and legislative role. The initial conference might be directed to an examination of alternative methods and approaches leading to publication of a scholarly history of the Senate. The second conference should be involved with substantive themes and issues of the Senate's past, present, and future. It might be appropriate to invite the oldest living former member of the Senate to preside at the 1989 conference. Specific topics should be formulated in cooperation with the Library of Congress, the Senate Historical Office, and "Project '87" of the American Historical Association and the American Political Science Association (see Appendix B), as well as other interested scholarly bodies.

(11) *A History of the United States Senate.*—In 1938 Professor George H. Haynes concluded a thirty-year research effort with the publication of his two volume "The Senate of the United States." Haynes' work focuses on the development of Senate procedure and precedents. After nearly a half-century it is very much out of date.

A new history is clearly in order and the Senate bicentennial provides an appropriate occasion for such an undertaking. Such a project obviously requires careful additional study. A positive step in that direction would involve convening a small conference of congressional scholars to discuss questions such as methods of research and writing, funding, single or multiple authorship, biographical as distinguished from institutional developments, and treatment of related topics such as the role of political parties. It might be useful subsequently to hold two or more conferences, wherein preliminary chapters could be presented, as a means of preparing such a history.

INDEPENDENT PROJECTS

(12) *Committee Histories.*—The Study Group recommends that individual standing committees consider expanding their existing histories, or commissioning new ones by drawing on the resources of the Library of Congress or retaining the services of independent professional historials. The Senate Historical Office could assist with preparation of outlines and related preliminary activities to ensure that projects are carefully delineated and kept within reasonable bounds of cost and completion schedule.

Research into the activities of individual Senate committees has been sporadic and generally unsatisfactory. Special investigative committees serve as the focus of the best existing historical studies. Most notable among them are the Truman War Investigating Committee, the Kefauver Crime Committee, and the LaFollette Civil Liberties Committee. There is no competent general history of any Senate standing committee. Several committees have published "histories" that are confined largely to lists of former members with brief accounts of legislative activities.

The Study Group considered a proposal for special Senate funding to commission or otherwise encourage the production of distinguished studies. After due consideration, the study group decided against such a plan. High quality studies require major research effort over extended periods of time. Ideally, these activities are conducted by graduate students writing doctoral dissertations or mature scholars whose interest in related fields is already well developed. The Study Group believes the process of identifying and "rewarding" such individuals would be complex and beyond the Senate's proper role. There is no reason for confidence that studies begun in the optimism inspired by special subsidy would be completed on time, or at all. The expense involved, in these austere times, simply eliminates this proposal as a realistic option. The Study Group believes the Senate could effectively encourage private sector research through the medium of bicentennial conferences that offer the prospect of modest honoraria and publication.

(13) *Film: "The United States Senate Over Two Centuries".*—The Study Group recommends support of a privately funded and historically based film focusing on the Senate's institutional development over the past two hundred years. The film should be designed for viewing on public television and for use in schools and colleges, public discussion groups, and within the Senate itself.

The American Political Science Association is preparing a "telecourse" entitled "Congress: We the People" (see Appendix B). Funding for the telecourse is provided by a grant from the Corporation for Public Broadcasting and the Annenberg School of Communication. The telecourse will draw upon the considerable library of footage gathered by Washington public television station WETA for its public affairs program "The Lawmakers," and from its regular coverage of Congress over the last decade. One theme of the telecourse will be to distinguish between the Senate and House, drawing upon the resources of the WETA public affairs production staff and a group of congressional scholars. Working within this format, it should be feasible to develop a program covering the Senate as a national institution and as an institution representing the states, picturing the Senate as both an integrated organization and a collection of its individual members. The Study Group believes the Senate should serve as a source of ideas and documentation, but not of direction, funding, or editorial control.

(14) *Commemorative Stamps and Medals.*—The Study Group has initiated action through the Postmaster General to have the Citizen's Stamp Advisory Committee consider a Senate commemorative stamp when it begins planning for the 1989 stamp program. The Study Group encourages further consideration of an appropriate process for design and issuance of national commemorative medals in conjunction with the House of Representatives.

IMPLEMENTATION OF RECOMMENDATIONS

(1) The Study Group recommends that its final report be distributed for comment to all current and former members and officers of the Senate. It further recommends that the report and a digest of members' comments be published as a Senate report or document and inserted in the CONGRESSIONAL RECORD to ensure widest possible dissemination.

(2) The Secretary of the Senate, in his capacity as executive secretary of the Senate Commission on Art and Antiquities and as supervisor of the Senate Historical Office should be responsible for pursuing the Study Group's individual recommendations through appropriate Senate channels. In this respect, he should consult with the Senate Commission on Art and Antiquities, the Senate leadership, and the Senate Historical Office Advisory Committee.

(3) The Senate may wish to establish a special bicentennial commission that would begin in the year 1987, at the start of the 100th Congress, to coordinate specific activities of the bicentennial period 1987–1989.

Respectfully submitted,

Hugh Scott, Chairman, Howard H. Baker, Jr., Robert C. Byrd, Charles McC. Mathias, Jr., Claiborne Pell, John Warner, Wendell Ford, Slade Gorton, Milton Young, Wendell Anderson, William F. Hildenbrand, Daniel Boorstin, Robert M. Warner, Forrest C. Pogue, Harold M. Hyman, William E. Leuchtenburg.

APPENDIX A: PROJECTS REQUIRING SPECIAL FUNDING

RECOMMENDATION NO. 1: BIOGRAPHICAL DIRECTORY OF THE UNITED STATES SENATE, 1789–1989

Proposal

There is no single, up-to-date comprehensive biographical guide to the more than 1,750 individuals who have served in the Senate since 1789. Several publications currently serve this function, although their shortcomings are significant. The Study Group proposes a 600-page directory containing 200–500 word sketches for all senators serving in the first 100 Congresses.

Each entry would include, at a minimum, the following information:

Name, party, and state represented.
Birth date and place.
Parents' occupation.
Education and military experience.
Previous occupations and political experience.
Name of spouse and number of children.
Congressional service dates.
Party leadership positions.
Major legislation, notable accomplishments and controversies.
Committee chairmanships.
Subsequent career.
Place and date of death and burial.
Books and articles by or about.

Much of the work for the proposed publication has already been accomplished. The out-of-print "Biographical Directory of the American Congress, 1774-1971" contains sketches for approximately 1,500 senators. Its entries, corrected and revised, would be placed in the Senate Historical Office's computer data base, which already includes information on the location of former senators' manuscript collections and books by and about former members. Categories not included in the Biographical Directory, such as committee chairmanships, notable accomplishments, and family information, would be added. Recently the Joint Committee on Printing decided not to undertake its customary ten-year revision of the "Biographical Directory of the American Congress, 1774-1971" in view of cost considerations. Apparently this was due in part to the large number of entries for House members, nearly 10,000. Should the House decide, as part of its Bicentennial commemoration, to publish its own biographical directory, such a volume easily could serve as a companion to that proposed for the Senate's.

Existing Congressional Biographical Reference Books

The Biographical Directory of the American Congress, 1774-1971.—This 1,972-page volume contains 200-word profiles of approximately 10,800 senators and representatives. It has appeared in eleven editions since 1859. The most recent three were published in 1949, 1961, and 1971. As noted above, the 1981 edition will not be published due to projected expense. Staff of the Joint Committee on Printing have prepared new sketches and revisions for 2,000 members in the event the House and Senate decide to issue future directories.

This volume has a number of shortcomings. Its most serious is that it tells virtually nothing of members' careers while they were in Congress. Many of its entries bear marks of 19th century authorship, as in that for Senator Blanche K. Bruce who is described as being "of the Negro race." The entry for Senator Joseph R. McCarthy includes nothing of his controversial career and 1954 Senate censure.

The Dictionary of American Biography.—The first of the Dictionary's twenty-six volumes appeared in 1928 and the most recent in 1982. The set includes notable Americans who have been dead for at least fifteen years and contains profiles, ranging from 500 to 4,000 words, of approximately one-third of all former senators. The Study Group considered a project that would commission scholars to write fresh accounts of all former senators based on this model. This effort would include the one thousand senators not in the Dictionary as well as updated profiles, for many of those in the Dictionary were written in the 1930's. After careful consideration, the Study Group rejected this approach as too costly, and essentially duplicative of the Dictionary. By expanding entries in the "Biographical Directory of the American Congress" and adding information on existing book-length biographies to the proposed volume's citations, the Study Group believes a useful, cost-effective, and appropriate publication would result.

RECOMMENDATIONS NO. 2: GUIDE TO SENATE RECORDS AT THE NATIONAL ARCHIVES

The Senate maintains approximately twenty thousand linear feet of its noncurrent records at the National Archives. Dating from 1789, the collection includes both floor and committee papers. These materials are basic sources for the study and understanding of the Senate's history and role in the legislative process, and of the general history of the American people. They contain evidence of each committee's organization and functions, furnish a complete legislative history of individual bills and laws, and serve as a rich source of reference material for topics within a committee's jurisdiction. Committee and related records are a vital component of the Senate's "institutional memory."

In 1937, the Senate transferred its records from various Capitol basement and attic storerooms to the then newly-opened National Archives for preservation and public use. Upon completion of a project to arrange the Senate's collection, the National Archives issued a 250-page "preliminary inventory" describing briefly the collection's major components through 1946. At that time the Archives expected to prepare a more detailed inventory, but has never done so. As a result, there is currently no reliable and comprehensive guide to Senate records. Since publication of the 1946 inventory, the pre-World War II collection has expanded and parts of it have been rearranged, rendering portions of the earlier inventory obsolete. No guide exists for materials deposited over the past four decades.

The Study Group believes that preparation of a comprehensive guide to Senate records at the National Archives, along with the soon-to-be-published catalog of former senators' research collections, would be a fitting project with which to commemorate the Senate's 200th anniversary.

The National Archives has a computer system that will facilitate revising and expanding the existing guide. That agency estimates that the cost of such a revision and updating would be approximately $450,000.

RECOMMENDATION NO. 3: EXHIBITIONS AND CEREMONIAL EVENTS

In the past decade, the Commission on Art and Antiquities has sponsored fifteen exhibitions devoted to the rich heritage of the Senate. For the most part, these exhibits have been installed in the Crypt area of the Capitol Building. Their subjects have been as diverse and multi-faceted as the institution itself and have ranged from a display of original documents illustrating the Senate's relationship with the presidency under the advice and consent clause of the Constitution, to an exhibit featuring the numerous U.S. commemorative postal issues which have been based on paintings and sculpture in the Senate's collection.

The bicentennial of the Senate provides an opportunity to produce a series of commemorative exhibits which would be installed in the Capitol or Senate office buildings. The first exhibition would highlight notable events in the first century of the Senate's history through the display of a wide selection of original documents. These might include the following examples:

George Washington's 1789 message to the U.S. Senate, nominating the first cabinet members.

Farewell message to the Senate from Vice President Thomas Jefferson on his assumption of the presidency, February 28, 1801.

Letter from President Madison to the president of the Senate, September 17, 1814, on the subject of accommodations for Congress after the burning of Washington.

Annual message of President James Monroe, December 2, 1823, containing the Monroe Doctrine.

Tabulation of the vote of the Senate to elect a vice president, February 8, 1837, the only time such an election has occurred. Richard Johnson of Kentucky defeated Francis Granger of New York, 33 to 16.

Letter of Millard Fillmore to the Senate, July 10, 1850, addressed by way of Secretary of the Senate Asbury Dickins, giving formal notice that he would no longer "occupy the chair of the Senate" due to his accession to the presidency on the death of Zachary Taylor.

Message from Abraham Lincoln, February 28, 1863, transmitting copies of addresses to him of meetings of workers in Manchester and London, England, expressing appreciation for preliminary emancipation of slaves.

Papers relating to the impeachment of President Andrew Johnson, including original transcripts of testimony taken by the House managers, May-June 1868, exhibits used in the trial, ballots taken in the Senate, and a letter from Chief Justice Salmon P. Chase with observations on the proper mode of conducting the trial in the Senate.

Petition signed by Susan B. Anthony and Elizabeth Cady Stanton as officers of the National Woman Suffrage Association, Janaury 22, 1873, asking for legislation "to protect women citizens . . . in their right to vote."

Tabulation of the 1876 electoral vote as counted in the Senate on March 1, 1877, showing Rutherford B. Hayes as the winner by one vote.

Transcripts of hearings held by the Senate Committee on Civil Service and Retrenchment on S. 133, Forty-seventh Congress, the bill which became the Pendleton Act (1883) and established the Civil Service Commission.

Omnibus Statehood Bill (S. 185), Fiftieth Congress. The different copies of this bill reflect its changing versions before final passage on February 22, 1889, when it provided for the admission of North Dakota, South Dakota, Montana, and Washington. Earlier drafts would have admitted "Dakota" only, and organized a new territory to be known as "Lincoln" or would have admitted the state of South Dakota only.

In the second exhibit, we would turn from the legislative and political story, as reflected in the significant documents of the Senate's first century, to a different study of the institution, spanning the period of its formative years to the present. Here the works of America's graphic artists would dominate. Drawings, engravings, architectural renderings and photographs could all play a prominent role. While the legislative integrant would be included, so too would the exhibit feature the cultural, social, architectural and artistic lives of the Senate. Since 1975, the Commission on Art and Antiquities has acquired over 200 engravings of

the Senate which originally appeared in mid-to-late 19th century periodicals. The collection, as well as the extensive photographic resources of the Senate Historical Office, will be invaluable to the development of this exhibition.

With the selection in the late 1950s of Henry Clay, Daniel Webster, John C. Calhoun, Robert M. LaFollette, Sr., and Robert A. Taft as outstanding former senators and the subsequent commissioning of their portraits for the Senator's Reception Room, a special gallery was created near the Senate Chamber. Because it is one of the most popular rooms in the Capitol, it is proposed that a series of exhibits, which chronicle the periods in which these members served, be installed adjacent to the portraits in the Reception Room. The exhibit cases, although somewhat limited in size, would feature memorabilia related to the subjects as well as noteworthy documents and graphics.

Traveling Exhibitions

Consideration should be given to circulating throughout the country exhibits based on special displays which are scheduled for installation in the Capitol building during the bicentennial period. These traveling exhibits would be mounted on a series of panels designed to withstand the rigors of shipment over a five year travel schedule. Selections of the state institution hosting the exhibit would be made by the senators from each state. Design and production of the exhibits would be scaled to accommodate buildings with limited display areas. State offices of individual senators might be considered fitting locations, as well as local historical societies or museums.

Of the exhibitions planned for the Capitol between 1987-92, two subjects would seem to be particularly appropriate for travel. The first exhibit would be devoted to the story of the Senate as seen through the works of American graphic artists. Engraved views of the Senate, architectural renderings, and photographic studies would be featured. Among the resources from which material would be drawn is the collection of 19th century Senate engravings acquired under the direction of the Commission on Art and Antiquities, and the extensive photographic files of the Senate Historical Office.

A second subject worthy of consideration would trace the history of the Senate from the perspective of the political cartoonist. The marriage of the editorial cartoonist's artistic style and humor has made cartoons a popular—and sometimes painful—portrayal of the United States Senate. Not only would this exhibit serve as a history of the Senate and the principal issues it has faced, but it would also trace the development of technology that made the production of cartoons possible. Paralleling these changes is the shift in style and approach that occurred through several generations of American political cartoonists. While the Senate has a limited number of political cartoons in its collection, it is recommended that efforts be made over the next four years to increase its holdings in order to enhance the quality of this traveling exhibit.

As described, both traveling exhibit topics lend themselves to additional forms of interpretation. For example, a folio of reproductions of several 19th century engraved views of the Senate featured in the display, could be sold through the Government Printing Office during the exhibits' traveling schedule. Also of interest might be a publication on Senate political cartoons, discussing their significance in greater detail than the space on the exhibit panels could provide. The "Story of the Senate" exhibit, employing prints, photographs, and drawings, would also be an ideal subject for a poster. Revenue realized from the sale of these publications could be used to defray expenses associated with producing exhibits.

Recent interviews were held with staff members of the Smithsonian Institution Traveling Exhibition Service (SITES) in order to develop funding projections for this program. A moderate-size exhibit, consisting of between 15-20 panels, could involve expenditures totaling about $20,000. This would include design and production costs, covering silkscreening, photographs, mounting, typesetting, etc. It is intended that, wherever possible, Senate staff would be involved in the development and fabrication of these exhibits.

Ceremonial Events

The two most significant dates during the bicentennial period which should be considered for ceremonial observances are March 4, 1989 and April 6, 1989.

March 4, 1789 was the day appointed for the beginning of the government under the new Constitution. Although eleven state conventions had ratified the Constitution and would thus be represented in the Senate, only eight out of twenty-two senators took their seats on the first day. Of the fifty-nine representatives, only thirteen had arrived in New York's Federal Hall by that time. Nonetheless, March 4, 1789 is considered the first day of the first session of the first Congress. It would seem fitting that this date be commemorated jointly in ceremonies with the House of Representatives here in the Capitol.

It was not until April 6, 1789 that the Senate, after long delay, achieved a quorum and could be formally organized. (The House had reached a quorum on April 1, 1789). The Senate might wish to convene in the Old Senate Chamber, or in its present chamber, on April 6, 1989, to celebrate this signal anniversary.

RECOMMENDATION NO. 4: MICROFILM PUBLICATION OF KEY SENATE RECORDS

The National Archives recommends four specific projects for microfilming Senate records. The first would involve completing a longstanding plan to film the records of the precedent-setting first fourteen Congresses (1789-1817). The remaining projects were suggested because they involve records of great historical interest that complement existing filmed collections of Executive and Judicial Branch records. The Study Group recommends that the filming of the first fourteen Congresses' records be given a higher priority than the other three projects, but believes that all are worthy of Senate funding.

Records of the First Fourteen Congresses.—The records of the first three decades of the federal government have great precedential value and have been used extensively in research on constitutional, legislative, and administrative topics. Filming these records will facilitate their use in libraries across the nation and minimize wear and tear on the originals. Only a small portion of Senate records for the period have as yet been filmed. Estimated cost to complete this project would be $39,000.

Indian Relations—Executive Proceedings, 1st to 41st Congresses (1789-1871).—From 1789 to 1871, the Senate dealt with negotiated Indian treaties under the "advice and consent" provisions of the Constitution. The records generated by this process consist of Executive Branch correspondence and memoranda relating to negotiation of the treaties, as well as unique materials that reflect the Senate's deliberations. These files constitute an historically valuable record of the Senate's exercise of its responsibilities on Indian relations. Estimated cost to complete this project would be $13,000.

Foreign Relations—Executive Proceedings, 1st to 79th Congresses (1789-1947).—This is an important and heavily-used collection, which complements a more extensive set of State Department records. Filming would eliminate wear and chances of theft of irreplaceable documents. Estimated cost to complete this project would be $33,000.

Senate Impeachment Proceedings..—The Senate has sat as a court of impeachment on twelve occasions since 1798. The records created by the Senate in the exercise of this unique constitutional function occupy thirty trays and could be arranged, filmed, and described at a relatively modest cost as indicated below. Estimated cost to complete this project would be $10,000.

APPENDIX B: RECOMMENDATIONS OF "PROJECT '87" OF THE AMERICAN POLITICAL SCIENCE ASSOCIATION AND THE AMERICAN HISTORICAL ASSOCIATION

I. INTRODUCTION

Project '87, a joint endeavor of the APSA and the AHA, was inaugurated in 1978 to support scholarship, enhance teaching, and promote public examination of the Constitution on the occasion of its 200th anniversary. Project '87 enthusiastically welcomes the plan of the Senate to engage in scholarly projects and public programs as an observance of its bicentennial and the 200th anniversary of the adoption of the Constitution. It is Project '87's hope to be able to assist the Senate in its plans, and to collaborate in the development of commemorative programs.

II. SCHOLARSHIP

The Joint Committee which governs Project '87 conceived of its work in three stages, the first of which focuses on research. In the past years, as part of Stage I, Project '87 has awarded fifty-one research grants and fellowships and organized five conferences on constitutional topics. For each of the last four conferences, Project '87 oversaw the publication of a volume of collected pieces. In addition, several articles and books have appeared, authored by the scholars who received financial awards from Project '87's fellowship competitions.

In calling to public attention the singular character of our national institutions, the bicentennial offers an opportunity for the Senate to highlight its special role in the structure of the government, and the unique character of its resources for scholars. The biographical directory of the Senate, the creation of tools permitting greater access to Senate records in the National Archives, microfilming of heavily-used Senate records, guides to senators' papers, plans for conferences, all will assist scholars and encourage work which will explicate the history of the Senate for the academic community and ultimately for the public.

To the extent possible and desirable, Project '87 looks forward to cooperating with the Senate in fostering the use of such resources and in executing its programs. Possible vehicles for doing so included the following suggestions:

(A) Through its own activities in holding conferences and producing written materi-

als, and through the publications of its two founding organizations, the American Political Science Association and the American Historical Association, Project '87 has established a wide network of scholars who specialize in constitutional issues. Project '87 can use this network to distribute special announcements regarding the availability of the new scholarly resources the Senate plans to create.

(B) In addition, Project '87 could work with the Senate to organize a series of conferences with the goal of developing a one- or two-volume history of the Senate. The conferences could be organized in the following manner:

1. The Senate Historical Office and Project '87 would issue a call for proposals on Senate history and politics.

2. A committee comprised of representatives of the Senate Historical Office, its Advisory Board, and members of Project '87's Joint Committee of scholars would choose from among the best applicants and invite them to a preliminary meeting.

3. The preliminary meeting would include the applicants chosen through the competition and members of the committee that selected them. This body would then review the proposed papers and decide upon themes and organization of the volume/s/.

4. The body would also decide upon additional papers to be solicited from scholars who did not participate in the competition, in order to produce a superior, comprehensive, collection of essays.

5. At a time to be determined, a full-scale conference would be held in Washington, which Project '87 would convene, drawing upon its experience in holding conferences on constitutional subjects.

6. After revision, the scholars would return the papers for review by an editorial board composed of representatives of Project '87, the Senate Historical Office, and its Advisory Board.

7. The volume then would be published through the offices of the Senate and Project '87, in a manner acceptable to all parties.

(C) A fellowship competition, co-sponsored by Project '87 and the Senate, is another activity that would encourage research on the Senate. In the past four years, Project '87 has held four rounds of fellowship competition, and is now investigating funding for competitions based on topics more focused than the former competitions. Scholarship focusing on the Senate would be one such area.

Project '87 is prepared to run the competition, using its Joint Committee of scholars to referee the applications. Such a competition could be structured to permit scholars already engaged in research on the Senate to bring their manuscripts to completion, and/or explore specific topics proposed by scholars in order to fill gaps in the research.

Funding For Scholarly Activities

Project '87 has supported all of its scholarly activities through specific program grants from the Lilly Endowment, the National Endowment for the Humanities, the Mellon Foundation, the Rockefeller Foundation, and the Ford Foundation. If the Senate is interested in collaborating with Project '87 on any of the programs included in this proposal, funds would have to be acquired from either public or private sources. The Senate may wish to fund these programs directly through an allocation to a bicentennial commission or through the Senate Historical Office, or funds could be solicited from private sources. Project '87 would be willing to work with the Senate to come to a mutually agreeable arrangement.

III. EDUCATIONAL ACTIVITIES

Stage II of Project '87's program focuses on the production of educational materials for use by teachers at all grade levels and by educators in other institutions such as libraries and museums. Our present projects include the development of a sourcebook on the Constitution for secondary school teachers, which is now nearing completion, and a series of regional conferences for high-school educators, conducted by the American Historical Association. Project '87 hopes that the Senate bicentennial program would also provide for the publication of materials which will be useful to this clientele.

Project '87 urges the Senate to solicit the views of secondary school teachers, librarians and museum officials to plan the format and scope of such materials, and the design of exhibits. Not only will prior consultation with such officials help the Senate prepare suitable publications for this audience, and then increase its impact, but would alert the Senate to specific items these educators feel are lacking, and could tailor-make exhibits or pamphlets with this audience in mind. Project '87, which has had extensive contracts with secondary school teachers, curriculum supervisors and school administrators, can direct the Senate to key educators, with experience in developing instructional materials in this field, who are in positions which enable them to reach their colleagues through their professional associations.

IV. PUBLIC PROGRAMS—STAGE III OF PROJECT '87'S PROGRAM

(A) *Film/Video Presentations.*—Communication in American society is conducted very much through visual images and film/video media. Consequently, film or video programs are very appealing. Project '87 itself has spent three years gathering information about current and planned films and television programs on constitutional issues. On the basis of this experience and in view of the considerable cost and complexity of film production, we suggest that the Senate bicentennial planning committee give careful consideration to identifying the intended audience(s) for the film, including one or all of the following:

a. The Senate itself (as an orientation for freshmen senators and for staff).

b. The American public (as general information and entertainment).

c. Public/citizen discussion groups (as information for further reflection and study through, for example, the programs of the League of Women Voters or programs of local public libraries).

d. Instructional use—in high schools and colleges. Decisions about film production should be based upon the objectives and intended audience for the film. Once the decision is made about the audience the Senate wishes to reach with film, it would be in a position to consider alternative presentations which would fulfill its objectives.

If the planning committee has an educational objective in mind—either for the schools or for the Senate itself—we would like to suggest an approach to the creation of a film or video cassette program. WETA/26 and the APSA are preparing a telecourse entitled, "Congress: We the People." Funding for the telecourse is provided by a grant from the Corporation for Public Broadcasting/Annenberg School of Communication.

The telecourse will draw upon the considerable library of footage gathered by WETA for its public affairs program, "The Lawmakers," and from its continual coverage of Congress over the last decade. One theme of the telecourse will be to distinguish between the Senate and the House. The telecourse is being developed by the public affairs production staff of WETA in close cooperation with a group of congressional scholars including: Herbert B. Asher, Charles S. Bullock, Roger Davidson, I. M. Destler, Richard F. Fenno, Charles O. Jones, David R. Mayhew, Bruce I. Oppenheimer, Robert L. Peabody, Nelson Polsby, Randall S. Ripley, Barbara Sinclair, and James L. Sundquist.

It should be possible to draw upon the same production staff and a special group of scholars to develop a program about the Senate. Such a program could draw upon WETA's extensive archives and the scholarly research of the telecourse for current coverage of the Senate and then add footage and material on the history and evolution of the Senate, possibly using the speeches of Robert Byrd on the history of the Senate. Additional footage should cover the Senate both as a national institution and as an institution representing the states, and should picture the Senate as both an integrated organization and a collection of its individual members.

(B) *A Bicentennial Chronicle.*—As a major part of its public program, Project '87 plans to publish a quarterly magazine designed to serve as a chronicle of the American constitutional bicentennial. Supported by a planning grant from the National Endowment for the Humanities, the first issue of the magazine will represent a prototype for a quarterly journal which will contain three basic sections: substantive articles on constitutional issues, a center section of documents relating to the Constitution, and a resource section containing information for scholars and agencies planning bicentennial celebrations. This section will incude information on available grants, news about grant recipients and the projects they plan, lists of scholars able to act as consultants on bicentennial projects, bibliographies, descriptions of documents and manuscript collections, a calendar of bicentennial events, a chronology of historic dates relating to the bicentennial, successful bicentennial events from 1976 and, as the bicentennial era progresses, model programs about the Constitution.

Project '87 hopes to include extensive coverage in the magazine on the Senate's bicentennial activities ranging from listings to feature articles on Senate programs, and pieces on substantive issues of governance growing out of the Senate's scholarly activities.

Project '87 applauds the Senate bicentennial study group's plans for commemorating the forthcoming anniversaries by its proposals for substantive and enduring projects. Observed in this manner, the bicentennial of the founding of our government can indeed evoke a renewed sense of commitment to democratic and republican principles, and help to make the public aware of the meaning and vitality of the nation's history.

APPENDIX C: DIGEST OF COMMENTS RECEIVED FROM CURRENT AND FORMER MEMBERS AND OFFICERS OF THE SENATE

GENERAL SUGGESTIONS

Special illustrated publication on art and artists in the Capitol. Possible update of Charles E. Fairman, "Art and Artists of the Capitol of the United States of America" (Washington: Government Printing Office,

1927) Senate Document 95, 69th Congress, 1st Session.

Develop commemorative programs with other parliamentary bodies to emphasize Senate's deeper roots.

Include all living former senators in at least one of the commemorative events to give a heightened public perception of the Senate's institutional continuity.

SPECIFIC COMMENTS

Exhibitions and Ceremonial Events

I would definitely agree that the first act should be for the two houses to meet and join together in a joint session on March 4, 1989. However, instead of using the chamber of the House of Representatives, I would recommend that they assemble on the West Front of the Capitol in a celebration patterned after the 1981 inauguration. The House of Representatives cannot accommodate many guests whereas the West Front can. With the Marine Band and several vocalists the occasion would be more festive. I would suggest short speeches by the President of the United States, the Speaker of the House of Representatives, and the President Pro Tempore of the Senate. Television recommended.

On April 6th the Senate could then meet in its chamber with remarks first by the Vice President of the United States and then by the Majority and Minority Leaders. They in turn would be followed by the two former senators who had the most seniority and who had served elective terms of at least six years; one a woman and the other a man. As of today one would be Margaret Chase Smith of Maine and the other Lister Hill of Alabama. Television recommended.

My last suggestion would be that all of the historical material referred to be put on exhibition for the full year of 1989 at the Smithsonian Institution. From what I have observed over the years that location seems to be logical from visitor attendance, knowledge of presentation, security, and exhibition space.

Minutes of Democratic and Republican Party Caucuses

It would seem reasonable to permit those minutes predating the Senate service of the oldest living senator, or ex-senator to be studied by recognized scholars and historians under specific conditions. Each request could be evaluated on its merits and careful criteria established to prevent access by the curious, non-serious students, or the media. The Historian of the Senate may be tasked with screening requests and making appropriate recommendations. It is almost certain that party minutes will be made available to historians at some point and the Bicentenary could well provide an appropriate and meaningful vehicle.

I believe the number of years in which they should be kept confidential should be minimized. I would not give an estimate of the number of years but believe the principle of minimization to be important. We believe in the Senate of letting the people know as much as humanly possible and realistically practical about our work.

Guide To Research Collections of Former United States Senators, 1789-1982

I believe this is very long overdue and very desirable. These collections are critically important to scholars and students and for the history of our country. I believe they should be encouraged in every way by having them known about generally which this Guide will accomplish. I also believe the inclusion in the Guide of books written by members about their own careers and written about members is an extremely important bibliography.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, after the time for the two leaders under the standing order has been yielded back or expired, there will be a period for the transaction of routine morning business in which Senators may speak for not more than 2 minutes each to expire at 10:30 a.m., and at that time the Senate will resume consideration of Senate Concurrent Resolution 27, at which time the Domenici-Baker amendment in the nature of a substitute, No. 1243, will be the pending question.

Mr. President, the distinguished Senator from Maine (Mr. COHEN) has indicated to me that he has a need for time this morning beyond the 2 minutes allocated in morning business.

Since I do not have 10 minutes which he needs but I probably do have 8 minutes, I am about to yield the remainder of my time to the distinguished Senator from Maine, but first I ask unanimous consent that it may be aggregated together with the 2 minutes available to him on morning business so he may deliver an address of 10 minutes in length.

The PRESIDING OFFICER (Mr. HECHT). Without objection, it is so ordered.

Mr. BAKER. Mr. President, I yield the floor.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER. The acting Democratic leader is recognized.

Mr. DIXON. Mr. President, I yield 5 minutes to my distinguished friend from Washington.

The PRESIDING OFFICER. The Senator from Washington is recognized.

TOWARD A LONG-TERM POLICY FOR CENTRAL AMERICA

Mr. JACKSON. Mr. President, as Congress and the rest of the country wrestle over U.S. policy in Central America, at least one issue has been settled: The region is of immense strategic importance to the United States. Whatever policy options might be available to us, ignoring threats to the stability of Central America and refusing to engage ourselves in the problems of the region are not among them.

The commonly cited figures bear a quick mention.

Almost half of our shipping tonnage and imported oil passes through the Caribbean shipping lanes. Sixty-five percent of our supply requirements during a general European military mobilization would be shipped from gulf ports through the Florida Straits.

Controlled immigration through our southern frontier can only become possible with stability in Central America. When one-of-eight persons born in the Caribbean and alive today resides on the mainland United States, our southern and southwestern States are rightly concerned about preventing a flood of the impoverished and the discontented into this country.

A sequence of crises leading to Castro-type regimes throughout Central America, including Mexico, would have disastrous strategic ramifications which we all recognize. None of us relishes the prospect of living in a garrison state, unable to meet our commitments to our NATO allies and others, nor do we like to contemplate the threat such a course of events poses to the fundamental nature of American society and her democratic institutions.

Even with the high stakes involved, it is not unexpected that some American citizens and some American politicians harbor wistful thoughts that somehow the United States might not have to engage itself in Central America. The problems in the region are enormous; the policies to address them involve difficult choices; and most important, the problems are not going to go away. There are no quick fixes. Piecemeal proposals and frantic, ad hoc programs are inadequate. The United States faces a profound, long-term challenge in Central America and must devise a set of long-term policies to match it.

The nations of Central America share many differences: Different histories, different geographies, different ethnic compositions, different patterns of landholding, and different degrees of democratization. But if we look at the entire Central American isthmus, two facts present themselves. The economic and social crises confronting all of the nations are real and Mexico with 79 percent of the total land mass and 76 percent of the population is a key to maintaining stability in the region.

In good times life was hard, but after almost 3 years of recession, all Central American nations are hurting and hurting bad. Commodity prices are still too low, interest rates still too high, and servicing foreign debts casts a long shadow over hopes for economic recovery, much less hopes for economic development.

In Mexico, Mr. President, the economic crisis is particularly acute.

At the end of 1977, things looked bright: The growth rate was 8 percent, new oil was coming into production and being sold at high prices, employment prospects were improving, and foreign loans fueled a vigorous program of industrial development. But that was 5 years ago, before the addition of another 12 million mouths to

feed, before a persistent worldwide recession, and before the collapse of oil prices.

Now Mexico faces almost $90 billion in combined private and public foreign debt, and is attempting to implement an IMF economic adjustment program. Her unemployment hovers near 50 percent, and the agricultural sector is in decline forcing more and more rural people into the cities where the middle class is becoming increasingly disenchanted.

The economic problems are not just cyclical, but structural. Many of the large industrial projects which were to be financed by the oil money turned sour, unable to be completed because of chronic mismanagement and corruption. And in spite of Mexico's historical commitment to land reform, fully one-third of the agricultural population remains landless with tremendous inefficiencies in the land under cultivation. With some 40 percent of the labor force devoted to agriculture, that sector produced only 8.5 percent of the gross domestic product in 1980.

Fortunately, Mexico, along with Costa Rica, enjoys political stability under a regime that is more or less democratic. But the institution responsible for Mexican stability since the revolution—the PRI, the Institutionalized Revolutionary Party—has never confronted such a challenging set of circumstances as it does today or is likely to in the near future.

The other nations of Central America face similar economic problems, but suffer under authoritarian regimes of varying degrees of repressiveness. The economic and social injustices abound. In Guatemala, 3 percent of the population owns 70 percent of the land, and until the recent land reform, the pattern of landholding in El Salvador was the same. Adult literacy in Guatemala is under 50 percent, and a Guatemalan Army campaign against a handful of subversives has terrorized the Mayan Indians forcing over 30,000 of them to cross the border into Mexico.

Given the poverty and the unremitting patterns of social injustice in the region, Marxist revolutionary promises of a better future understandably prove attractive to many of the peoples of Central America. But the promises are false. The history of Cuba and the evolution of the Sandinista regime in Nicaragua, not to mention the horrors which have transpired in Indochina since 1975, demonstrate clearly that Marxist-Leninist regimes will not offer the people of these countries a democratic future or expanded economic opportunities. Quite the opposite. Cuba exports her human problems to the United States and requires $4 billion annually in subsidies from the Soviet Union. And in Nicaragua the standard course of Marxist totalitarian control and repression proceeds apace.

How are we then to approach the security needs of the United States in Central America?

One thing should be very clear, Mr. President: Military approaches alone are inadequate to deal with the economic crises and social injustices of the region.

Some security assistance will, obviously, be required in the face of armed Communist insurgencies, but our security aid should be understood in one way: It is a shield behind which endangered nations can protect themselves from external threats as they work to rectify injustices, build democratic institutions, and hold free and fair elections. Our security assistance ought not to be the main focus of national debate, for it ought not to be the main focus of national debate, for it ought not to be the foundation of our policy toward Central America. The shield protecting Central Americans from Communist insurgency and domination will crumble unless we address the serious social and economic dislocations and injustices in the region.

A second thing should also be clear: America's best minds need to address the problem of security and economic development of the Central American isthmus. Mr. President, we must realize that our policies can no longer follow the patterns which have arisen from the United States traditional neglect of Latin America—sporadic attention when we see our immediate security interests at stake by coup or revolution, and then abandonment and unconcern. Central America needs to be the focus of a large, long-term, steady effort by the United States, and should have a top spot on America's national security agenda.

What sort of effort are we talking about? I can best describe it as one of Marshall plan proportions. The long-term security of our southern frontier is as vital to U.S. interests as the long-term security of Western Europe, and it deserves the same level of American energy and commitment.

Mr. President, I recommend that serious consideration be given to convening a national bipartisan commission for Central America. Composed of respected leaders of government, business, labor, education, and the Hispanic and religious communities in this country, the commission's charge would be to chart a course of hope for the peoples of Central America.

Such a commission is not without precedent. The Marshall committee, headed by Henry Stimson, and drawn from the leadership of all sectors of American society, was more responsible than any other factor for forging consensus in the country to get the Marshall Plan for European Recovery through Congress and underway.

I believe it is high time for the President to bring in the major sectors of American society, particularly labor, to play key roles in the formulation and implementation of our Central American foreign policy.

The proposed commission would function as the instrument to help build the necessary consensus on a long-term, comprehensive policy for this region.

The commission could communicate to Americans from all regions and all walks of life that their lives are inextricably linked to events in that region—be it the price of coffee, the future of the American labor force, and ultimately the security of their nation.

The commission would consult with governmental and other leaders of Central America, invite their views and receive their recommendations on the policies which would best assist them in their long-range security needs and economic development.

The commission could also serve an important oversight role for the nongovernmental international actors that should be a part of an effective U.S. policy for Central America. Labor unions, political parties, churches, and voluntary organizations can often do more to help build democratic institutions than the public diplomacy gestures of governments.

Mr. President, I am convinced that unless the United States works with Mexico and other Central American nations in addressing their chronic economic and political crises, none of the nations of North and Central America can face the future with calm confidence, secure in the inviolability of their borders, and assured of maintaining peace with one another.

The commission's task will not be easy, and its recommendations will likely require sacrifice from the American people. But over time its work could prove, as the Marshall plan has proven, to be one of the wisest investments our Nation ever made.

Mr. President, I yield the floor.

Mr. DIXON. Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 10:30 a.m. with statements therein limited to 2 minutes each.

The Senator from Maine.

Mr. BAKER. Mr. President, will the Senator yield to me for a moment?

Mr. COHEN. Yes.

Mr. BAKER. Mr. President, under the order previously entered I believe the Senator now has 2 minutes plus

the remainder of my time under the standing order; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. What is the total time?

The PRESIDING OFFICER. Ten minutes and thirteen seconds.

Mr. BAKER. I thank the Chair.

The PRESIDING OFFICER. The Senator from Maine.

UNITED STATES-ISRAELI RELATIONS—A NEED FOR UNDERSTANDING

Mr. COHEN. Mr. President, United States-Israeli relations, long viewed as special, have reached one of their lowest points since the creation of the State of Israel in 1948. Over the past few years, the relationship of our country and Israel has been marked by mutual mistrust, differing perceptions of basic strategic goals, and a breakdown of effective communication on matters of common interest.

The deterioration which has taken place is especially troubling, since Israel remains our closest ally in the Middle East. Israel is a geostrategic linchpin for any U.S. defense planner. She has the potential to contribute in three theaters: the Persian Gulf, the eastern Mediterranean, and NATO's southern flank. Further, Israel's democratic institutions and the inherent stability of her government insure that she will be a reliable ally over the long term.

For these and other reasons, we cannot allow what has been a family squabble to grow into a serious fissure between our two nations. The strains in United States-Israel relations today have dimensions unique in the history of our alliance, and the importance of easing those strains is also unparalleled. It is essential that we work with the Israelis, rather than at cross purposes, in pursuit of our mutual interests in the region.

When I was in Israel earlier this year, I found a dual focus. One was on the report of the Commission of Inquiry, which on the day the delegation I headed met with Prime Minister Begin recommended that Defense Minister Sharon and several military leaders be relieved of their positions.

That report, which, of course, produced considerable pain and anguish for the government of Prime Minister Begin demonstrated the finest aspect of the democratic system which we and the Israelis share. Few other world governments would have had the courage, in my opinion, to establish that kind of inquiry board and to followthrough on its recommendations to the extent the Israelis did.

But the other major focus dealt with what the Israelis perceived, and I believe correctly, as a difficult attitude on the part of the United States toward their country. The incident involving a U.S. Marine captain and an Israeli tank was being used by some in our country to serve as a representation of the level of tensions between the United States and Israel. This, Israeli officials repeatedly told me, was unfair and extremely troubling to them.

In the months which have followed my visit to Israel, I have seen little which would indicate any improvement in the situation. Our Government resisted working with the Israelis on a memorandum of agreement to share information gained by their forces during the Lebanon incursion. It has held up the sale of F-16's to Israel, something about which many of us in this body have expressed strong concern. And the resolution of the Lavi fighter plane issue had also served to complicate, rather than smooth, the situation.

The handling of the Memorandum of Agreement controversy serves almost as a model of how two nations should not deal with each other if they wish to maintain their close alliance. The Israelis wanted to share with us the benefit of the information, as they had following the 1967 and 1973 wars, but they found themselves repeatedly rebuffed.

At virtually every hearing I have attended this year, I have been told, by defense and intelligence people alike, that this information could be extremely valuable to us. Commanders from every service emphasized just how much they would like to have the benefit of what the Israelis had learned.

Yet administration officials said that signing an MOA was unnecessary between allies. Then it was said that such an MOA would be unprecedented. Finally, it was argued that the MOA as proposed by Israel placed onerous burdens on the United States and that we would have to pay too high a price for information that we really did not need anyway.

Of course, we discovered that an MOA was not unprecedented. In fact, memorandums of agreement had been signed between our two countries on two prior occasions. More importantly, the proposed MOA was not substantially different in its provisions to the 1967 and 1973 agreements.

Ultimately, the Israelis, in their desire to reach an accommodation with us, simply capitulated and supplied our Nation with the information in the absence of an agreement. Moshe Arens, who left his post as Israel's Ambassador to the United States to replace Ariel Sharon as his country's Defense Minister, told me personally of his frustration with the attitude of our Government on this issue and of his personal commitment to looking for a resolution to this problem.

That commitment on the part of this brave and dedicated man was, in my view, the key factor in Israel's decision. It reflected the desire he expressed to me that we remove the roadblocks to cooperation between the United States and Israel. But no sooner had this issue been resolved than the United States placed a hold on the sale of F-16's to Israel. It almost seemed that our Government was bent on keeping the level of tensions with Israel higher than they ought to be.

One recent development—Secretary of State Shultz' mission to reach an accord for the withdrawal of Israel and Syrian troops from Lebanon—lends encouragement that we are looking for ways in which we can work together in pursuit of our common interests and goals. The Israelis have consistently said that they wanted to withdraw their forces, but that they wanted assurances that their national security interests would be preserved in the process.

The Lebanon peace agreement could, as the Washington Post suggested in a May 8 editorial, be the administration's "biggest diplomatic success." That a basic agreement between Israel and Lebanon was reached is, I believe, a tribute to President Reagan and Secretary Shultz and their willingness to devote so much energy and attention to reaching an accord. Rather than taking an antagonistic or overly demanding approach, Secretary Schultz concentrated on the key considerations and concerns and went about the task of seeking solutions.

This approach, unfortunately, has not always been taken in our Middle East policy. What we all too often have, it seems to me, is a tendency to emphasize our differences with the Israelis rather than trying to correct those differences and building on our long and fruitful alliance. The problem will only be exacerbated if some negative attitudes are not changed soon. We are allies and friends. Our goals are common ones. What differences we have are not, and should not be, insurmountable.

In adopting a confrontational posture with the State of Israel, we may be sacrificing the strategic interests of our country. For if allies do not talk with each other—and if the conversations they do have are adversarial and not truly communicative—problems are certain to occur and to grow greater.

Discouraging effective communication with a strategic ally at whatever level is not a tenable policy, in my view. We have to start talking, both at the diplomatic level between the highest officials of our countries and at the military level with our troops on the ground.

The energies which are going into straining United States-Israeli relations must be redirected toward strengthening our traditional alliance. If they are not, there are dangerous implications for the cause of peace in the Middle East and for the relations we have with all our allies throughout the world. We must demonstrate that we work to resolve disagreements and to strengthen bonds, rather than acting in ways which only raise questions about our reliability as allies.

To understand the dimensions of the problem, we must look at the elements which are involved. Both sides bear responsibility, and both have an obligation to work for improvement and change. This change is needed to correct the following:

The fundamental lack of trust among the top political leadership of both the United States and Israel. Both Washington and Jerusalem have begun, the first time, to question the good intentions of the other.

The absence of an overall coordinated strategy, which marked relations for years. The United States must bear some responsibility for this, since it has not been as clear and precise as it needs to be in indicating to Israel the areas of agreement and disagreement between the two countries.

A pattern of independent actions by the Begin government which have been seen by the United States as unduly provocative and insufficiently sensitive to U.S. interests in the area.

The natural divergence of some long-term interests and goals of the United States and Israel. This is particularly evident in U.S. attempts to improve security ties to moderate Arab states through the provision of sophisticated weapons, which Israel views as a threat to her security.

The danger signs of a major confrontation, then, are apparent in United States-Israeli relations. The conflicting objectives make it incumbent on both countries to be scrupulous about maintaining ties and to strive harder to understand each other. It is in the mutual interest of both Israel and the United States to make a major effort to assure that a pattern of understanding and cooperation is reestablished.

It is within this context—the need for better understanding between the people, and the leaders, or our two countries—that I would like to share with my colleagues a letter which I received recently from a friend in Israel. The letter provides some critical insights into Israeli thinking and offers some recommendations for improved relations between our Nation and Israel.

My friend, Dan Bavly, noted that Israel is the only country in the world which is expected by almost all the international community to pay a price for recognition by its neighbors. The atmosphere of automatic and unconditional ostracism on the international scene, he said, cannot but stiffen the policies of any Israeli Government.

"When it comes to our relations with the Western democracies, even our friends with a very good general picture of the Israeli scene do not realize just how suspicious and bitter our disappointments have made us," he told me. "Israel no longer dares expect a fair deal from the international community."

I will ask to place the full text of the letter in the RECORD at the conclusion of this statement, but I would like to highlight five specific recommendations which my friend suggested might engender a more positive approach to questions regarding Israel and the Middle East:

First. Agreements are not technical documents, certainly not in the Middle East. Creating attitudes of trust is far more important and fertile than any stark, readymade mechanical solution. And it is with help toward this general climate of mutual confidence that friends, from both Europe and North America, can contribute.

Second. Do not rush to arm the Arab states. Rather than as a deterrent, the weapons are purchased to be used. The chief aim of the massive Arab military buildup is against Israel and will inevitably lead to more bloodshed.

Third. Accept Arab demands only if you feel bound to do so out of conviction, not out of fear.

Fourth. Help Israel not to become an outcast. Rather than ostracizing the country or allowing it to be banished, make it feel at home in the international community.

Fifth. Please stop moralizing. Apply the same standards you would if you had similar obstacles to those Israel faces. You might discover that Israel shows up rather well after such an exercise.

There is, I believe, much wisdom in my friend's recommendations. Applying the five principles he outlines could do much to improve understanding and to lead toward a better working relationship between our two nations.

If our interests, and the interests of peace, are to be effectively served in the Middle East, we need better communication, openness, and cooperation with our most important ally in the region. This will only be achieved if we give full recognition to the kinds of issues which Dan Bavly raised in his letter to me.

It is well and good for us to increase our level of assistance to Israel, as we did last year and are in the process of doing again this year. But that is not enough.

We need a strong commitment at the highest levels to work with the Israelis on behalf of our common interests. In his meeting with me before returning to Israel to take over the post of defense minister, Moshe Arens pledged to do all he could to reduce tensions and improve communications. Israel's decision to share its Lebanon experience information soon after his return to Jerusalem is a reflection of his personal commitment.

As one Member of the Senate, I will do all I can to see that Minister Arens' efforts are reciprocated. That is a message I passed on to him in the meeting we held. Earlier, in my February visit in my role as head of the liaison between the Senate Armed Services Committee and its counterpart committee in the Israeli Knesset, I attempted to convey a similar message.

But this commitment must extend beyond any group of Senators, any committee, or any group of individuals either in Congress or the administration. It must be a reflection of national will and of national policy.

If we take heed of my friend's letter—and of the five specific points he raised—we can go a long way toward achieving this essential goal. I commend the letter to the attention of my colleagues.

Mr. President, I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 29, 1983.

DEAR BILL: In this mixed-up world, in which almost everyone knows what is wrong with Israel, our friends in the West often tell us how difficult it has become to defend the country nowadays; they find it hard to identify with it in general and with the positions of our Government in particular. On the subject, herewith are some comments you may find of interest:

To many foreigners, even the splendid performance of the judicial tribunal investigating the extent of Israel's involvement in the Sabra and Shatilla massacres was dimmed by what they saw as the failure of the Government to respond to the verdict as fully as they would have wanted. But the fact is that we did maintain our high standards and Begin was politically correct in removing Sharon from the Defense Ministry rather than fire him from the Cabinet. Out of government, Sharon could attract and organize the radical nationalist opposition into a group far more threatening than Rabbi Kahane's lunatic fringe; the danger of violence between Jew and Jew would substantially increase. Sharon cannot be put away in jail—having him in government without portfolio, stripped of the power he previously wielded, is the safest way. The great majority of Israelis, including the Opposition, are satisfied with the Government's response.

Israel is the only country which is expected by almost all the international community to pay a price for recognition by its neighbors. For a reversible exchange of ambassadors with Egypt, Israel last year irreversibly returned the whole of the Sinai peninsula; no one said thank you, but insisted that the Israelis continue to pay for recognition all round, with the minimum cost being

the complete return to the pre-1967 armistice lines. Such an atmosphere of automatic and unconditional ostracism on the international scene cannot but stiffen the policies of any Israeli government. There is no other country or similar body in the world that shares this experience.

When it comes to our relations with the Western democracies, even our friends with a very good general picture of the Israeli scene do not realize just how suspicious and bitter our disappointments have made us. Israel no longer dares expect a fair deal from the international community. The problems of the Middle East are not only endlessly aired over the media but in national and international political assemblies as well. Thus, the Security Council is busy with Israel, in one way or another, in about a third to one half of its sessions, the BBC spends twice as much time on the Middle East as on European security and the General Assembly of the United Nations spends a good part of its sessions on condemnations of Israel, with the moral rectitude of the international community represented by a range of countries from Uganda, Libya and Grenada (very often), to the nations of Western Europe, by way of the Communist bloc.

When European countries make proposals for Mideastern settlements which by-pass the Camp David accords and tend to outdo the United States in meeting Arab demands, Israelis believe that principles are being sacrificed to political or economic expediency and feel correspondingly disillusioned. To them, it is clear that the European Economic Community is in no position to assume any responsibility for whatever allowance it has made in its proposals for the safety of Israel. Europe has defence problems of its own, with which it is hard put to cope. Western eagerness to please the Arabs only enhances Arab intransigence and encumbers any progress towards accommodation. That, at least, is how it looks to Israeli eyes.

An Israeli friend offered the following recommendations, which might engender a more positive approach to these and other questions of the moment:

1. Agreements are not technical documents, certainly not in the Middle East. Creating attitudes of trust is far more important and fertile than any stark, ready-made, mechanical solution. And it is with help towards this general climate of mutual confidence that friends, from both Europe and North America, can contribute.

2. Do not rush to arm the Arab states. Rather than as a deterrent, the weapons are purchased to be used. The chief aim of the massive Arab military build-up is against Israel and will inevitably lead to more bloodshed.

3. Accept Arab demands only if you feel bound to do so out of conviction, not out of fear.

4. Help Israel not to become an outcast. Rather than ostracising the country or allowing it to be banished, make it feel at home in the international community.

5. Please stop moralizing. Apply the same standards you would if you had similar obstacles to those Israel faces. You might discover that Israel shows up rather well after such an exercise.

Towards these ends do not hesitiate to write or speak.

With best wishes,

Yours sincerely,

DAN BAVLY.

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

A RESOLUTION WITHOUT RESOLVE

Mr. PROXMIRE. Mr. President, later today we will settle our position on the budget resolution. I am going to vote against the Domenici-Baker substitute amendment for the budget resolution. Despite the long hours of debate and despite all of the commendable efforts of those involved, we are voting on an irresponsible, misguided compromise resolution that obviously reflects a lack of will to do what we must do, which is to cut spending and raise taxes.

Let us be clear about it. This resolution endorses deficits of about $200 billion a year as far into the future as we can reasonably see. We will be incurring these deficits during a period of economic recovery.

What does that mean? It means that millions of consumers will not be buying new houses, cars, and consumer durables. It means that many businesses will be trying to find credit to finance an expansion. And they will not find it. These private borrowers will run head-on into the Federal Government, which will be financing those staggering deficits. That collision will either damage the recovery, by raising interest rates, directly, or set off another bout of inflation, which also would skyrocket interest rates.

Mr. President, we find ourselves in this situation because a number of Senators evidently believe that deficits are less damaging than either increasing revenues or decreasing spending. That belief, over the past two decades, is what got us into the mess we now face. The Senate should have learned by now that these deficits will have to be paid for—one way or another.

Economists seldom reach a consensus on anything but nearly every economist agrees that deficits approaching $200 billion during the middle of a recovery are poison. Nearly every Senator agrees that deficits should be reduced. Yet when the resolution reaches the Senate floor, we move in exactly the opposite direction.

We scale back needed revenue increases, ostensibly because raising taxes now would harm the recovery. Little is said, however, about higher interest rates, caused by higher deficits, and how that will torpedo the recovery.

We add money to spending to appease the White House and powerful special interest group while, in the next breath, excoriating large deficits.

Mr. President, the Senate has made a choice, and a wrong one, I believe. We could have asked the American people directly to pay for these deficits. That would have meant more taxes and less spending.

The economy will have to absorb deficits which are unprecedented in peacetime. In 1968, at the height of the Vietnam war, the deficit reached 2.9 percent of GNP. Many people believe that deficit sparked the inflation which bedeviled the economy during the last decade. During the recession of 1974-75, the deficit reached 3.9 percent of GNP. During the late seventies, inflation once again exploded and the prime rate went over 20 percent.

We may now be slowly recovering from another recession. But the deficit this year will be 6.5 percent of GNP. This is a far higher percent of GNP than the deficit recorded in 1933, the worst year of the Great Depression when unemployment climbed to 25 percent. In percentage terms, this deficit is two-thirds higher than the one incurred in 1976 during the last major recession.

Mr. President, because deficits of this size are unprecedented, it is difficult to predict what their influence will be. Are credit-sensitive industries to be put through the wringer once again? Will the Federal Reserve, under political pressure, buy the Treasury debt, pump large amounts of money into the economy and ignite another round of inflation? Or will the recovery slow and sputter under the weight of these deficits?

We will be able to go home tomorrow and reassure the defense contractor that the money will continue to flow, make points with the teachers because of more money for education, and comfort the taxpayers by promising another tax cut in July. But 2 or 3 years from now, after the next election, how many of us will be willing to accept the blame when industry cannot find money to invest in new plant and equipment. How many will step forward to accept the blame when inflation begins its insidious growth. How many will explain to the frustrated couple looking for a new home: "Those large deficits I voted for 2 years ago are the root cause of your being unable to buy that new house."

How many? We all know the answer to that question—none.

Mr. President, we seem to have fallen rather casually into the habit of breaking new records. Unemployment hit a postwar high and we continue with business as usual. We run up more of a deficit in 6 months than we have incurred in any preceding year—any preceding year, Mr. President. That fact merits only a passing glance. Federal spending, as a percentage of GNP, reaches a peacetime high. Another ho-hum.

Business as usual will no longer serve, Mr. President. We need to stiffen our resolve and squarely face the Nation's economic problems. But with this resolution we continue to evade,

to procrastinate, and to hide. The Nation deserves better of us.

NUCLEAR ARMS CONTROL DOES NOT REQUIRE TRUSTING THE RUSSIANS

Mr. PROXMIRE. Mr. President, perhaps the most troublesome obstacle in the way of nuclear arms control is the widespread conviction in this country and in this Senate that we cannot trust the Russians. Many Americans are convinced they will cheat. So the question: "How can you make a contract or an agreement with a nation that will flaunt the agreement, that will not keep it?" But, Mr. President, as "Living With Nuclear Weapons," the Harvard study group's recent book points out, this is a half truth about arms control. The fact is that we do not have to trust the Russians.

What we have to do is to be able to verify that the Soviets are or are not keeping their promises. On Monday the Senate Defense Appropriations Subcommittee took several hours of testimony on arms control as a military strategy. At that hearing, I asked William Colby, the former head of the Central Intelligence Agency, whether we could verify a comprehensive nuclear freeze agreement with the Soviet agency. Few people in this country can speak with the authority of Mr. Colby on the capability of our intelligence system and the extent to which we can or cannot verify an arms agreement with the Soviets. For years his job was exactly this: to determine what the U.S.S.R. and especially its military forces were doing. He said that any cheating on a comprehensive nuclear freeze would have to be so substantial in order to give the Russians any kind of significant advantage that we would be able to tell.

I asked Colby this hypothetical question. "Suppose the Soviets were to construct a massive underground factory and turn out hundreds or thousands of cruise missiles and conceal these missiles deep underground. The cruise missile carries a tremendous nuclear wallop. But it is small."

Colby said that such a production effort would be detected by our intelligence even if it were far underground, because of the many activities and supplies necessary to feed such an operation and to carry off the necessary wastes. He said that we would not need onsite inspection to verify such an agreement.

Furthermore, as the Harvard study indicates, modern arms control agreements between superpowers usually include specific provisions to enhance verification of compliance. The study gives these examples:

1. The Antarctic Treaty (1959) guarantees that designated observers will have access to all areas of the Antarctic.

2. The non-proliferation treaty (1968) provides for international safeguards including on-site inspections to deter diversion of nuclear materials from civilian to military use.

3. The SALT I (1972) agreements prohibit deliberate concealment measures and other forms of interference with national technical means of verification including photographic satellites.

And the Harvard study also points out that:

Soviet secrecy would be an even greater problem for U.S. defense planners without the bonus of information that comes with verifiable arms control agreements.

REMEMBERING THE VICTIMS OF THE HOLOCAUST

Mr. PROXMIRE. Mr. President, for many years I have urged this body to ratify the Genocide Convention. I live in constant wonder why over the past 34 years the Senate has failed to act on this important treaty.

I am only left to think that despite atrocities of Nazi Germany, Cambodia, Surinam, East Timor, Iran, Armenia, and other countries that I and other Senators have detailed on the floor of the Sente, genocide remains too far removed, too elusive a concept for the Senate to grasp and deal with. Perhaps it is because of the magnitude of the horror that we fail to realize its tremendous consequences. Perhaps we can gain some perspective if we view the Holocaust as 6 million individual examples of brutal and premeditated murder.

A book, previously published in Europe and now available in this country, may help my colleagues to overcome the elusiveness that this difficult topic seems to carry.

The book, "Memorial to the Jews Deported from France—1942-1944," documents the personal histories of 80,000 Jews who were sent from France to Nazi death camps.

The book was compiled by Serge and Beate Klarsfeld, two noted Nazi hunters. At a press conference marking the American publication of this extraordinary volume, Serge Klarsfeld noted that 78 convoys traveled from France to the Auschwitz concentration camp between 1940 and 1944, carrying a human cargo that included Jews from 67 countries, many of these children separated from their parents.

In a small, yet important way, each time one of us reviews these photographs and life histories, we remember and reaffirm that each one of these victims lived.

I urge my colleagues to look at this book, and I do so in the hope that the personal histories of those killed may make the horrible act of genocide a little less elusive, a little more real, so that the Senate can get on with its duty and ratify the Genocide Convention.

SOVIET SPYING ACTIVITY

Mr. THURMOND. Mr. President, I have become increasingly concerned over the recent global upsurge of Soviet spying activity.

In the first 4 months of 1983 alone, 10 Western nations have expelled approximately 70 Soviet diplomats, journalists, and other officials on charges of espionage.

Sweden has recalled its Ambassador to the Soviet Union and protested through diplomatic channels Moscow's violations of Swedish territorial integrity in two recent cases of suspected Russian naval maneuvering.

This past April, France expelled 47 Soviet officials on charges of espionage, the largest Soviet group expelled since England deported 105 Russian citizens in 1971.

The United States, in addition to expelling three Soviet officials in April, deported members of Cuba's United Nations delegation on charges of intelligence activities. According to FBI estimates, there are approximately 1,000 Communist intelligence agents operating in the United States. Through their combined espionage efforts, the Soviets have allegedly been successful in acquiring details of American secrets dealing with: Radar system for the B-1 and Stealth bombers, F-15 look-down, shoot-down systems, and Phoenix air-to-air missile systems.

Soviet successes at obtaining both information and hardware for development of their own new weapons systems have reportedly saved that country billions of dollars in research costs, and have cut their weapons development time by several years.

Mr. President, the current rash of expulsions should serve as notice that the Soviets have not abandoned their goals of worldwide disruption and domination. All this activity comes at a time when there are those who argue that the Soviet Union is playing a minimal role in the crisis in Central America. Unfortunately, the truth of the matter is that, at this very moment, Cuban and Soviet intelligence personnel are feverishly aiding those who wish to oppress the citizens of Latin America and disrupt the lifestyles of those who strive for democracy in that area.

Mr. President, we should not take lightly this recent surge of Soviet spying activity. We should realize that the Soviet Union is enhancing its efforts to gain military and technical superiority over those who oppose their totalitarian system. Additionally, we should support the President's efforts to convince the leaders of other Western nations of the need for increased coordinated efforts aimed at preventing the Soviets from obtaining their goals through espionage.

Mr. President, I recently came across an article in the U.S. News & World

Report that describes this problem in some detail. I ask unanimous consent that a copy of this article appear in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From U.S. News & World Report, Nov. 8, 1982]

BEHIND LATEST SURGE IN SOVIET SPYING

Item: An allegation surfaces of a Soviet "mole" penetrating British intelligence and pinpointing nuclear weapons of Britain and the United States.

Item: A KGB spy master defects to the West with dossiers on Soviet secret agents in Europe and the Near East.

Item: A Polish banker operating as an undercover agent seeks asylum in the U.S. and provides the CIA and FBI with new details of Soviet-bloc intelligence operations.

Three spy thrillers in a matter of days have stripped bare Soviet-bloc espionage of a scale and gravity that is shaking counter-intelligence services around the world.

The disclosures in late October showed Soviet agents are tapping the free world's closest-held military and industrial secrets—often with alarming ease.

One report—of lax security at a top-secret British communications intelligence center—threatens to weaken U.S. cooperation with Britain in intelligence operations.

In this scandal, translator Geoffery Prime is accused of giving Moscow secrets that damaged the West as badly as the notorious English traitor Kim Philby did in the 1950s.

Offsetting Prime's alleged betrayal somewhat are the defections of Polish banker Andrezj Treumann and the KGB's top man in Iran, Vladimir Kuzichkin, who reportedly have exposed subversion plans of the Kremlin.

Sweden's recent effort to force a presumed Soviet-bloc submarine to surface in its waters showed just the military aspect of the espionage threat. No less worrying for Western authorities is the Kremlin drive to steal industrial secrets. Japan is a prime target for Soviet acquisition of high technology that cannot be obtained directly from the U.S.

The brazenness of the U.S.S.R.'s spying campaign is underscored by the growing number of expulsions of Soviet agents in diplomatic clothing from embassies worldwide—at least 21 from 11 nations in the first six months of 1982. Among them—

Last February Norway expelled two Soviet trade officials who tried to buy secrets from employees at plants producing components for the American-designed F-16 fighter.

Bangladesh in April kicked out two Soviet Embassy attachés who were tracked into a jungle where they tried to burn 588 reels of film.

In April, Spain deported two Soviet airline employees for trying to infiltrate the Spanish Air Force.

On October 2, Switzerland caught a KGB colonel and his wife using the neutral country as a base for spy missions.

U.S. News & World Report correspondents in major capitals find grave concern about Moscow's spying. This picture emerges in talks with intelligence exports and diplomats:

London

Britain has been shaken by what appears to be the most damaging penetration of Western intelligence since the time of traitors Kim Philby, Guy Burgess and Donald Maclean.

The latest treachery centers on charges against Geoffrey Prime, 44, who worked from 1968 to 1977 as a translator at the heart of Britain's electronic-intelligence network.

Prime reportedly stole secrets that enabled Moscow to locate all British and U.S. nuclear warheads, to learn day-by-day readiness of every NATO division, to identify Western spies, to discover which Soviet codes had been broken by the west and to plant false information.

Prime's role was leaked by U.S. officials who were angry about sloppy British security. One former employee of the British spy operation said security at the center—which works closely with America's supersecret, code-breaking National Security Agency—is "just about good enough to fend off a well-meaning drunk."

Prime Minister Margaret Thatcher faced heated questioning about the charges in Parliament. And one Conservative member, Geoffrey Dickens, said: "Our computers in this country appear to be leaking like sieves."

Aside from the penetration of the electronic-intelligence center, Russian spies in Britain are striving to obtain computer-technology secrets as well as details of operations in the North Sea oil fields. Of particular worry is the vulnerability of data in government computers. Civil-service operators are usually more poorly paid than those in the commercial field; many leave for better salaries, taking with them intimate knowledge of government techniques and becoming targets for subversion.

Tokyo

Soviet-bloc spies have focused in the past two years on prying into Japan's advanced industrial technology. Officials say this trend was accelerated by President Reagan's toughened embargo against the Soviet Union because of Russia's support for the martial-law takeover in Poland.

Targets of Soviet agents are Japanese technologies in ceramics, electronics, robots, optical fiber, genetic engineering, lasers, biotechnology, nuclear fission and fast-breeder reactors. Japanese ceramic materials, for example, could replace steel in the manufacture of lighter and stronger tanks, ships and planes.

Efforts by Tokyo to guard against espionage seem half-hearted. Stripped of military power after World War II, Japan has no antiespionage laws to back a crackdown.

In the past 37 years, Tokyo has uncovered only nine spy cases involving Russians, who safely fled while the prosecution focused on their Japanese accomplices. The spies are reportedly helped by 2,000 Japanese citizens recruited by Moscow while being held prisoners after World War II.

In one notable case in 1980, a major general in Japan's Self-Defense Force was given a one-year prison term for passing classified information to Soviet military attachés.

Bonn

West Germany is a hotbed of Soviet-directed spying, and authorities assume that Communist agents here number in the thousands. In 1980 alone, 33 persons were convicted of spying and more than 50 were arrested.

Last month, Bonn's annual official intelligence report detailed thwarted attempts by Poland's Deploma trading office in Düsseldorf to obtain plans for the electronic-guidance system for an American-made rocket. And the report said the Bulgarian Embassy tried to evade embargoes by ordering small quantities of a product from a range of companies. Eyed by the Bulgarians: Microelectronics, laser optics, radiation technology and semiconductors.

In March, the Bonn parliament learned of the expulsion of 10 Eastern European agents posing as businessmen. Investigators said much of the spying was done by "mixed firms" in which the agents operated businesses jointly with West German partners.

Authorities say Soviet-bloc agents increasingly use a technique of recruiting jobless workers who advertise for employment in West German newspapers. The job hunter is usually contacted by phone or mail and offered an expenses-paid trip to East Berlin, where he is pressured to start spying. Officials say 70 percent of all Communist espionage is handled by East German intelligence.

Paris

Soviet-bloc agents in France have a special mission. French police say that for the past two years they have focused on disinformation and destabilization.

One part of the strategy: Discrediting exiles and dissidents from Eastern-bloc nations. Action against exiles ranges from surveillance to beatings and even murder. Officials say the problem is growing because of pressures for human rights in Soviet-bloc countries and struggles against corrupt Eastern regimes.

Exiles working for Radio Free Europe have been beaten or sent parcels containing bombs. A Romanian journalist was stabbed 22 times in a Paris underground garage in 1981.

In the two decades before 1980, the French regularly expelled Soviet diplomats who were often caught with photocopies of classified French or NATO documents. One of the most ambitious plots, though never proved, involved the acquisition of plans of the French supersonic airliner Concorde that helped the Soviets to build the Tupolev 144.

The latest expulsion involved an assistant Soviet air attaché caught stealing equipment from an exhibit at a Le Bourget air show.

The French secret service, DST, has a special branch protecting some 400 "sensitive" firms here, both advising and shielding them from spies. But DST says that at least 70 percent of the "sensitive" information can be collected legally by spies without their resorting to breaking into offices or planting electronic snooping equipment.

Severe punishment has been meted out in a few cases of industrial espionage brought to light here. Last February, Marcel Abel was sentenced to five years in prison for mailing specialized pharmaceutical publications to East German security services—even though there was no proof his work had harmed French military or economic interests.

Geneva

Switzerland—traditionally a mecca for international spying—is a springboard for Communist espionage in Western Europe, and the counterintelligence task here is awesome. Geneva hosts a number of international organizations with a total of more than 15,000 employees and frequent personnel changes. One third of all persons involved in Swiss spy cases are diplomats or officials of international agencies.

Yet some "deserters" cast doubt on the effectiveness of KGB people in Geneva. One difficulty: They are poorly briefed and live

isolated in Soviet diplomatic quarters amid nepotism and bureaucratic game playing.

KGB operatives here reportedly become competitive in an unproductive way, trying to impress superiors and to prolong their stay in wealthy Switzerland.

Stockholm

Tens of thousands of shortwave-radio messages are now being beamed to Communist agents in Scandinavia, according to Swedish intelligence. The sensation in October over the suspected presence of a Soviet submarine in Swedish waters is only the latest in a long history of such incidents. Soviet-bloc submarines continually violate Swedish sovereignty to spy on defense installations and reconnoiter places that could serve as military bases in time of war.

Controls were tightened after a Soviet sub was found aground in 1981 in restricted waters near a Swedish naval base. But still, the Swedish military has investigated more than 50 reports of suspected foreign submarines since June. Unconfirmed reports say Soviet subs recently put ashore spies in the Stockholm archipelago.

Last October, Denmark expelled Valdimir Merkulov, a KGB case officer working under the guise of a diplomat. Merkulov arranged through a local KGB agent of influence to have 150 Danish artists sign an appeal calling for a Nordic nuclear-weapons-free zone and supplied money to place the appeal in newspaper advertisements.

Ottawa

A former security official of the Canadian government charges that the Soviet Union is deeply involved in at least two Canadian industries. Edmund R. M. Griffiths, now president of Sterling Risk Assessment Corporation, says the Soviets are locked into farm-machinery and auto firms.

He also says Parliament has shown little concern.

Griffiths—a former assistant to the Minister of Justice, the Attorney General and the Solicitor General—also complains that Soviet spies "get sanctuary in universities, but the educators don't want to allow counterespionage agents the luxury of competing on campus."

Canada expelled a Soviet diplomat in April for tryting to buy high-technology communications products that Western nations agreed not to sell to Moscow. Mikhail Abramov, the Soviet trade representative here, offered large sums of money to an unidentified Canadian businessman in an attempt to illegally export fiber-optic and other items.

In January, 1980, Soviet military attaché Igor Bardeev and two of his staff were expelled for trying to find out the electronic "black box" secrets of the American-made F-18A Hornet fighter plane that Canada was considering buying for its forces.

Singapore

Soviet spies are keenly interested in the Western Pacific and Indian Ocean because of increasing U.S. military activity in the region and because Russians now operate out of the former U.S. base at Cam Ranh Bay, Vietnam.

Attention on espionage in this area sharpened last year when three Soviet diplomats were expelled by the Malaysian government after the Prime Minister's political secretary was arrested and accused of spying.

Singapore in February expelled two more Russians on espionage charges, including Anatoliy Larkin, the second secretary at the Soviet Embassy.

Also in February, two Russians were kicked out of Indonesia. Intelligence sources say the two were getting oceanographic information on Indonesian waters from an Indonesian military officer. This information included details on water depths and density that would be invaluable to Soviet submarines seeking to enter the Indian Ocean without being detected.

The expulsion of Larkin is cited as a classic example of how Western governments often work at cross-purposes in combatting the KGB. Some sources say that Larkin, a senior KGB man, was ousted from Singapore to show the solidarity of Southeast Asian nations against Moscow—and not because he has picked up critical information.

In fact, Larkin, a playboy type who liked the good life, reportedly had already been tabbed as a potential defector. The CIA was about to approach him with an offer when the Singapore arrest came—blowing the whole operation.

THE WIDE NET OF SOVIET ESPIONAGE IN AMERICA

Wherever Soviet-bloc spies operate around the world, their No. 1 target is American military and industrial technology.

Enough cases have come to light in recent months to indicate the extent of their efforts in the U.S.

Gen. Vasiliy Ivanovich Chitov, a top espionage agent working out of the Soviet Embassy in Washington, was caught in February making a pickup at a message-exchange point. He was expelled the next day.

Two Cuban diplomats at the United Nations were expelled in July after customs agents intercepted a TV-satellite monitoring system they were trying to get out of the country.

A Polish espionage officer and a former executive of a defense plant in Southern California were sentenced to long prison terms last December in what the FBI called "one of the most damaging espionage cases uncovered in the country in over a decade."

A defector told the FBI last year that Soviet engineers who visited aircraft plants in this country as guests of the State Department wore special shoes that picked up metal shavings to be analyzed for their alloy content.

But publicized cases such as these are the exception. Most of the espionage-counterespionage war between the U.S. and Russia is hidden from public view. Sometimes spies are protected from prosecution by diplomatic immunity and are quietly sent home. More often, the FBI tries to get them to work for it.

In late October, the highest-ranking Polish banker in the U.S. defected and reportedly provided the FBI with valuable inside information on the Soviet-bloc espionage apparatus.

If it is not possible to convince a spy to defect or act as a double agent, he may still be permitted to operate but under FBI surveillance. "Otherwise," says FBI Director William H. Webster, "we run the risk that he will be replaced by someone that we do not know."

The number of Soviet-bloc spies active in this country certainly runs into the thousands.

More than a thousand espionage officers are known to be attached to embassies, consulates and to the U.N. in New York. They often work quite openly in efforts to gather information and recruit Americans as agents.

At technology conferences, they mingle, shake hands and avidly collect business cards.

How many Americans they have recruited is not known. Also hidden from view is the number of "sleepers"—spies sent here to remian quiet until they are activated for a particular espionage job.

The Soviet effort is also aided by more than 20 firms in this country owned by Russia or its Eastern European allies—serving as conduits for U.S. technology.

Although Soviet espionage agents sometimes seem to act as vacuum cleaners, scooping up anything they can get, the CIA says they work from lists of most-wanted technology carefully compiled by the Soviet State Committee for Science and Technolgy.

Says the FBI's Webster: "I do not think there's been another time in our history when our country has been under such a sophisticated espionage assault."

JERRY W. COOPER, TENNESSEE'S SMALL BUSINESS PERSON OF THE YEAR

Mr. SASSER. Mr. President, this is National Small Business Week, a week in which both the public and private sectors take note of the entrepreneurial spirit which has not only made our country great, but which serves also as the very backbone of our Nation's economy.

Indicative of that spirit is Jerry W. Cooper of McMinnville, Tenn. He is the State's Small Business Person of the Year. This honor is bestowed on an individual only after a rigorous process of nomination and review by councils, committees, and the Small Business Administration (SBA).

In order to receive recognition as Tennessee's Small Business Person of the Year, Jerry Cooper and his business—Cooper Manufacturing, Inc., a firm that designs and manufactures furniture and furniture parts—were judged on the following criteria:

First, the business' "staying power," that is, its substantiated history as an established business; second, the growth in the number of its employees, a benchmark by which to judge the business' impact on the job market; third, an increase in sales or unit volume, which is an indication of continued business growth; fourth, evidence of the improved financial condition of the business as reflected in its current and past financial reports; fifth, examples of the creativity and imagination of the business as demonstrated in the innovativeness of the product or service which it offers; sixth, how the business responds to adversity, as seen in the problems faced by the business and the solutions taken in resolving those problems; seventh, evidence of contributions by the business to aid community-oriented projects as illustrated through the personal time or other resources contributed to such projects; and finally, any initiatives the busi-

ness took to create new jobs, help reduce inflation, employ the handicapped or disadvantaged, save energy, or improve the environment.

In the explanation that accompanied the award to Jerry Cooper, the SBA outlined just why he managed to succeed and become Tennessee's Small Business Person of the Year:

In April 1973, Jerry W. Cooper and a partner founded Cooper Manufacturing Inc. to design and manufacture furniture and furniture parts and to buy and sell lumber and wood products. The partners found that although they purchased log-run lumber—the full product of the log—the furniture they wanted to make required only the middle grades, so they set out to locate customers who could use the upper grades for cabinet stock and lower grades for pallets and skids. A kiln that took six months to build and had been installed less than two months was destroyed by fire and completely rebuilt in 16 days. The company has been successful in marketing its kiln-dried lumber; sales in 1982 were $1.4 million, and employment is up to 42. Jerry Cooper is deeply involved in community projects. As President of the Jaycees in 1982. he worked on a project to build a camp for physically and mentally handicapped people of all ages at Cordell Hull Lake in Jackson County.

Mr. President, I am proud to know and represent Tennesseans such as Jerry W. Cooper, and I am pleased that he has been honored for his outstanding business record. It is a standard by which other businesses ought to measure themselves. It is also a good example of the reasons we have a National Small Business Week, because it has provided a forum for recognizing in people like Jerry W. Cooper the entrepreneurial spirit which serves as an inspiration to us all.

SOIL CONSERVATIONIST WINS NATIONAL HONOR

Mr. SASSER. Mr. President, my colleagues and I are very pleased to learn that a fellow Tennessean, Mr. E. B. Dyer of the USDA Soil Conservation Service in Nashville, has been selected to receive 1 of 10 Gulf Oil Corp., awards for professional conservationists in 1983. Mr. Dyer and his wife Sarah were in Washington this past Thursday evening to receive the honor.

He has been a career civil servant in the cause of soil and water conservation for 26 years, all of that time in Tennessee. His accomplishments are of lasting benefit not only to Tennessee and the Nation but extend even to other nations as well.

E. B.'s relationship to my family goes back many years when my father, Mr. Ralph Sasser, served as State conservationist of the Soil Conservation Service. I have had the pleasure of knowing E. B. and working closely with him on many issues over the years. He is truly an outstanding individual and an outstanding conservationist. He has demonstrated his professionalism and leadership abilities in many varied activities and in varied responsibilities including his present role as assistant State conservationist.

Within Tennessee, he has been a really innovative producer of useful information and ideas about natural resource issues—and an effective catalyst in motivating employees of SCS and other agencies, conservation district leaders, and farmers and their organizations to recognize the problems and work together to resolve them.

He has contributed as well to national programs through his model efforts in river basin planning, in watershed and rural clean water activities, and in targeting of information, education, and technical assistance toward solving critical soil and water problems through voluntary programs.

Because of his professionalism in the many aspects of soil and water conservation, he was selected by USDA in 1981 to represent the United States as a member of a four-person team to review and advise the People's Republic of China about soil and water problems. Not only were his recommendations in China helpful in designing programs over there, but also he escorted a group of Chinese conservation and agricultural officials on a 6-week tour of the United States.

He is a member of many professional, civic, and church groups, and has given extra measure to each of them just as he has on his regular job. He has given hundreds of lectures, speeches, and programs—and has helped many of these groups find a common purpose so that they can accomplish more working together than by their separate actions.

In fact, he helped form the Natural Resource Conservation Societies of Tennessee that provides a coordination and communication function for five professional conservation societies in the State. I participated in that group's conservation field day last fall that was attended by more than 500 people. The result is many more people who are active in caring for our State's natural resources.

E. B. was graduated from the University of Tennessee at Knoxville, in agronomy and soils. He also has received a master's degree in economics from North Carolina State University. He has combined technical knowledge with a love of people and the land and an ability to lead. He truly represents the best in Federal programs, and he has worked unstintingly to improve these programs.

I am glad that Gulf Oil Corp., itself has the kind of active interest in soil and water conservation that it devotes so much attention to recognizing dedicated people in the field—and I am glad that Gulf Oil saw fit to recognize E. B. Dyer.

THE MEMORIAL PLAQUE FOR THE AMERICANS WHO DIED ON THE IRAN RESCUE MISSION

Mr. THURMOND. Mr. President, the United States recently honored the eight brave Americans who gave their lives in the ill-fated Iranian rescue mission, a ceremony I and many of my colleagues had the high honor of attending.

Ambassador Bruce Laingen, who headed up our Embassy in Teheran and has since taken up the cause of honoring the Americans who died trying to free the 53 hostages, gave, perhaps, one of the most inspiring and moving addresses I have heard.

He spoke eloquently of freedom and of the bravery of the men on the Iranian rescue mission, soldiers who were ready to make the supreme sacrifice for their country. The recurrent theme in Ambassador Laingen's speech, however, was self-sacrifice, and how this Nation has always been blessed with men and women of great courage—people who give of themselves so that the torch of freedom will continue to burn brightly.

Mr. President, my colleagues who attended the unveiling and dedication of the plaque in honor of those who died in the Iranian rescue mission will long remember the ceremony. Indeed, it was one that we should never forget; and the plaque honoring the eight brave men who died in that tragic event will be a silent and stirring reminder to us and our children that freedom costs, and that there are those who have paid the price.

In order to share more about the dedication of the plaque and the ceremony at Arlington National Cemetery, I ask unanimous consent that the address by Ambassador Bruce Laingen, commemorating this historic event, be included in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS BY AMBASSADOR BRUCE LAINGEN AT CEREMONY IN ARLINGTON NATIONAL CEMETERY

Mr. Secretary, Members of Congress, distinguished guests, families of those we honor, colleagues from the Tehran hostage group:

Three years ago those whose memory we honor today were members of a small band of valorous men, embarked on a mission of almost incredible complexity. Men persuaded by hope and filled with the exuberance of youth, bright eyed in a spirit of adventure and daring, confident and committed in teamwork.

But more than that—they were also men joined together because they cared; because they cared about something much larger than themselves. Because they cared about freedom; because they cared with special fervor about the freedom and welfare of 53 of their countrymen; and because they cared about the dignity of the human spirit.

Renewing in this way their commitment to those very fundamentals of individual freedom that have always been at the core of the American experience; reminding us of the commitment of all who respond to the call of public service. Reminiscent of an expression from Thomas Paine that those who expect to reap the blessings of freedom must undergo the fatigue of supporting it. Reminiscent also of a maxim attributed to another American patriot, Andrew Jackson, that one man with courage makes a majority. Courage was not in short supply at Desert One. The men on that mission three years ago made courage contagious.

This is not the time or place to make a judgment of the technical or political wisdom of what those men were asked to do, and of the resources made available to them. Their mission has been termed a failure. And it did fail, in the sense that none of those men reached their goal. And it was a terrible tragedy in the loss of these eight men.

But it was not a failure in other respects: in what was learned, and in the demonstrated readiness of that group of men to try, and to try against almost impossible odds. Nor was it a failure in the way they reaffirmed in that way America's espousal of freedom and in the example they set for all of us of personal courage and sacrifice.

Today we come to this place, so symbolic of sacrifice in our nation's history, to dedicate a simple plaque to their memory, and to their heroism; yes, and also to commemorate the courage and spirit of all who went on that mission, and the love of families that gave them the strength to try.

A plaque that can do little to ease the pain of the families of those who did not return. A plaque inevitably inadequate in terms of what we owe them. But let this plaque, this monument, be seen as something more as well; let this plaque—and its dedication today—be also a reminder of the sacrifice of those many unsung heroes in a far larger sense. All those in public service who give of themselves and, not infrequently, their very lives in responding to the call of duty; all those whose lives are lost in the daily task of training and exercises in maintaining our military deterrent in times of peace, at sea and on land (including those who died in the Indian Ocean while we were held in Iran), but whose loss sees so little public notice.

Yes, those too who man and who seek to protect our Embassies abroad in so many areas of risk—all of us reminded this past week by the tragedy of Beirut of what too often we take for granted in such service and where examples of heroism too often go unnoticed. Unsung, all of them, but heroes too, just as much as those we honor here today.

So let this memorial be a continuing memorial, one that is alive in our minds and preserved in our hearts, to all who even today risk their lives, their homes, their sacred honor in the defense of those ideals that have made us proud to be called Americans.

And now to you, eight brave countrymen, who tried to reach out to us; from 53 fellow Americans who did not and now can never know you, but whose freedom when it finally came was brighter because of what you tried to do and what your memory means to us; over the distance of that great unknown that in death divides you from us, but within the faith that unites us all; we salute you, we reach out to you in a spirit of undying respect, we will not forget.

I now ask Secretary Weinberger to join me in unveiling the memorial plaque.

TRIBUTE TO MAJ. GEN. ALBERT AKERS, THE COMMANDING GENERAL OF FORT JACKSON IN SOUTH CAROLINA

Mr. THURMOND. Mr. President, I rise today to call to the attention of the Senate an excellent example of civilian and military relations.

Recently, Maj. Gen. Albert Akers, the commanding general of Fort Jackson, S.C., was presented the Ambassador of the Year Award by the Greater Columbia Chamber of Commerce. General Akers received this award in recognition of his dedicated service to both Fort Jackson and the city of Columbia, S.C.

General Akers has epitomized the motto of Fort Jackson, which is "Victory Starts Here." Not only does victory begin with tough basic training, its bedrock is strong civilian support of the military.

His pursuit of excellence in training soldiers carries over to the fine relationship Fort Jackson enjoys with the city of Columbia.

Mr. President, General Akers is to be commended for the outstanding job he has done as commanding general of Fort Jackson and in developing a strong relationship between the fort—the Army's largest and most active training center—and the city of Columbia, and I ask unanimous consent that an article from the Columbia Record newspaper, concerning General Akers, receipt of the Ambassador of the Year Award, be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AWARD DESERVED

Fort Jackson has enjoyed a sometimes capricious but largely fruitful relationship with the city of Columbia since World War I.

A beneficial reciprocity has occurred because there has been a consensus and an understanding on the part of the military and civilian communities that to have it otherwise would be merely an uneasy state of coexistence.

Through the years, Fort Jackson and Columbia have been fortunate to have as commanding generals civic-minded individuals who have blended well with the community outside the army installation.

None has fitted in better than the current commander, Maj. Gen. Albert B. Akers. For his community work, he was presented last week the annual Ambassador of the Year Award of the Greater Columbia Chamber of Commerce. Al Akers deserved it.

"Good relations are a must," Akers said in a recent interview. "Anything less is time consuming and debilitating and detracts from our mission. It's like a man who is quarreling with his wife. It's going to affect his job."

What he really said goes without saying, of course, but sometimes the obvious needs stating lest passivity and a "taking-it-for-granted" attitude allow relations between the civilian and military communities to degenerate imperceptibly into alienation and suspicion.

What may have begun as a marriage of convenience has for Columbia and Fort Jackson evolved through active good faith into a union of genuine respect and, yes, even affection.

REPORT ON BILATERAL TALKS WITH LEADERS OF MEXICO, PERU, AND BRAZIL

Mr. SYMMS. Mr. President, from March 25 to March 31, I participated in bilateral talks with political leaders, central bank chiefs, diplomats, and businessmen of Mexico, Peru, and Brazil in their respective homelands.

I returned with great admiration for the leaders I met, and I remain impressed by their courage in the face of distressing economic and social conditions. However, I must also report that I saw little to justify an expansion of the U.S. quota in the International Monetary Fund.

No matter how determined Latin American leaders may be toward correcting their problems, I do not believe that Government action alone can impose enough discipline to solve the economic and institutional inefficiencies that have led to the debt crisis. We would merely be throwing good money after bad, while doing nothing to promote efficiency and free enterprise in Latin America.

All Latin American governments are top heavy. That is, they maintain inefficient civil bureaucracies and lavish pension plans that sap the vitality of the private sector. With each loan we offer, the larger the public sector seems to get. This inefficiency is exacerbated by the continuing practice of political leaders to make the popular move and nationalize foreign investment while discouraging new investment. Denationalizing industries is an essential ingredient in encouraging foreign and domestic equity development.

It is not my intention to be smug, or to rudely lecture my recent hosts. The economic difficulties of Latin America—subsidies, protectionism, distorted prices, inefficient state enterprises, uncontrolled government expenditures, swollen deficits, and inflationary money growth—are also features of our own economy. Indeed, if we continue on the path we are on, it will be the debtor nations who provide the model of the future for the lending nations.

Mr. President, with this concern in mind, I would like to recount a report of my observations as a member of the delegation to Latin America lead by Deputy Secretary of the Treasury, R. T. McNamar.

I might say, Mr. President, as an American, I was extremely proud of

the job Mr. McNamar and Mr. Tom Conover, Comptroller of Currency, and Mr. Tom Dawson, Deputy Assistant Secretary for Developing Nations, did in representing the United States of America. I should also mention the marvelous support of Assistant Secretary W. Dennis Thomas. Each of these public servants and their staffs demonstrated their considerable talent in putting together such a tight and rigorous schedule.

We departed Andrews Air Force Base on Friday, March 25, and arrived in Mexico City 4½ hours later. Even the most worldly traveler has to gape at the Mexican capital, a sprawling metropolis of some 15 to 20 million souls. The wide avenues and promenades of the city are a sight to behold. And, of course, the capital is world famous for its unsurpassed anthropological museums and cultural attractions. Unfortunately, Mexico City is also known for its crowded, unsanitary conditions. The massive population is too great a burden, straining city services beyond capacity. Pollution is severe. It seems to me that any effort to restore the Mexican economy might do well to begin with a reformation of this great city.

Of course, Mexican urban problems do not concern us directly. However, we must note that there is an ominous potential for unrest in urban Mexico. The last Mexican Revolution was lead, in myth if not in fact, by the campesinos. Today, Mexican stability faces a potential threat not from the villages, but from the city—where un- or underemployment afflicts half of the adult population. We must support the Mexican Government in its efforts to alleviate this poverty, not just for humanitarian reasons, but to bolster the stability of our nearest and most important neighbor.

Yet, I cannot accept that the IMF offers the best channel for achieving this. Mexico had the opportunity with the high world price for oil and international lending in the last decade to industrialize efficiently.

This opportunity was squandered.

It does not appear to me that the Mexicans can even pay the interest on their loans, much less begin to pay the principal. It is a Catch-22 situation. If we continue to give them handouts, the inefficient practices will only be bolstered. If we fail to aid them, the Mexican economy might collapse, causing us a legion of immigration and economic problems. Recognizing this, I can only conclude that further aid would be counterproductive—until the Mexican Government reforms the public sector.

On Saturday, March 26, I attended a briefing on United States-Mexican relations from Ambassador John Gavin. Mr. Gavin is certainly an Ambassador the President can be proud of. Fluent in Spanish and well-known in Mexico, Mr. Gavin excelled as a graduate student under Dr. John Johnson, one of the great Latin Americanists of our time, at Stanford University. And, despite some U.S. press reports to the contrary, Mr. Gavin is well thought of in Mexico. He has earned the confidence of the Mexican Government.

In all, Mr. Gavin is a can-do man who eagerly assumes weighty responsibilities with joy. I compliment the President on his choice.

On that same morning, I heard the concerns of many American businessmen, worried about closed doors to their products. There were reciprocal concerns from the Mexican business community that protectionism was a growing issue in the next U.S. election.

To both groups, I stressed that most Americans believe that free trade and open markets would ultimately benefit both societies.

At the National Palace, we met with Jesus Silva-Herzog, the Mexican Finance Minister, and with Bernardo Sepulveda Amor, the Mexican Foreign Minister. I took the opportunity to ask several officials why Mexico expects assistance from the United States, but is unwilling to join our Government in an unequivocal denunciation of Nicaraguan and Cuban proxies of the Soviet Union operating in Central America?

The answer I received was inadequate.

Leaving Mexico on Sunday, our delegation arrived at Howard Air Force Base in Panama, where a quick inspection of the Panama Canal was arranged. This was not my first trip to the Canal Zone; I felt better about the zone in 1982 than now.

While I opposed the Panama Canal Treaty, I have to compliment the State Department on its administration of the transfer agreement. I am especially impressed by the fine performance of the Panama Canal Commission, under the able direction of Retired Gen. D. P. McAuliffe and his resourceful deputy, Fernando Manfredo, Jr.

With such competent administration, more tonnage passed through the Canal in 1982 than ever before.

But the housing of the Canal, under Panamanian stewardship, is deteriorating. The railroad remains in disrepair. The Panamanians are short on capital because much of their Canal profits are paid on international loans. Panama has high unemployment and a low average age for the population; not a recipe for social stability. While Panama is second only to Costa Rica as a model of stability for the region, I am not confident that it will remain so. Havana makes its presence felt throughout Central America. Indeed, there are some 6,000 Communists in Panama itself.

Arriving in Lima in the evening, we attended a reception at the National Palace hosted by President Fernando Bellaunde Terry, a former architect with bold ideas for rebuilding Peru. The President escorted us to a palace room where we saw displays of impressive public works projects. With obvious pride, he showed us plans for great highways to connect the urban coast with the vast interior east of the Andes. He spoke of agricultural expansion. And he told us of a project, now underway, to bore a tunnel through the mountains to open a mammoth hydroelectric and irrigation project.

On Monday, I was impressed by the free-market attitude of the Peruvian Finance Ministry officials. They have made truly heroic efforts to anticipate IMF conditions and to abide by them. One example of Peruvian fiscal sense, in contrast to Mexican practice, stands out in my mind. The Peruvians charge the going rate for the use of their transportation system. Such a frugal cut in state subsidies is unpopular, but it is eventually fairer to everyone.

That afternoon, we conferred with U.S. businessmen and our Ambassador, Frank Ortiz, an outstanding and capable diplomat.

Yet I cannot say that I left Peru entirely satisfied with everything I had seen. As a Peruvian official confided in me, the military, a client of the Soviet Union, casts a long shadow over the National Palace. As you might expect, any criticism of the military by Government officials is made in hushed tones.

I would recommend that those Americans who have qualms about selling U.S. arms to foreign government should visit Peru. Taxiing down the runway at the Lima Airport, sightseers can take in an impressive catalog of Russian weapons, jets, and helicopter gunships. Wherever there are many Soviet weapons, there are also Soviet advisers. And wherever there are Soviet advisers, there are sure to be Soviet KGB agents. Thus, the Soviet Union, in Peru, maintains a constant and malignant presence for all of South America. Oh, how I wish the Peruvian military had U.S. equipment, sans advisers.

Nor is the military the only threat to the Peruvian Government. Since my recent visit, terriorism has markedly increased there. The Sendero Luminoso, a group of self-styled Communist revolutionaries, massacred 80 villagers in the nation's central highlands.

Arriving in Brasilia on Monday, I participated in bilateral talks with the Brazilian Minister of the Economy, the Central Bank President, the Minister of Planning, and many legislators on the following day, But one man dominated my impression of Brazil, President Figueiredo—an impressive man with any title.

In fact, the Brazilian President reminds me greatly of our own President. He is robust, charismatic, an attentive listener, and he has a marvelous sense of humor. He is also direct and uneqivocal in his belief in the urgent need to keep Soviet influence out of Central America, and the Americas in general.

I was also delighted by the quality of our representation by Mr. Langhorne A. Motley. Mr. Motley, like Mr. Gavin and Mr. Ortiz, is fluent in the language of his hosts. Mr. Motley spent the first 18 years of his life in Brazil; in fact, his mother still lives in Rio de Janeiro. He was a dual citizen until the time of his confirmation. You could not ask for a better representative than that. But Mr. Motley has more to recommend him than his birthright. He is a capable and decisive ambassador of great service to the United States.

If you fly across Brazil, an awesome expanse of pristine forests, tropical jungle, and rolling savannah opens up before you. Brazil is larger than the continental United States. One can hardly call this South American giant a Third-World country. Already a booming commerical center when Jamestown was a primitive village, Brazil is now an industrialized nation of 120 million people. Brazil has marshaled its potential to create the world's largest hydroelectric power project at Itaipu, to build automobiles, to produce steel and synthetic fuels. As Brazil continues to focus its energies inward, toward its largely untapped resources, I can't help but wonder how much commercial and industrial competition they will some day pose for us.

And, I expect, there will be considerable competition from Brazilian agriculture. Given the inexhaustable amount of land, the enormous water resources of the Amazon River basin and their propitious climate, we may well see Brazil become a leading agricultural exporter as well.

Brazilian economic progress has, historically, been hampered by the tendency for its inhabitants to cling to the coast. I believe that the Brazilian economy will reach the take-off point when a truly continental highway and railroad network is constructed. With such a network, the infrastructure for mass movements of resources will be open. Only then, will Brazil's potential as a superpower be realized.

Returning from Brazil that Thursday, March 31, I concluded that I had seen nothing to justify the $8 billion International Monetary Fund extension that was eventually favored in the Senate Budget Committee, without my vote.

I am not callous to the hardships experienced by these three nations. But it is apparent that the IMF is offering no creative solution to the structural problems inherent in Latin American economics. Indeed increased indebtedness is likely to be the only result of further loans under current IMF policies.

The IMF should seek to tighten lending conditions. These countries must, if they are going to accept IMF aid, begin to implement economic policies in their countries which will encourage foreign and domestic investment. They must denationalize industries, reduce tariffs on imports, eliminate the rigid exchange rates and, cut their excessive spending on social programs.

The closed doors to our farmers, our oil producers, and our businessmen must open up.

Also, nations that accept our support must carry their weight to protect our security and the hemispheric integrity of the Americas.

Ultimately, it is the strategic priority that must come first. We should seek support among our southern neighbors to root out the insidious influence of Soviet-backed revolution. This is not to say we should ignore Latin American social conditions—or the abuse of human rights in Central America. These problems also represent a threat to stability in Central America.

In the end, there is only one way to encourage respect for human rights. That is to encourage prosperity and independence—the prime results of the free-enterprise system. It is only with a free market and respect for property rights, that we will ever see a system in Latin America that respects individual rights. And, the development of a free-market economy in Latin America is the only, and I mean the only, way to make our loans sound.

I remain unconvinced that an extension of U.S. participation will address this need for fundamental change. Only the Latin Americans themselves can opt for free enterprise and growth.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

FIRST CONCURRENT BUDGET RESOLUTION—FISCAL YEAR 1984

The PRESIDING OFFICER. Under the previous order, the hour of 10:30 a.m. having arrived, the Senate will now resume consideration of the unfinished business which the clerk will state.

The legislative clerk read as follows:

A Senate concurrent resolution (S. Con. Res. 27) revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986.

The Senate resumed consideration of the concurrent resolution.

AMENDMENT NO. 1243

The PRESIDING OFFICER. The pending question is on the Domenici-Baker amendment No. 1243 in the nature of a substitute.

The majority leader is recognized.

Mr. BAKER. Mr. President, the distinguished chairman of the Budget Committee and the distinguished ranking minority member of the committee are deep in conversation. I have no idea what will come of that, but I gather from that conversation they are not ready to go yet. I have discussed with them the request I am about to make next and they have no objection. I hope other Senators will not.

Mr. President, I ask unanimous consent that it may be in order to suggest the absence of a quorum with the time charged equally against both sides.

Mr. DOMENICI. Reserving the right to object, I just want to tell the leader what we were talking about.

Mr. BAKER. I am probably happier not knowing.

Mr. DOMENICI. The distinguished Senator from Florida went turkey hunting this morning, and he got a turkey. We were talking about turkeys.

Mr. BAKER. I am tempted beyond all measure of restraint to remark on the other turkeys that we have to deal with.

Mr. DOMENICI. I commented knowing full well that the Senator might, but I beg him not to.

Mr. BAKER. All right. I agree.

Mr. President, I put the request.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11:30 A.M.

Mr. BAKER. Mr. President, there are Members absent from the Chamber who are engaged in other matters that are important, and for a variety of reasons it does not appear possible to proceed with the consideration of this resolution at the moment.

I ask unanimous consent that the Senate stand in recess until 11:30 a.m. today.

There being no objection, the Senate, at 11:06 a.m., recessed until 11:30 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. DOMENICI).

RECESS UNTIL 11:45 A.M.

Mr. BAKER. Mr. President, the same circumstances that suggested the desirability of a recess earlier until 11:30 a.m. still obtain. It is unlikely that we are going to be able to do anything before 12 o'clock noon, but since there is a possibility we can and since there are certain Members I know of on this side of the aisle who are anxious to leave at 12 noon for another commitment off the floor, what I am about to do is to recess until 11:45 a.m. with the understanding if we need to recess longer than that we will.

But for the moment, Mr. President, I ask unanimous consent that the Senate stand in recess until 11:45 a.m. today.

There being no objection, the Senate, at 11:31 a.m., recessed until 11:45 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. PRESSLER).

RECESS UNTIL 12 NOON

Mr. BAKER. Mr. President, we are still not ready. That is what it boils down to. There are good reasons for this. A number of Senators are directly involved in these negotiations, the complex issues which must be resolved with respect to the next steps to be taken by the Senate.

Mr. President, I think it is not unreasonable to ask the Senate to stand in recess until 12 noon, which I now do.

There being no objection, the Senate, at 11:45 a.m., recessed until 12 noon; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. GARN).

RECESS UNTIL 12:15 P.M.

Mr. BAKER. Mr. President, I regret to say that the principals involved in the debate need a little more time once again. I ask unanimous consent the Senate stand in recess until 12:15.

There being no objection, the Senate, at 12:01 p.m., recessed until 12:15 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. ARMSTRONG).

RECESS UNTIL 1 P.M.

Mr. BAKER. Mr. President, by way of advising the Senate on the current status of the situation, the minority Members of the Senate are at this moment in caucus, or about to go into caucus. I am advised by the minority leader that they will require approximately 45 minutes.

Therefore, I ask unanimous consent that the Senate stand in recess until 1 p.m.

There being no objection, the Senate, at 12:15 p.m., recessed until 1 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. GORTON).

RECESS UNTIL 1:20 P.M.

Mr. BAKER. Mr. President, it has been brought to my attention that the caucus of Democratic Members of the Senate is still in progress. I have received a request from that side to extend the recess for 15 minutes. Therefore, I ask unanimous consent that the Senate stand in recess until 1:20 p.m.

There being no objection, the Senate, at 1:01 p.m., recessed until 1:20 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. DURENBERGER).

Mr. BAKER. Mr. President, I believe the principals are now here and we are ready to proceed, and I see the manager of the bill, the chairman of the committee, is on deck.

It has been pointed out to me that for a variety of reasons not all related to time of debate, but in part related to the charging of that time for quorums and the like, there exists a substantial advantage of time in favor of the minority and against the majority.

I do not wish to preempt the chairman's position, but I wonder if I might inquire of the minority leader if there would be some disposition, now that we are coming to the home stretch, to move toward equalization of time for the remainder of time remaining?

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. How much time remains on each side on the budget resolution?

The PRESIDING OFFICER. The Senator from New Mexico has 1 hour and 40 minutes and the Senator from Florida has 3 hours and 46 minutes.

Mr. BYRD. He has 2 hours and 6 minutes more than the Senator from New Mexico.

The Senator from Florida (Mr. CHILES) and I have discussed this with others and we are willing to yield 45 minutes of our time on the resolution to the majority.

Mr. BAKER. Very well.

Mr. President, I thank the Senator and I assume there is no further requirement for action by unanimous consent. The Senator may do that under the act.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the minority. It is a very generous gesture and will expedite the proceedings at hand.

Mr. President, the pending question is the Domenici substitute, is it not?

The PRESIDING OFFICER. It is.

Mr. BAKER. We have spent a fair amount of time today not talking about the Domenici substitute, and I wonder if there is much reason to not talk about it much longer or if we can get on with a vote or some sort of thing on that amendment?

Mr. DOMENICI. Mr. Leader, from my standpoint might I first join you in thanking the distinguished minority leader and the distinguished Senator from Florida for yielding us 45 minutes to somewhat equalize the time.

Having said that, I am prepared, Mr. Leader, to yield back the remainder of my time on the Domenici substitute.

I had a request from Senator ABDNOR who wanted to speak for 1 minute.

Mr. ABDNOR. Mr. President, we are all well aware that this compromise budget resolution does not have overwhelming support from anyone, but it is the best concensus at which we can hope to arrive. As we all know, the President is not very satisfied with either the levels of defense spending or social spending which it contains. On the other hand, those who favor reducing the deficit through additional taxes are not totally satisfied either. Still, this alternative is both a reasonable and fiscally responsible version of a budget. It is my hope that it is something upon which we can agree.

The 7.5-percent figure for real growth in defense spending recognizes the serious situation we face in light of the massive Soviet military buildup of the last two decades. While this figure is entirely reasonable and defensible in its own right, the truth of the matter, as we all realize, is that whatever number we settle on will be our starting point when we go to conference with the House.

The House approved only a 2.3-percent increase. That means the final figure will be somewhere between the House and Senate figures. We should bear in mind that the President originally requested more than 10 percent in real terms.

It is interesting to note that the debate on defense spending has shifted significantly during the past 2 years. Hardly anyone in Congress is calling for defense cuts. The real debate involves how much of an increase should be granted. This indicates that Members of Congress understand the nature of the formidable threat facing this country.

As a more general rule, we would do well to keep in mind that whatever budget resolution this distinguished body finally approves will have to be taken to conference with the House. The resolution passed by that body threatens to destroy virtually every bit of progress achieved in recent years.

The House would raise social spending to the point that 97 percent of the

savings we have been able to make in social welfare programs in the last couple of years would be lost. This would be a huge step backward. Funding for many of these programs has actually been increasing, but the actions we have taken in the recent past have successfully slowed the rate of this increase from what it otherwise would have been.

To finance all of this extra spending, the House would raise taxes $315 billion over existing law for the next 6 years. That is $315 billion that would come straight out of the pockets of American workers who are trying to support their families. The massive taxes and huge deficits the House would have us approve so that we can return to the big-spender policies of the past is a prescription that is guaranteed to destroy economic recovery. The spending restraint Congress has shown in the last 2 years has finally instilled some confidence in the private sector of the economy. Whatever kind of resolution we pass here is going to have to be compromised with a House budget that would obliterate the confidence of the financial community so essential for a return to prosperity.

As far as total outlays are concerned, this substitute includes the savings achieved by the Senate Budget Committee. On the revenue side, however, it does away with the requirement that we somehow come up with some $30 billion in short order for fiscal 1984. Unless we succeed in modifying this mandate, it would seem that there are only a limited number of ways to make this money appear.

We can either increase existing taxes, impose new ones, repeal the third year of the tax cut, do away with indexing, or resort to a combination of some or all of these. While the desire to reduce the size of the massive Federal deficit is certainly admirable, in fact some of us have been voicing our concerns about deficits for years, these alternative ways of increasing revenues are simply not acceptable under current economic conditions.

The problem with adding new taxes or increasing the ones we have is that the American taxpayer is already taxed to the hilt. In recent months we have added a nickel to the gas tax and raised contributions to social security. If taxes are now raised even more, the standard of living of workers will decrease. Even more disturbing, many more Americans are going to find themselves without a job as the economy suffers distortions brought about by excessive taxation.

In recognition of the heavy burden on the taxpayer and on the economy as a whole, Congress passed the 3-year program of tax relief. The Nation now is beginning to reap the benefits of that action. Unemployment is on its way down, productivity is increasing, interest rates, although still too high, are at their lowest point in years, and this is all happening during a time when inflation is at a relative snail's pace. There still is a long way to go, and we should hesitate to change direction by junking the third-year cut at such an early stage of recovery.

The most serious mistake we could make, however, would be to eliminate or delay the indexing of personal income tax rates presently slated to begin January 1985. Dropping indexing would enable us to levy more taxes on the public without having to face them with the truth of what was happening. As a matter of fact, the lack of indexing is to a large extent responsible for the economic problems which are now confronting us. As long as we had rapid inflation as in the late sixties and all through the seventies, Congress did not need to raise taxes to increase revenues—it happened automatically as taxpayers who were making no more in terms of constant dollars nevertheless found themselves vaulted into higher tax brackets.

With such "painless taxes," and by that I mean painless only in the sense Members of Congress did not have to admit voting for tax increases, Congress did not have to control spending. Instead, a herd of new programs was set loose, and you can be sure the resulting backdoor tax increases have been plenty painful for the average American. Now this herd of new programs is threatening to trample us all in the form of huge deficits.

Doing away with indexing may be a short-term way to raise a few extra dollars, but it is also the best way to assure that we will soon return to the free-spending policies which got us into trouble in the first place.

The best way to deal with the serious deficit problem is through economic recovery which both increases revenues and cuts spending. But, the best way to kill economic recovery while still in its early stages is to tax it to death. The alternative resolution we are now considering avoids this serious mistake. All in all, it is a very workable and responsible approach to a very serious fiscal problem. I urge my colleagues to support it.

Mr. DOMENICI. Mr. President, I thank my friend. I might say with all the things that have been said about the substitute here, the Senator's words are very kind and I appreciate it.

I say to the distinguished Senator from Florida that I had one request from Senator TOWER, and we just want to check real quick to see if he still wishes to speak, if we could have a couple of minutes.

Mr. President, the request that the distinguished Senator from Texas (Mr. TOWER) made of me was on yesterday, and I understand that if he has a statement he will place it in the RECORD and, therefore, I have no further requests, and I am prepared to yield back my time that I have on the substitute, and I do so.

The PRESIDING OFFICER. The Senator from Florida has 58 minutes remaining.

Mr. CHILES. Mr. President, I had one request from the Senator from Oklahoma.

Mr. BOREN. Mr. President, this proposal before us will add $1,800,000,000 to the national debt between now and 1988. There is no way that my conscience will allow me to vote for it. Even the most elementary understanding of economics would lead one to conclude that deficits of this size will force such huge Government borrowing that interest rates will be pushed up and any fledging economic recovery will be choked off.

All of us know the facts. The argument in both the Democratic and Republican cloakrooms is, When will the interest rates be forced up? Politicians are wondering whether the interest rates will go up before or after the 1984 elections. They are not asking "if" it will happen but only "when" it will happen.

When will we stop playing politics? When will we try to stop pretending that deficits do not matter? When will we stop trying to fool the people by saying that we can write a responsible budget without affecting revenues, defense, or entitlement programs. We cannot exempt from consideration 100 percent of the income and 80 percent of the spending and still write a responsible budget.

We are underestimating the understanding and patriotism of the American people. They understand that deficits do matter. They know that without controlling the budget, there can be no real economic recovery. They are willing to make sacrifices as long as they are reasonable and are shared by all. Congress and the President, including members of both parties, are failing to provide the leadership which is now desperately needed.

The Hollings proposal and the Johnston-Nunn proposals for sharply reduced deficits brought about by a fairly distributed and shared sacrifice should be reconsidered by the President and by others who in the past have professed to be for balanced budgets.

DEFICITS, DEFICITS, DEFICITS

Mr. EAGLETON. Mr. President, in August 1981, we enacted the Kemp-Roth tax bill and instituted the era of Reaganomics. Today, as we vote on the 1984 budget, we are reaping the bitter harvest of that fundamentally flawed economic policy.

Today's and tomorrow's colossal deficits should come as no surprise. When you deplete Federal revenues by $1 trillion 1984-88 and massively in-

crease defense spending to $1.7 trillion 1984-88, you do not have to be a Price-Waterhouse accountant to see that you are creating a giant sea of red ink. Senator DOMENICI and Senator BAKER in their version of the budget anticipate accumulated deficits of $1,008 trillion from 1984 to 1988.

I remember the shock that ran through this place when President Carter submitted his fiscal year 1981 budget with a deficit of $16 billion. Imagine that—a $16 billion deficit from a President who had come to office on a pledge of balancing the budget.

We forthwith made him take that budget back. In fact, he submitted three budgets that year in an effort to calm the alarm that deficit figure was creating in Congress and in the financial markets.

I served on Majority Leader BYRD's task force which was charged with the painful duty of trying to bring the budget into balance. I think we did a respectable job, but the Iranian Revolution and the explosion of OPEC oil prices that followed undid most of our work. We finished the year with a $57 billion deficit and Ronald Reagan entered the White House.

Candidate Reagan told the American people he would balance the budget if not in 1983 then certainly in 1984.

Thus, when President Reagan submitted his version of the fiscal year 1982 budget, he projected the following deficit picture.

Fiscal year:	*Billions*
1982	−$45.0
1983	−23.0
1984	−+.5

Instead, we have the following:

Fiscal year:	*Billions*
1982	−$110
1983 (estimated)	−204
1984 (estimated)	−200
1985 (estimated)	−185

Put another way, Ronald Reagan in his term of office will add more than two-thirds as much to the national debt as all of his predecessor Presidents put together. The debt was $1 trillion when he began his term and it will be over $1.7 trillion when he completes it. Pretty neat trick from a man who used to balance the budget every night while he was on the General Electric banquet circuit.

Well, what is the significance of all this? Is it just a big numbers game that has no real meaning? Is this just another great American con job?

There is enormous significance, I submit. I will mention but two major consequences of all of this deficit business.

First. Aborting the recovery: With an economy as dead as ours, with factories, equipment, and people so terribly underutilized, the impact of these deficits will not be directly felt in 1983 and 1984. There is little risk of "crowding out" in 1983 and 1984 because businesses will not be massively in the credit markets in those years. But in 1985 and thereafter, you run the almost certain risk of crowding out galore.

Under the resolution before us, 65 percent of the investment capital in the Nation's capital markets will be absorbed by the Federal Government in 1983 just to cover the deficit. In 1984, it will be 57 percent, and 51 percent in 1985 if all goes well. But, how can all go well? What is left for business and industry to rebuild? What is left for housing? What is left for investment in all those high-tech industries the President says is our best hope to provide jobs?

In the past 25 years, Federal participation in the credit markets averaged only 20 percent. Today it is 38 percent, tomorow it will be 65 percent, and under this resolution it will be 51 percent in 1985 when business may want to do some very substantial borrowing.

When and if that occurs, interest rates will climb upward and we could be plummeted into yet another recession.

Second. Shackling the future: By creating an unending sea of big, bigger, and biggest deficits for the remainder of the decade of the eighties we are, by delayed paralysis, crippling future Congresses and future Presidents. Mandrake the Magician would have trouble working around this deficit stranglehold. Cutting the defense budget will be very hard with many new, expensive weapons cramming the pipeline. Entitlements will continue on their merry, uncontrolled way. If inflation returns, you will have the mad momentum of indexing causing expenditures to ratchet up and revenues to ratchet down.

The 1984 election will tell us whether Ronald Reagan or some Democrat is the political inheritor of the delayed miseries of Reaganomics. Whatever the electoral case may be, I perceive the inheritance to be a haunted legacy.

Mr. MITCHELL. Mr. President, I intend to vote against this budget resolution for the simple reason that it fails to meet the test of responsible budgeting.

The process of drafting a budget for fiscal year 1984 began in a bipartisan fashion in the Senate Budget Committee. There, Republicans joined Democrats in reporting out a budget that, while not perfect by most standards, represented a good start on a 1984 budget.

The most critical element of a 1984 budget is a demonstration of Congress intent to reduce Federal deficits, particularly after the economy recovers from the recession. According to most economists, it is the prospect of continuing massive deficits in the foreseeable future that is preventing interest rates from falling further. This prospect is making investors reluctant to commit funds at reasonable rates of interest. As long as interest rates remain at high levels, economic recovery will be weak. Consequently, the most important contribution that Congress can make to a sustained recovery is to show a serious commitment to reduce deficits in the next several years.

The bipartisan budget reported by the Budget Committee, although its deficits were still too high, achieved significant progress in reducing future deficits. The fiscal year 1988 deficit represented a 54-percent reduction from the deficit that would occur with no action. Furthermore, the 1988 deficit would have been 22 percent below that recommended by President Reagan. Thus, whatever the faults of the Budget Committee's resolution, it endorsed policies that would have substantially reduced deficits. Furthermore, the bipartisan nature of the budget would have given some assurance to the financial markets that these policies would have been implemented.

Rather than continue this bipartisan process, Senate Republicans retreated behind closed doors and drafted their own budget. This was necessary, not because the original budget was inadequate, but because some of its provisions were embarrassing to President Reagan.

Most budget analysts agree that recent congressional actions taken in defense spending and tax cuts are major factors in projected Federal deficits. By addressing these causes of high deficits, the Budget Committee's resolution was a responsible effort. Specifically, that budget scaled back future tax cuts, but retained those tax cuts that are already in place. The budget also moderated defense growth, which allows us to meet our security needs within our Nation's fiscal capacity. By achieving significant savings in these areas, this budget was able to reject the administration's proposals for further deep cuts in domestic programs.

The Republican substitute does not have this balance. While it retains the original budget recommendations for domestic programs, it reverses the savings in the defense and tax areas. Rather than engage in debate over the appropriate level for defense spending, Senate Republicans have engaged in a numbers game that is designed to save face for the President. A similar situation exists regarding revenues, where the question of the role that revenues can play in reducing deficits is overshadowed by the symbolic importance of the 1981 tax cut.

The inevitable consequence of these budget policies is massive deficits. The policies recommended by the Republi-

can budget will produce a 1988 deficit of $220 billion, which exceeds the committee budget deficit by 77 percent. This is exactly the wrong fiscal policy, if we want a stronger recovery. This budget sends a message to the financial markets that Congress, for political reasons, cannot agree on ways to reduce the deficit.

The Republican substitute attempts to paper over this defect in two ways. First, the budget presents forecasts for only 2 years, in order to avoid admitting to the consequences of its policies for the deficit. Second, language is included that states Congress intent to lower the deficit in future years.

This approach is wholly inadequate. It reinforces the attitude held by many in the financial community and in the public in general that Congress is unable to agree on specific measures to lower the deficit. Moreover, it reflects a misunderstanding of the task confronting Congress. What is needed is action to be taken now to reduce the deficit over the next several years, not a vague commitment to take action at some point in the future. Under the Republican substitute, those in business, labor, and the financial community must continue to deal with the uncertainty over future Federal budget policies.

In sum, this resolution is not a responsible answer to our economic and budgetary needs. I am hopeful that the conference with the House will produce a better budget plan.

Mr. TOWER. Mr. President, one of the continuing problems of American Government, a problem central to the debate in the Senate on this year's budget resolution, is the increasingly difficult time we seem to have in establishing a national policy course and staying on it. Americans are by nature impatient. This impatience has generally been an asset, for it has caused our people not to accept the status quo and to always work energetically to improve life in our country. But impatience when continually applied to basic national public policy tends to create only uncertainty; it tends to undermine confidence in our Government and in our economy.

For one of the few times in the last 20 years in the United States, Americans made a clear choice in 1980 when they elected a President about the direction in which this country should move. When they went to the polls just 2 years ago, a majority of Americans seemed to say these things:

First. We must insure our national security at any price.

Second. We must leave with each wage earner the maximum possible percentage of the money he or she earns. The strength of America has always assumed that people would have the broadest discretion in the use of their income, not that Government would confiscate unfairly large portions of income to spend for its own purposes.

Third. We can no longer afford to offer an excessively large range of domestic programs, though we will not compromise our obligations to elderly Americans, to the disabled, and to the most needy in our society.

This was a clear message. It was a message that set our country on a course, a course which in my view was thoughtful and prudent. The question before the Senate today as it debates this budget resolution is whether that course is right or whether a new direction is now needed. I am fervently of the opinion that the principles about government which dictated the outcome of the 1980 Presidential election are still the fundamental principles in the minds of most Americans. Thus, I believe that the Domenici-Baker amendment to this budget resolution more nearly reflects the aspirations and priorities of the American people than do the resolutions passed in the House or reported in the Senate, and I support the proposal of Senators DOMENICI and BAKER.

Let us look briefly at the course upon which we set in 1980, and at the benefits to the country which that national direction has achieved. First, we announced a commitment to upgrade our national defenses. We would modernize strategically and conventionally. We would improve readiness and sustainability. We would, for the first time in more than a decade, respond convincingly to a massive Soviet military buildup that had spanned 20 years. For we as a nation recognized that our forces in 1980 were not adequate to meet our obligations throughout the world.

For 2 years we stayed on this course. As a result, we are now in a better position to respond to conventional contingencies than we were when President Reagan took office. Moreover, we have undertaken an essential strategic modernization effort that is critical to insure our national security. As a result of this defense program, we may soon be in a position to have sufficient credibility with the Soviets to achieve meaningful arms control agreements. We are already achieving greater stability in weapons systems production and are driving down the unit costs of various programs. And finally, as we enhance our defenses, we are in a position to conduct foreign policy from a position of strength.

Second, the President proposed and the Congress adopted a significant plan for tax reduction. The last reduction in individual income tax rates will take effect on July 1. The Congress has also enacted tax provisions which will automatically index the tax rates to account for future inflation.

There are many who argue that this was an ill-conceived fiscal policy which has been unsuccessful. But look at the facts. Inflation is one-third what it was in the Carter administration. Interest rates have been cut in half. We have pulled out of a long, difficult recession and are seeing promising economic growth, including recoveries in major industrial sectors such as automobiles and homebuilding. The stock market is at an alltime high and has been setting new records almost daily. The undeniable lesson is that the fiscal policy of the last 2 years has created confidence among Americans in the country's economy, and that confidence is reflected by virtually every economic measurement.

Third, President Reagan proposed and the Congress adopted substantial reductions in domestic programs in 1981. The domestic programs which we cut were not essential governmental obligations; they were not solemn responsibilities to groups of Americans, such as social security or medicare. They were remnants of the so-called Great Society, remnants of an era when the conventional wisdom was that the Federal Government ought to solve every social problem. That view has reflected in the real growth of domestic expenditures, not counting interest on the national debt, by 200 percent from 1963 to 1983 while real growth in defense for this same period was only 18 percent.

The effect of these domestic program reductions has also been positive. These reductions have helped to hold down deficits. The reductions have limited the long-term obligations of the Federal Government and have signaled the public that we cannot look to Government to solve every individual's problem. There are some groups—the elderly, the handicapped—to whom Government has special obligations. But this country was built on self-reliance, not on governmental support for large groups of individuals with no special need.

These were the principles which dictated public policy for the last 2 years. They were and are sound principles which the American people endorsed in 1980 and which the American people, I deeply believe, continue to subscribe to.

But what do the budget resolutions passed in the House and reported in the Senate do? They move away from each of the basic principles of American policy we have followed since President Reagan was elected. They signal a shift in the direction of our country—a shift toward military inadequacy, toward confiscatory taxation, and toward unnecessary governmental spending. It is a shift that is not called for and that does not serve the interests of the country. I shall be disappointed if the Senate as a whole chooses to abandon a successful and consistent program of the last 2 years to move in different directions. And I

am pleased that the distinguished chairman of our Budget Committee and the distinguished majority leader have offered the Senate an alternative that keeps the country moving in the right direction.

How does the Domenici-Baker amendment keep the country on the course I have described? First, the amendment increases the defense budget ceiling by $8 billion in budget authority—from $267 billion in the committee-reported resolution to $275 billion under the amendment. This amount is still not fully adequate, but it is a material improvement and is generally consistent with our commitment to guaranteed national security. I testified at length before the Budget Committee on these matters on March 7 of this year and, therefore, will not take the Senate's time to review the points I made before the committee. I do ask unanimous consent that my statement from March 7 be inserted in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit No. 1.)

Mr. TOWER. Second, the amendment does not require a large increase in taxes for fiscal year 1984 and succeeding years, as the reported budget resolution does. That resolution would do away with the third year of tax reduction and stop indexing. This proposed tax increase could not come at a worse time. The economic recovery is just starting; for it to continue, a pickup in consumer spending must occur. According to many economists, a tax increase of this size will severely reduce consumer purchasing power and could stop the recovery dead in its tracks.

But economic performance in this country is based on at least one important factor which no econometrician can factor into his computer model. It is based on the confidence of Americans in the underlying strength of the economy, and that confidence is created and maintained when Americans believe that there is a consistent, sensible policy upon which they can rely. The confidence wanes when policy direction shifts, when promises are broken, and when national leaders seem not to be in control. Nothing could do more to destroy the confidence that Americans now have in the economy than to rescind a tax reduction which has been promised for 2 years. It is a reduction which consumers expect, which business has anticipated, and which the financial markets are responding to. If we renege on commitments about national tax policy, then those Senators who vote for these tax increases can have the responsibility for what the economy does.

Finally, what does the Senate-reported budget resolution do with domestic programs? In almost every category of domestic spending, it provides for increases above what President Reagan requested. In energy; natural resources and environment; agriculture; community and regional development; education, training, employment, and social services; health; income security; and veterans' benefits, the budget resolution exceeds the administation's proposal. At a time when we need to continue to limit governmental obligations, this is the wrong direction in which to move.

There is probably no decision which the Congress makes each year that is more important than the decision about the size and composition of the Federal budget. The budget is the summary expression of the priorities of the American people.

There are some Members of Congress who believe that the Federal Government should receive a larger percentage of individuals' income, that relatively small increases in defense spending are sufficient, and that major growth in domestic programs of all types is appropriate.

There are other Senators and Representatives who believe that we should leave more hard-earned dollars with people to spend in whatever way they choose, that our national defenses need substantial investment now, and that many domestic programs are nonessential and can be reduced or abandoned.

The resolution reported by the Budget Committee reflects the views of the first group. It does not reflect my views, nor, I think, the views of the American people. The American people experienced for too long the shortsighted fiscal policy reflected in the House-passed budget proposal and that reported in the Senate. That policy resulted in national double-digit inflation; it provided us with interest rates that reached 21.5 percent by 1980. That fiscal policy did not work then and it will not work now.

I would make one final point. There are some who say that the priorities that I and other Senators may establish are insensitive to human needs. Nothing could be less true. As I said previously, I do not know of a single Senator who would not honor our longstanding obligations under the social security program, under medicare, and under a series of other programs that have historically been obligations of our Government to those most in need.

But there are at least four reasons that many of us believe that a growing Federal domestic program effort is no longer prudent. First, we are in a period of severely limited Federal resources. We simply cannot do everything we might like to do if our revenues were greater.

Second, we need to be fair to all taxpayers. A family which has taxable income of $20,000 a year is already paying one-quarter of the next dollar of income to the Federal Government. When State and local tax obligations are added to this, we see that Americans who are not earning excessive amounts of money are paying more than one-third of their income in taxes. If we increase governmental obligations, then we will have to ask such Amerians to give up even more or their income.

Third, national security must be the first priority. Every other part of governmental activity becomes meaningless unless the long-term security of the United States against external threat is assured.

Fourth, more money is not necessarily the answer to many domestic problems. For example, a commission recently reported on substantial problems with American education. While I share the concerns of this commission, I am reasonably convinced as one who was formerly a college professor that more Federal spending on education is not going to solve the problem. In fact, we have spent increasingly larger amounts on education since 1960, and the problem has become increasingly more serious.

We have been on a course for the last 2 years—with respect to taxation, national defense, and national priorities—which is fundamentally sound and which ought to be continued. It is a course that reflects the view of the majority of Americans. If we pass the budget resolution now before us, we will have shifted course for no apparent reason and when there is no demand to do so. I hope that we will make a more responsible choice by adopting the Domenici-Baker amendment and enabling the country to continue on a policy course which I am convinced is sound and will produce the economic results we all want.

EXHIBIT NO. 1

STATEMENT OF SENATOR JOHN TOWER BEFORE THE SENATE COMMITTEE ON THE BUDGET

[Charts and graphs not reproducible in RECORD.]

Good morning, Mr. Chairman. I appreciate the opportunity to present my personal views on the President's FY 84 request for National Defense.

When I appeared before this Committee last year, I indicated my belief that it would be a grave error to make near-term and long-term reductions in the President's proposed defense program. My convictions in this regard have only strengthened.

During the course of this hearing, I will review significant trends in the global situation and how our military forces are being used every day to support our foreign policy commitments. In addition, I will discuss the improvements which have recently been made in our defense posture, the magnitude of our outstanding requirements, and some recent changes in the economic situation which bear on our ability to fund our national security requirements.

These issues should be considered of fundamental importance to the Budget Com-

mittee as we assess our national priorities and our global responsibilities over the next five years.

CHANGES IN THE GLOBAL SITUATION

During the ten-year period which ended in 1980, the task of protecting U.S. worldwide interests became exceedingly more complex and demanding. The rapid expansion of Soviet military might during the decade of the 1970's put considerable pressure on U.S. allies in Europe and Asia and fundamentally altered the strategic nuclear balance. Challenges facing U.S. military forces were also magnified by growing international instability and the geographic expansion of threats to Western interests, often the result of Soviet or Soviet-inspired activity.

For example, in the 1970's, we saw Cubans involved in conflict in Angola and Ethiopia, the Vietnamese invasion of Kampuchea, and Soviets engaged in brutal warfare against the people of Afghanistan. In addition to these open conflicts, the Soviets moved aggressively to expand their influence in Syria, Iraq, South Yemen, and Libya. Moreover, Cuba revived its policy of supporting radical elements in the Western Hemisphere.

Since 1980, the destabilizing activities of the Soviets and their surrogates have not lessened. The world is certainly no more stable today than it was in 1980.

To date, the change in the Kremlin's leadership following the death of Leonid Brezhnev has not resulted in any alteration in the aggressive international behavior of the Soviet Union. The brutal warfare in Afghanistan continues as does Soviet repression in Poland. Most troubling has been the skill of Mr. Andropov to play upon the fears of West Europeans in an effort to divide the United States from her European allies.

Within the Western Hemisphere, there are many causes for concern. The insurgency in El Salvador is continuing. Nicaragua continues a military build-up unprecedented in the region and has initiated border clashes with Honduras.

Major events of the past year confirm the trends toward declining global stability. Three major conflcits occurred during this period: the battle over the Falkland Islands, the Israeli incursion into Lebanon, and the second phase of the Iran-Iraq war. While many lessons can be drawn from these conflicts—including the value of advanced technology weapons—the major conclusion is the continuing trend of nations to turn to military means to solve international disputes. The ongoing Iran-Iraq war is particularly troubling, given its potential to destabilize the entire, oil-rich Persian Gulf region.

There are a number of forces within the Middle East that remain a serious threat to U.S. interests. Key among these is Libya.

We have no reason to be complacent about the global situation. It is true that our economic problems are real and severe; they must be addressed. However, we must caution against a myopia about budget deficits which severely handicaps our ability to deal with some very serious international security issues. We cannot permit ourselves to be distracted from our global responsibilities, while the Soviets and their surrogates, facing their own economic problems, continue to pursue an aggressive foreign policy.

The global situation which I have described requires that the President have adequate foreign policy tools to meet the challenges that face Western security. Among these is an adequate foreign assistance program—both its military and economic components. However, one of the President's chief foreign policy tools is a capable military force. Essential to the value of this tool is the perception by our Allies and adversaries not only that the United States has the will to use these forces in support of its foreign policy objectives, but also that we can prevail should deterrence fail.

DEFENSE AS AN INSTRUMENT OF FOREIGN POLICY

In urging the Budget Committee to support the full range of foreign-policy related programs in FY 1984, I do not want to leave the impression that the United States has not responded to these crises or that our Armed Forces have been idle during the last twelve months. In fact, our forces have been quite active, both in response to international crises and in the pre-planned execution of operations and training in support of U.S. foreign policy.

For example, Figure 1 depicts naval operations during the two-month period from the end of September through November, 1982. During this period, eight of our fourteen carriers were at sea in support of U.S. policy. The scope of our global commitments required adjustments in the movement of carrier battle groups in every ocean to meet our commitment in Lebanon while fulfilling all other international obligations. This flexibility is not easily acquired or sustained. The Navy modified the deployments of seven carriers to place two on-station in the eastern Mediterranean Sea. The incremental cost of the Lebanon commitment in FY 1983, which will have to be absorbed through a decline in other operations or maintenance, is in excess of $100 million.

The pace of operations in the other Services is just as impressive. Funding approved by the Congress supports our foreign policy on a daily basis. Any decrease from the current level of effort is certain to have at least one of the following effects: a reduction of our ability to perform these same missions more efficiently in the future and to meet the projected threat; a reduction in our ability to support foreign policy objectives this year; or a reduction in the manpower and materiel support base necessary to carry out these operations.

If substantial "meat ax" reductions are to be made, we must first ask our civilian policy-makers which commitments they are prepared to compromise. It is unreasonable to ask the Services to give us a list enumerating any substantial cuts until we tell them which commitments, or which roles and missions assigned them by civilian authority, will now have a lower priority.

DEFENSE IMPROVEMENTS SINCE 1980

In 1980 there are serious concern among the American people that our military capability was rapidly declining relative to that of the Soviet Union. The American people were outraged that our defense posture had been neglected and permitted to deteriorate. In America, people understand well that a weak military or even a perception of weakness will undermine the very purpose of a strong military—namely, to deter aggression—and that such weakness will increase, not decrease, the likelihood of conflict. They were also angered that our military might not be able to prevail should deterrence fail. Let's look at what the state of our military was in 1980.

In late 1980, the readiness of U.S. forces was at an all-time post-war low. Personnel retention had become critical. The Army was short 515 infantry squads and 6,000 combat arms non-commissioned officers. Ships could not sail for lack of specialized personnel. The materiel readiness of our forces was also critical. Shortages of spare and repair parts restricted operations and training.

Across the entire range of military investment, the rate of modernization was too slow. Moreover, even the less than adequate levels of procurement proposed were underfunded. Through the unwillingness of previous administrations—both Republican and Democrat—to apply proper estimates to its budgets, the entire defense program was wracked by inflation.

Overall, our capabilities in 1980 were insufficient to meet our minimum peacetime requirements and the foreign policy crises of that period. More importantly, we had not laid a sufficient foundation for the improvements necessary to meet a more technically capable threat in the context of an increasingly unstable global environment.

Let's now look at the return on investment we have realized during the last two years.

Since 1980, the number of units reporting themselves fully or substantially combat-ready has increased by 30 percent. Personnel retention is still a serious long-term problem, but previous trends have been reversed. In 1982, nearly 70 percent of all eligible personnel chose to reenlist compared to only 55 percent two years earlier. Except for specialized areas, this problem is no longer critical. Materiel readiness is somewhat improved, and further improvements are in sight as the spare part investments of FY 1981 and FY 1982 reach the flight lines and storage bins.

The pace of modernization has increased, but not as much as desired. Inefficient rates of production can still be found in the modernization of tactical air and ground forces. In order to maintain the current inventory of tactical aircraft at an acceptable average age, we need to procure 603 aircraft every year. The FY 1984 request contains only 449.

Overall, our military capabilities are still short of requirements. However, in gross terms, improvements in capability will be achieved sooner than previously estimated.

We in Congress should feel good about these improvements. In most areas, the trends are clearly positive.

However, we cannot make up for over ten years of neglect in just two budget cycles. It is important to keep in mind the cumulative size of Soviet military investments built up over the years.

As indicated in the net assessment briefing we received last week, the gap between the military capital stocks of the United States and the Soviet Union, which is already considerable, will continue to widen in the Soviets' favor, even if the President's five-year plan is fully funded.

During the course of the President's current procurement plan, which is much maligned in Congress for being too ambitious, the Soviets will out-produce us: over 2-to-1 in tanks, 3-to-1 in armored vehicles, 8-to-1 in artillery and rocket launchers, 2-to-1 in tactical combat aircraft, 3-to-1 in major warships and submarines, and 2-to-1 in theater nuclear delivery systems.

It is this level of disparity which is, in large measure, responsible for unfavorable regional balances, such as that depicted for Europe in Figure 2.

In the total scheme of our geographic disadvantages, our social preferences for domestic programs, Soviet production rates, serious regional military imbalances, and a

very dynamic technological environment, I cannot stress enough the importance of maintaining our current modernization program.

Our adversaries are not standing still and, in fact, have achieved qualitative preeminence on the battlefield in many areas. Thus, the Army's modernization program is not only a response to a quantitatively superior threat, but to a qualitatively superior one as well. Figure 3 indicates that, by the end of this decade, the Army's introduction of new combat systems will reverse most of the qualitative, system-on-system disadvantages we now face. The outcome of any future conflict may be subject to debate; but the Congress should have confidence that, in both new doctrine and new systems, we are changing the character of the modern battlefield in ways that favor U.S. forces. Despite the complex engineering problems we constantly face in the development of high-quality weapon systems, technology is still our strong suit and we must exploit this advantage.

OUTSTANDING DEFENSE REQUIREMENTS

Let me turn to another issue of some concern in Congress—the absolute need for every program in the President's request.

This Committee has expressed its skepticism over Secretary Weinberger's vigorous defense of every dollar within his budget. We on the Armed Services Committee understand that skepticism. Every year, the authorizing and appropriating committees make literally hundreds of changes to the budget which result in net reductions from the Administration's request. We will continue to do so.

However, we must not confuse this microcosm of Congressional oversight with the larger issues of paramount importance in the budget process. In my judgment, every dollar in the President's defense program can be used to fulfill validated military requirements. Consider the scope and magnitude of the unmet defense requirements we still face.

Figure 4 indicates that, when the President's FY 1983-1987 five-year plan is finally delivered to the field (about 1991), and assuming it is totally funded, the Army will have achieved the following levels of its inventory objectives: 59% for tanks, 79% for self-propelled Howitzers, 69% for Light Armored Vehicles, 64% for personnel carriers and fighting vehicles, and 85% for five-and ten-ton trucks.

In the area of combat sustainability, Figure 5 shows that by about 1989, we will have on hand less than 80 percent of war reserve requirements for ammunition, only 70 percent of the requirement for tactical missiles, a full 96 percent of needed secondary items, but only 61 percent of the requirement for petroleum derivatives.

The acquisition cost of combat sustainability in these high consumption areas is estimated at $1 billion per day. The cost for major equipment reserves is, of course, much higher. In 1980, the Army's war reserve inventory for equipment was below ten days of supply. By the end of 1984, it will be over twenty days. This clearly represents progress, but we are not yet approaching acceptable levels of staying power.

Yes, there are places where defense can use every dollar it can get to meet long-standing deficiencies. But another factor of legitmate concern is the state of our economy.

ECONOMIC CONSIDERATIONS

It is apparent that many of our colleagues will make their decisions concerning the appropriate level for defense spending based on considerations other than those of national security. In the last few years, it has even become popular in certain quarters to equate reduced defense spending with increased economic health. Let's look at the facts.

Under the Administration's plan, defense spending will increase to about 31 percent of total federal unified budget outlays in 1988. This 31 percent share was exceeded each peacetime year from 1954 to 1972. During this period, both unemployment and the prime interest rate averaged about five percent.

Between 1979 and 1983, defense spending has average only 25 percent of federal outlays whiled unemployment averaged 8.1 percent and the prime rate 14.4 percent.

In trying to find the cause of high unemployment, high interest rates, and economic stagnation, defense per se is not the place to look.

In her testimony before the House Armed Services Committee, Alice Rivlin, Director of the Congressional Budget Office, concluded that:

"The Congress must ultimately determine the need for defense spending by weighing alternative uses of resources against the threats to U.S. national interests and resulting defense requirements. Clearly, the U.S. economy can support the defense build-up proposed by the Administration * * * Moreover, the economy can sustain the defense build-up with little risk of rekindling inflation, at least in the next few years, and no overall adverse effects on employment."

The only caveat offered by Mrs. Rivlin in this and other testimony has been the warning that growing Federal deficits could slow economic growth and rekindle inflation.

The Administration has heeded this warning by proposing a budget which, if approved, would cut the deficit (both in real terms and as a percentage of GNP) to less than half of the CBO baseline projection in 1988.

However, the Administration's budget has one major flaw—its overly pessimistic economic forecast. The most recent information available shows the leading economic indicators in January up 3.6 percent, the largest increase in 33 years. Durable goods, housing starts, and automobile production are all up.

I am not here to argue for a particular set of economic assumptions, but it seems apparent that the economy will recover more strongly, and deficits will probably be smaller than previously projected. To those Members who last December or January publicly committed themselves to make significant reductions in defense based on the most pessimistic economic forecasts, I ask you to reconsider your position. In my view, the Budget Committee should not be basing its mark-up materials on anything but the most recent economic forecasts.

In addition to the macroeconomic factors which may influence Members' views on defense spending, there is a microeconomic view. In anticipation of the defense cuts called for by so many Members, I recently sent a letter to each Senator asking that he or she provide me a list of those programs in his or her state that could be reduced without an adverse impact on national security. To date, I have received responses from only six Senators, whose recommendations would amount to reductions in their states totaling less than $200 million in fiscal year 1984 and only $1 billion over the next five years.

Wittingly or unwittingly, my colleagues—by opting not to respond to my letter—have sent all of us a message: First, that there is more Congressional support for defense than has been reported in the media; and second, once we put the political rhetoric aside, the vast majority of my colleagues recognize that defense spending provides a tangible economic benefit to their states. Put more succinctly, reductions in defense spending places at risk *Jobs* for constitutents in their states in a time of high unemployment. They obviously do not subscribe to the ludicrous assertion of a few that somehow it is higher defense that will impede ecomomic recovery.

ARBITRARY REAL GROWTH PATTERNS

It is obvious, Mr. Chairman, that economic considerations are driving Members of this Committee to simplistic and rather arbitrary solutions to a formidable national security problem.

In his March 1 letter to the Budget Committee, Secretary Weinberger has already indicated the fundamental problems associated with arbitrary and fixed percentages of real growth. I would only highlight some additional points which reinforce his conclusion.

Some have suggested that five percent real growth for defense would be a more appropriate level of effort. CBO has estimated that this would amount to a reduction in budget authority of $129 billion over the next five years. This is a considerable sum of money In fact, $129 billion is the equivalent size of one and one-half FY 1984 procurement budgets: more than 1,000 tanks, more than 600 tactical aircraft, and about 24 warships. Over a five-year period, the reductions each year may appear small to some, but they can represent real combat capabilities.

A more honest approach might suggest that we find less expensive substitutes for major systems. But in this case, military capabilities are sacrificed and "savings" quickly disappear.

As Figure 6 shows, if the Army's "big five" [1] were eliminated in FY 1984, the savings would amount to nearly $6 billion in budget authority. But if they were replaced by current substitutes, the net savings would be less than half that amount. Of course, I should also note that the newer systems are generally easier to maintain, are safer, and require less manpower to operate. In addition, the Army's air-land battle doctrine, of such special interest to many within the so-called reform movement, cannot be fully implemented unless supported by these new systems.

Finally, Mr. Chairman, I would like to clear the record concerning the joint hearing held by the Budget and Armed Services Committees on cost growth in the defense program. Much has been written about the role of Mr. Spinney's work in the so-called military reform movement. Unfortunately, a false connection has been made between Mr. Spinney's analysis and calls for reductions in defense.

Many have misinterpreted some significant conclusions contained in Mr. Spinney's testimony. Clearly, the authors of the recent Time Magazine article missed the mark. Unfortunately, I do not have time today to challenge the many erroneous assertions reflected in that article—particularly, the sophistication versus simplicity arguments. At least, however, let me summarize for you what Mr. Spinney said in his testi-

[1] M-1, M-2/3, Divad, Patriot, AH-64

mony before the Armed Services and Budget Committees ten days ago.

The hearing record indicates that it is Mr. Spinney's view that: (1) defense needs more dollars; (2) it is desirable to have a stable production environment; (3) increased production rates can be expected to drive down costs; (4) program stretch-outs cause costs to go up; and (5) reducing the defense budget would not cure cost growth problems—it would make things worse.

It is significant that these conclusions are similar to those of the service Secretaries and military Chiefs of Staff concerning the potential impact of significant reductions in the defense program.

Several Members of the Budget Committee, including you, Mr. Chairman, indicated that the Spinney report made a convincing case for the adverse effect that reductions in defense spending (particularly in the procurement accounts) would have on the cost of modernizing our forces.

SUMMARY

In the 1970's, our reason for not funding the required level for defense was a mood of anti-militarism. In 1983, the reason given by some is that we simply cannot afford it. Irrespective of the reason given in the 1970's or the reasons given today, the result is the same. While we slow down, the Soviets continue to expand, which in turn skews the military balance even further toward the Soviets.

Mr. Chairman, in key regions of the world where the United States has vital interests, our political-military situation is eroding. The demands on our foreign policy and national security establishment are increasing.

Continued long-term political competition with the Soviet Union is a virtual certainty. Military conflict, with either the Soviet Union or its proxies, cannot be ruled out.

At less than 7 percent of GNP and only 26 percent of federal outlays, the United States can afford this defense program—I know it, and I believe you know it.

We have made important progress in defense during the past two years. We must not falter, we must not weaken nor tire.

At his own momentary political peril, the President has chosen a prudent course for the rebuilding of our nation's defense. I stand with him.

There is no national security justification for doing less than he has asked.

Mr. BYRD. Mr. President, for the second year in a row, the Senate is being asked to reject the budget resolution only recently reported by its own Budget Committee, and to give its approval instead to a hastily conceived Republican substitute written behind closed doors without consultation or so much as a passing concern for the views—or the votes—of the Democratic minority. Once again, the statutory deadlines established by the Budget Act have been pushed aside, so that the President, insistent upon a budget the priorities of which are not supported by a majority of the Congress, and his Republican colleagues in the Senate, can scramble to improvise a budget without regard to the traditional bipartisan process of open debate and deliberation. All the while, reports persist that at least some members of the administration and the Senate continue to argue for no budget at all, if they cannot prevail in winning the Senate over to support their own position.

I do not believe that this kind of process serves the best interests of either the Senate or of the country.

The Senate has a long and proud tradition of bipartisan debate and compromise. In the past, we have been successful in forging bipartisan solutions to pressing national questions. Until very recently, the history of the budget process in the Senate has been one of bipartisanship. But that spirit has been sorely missing from the budget debates of the last few years. The resultant budgets, in my view, have suffered grievously from its absence.

I cannot support the budget proposed by Senators DOMENICI and BAKER. The Domenici-Baker budget, with the blessings of the White House, would send the deficits soaring through the stratosphere. The deficits under this budget proposal would amount to a staggering $192.4 billion next year and would rise to $220 billion in fiscal year 1988. That is $306 billion more in deficit spending than would occur under the budget reported by the Senate Budget Committee. Deficits of this magnitude will send interest rates spiralling upward and threaten to abort the fragile economic recovery now underway.

The Domenici-Baker budget would increase the national debt by $1 trillion in just 5 years. That is more debt than the Republic accumulated in its first 205 years. It is indeed ironic that the party which was swept into the White House and control of the Senate in 1980 pledging a balanced budget would now propose a budget with the highest deficits in the history of the Republic.

This budget would have us mortgage our future, and the future of our children, in order to retain an unfair and unwise tax policy which we cannot afford.

The President's tax program has been grossly unfair to the average American taxpayer. To date, under the Reagan program, the tax liability of a family of four with a yearly income of $100,000 has been permanently slashed $3,454 a year. On the other hand, a family of four earning $20,000 a year has received an annual tax cut of only $300.

The tremendous inequities contained in the President's tax program would only be made worse if the scheduled final installment of the Reagan tax plan is allowed to go into effect.

The third-year tax cut contained in the President's rate-reduction program would permanently reduce the tax liability of a family of four with an income of $100,000 by a staggering $2,363 a year, or $11,840 over the next 5 years. In sharp contrast, a family of four earning $20,000 would receive a tax break of only $164 a year, or $820

over the next 5 years, from the President's third-year tax cut.

The central question now before the Congress is not whether taxes should be raised, but rather whether the American people are best served by continuing to cut taxes for the third year in a row in such an extreme and unfair manner at a time when the Federal deficit is skyrocketing out of control. Democrats believe it is time to call a halt to President Reagan's inequitable and discredited supply-side tax program. It is not fair and it has not worked. I recognize that it is not realistic to expect Congress to repeal the third year of the Reagan-Kemp-Roth tax program, given the President's often repeated threat to veto any such legislation. But I continue to hope that my Republican colleagues will listen to reason and heed the call of basic fairness by agreeing at least to put a cap on the amount of the tax cut which any one taxpayer can receive so that the lower- and middle-income people will get a full 10-percent tax cut, and so that no one would receive more than their fair share and so that the rich would no longer receive a windfall tax reduction far in excess of what the ordinary American taxpayer can receive.

Failure to modify the counterproductive Reagan tax program will virtually guarantee slow economic growth, high interest rates, high unemployment, and record budget deficits for the remainder of this decade. That is the heart of the argument over this budget. That is why I urge my colleagues to join me in voting against the Domenici-Baker budget.

Mr. CHILES. Mr. President, I know of no other requests for time on our side, so I will yield back the remainder of my time on the Domenici-Baker substitute. I move to table the substitute and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll to ascertain the presence of a quorum.

The bill clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTE ON MOTION TO TABLE AMENDMENT NO. 1243

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Florida (Mr. CHILES) to table the amendment of the Senator from New Mexico (Mr. DOMENICI). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 52, nays 48, as follows:

[Rollcall Vote No. 85 Leg.]

YEAS—52

Andrews	Ford	Mitchell
Baucus	Glenn	Moynihan
Bentsen	Hart	Nunn
Biden	Hatfield	Packwood
Bingaman	Hollings	Pell
Boren	Huddleston	Proxmire
Bradley	Inouye	Pryor
Bumpers	Jackson	Randolph
Burdick	Johnston	Riegle
Byrd	Kennedy	Sarbanes
Chafee	Lautenberg	Sasser
Chiles	Leahy	Stafford
Cranston	Levin	Stennis
DeConcini	Long	Tsongas
Dixon	Mathias	Weicker
Dodd	Matsunaga	Zorinsky
Eagleton	Melcher	
Exon	Metzenbaum	

NAYS—48

Abdnor	Grassley	Nickles
Armstrong	Hatch	Percy
Baker	Hawkins	Pressler
Boschwitz	Hecht	Quayle
Cochran	Heflin	Roth
Cohen	Heinz	Rudman
D'Amato	Helms	Simpson
Danforth	Humphrey	Specter
Denton	Jepsen	Stevens
Dole	Kassebaum	Symms
Domenici	Kasten	Thurmond
Durenberger	Laxalt	Tower
East	Lugar	Trible
Garn	Mattingly	Wallop
Goldwater	McClure	Warner
Gorton	Murkowski	Wilson

So the motion to lay on the table amendment No. 1243 was agreed to.

Mr. CHILES. Mr. President, I move to reconsider the vote by which the amendment was laid on the table.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, will the manager of the resolution yield to me for a minute, please?

Mr. DOMENICI. I am pleased to yield to the distinguished majority leader.

Mr. BAKER. Mr. President, I do not know how many more amendments there will be, but there are a number of hours left on the resolution. I believe it is urgently important that we try to finish this matter one way or the other way. Let me advise Members, as I have already advised the minority leader, that I expect not to ask Members to stay longer than 6:30 p.m. today. I think we can finish, I hope we can finish by 6:30 p.m. If we do not finish by 6:30 p.m., it will be my intention to ask the Senate to continue with the consideration of this measure tomorrow.

Mr. BUMPERS. Will the majority leader yield for a parliamentary inquiry?

Mr. BAKER. Yes, I yield the floor, Mr. President.

Mr. BUMPERS. Mr. President, how much time is left?

The PRESIDING OFFICER. There are 5 hours and 22 minutes remaining.

Mr. BUMPERS. Would the majority leader yield for a question?

Mr. BAKER. Yes, Mr. President, I shall be happy to yield.

Mr. BUMPERS. Mr. President, the Chair has just said there are 5 hours and 20 minutes left on the resolution. Will it be the majority leader's intention to use all that time up today?

Mr. BAKER. Mr. President, I hope not. I hope we can finish well in advance of that time. I would like us to be able to get to final disposition of this measure, whatever that is.

Mr. BUMPERS. That will take us until 7:10 p.m., as I understand it.

Mr. BYRD. Not necessarily.

Mr. BAKER. That does not include rollcall votes, Mr. President.

Mr. DOMENICI. And quorum calls immediately preceding the votes.

AMENDMENT NO. 1262

Purpose: Revising the congressional budget for the United States Government for the fiscal year 1983 and setting forth the congressional budget for the United States Government for the fiscal years 1984, 1985, and 1986

Mr. WEICKER. Mr. President, on behalf of Senators CHAFEE, MATHIAS, HATFIELD, STAFFORD, and myself, I send an amendment to the desk and ask that it be stated.

Mr. DOMENICI. May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER), for himself and Mr. CHAFEE, Mr. MATHIAS, Mr. HATFIELD, and Mr. STAFFORD, proposes an amendment numbered 1262.

Mr. WEICKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the resolving clause and insert in lieu thereof the following:

"That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1983 is hereby revised, the first concurrent resolution on the budget for fiscal year 1984 is hereby established, and the appropriate budgetary levels for fiscal years 1985 and 1986 are hereby set forth:

"(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985:

"(1) The recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $603,325,000,000.

"Fiscal year 1984: $670,300,000,000.

"Fiscal year 1985: $746,175,000,000.

"Fiscal year 1986: $812,900,000,000.

and the amounts by which the aggregate levels of Federal revenues should be changed are as follows:

"Fiscal year 1983: +$125,000,000.
"Fiscal year 1984: +$14,900,000,000.
"Fiscal year 1985: +$22,675,000,000.
"Fiscal year 1986: +$34,000,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $35,900,000,000.
"Fiscal year 1984: $39,700,000,000.
"Fiscal year 1985: $44,200,000,000.
"Fiscal year 1986: $50,900,000,000.

and the amounts for Federal Insurance Contributions Act revenues and other revenues pursuant to Public Law 98-21 for old age, survivors, and disability insurance within the recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $148,500,000,000.
"Fiscal year 1984: $166,500,000,000.
"Fiscal year 1985: $187,700,000,000.
"Fiscal year 1986: $204,400,000,000.

"(2) The appropriate levels of total new budget authority are as follows:

"Fiscal year 1983: $875,925,000,000.
"Fiscal year 1984: $915,149,000,000.
"Fiscal year 1985: $985,524,000,000.
"Fiscal year 1986: $1,050,349,000,000.

"(3) The appropriate levels of total budget outlays are as follows:

"Fiscal year 1983: $807,325,000,000.
"Fiscal year 1984: $850,899,000,000.
"Fiscal year 1985: $915,224,000,000.
"Fiscal year 1986: $970,749,000,000.

"(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

"Fiscal year 1983: $204,000,000,000.
"Fiscal year 1984: $180,599,000,000.
"Fiscal year 1985: $169,049,000,000.
"Fiscal year 1986: $157,849,000,000.

"(5) The appropriate levels of the public debt are as follows:

"Fiscal year 1983: $1,383,900,000,000.
"Fiscal year 1984: $1,608,399,000,000.
"Fiscal year 1985: $1,828,148,000,000.
"Fiscal year 1986: $2,043,597,000,000.

and the amounts by which the temporary statutory limits on such debt should be accordingly increased are as follows:

"Fiscal year 1983: $93,700,000,000.
"Fiscal year 1984: $224,499,000,000.
"Fiscal year 1985: $219,749,000,000.
"Fiscal year 1986: $215,449,000,000.

"(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

"Fiscal year 1983:
"(A) New direct loan obligations, $55,400,000,000.
"(B) New loan guarantee commitments, $94,500,000,000.
"Fiscal year 1984:
"(A) New direct loan obligations, $48,200,000,000.
"(B) New loan guarantee commitments, $94,500,000,000.
"Fiscal year 1985:
"(A) New direct loan obligations, $48,100,000,000.
"(B) New loan guarantee commitments, $97,400,000,000.
"Fiscal year 1986:
"(A) New direct loan obligations, $48,700,000,000.
"(B) New loan guarantee commitments, $101,000,000,000.

"(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations and new loan guarantee commitments for fiscal years 1983 through 1986 for each major functional category are:

"(1) National Defense (050):
"Fiscal year 1983:
"(A) New budget authority, $244,100,000,000.
"(B) Outlays, $214,300,000,000.
"(C) New direct loan obligations, $0.
"(D) New loan guarantee commitments, $0.
"Fiscal year 1984:
"(A) New budget authority, $270,700,000,000.
"(B) Outlays, $214,600,000,000.
"(C) New direct loan obligations, $0.
"(D) New loan guarantee commitments, $0.
"Fiscal year 1985:
"(A) New budget authority, $299,500,000,000.
"(B) Outlays, $272,300,000,000.
"(C) New direct loan obligations, $0.
"(D) New loan guarantee commitments, $0.
"Fiscal year 1986:
"(A) New budget authority, $331,500,000,000.
"(B) Outlays, $301,600,000,000.
"(C) New direct loan obligations, $0.
"(D) New loan guarantee commitments, $0.
"(2) International Affairs (150):
"Fiscal year 1983:
"(A) New budget authority, $24,900,000,000.
"(B) Outlays, $11,500,000,000.
"(C) New direct loan obligations, $11,700,000,000.
"(D) New loan guarantee commitments, $9,200,000,000.
"Fiscal year 1984:
"(A) New budget authority, $18,200,000,000.
"(B) Outlays, $12,700,000,000.
"(C) New direct loan obligations, $11,200,000,000.
"(D) New loan guarantee commitments, $10,300,000,000.
"Fiscal year 1985:
"(A) New budget authority, $16,500,000,000.
"(B) Outlays, $12,800,000,000.
"(C) New direct loan obligations, $11,500,000,000.
"(D) New loan guarantee commitments, $10,300,000,000.
"Fiscal year 1986:

"RECONCILIATION

"SEC. 2. (a) Not later than June 6, 1983, the Senate committees named in subsections (b) through (f) of this section shall submit their recommendations to the Senate Committee on the Budget and not later than June 6, 1983, the House committees named in subsections (g) through (l) of this section shall submit their recommendations to the House Committee on the Budget. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

"SENATE COMMITTEES

"(b) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within the jurisdiction of that committee, (A) to require reductions in appropriations for programs authorized by that committee so as the achieve savings in budget authority and outlays, or (B) which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority and outlays, or (C) any combination thereof, as follows: $1,243,000,000 in budget authority and $1,243,000,000 in outlays in fiscal year 1984; $1,332,000,000 in budget authority and $1,332,000,000 in outlays in fiscal year 1985; and $1,327,000,000 in budget authority and $1,327,000,000 in outlays in fiscal year 1986.

"(c)(1) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $856,000,000 in fiscal year 1984; to reduce outlays by $2,024,000,000 in fiscal year 1985; and to reduce outlays by $2,484,000,000 in fiscal year 1986.

"(2) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $14,900,000,000 in fiscal year 1984; $22,675,000,000 in fiscal year 1985; and $34,000,000,000 in fiscal year 1986.

"(d) The Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $258,000,000 and outlays by $534,000,000 in fiscal year 1984; to reduce budget authority by $368,000,000 and outlays by $834,000,000 in fiscal year 1985; and to reduce budget authority by $636,000,000 and outlays by $1,486,000,000 in fiscal year 1986.

"(e) The Senate Committee on Small Business shall report changes in laws within the jurisdiction of that committee to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

"(f) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $202,000,000 and outlays by $201,000,000 in fiscal year 1984; to reduce budget authority by $117,000,000 and outlays by $115,000,000 in fiscal year 1985; and to reduce budget authority by $118,000,000 and outlays by $118,000,000 in fiscal year 1986.

"HOUSE COMMITTEES

"(g) The House Committee on Agriculture shall report changes in laws within the jurisdiction of that committee, (A) to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays, or (B) which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority and outlays, or (C) any combination thereof, as follows: $1,243,000,000 in budget authority and $1,243,000,000 in outlays in fiscal year 1984; $1,332,000,000 in budget authority and $1,332,000,000 in outlays in fiscal year 1985; and $1,327,000,000 in budget authority and $1,327,000,000 in outlays in fiscal year 1986.

"(h) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $816,000,000 in fiscal year 1984; to reduce outlays by $1,538,000,000 in fiscal year 1985; and to reduce outlays by $1,979,000,000 in fiscal year 1986.

"(i) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $258,000,000 and outlays by $534,000,000 in fiscal year 1984; to reduce budget authority by $368,000,000 and outlays by $834,000,000 in fiscal year 1985; and to reduce budget authority by $636,000,000 and outlays by $1,486,000,000 in fiscal year 1986.

"(j) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

"(k) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $202,000,000 and outlays by $201,000,000 in fiscal year 1984; to reduce budget authority by $117,000,000 and outlays by $115,000,000 in fiscal year 1985; and to reduce budget authority by $118,000,000 and outlays by $118,000,000 in fiscal year 1986.

"(l)(1) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $849,000,000 in fiscal year 1984; to reduce outlays by $1,481,000,000 in fiscal year 1985; and to reduce outlays by $2,077,000,000 in fiscal year 1986.

"(2) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $14,900,000,000 in fiscal year 1984; $22,675,000,000 in fiscal year 1985; and $34,000,000,000 in fiscal year 1986.

"MISCELLANEOUS PROVISIONS

"SEC. 3. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution, or amendment thereto, providing—

"(1) new budget authority for fiscal year 1984; or

"(2) new spending authority described in section 401(c)(2)(C) of the Budget Act first effective in fiscal year 1984,

within the jurisdiction of any of its committees unless and until such committee makes the allocations or subdivisions required by section 302(b) of the Budget Act, in connection with the most recently agreed to concurrent resolution on the budget.

"SEC. 4. It is the sense of the Congress that the President and the Congress, through the appropriations process, should limit the on-budget new direct loan obligations of the Federal Government to an amount not to exceed $37,600,000,000 in fiscal year 1983 and $29,300,000,000 in fiscal year 1984; off-budget new direct loan obligations to an amount not to exceed $17,800,000,000 in fiscal year 1983 and $18,900,000,000 in fiscal year 1984; and new loan guarantee commitments to an amount not to exceed $94,500,000,000 in fiscal year 1983 and $94,500,000,000 in fiscal year 1984. It is further the sense of the Congress that the President and the Congress should limit total Federal Financing Bank origination of direct loans guaranteed by other Federal agencies to $16,200,000,000 in fiscal year 1983 and $17,300,000,000 in fiscal year 1984, and Federal Financing Bank purchases of certificates of beneficial ownership from Federal agencies to $11,500,000,000 in fiscal year 1983 and $13,200,000,000 in fiscal year 1984. It is further the sense of the Congress that direct borrowing transactions of Federal agencies should be, to the maximum extent possible, restricted to the Federal Financing Bank.

SEC. 5. (a) The joint explanatory statement accompanying the conference report on this resolution shall include an estimated allocation, based upon the first section of this resolution as recommended in such conference report, of the appropriate levels of total new direct loan obligations and new loan guarantee commitments for fiscal year 1983 and fiscal year 1984, among each committee of the House of Representatives and the Senate which has jurisdiction over bills and resolutions providing such new obligations and commitments.

"(b) As soon as practicable after this resolution is agreed to, every committee of each House, after consulting with the committee or committees of the other House to which all or part of the allocation has been made, shall subdivide among its subcommittees the allocation of new direct loan obligations and new loan guarantee commitments for fiscal year 1983 and fiscal year 1984, allocated to it in the joint explanatory statement accompanying the conference report on this resolution.

"SEC. 6. It is the sense of the Congress that the budgets of Federal agencies initiating Federal Financing Bank purchases of certificates of beneficial ownership and originations of guaranteed loans should include the budget authority and outlays resulting from the transactions. The Congress recommends that the committees with jurisdiction over the Federal Financing Bank Act of 1973 consider expeditiously legislation to require that the budgetary impact of such Federal Financing Bank transactions be included in the budgets of the initiating agencies beginning with the fiscal year 1985 budget.".

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. (Mr. GRASSLEY), Without objection, it is so ordered.

Who yields time?

Mr. WEICKER. Mr. President, I rise to speak on behalf of the amendment offered——

Mr. STENNIS. Mr. President, will the Senator yield? May we have order, Mr. President? This is an important matter.

The PRESIDING OFFICER. The Senator from Mississippi has raised a point of order. We are reconvened to consider the Weicker amendment, and Senator WEICKER deserves the attention of the Senate.

The Senator from Connecticut.

Mr. WEICKER. I thank my distinguished colleague from Mississippi.

I rise to speak on behalf of the amendment offered by Senators CHAFEE, HATFIELD, MATHIAS, STAFFORD, and myself. As is customary at this time of year, the Senate is awash with budget numbers, and many Members find themselves looking for dry land.

What this amendment provides is a positive middle ground between the Budget Committee's numbers and those offered by its able chairman, Senator DOMENICI, and the distinguished majority leader, the so-called Republican substitute.

In origin, this, too, is a Republican substitute, but one we sincerely believe addresses serious and widespread bipartisan concerns about correct numbers for defense, deficits, and domestic spending.

(Mr. KASTEN assumed the chair.)

Mr. WEICKER. This amendment is a compromise but a compromise in the best sense of the word. To begin with, ours is the only alternative which incorporates the three budget amendments which the full Senate has passed to date, adding funds for education, health care for the unemployed, and prenatal care for low-income mothers. As such it demonstrates this body's continued commitment to health care and educational opportunity for all Americans, especially those hardest hit by the economic recession.

Second, the amendment offers a middle way on defense spending. The Budget Committee's resolution advocates a 5-percent real growth for 1984. The Domenici-Baker substitute came in at 7.5 percent, and we propose a 6-percent real increase for 1984, 5 percent for 1985 and 1986. This spending level would allow us to compensate for the no-growth years in the seventies, without yielding to the temptation to throw money at every weapons system that comes down the pike.

Instead, we seek to encourage the administration to come up with a clear set of spending priorities within which the Congress can work.

While we are on the subject of priorities, our amendment assumes that the greater share of reductions from the President's request will come from the accounts of hardware rather than readiness.

On the revenue side of our compromise, we advocate a moderate revenue increase of $14.9 billion in 1984, $22.7 billion in 1985, and $34 billion in 1986.

We allow the Finance Committee considerable elbow room within which to achieve these goals.

Our amendment would cut the Federal deficit by about $30 billion more over the course of the next 2 years than would the Domenici-Baker substitute.

A final word on deficits: once upon a time officials within this administration made a career out of preaching balanced budgets. These days the subject is barely accorded a passing reference in a 60-minute speech.

I am no believer in the balanced budget as the great panacea, but I know that big deficits are dangerous, and recovery can only come through the private sector. It can only come through people building and buying homes, buying automobiles and other consumer goods, and if the Federal Government continues to crowd borrowers out of the credit markets to the tune of $200 billion a year, recovery will never come. What will come will be interest rates, the likes of which we have never seen before. Two years of high interest rates have already helped to put thousands of small concerns out of business and millions of Americans out of work.

So when we are talking about the budget and its bottom line we are really talking about people, their lives and their futures. That is why I strongly urge my colleagues to support this compromise amendment. It is not just an exercise in numbers crunching. It has the needs and aspirations of all Americans in mind.

I realize the difficulties that confront all of us, certainly the difficulties that confront this Senator and my colleagues within our party, and the difficulties that confront my colleagues on the other side of the aisle in terms of what they perceive as being political opportunity.

But it seems to me there comes a time when partisanship is set aside and we at least make some attempt to do what is right for the constituency that we serve, in this instance the entire Nation.

Now, the bottom line is the fact that there are 12 million people out of work and theirs is a terrible tragedy. It seems to me, each one of the 100 in this Chamber owe it to that 12 million to get them back on the job as fast as possible.

The bottom line—and I can speak personally to this, as chairman of the Small Business Committee—is that you had in 1981, 50 percent more bankruptcies than in 1980 and in 1982, 50 percent more than in 1981 of small businesses' doors closed forever.

The fact is, as chairman of the Appropriations Subcommittee that handles the health care and education of this Nation, in terms of the effect of this recession on the poor in the sense of health care, it is devastating. We had testimony from the commissioner of health from the city of Philadelphia the other day and their infant mortality rate has gone up to 27 per thousand. There are just a few hospitals serving those that are indigent, seeing the mothers that come in for the first time, if you will, at the time of delivery and, yes, lives are being lost. Now, that is the situation while we continue this debate in the Senate.

I think everybody has made their point and there will probably be more to be made in the hours and the days ahead. But let us get on with this business. Let us put a budget together.

There is no way this is going to pass except with both Democratic and Republican votes. We all know that. There has been considerable moderation of the amendment which I have before the body at this time due to the wishes of other Members on this side. And I am sure there are ideas relative to this matter that emanate from the Democratic side.

But let us put the budget together and let us get on with the entire constitutional process, because the only people that are paying right now are the ones that are out of work, the ones that are being hurt in the sense of their education, being hurt in the sense of health care, and the businesses that are closing, et cetera. Everybody can sit on their prerogatives until kingdom come, but nobody is hurting in this Chamber. They are on the streets of America.

The President is not going to get his way, not as far as this Republican is concerned, but neither should the Democrats get their way. What we want is a way which, in effect, discharges our obligations to an entire constituency. And they do not give a damn whether they are Republicans or Democrats, they are human beings.

Mr. METZENBAUM. Will the Senator from Connecticut yield for a question?

Mr. WEICKER. I yield to my good friend from Ohio.

Mr. METZENBAUM. Mr. President, would my good friend from Connecticut be kind enough to indicate some of the specifics that we use around here? What are the defense numbers—not the numbers specifically—but what are the percentages? What economic assumptions are being made? What are the revenue increases that are provided for? And any other pertinent data of that kind, I believe, would help in the debate.

Mr. WEICKER. I would say to my friend from Ohio—and he is just that, and has been over the years—I will be very brief in my reply, because I only have a few minutes left and there are other Senators that want to talk on behalf of the proposal.

In the defense, the real increase is 6 percent, 5 percent, and 5 percent. On the matter of increased revenues, the increased revenues are $14.9 billion, $22.7 billion, and $34 billion over the 3-year span. And it includes those matters we have already passed, the Hollings-Stafford amendment, the Dole amendment, and the Cranston amendment. All of them are included in this bill.

Mr. METZENBAUM. What economic growth assumptions are made?

Mr. WEICKER. The same as the budget resolution.

Mr. President, I yield at this time to the distinguished Senator from Rhode Island, Senator CHAFEE.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, the proposition that is on the floor today, in effect a substitute for the committee resolution, as has been mentioned, would leave the nondefense spending amounts intact. It would include, as the Senator from Connecticut mentioned, the Stafford-Hollings education amendment, the Dole health benefits amendment, and the Cranston-Hatfield medicare amendment.

On defense, as has been mentioned, it would increase the real rate of growth in defense spending to 6 percent for fiscal year 1984 and the following years at 5 percent each.

On revenues, as the Senator from Connecticut mentioned, it would be $14 billion additional in 1984, $22 billion in 1985, and $34 billion in 1986.

Like all compromises, this does not represent what everybody would like. It does not go as far in reducing the budget deficits as some would like. However, it is obvious that in this Chamber there are a good number of people who feel that the budget resolution figures, as far as revenue goes, are too steep and the only way they can be achieved is through getting rid of the third-year tax cut and indexing, getting rid of both of those for which there is good deal of support in this Chamber. So this is indeed a compromise.

Now, let me also say, Mr. President, that there has been some suggestion that we may not even have a budget resolution. Certainly I do not subscribe to that and it is safe to say that none of the sponsors of this amendment wish to do away with the budget resolution. They want a budget resolution. I just believe very strongly that a budget resolution has been a salutary instrument during the appropriations process as far as holding down spending and, indeed, achieving savings in the operations of our Government.

Mr. President, what really is driving us, as has been touched on here earlier, is the concern over the deficits. The deficits that are projected under the President's budget are really very, very significant. There is no way for us to overlook those. They are in the neighborhood of $200 billion in 1984 and very close to that, just a few billion dollars less than that, in 1985, and then they hover in the same area in the outyears.

So, Mr. President, I hope that we could all get behind this resolution and support it. There may be some changes presented, perhaps there will be, and perhaps those will go on to further support this suggestion that we have before the Chamber today. However, whatever it is, I think that they point in the same direction of the significant factor that is driving my interest in this process, Mr. President, in seeing a decline in the deficits in the outyears. True, I would like to achieve them in 1984 and in 1985 in more significant proportions than has been addressed here. But certainly in 1986 and 1987, we have to have something significant out there.

I was one of those who voted to table the Domenici resolution, primarily because that did not, in my judgment, address in 1984 or 1985 the deficits significantly enough, or in 1986. Of course, that was left a question mark.

Let me just say one final word regarding the deficits. These, of course, are larger in dollar terms and relative to the size of the economy than anything we have known since the end of World War II. I would hope that we could start this direction of bringing those down.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. Mr. President, I yield such time to the distinguished Senator from Ohio as he might desire.

The PRESIDING OFFICER. Is the Senator from Florida yielding time off the resolution?

Mr. CHILES. I am yielding time off of the amendment.

The PRESIDING OFFICER. The time on the amendment is controlled by the Senator from Connecticut and the Senator from New Mexico.

Mr. DOMENICI. I yield to the distinguished Senator from Ohio.

Mr. METZENBAUM. I thank the Senator from New Mexico.

Mr. President, I rise to address myself to this issue, not as an advocate of the amendment nor as an opponent of the amendment, But it is fair to say that I intend to vote for the amendment.

However, I do not rise for that purpose. I rise to address myself to my colleagues on the floor of the Senate as to the question of responsibility of this body to come up with a budget proposal.

Frankly, Mr. President, I am very disturbed when I read the report of the action that we just took a little bit ago defeating the Baker-Domenici proposal, when the report comes over the wire service that "a Reagan spokesman said yesterday that the President would rather have no budget at all than have Congress tamper with the tax cut, the third slice of the 25 percent approved on his urging in 1981."

Mr. President, I think this body has a statutory obligation, but beyond its statutory obligation, I believe it has a far greater obligation, to come up with a budget proposal. I think to do less than that would be irresponsible on our part. I think it would send the wrong message to the marketplace as far as this country is concerned and the marketplace throughout the world.

I am concerned also that my friends on the other side are also talking at this time that the majority leadership on that side "conceded for the first time that the Senate might be so deadlocked over the budget fight that it might be unable to produce a spending and revenue plan for 1984 because of the continuing family feud among the Senate Republicans."

Mr. President, I just think that is illogical. I think it is ill-considered. I do not think it will reflect well upon this body if we fail to come up with a budget. But in all fairness, I think much of the responsibility must be laid at the President's doorstep because the President who ran for office and promised this Nation that there would be a balanced budget is now saying that he is more concerned about protecting some future tax cut than he is about balancing the budget.

It is an accepted fact now that the deficits in the 4 years of this administration will pretty much equal the entire deficits that were accumulated over the history of this Nation. But having said that, do we not have any further concern at the White House about balancing the budget? We only talk about tax cuts. As a matter of fact, this is the same President who has already tripled telephone taxes, doubled the cigarette taxes, added a nickel to the gasoline tax, wants to add another 12 cents to the gasoline tax, and wants to add another 5-percent surcharge. But he is talking about not raising taxes. Well, he has already raised taxes.

The question is whether we are going to be responsible, whether the President of the United States is going to be responsible. Nobody is really talking about raising taxes. The most that anybody has talked about on the floor of this Senate or in the Congress is repealing some of the tax cuts that are talked about for tomorrow, not raising taxes. It is a totally different kettle of fish.

I just want this body to understand. I am not sure whether the Chafee, Weicker, Stafford, Hatfield, and Mathias amendment is the right answer. I voted for the budget resolution when it came out of committee, and I must say that I do not buy everything that is in it. I would have accepted a smaller defense number. I would be willing to have a substantially higher revenue number. If we would close some tax loopholes, we would indeed have that.

But sometimes we have to make a compromise in order to do that which we are obligated to do as U.S. Senators, whether we are Republicans or Democrats. We are supposed to have a sense of responsibility, and the Presi-

dent of the United States is supposed to have a sense of responsibility and not just make another speech about not raising taxes.

I commend the five who have offered this proposal, and I understand that the Senator from Washington has a proposal that he intends to offer if this does not pass. If it is what I expect it to be, I would expect to vote for that.

I would say that those voices that are being raised at this moment saying that we do not need a budget are not being responsible. That, in my opinion, is the height of irresponsibility.

We can fight about how much the defense figures ought to be, we can fight about what the revenue numbers ought to be, we can argue about what the domestic spending numbers ought to be, but if we have no solution at all, if we turn our backs on our responsibility and think we are playing a cute game of politics, we are not being the kind of Senators that the people of this Nation think they have representing them in the city of Washington.

Mr. RANDOLPH. Will my colleague yield?

Mr. METZENBAUM. I yield.

Mr. RANDOLPH. The Senator just made a very important statement and I believe in what he said. That is the reason I interrupted. In any corporate structure of this country, those officials of the company act on a budget, do they not?

Mr. METZENBAUM. They certainly do.

Mr. RANDOLPH. They do. And so the Federal Government, through the Congress, with those advisers within the committee structure, we do less than we should do. There is really a proper condemnation that would fall upon us if we fail to act as the Senator indicated we should act.

Mr. METZENBAUM. I very much appreciate those remarks from my good friend from West Virginia, he being a Member of Congress who has served longer than any other Member of Congress. His remarks are particularly relevant as to the responsibilities of a Member of the Congress.

Mr. President, I know there are others who wish to be heard. I thank you.

Mr. WEICKER. I yield to the distinguished Senator from Washington.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, I intend now to discuss a modification to the amendment by the distinguished Senator from Rhode Island and to ask his acceptance of that modification to the amendment which is before us at the present time.

Mr. President, we are in the very last hours and moments of this extended debate over a budget resolution. If one fact is clear, it is that every proposal before us has been an orphan, an orphan with almost no claim to parentage whatsoever.

It has been extremely easy for Members on both sides of the aisle to point out the defects in all of the proposals which we have discussed, but that clarity has not led us any closer to a solution.

The proposal of my close friend and distinguished colleague, the Senator from New Mexico, has been tabled.

The proposal reported by the Budget Committee, with reservations by many of its members, cannot possibly get anything like a sufficient number of votes to be adopted.

A single proposal which I felt to be most responsible, that of the Senator from Louisiana (Mr. JOHNSTON), which had the lowest budget deficits of all, was overwhelmingly defeated, having received only 13 votes.

It is my sincere hope that with this modification I can present something to my colleagues which, while it will not satisfy any of them, myself included, at least will meet the minimum goals of the great majority of the Members of this body and can represent something from which we can move forward to the next and very difficult process of a conference with the House of Representatives.

Briefly described, this modification changes nothing in respect to the domestic spending programs outlined in the Chafee amendment, which, in turn, changes nothing from the figures which have been adopted by this body in the course of its debate over the last 2 weeks.

This amendment changes very slightly the numbers for national defense: 6 percent real growth in 1984, 5.5 percent in 1985, and 5 percent thereafter. It therefore represents a compromise between the lower figures proposed by the Budget Committee, the higher figures proposed by the Senator from New Mexico, and the almost identical figures proposed by my distinguished colleague from the State of Washington (Mr. JACKSON). It differs somewhat more significantly from the present amendment in respect to revenues in an attempt, as difficult as it may be, to bridge the deepest gap, the greatest chasm, between Members of the U.S. Senate, among themselves, and with the President of the United States. It does that in this way:

We propose tax increases or revenue increases in fiscal year 1984 of just under $8 billion, of just under $14 billion in fiscal year 1985, and of approximately $51 billion in fiscal year 1986.

My colleagues will notice that the very large increase in revenues takes place more than 2 years from now in this modification. In that respect, it follows the philosophy outlined as long ago as January by the President of the United States, who firmly has taken the position that to increase taxes at the beginning stages of a recovery would be counterproductive and might significantly harm the recovery. That Presidential position, however, recognizes the extreme dangers of huge $200 billion budget deficits for extended periods in the future and, therefore, recognizes the necessity to deal with those in part, at least, by revenue increases in years beginning with fiscal year 1986. My figures are those of the President, modified only by actions in respect to revenues which this body has essentially already taken.

What, now, would this result in from the point of view of budget deficits? The deficits in each year of this proposal are less than those of the Domenici amendment, which was tabled a little earlier today. As compared with the Chafee amendment, they are $1 to $3 billion higher in 1984 and 1985 as a result of lower taxes, but considerably, quite sharply, lower in the years beginning in 1986.

They show, therefore, if we accept the Congressional Budget Office's projections, budget deficits of $184 billion in 1984, gradually declining to $182 billion in 1988. If we accept the high-growth projections which all of us hope will be attained and so expect to be attained with a responsible budget, those deficits go from $146 billion in 1984 to relatively small deficits, likely below $50 billion, by 1988. They, therefore, will send an appropriate signal to the people of the United States and to the financial markets of the United States that we are indeed concerned about budget deficits, that we do recognize that high growth with relatively low inflation rates and increasing employment are not consistent with huge, almost $200 billion budget deficits from now to infinity while, at the same time, recognizing that this year is not an appropriate time not only not to have substantial tax increases, but even to cancel tax increases which are, in effect, already in place.

I must confess, of course, that this does not satisfy anybody here. It is not a proposal I would make could I pass a budget on my own that I think would be desirable, and I suspect I speak for 99 other Members as well in making that statement. But for those who feel high deficits are the most important disease to cure, this helps. It helps more than even the Chafee amendment at the present time and more than the President's budget.

For those who feel that we must cut the growth rate of spending in many programs, this helps, because, of course, it includes a fairly substantial reconciliation in a number of entitlement spending areas.

For those who wish to protect many or most Federal spending programs, it helps, because it appears to them to be

more reasonable than the proposals of the U.S. President.

For those who are concerned that we have cut too deeply into national defense, it helps as against the resolution proposed by the Senate Budget Committee.

In connection with the most controversial of all of the issues—taxes—it helps because it begins to bridge the gulf between those here. I and many others believe that at the very least, we ought to promise at some time in the future to pay for what we spend. At the same time, it allows those of us who are very concerned about the preservation of tax indexing and the third year of the tax cut to preserve those matters. Those who oppose them or want some changes in them have enough flexibility here to win that battle if, indeed, they can win it on the floor of the Senate. I preferred the proposal by Senator JOHNSTON, but it lost. I preferred the proposal by the Senator from New Mexico, but it lost.

There are all kinds of reasons to vote against this proposal. You can vote against it because you think it spends too much on defense or too little, that it has too many taxes or too few, that it spends too much or too little. You can defend a negative vote to any of your constituents, because each of you is articulate enough to do so.

There is only one reason to vote for it. That is that we are required by the law to have a budget resolution and we are required by our responsibilities to our constituents to have a responsible budget resolution, one which is consistent with economic growth, one which is consistent with low inflation, one which is consistent with jobs for the people of the United States. It may be difficult to explain a "yes" vote, but I submit to my colleagues that a "yes" vote is the only responsible way in which to go at this point in this debate in this budget year with this budget resolution.

I thank the Senator from Connecticut.

Mr. WEICKER. Mr. President, I wonder if the distinguished Senator from Washington would provide me with a copy of the changes.

Mr. GORTON. Yes, Mr. President.

Mr. WEICKER. Having reviewed these earlier in detail, Mr. President, I might add, they are acceptable to the sponsors of the amendment.

Mr. President, I sent a modification of our amendment to the desk.

The PRESIDING OFFICER. The Senator has the right to modify his amendment. The amendment is so modified.

The amendment No. 1262, as modified, follows:

S. CON. RES. 27

Strike out after the resolving clause and insert in lieu thereof the following: "That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1983 is hereby revised, the first concurrent resolution on the budget for fiscal year 1984 is hereby established, and the appropriate budgetary levels for fiscal years 1985 and 1986 are hereby set forth:

"(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985:

"(1) The recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $603,325,000,000.

"Fiscal year 1984: $664,300,000,000.

"Fiscal year 1985: $736,175,000,000.

"Fiscal year 1986: $829,900,000,000.

and the amounts by which the aggregate levels of Federal revenues should be changed are as follows:

"Fiscal year 1983: +$125,000,000.

"Fiscal year 1984: +$8,900,000,000.

"Fiscal year 1985: +$12,675,000,000.

"Fiscal year 1986: +$51,000,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $35,900,000,000.

"Fiscal year 1984: $39,700,000,000.

"Fiscal year 1985: $44,200,000,000.

"Fiscal year 1986: $50,900,000,000.

and the amounts for Federal Insurance Contributions Act revenues and other revenues pursuant to Public Law 98-21 for old age, survivors, and disability insurance within the recommended levels of Federal revenues are as follows:

"Fiscal year 1983: $148,500,000,000.

"Fiscal year 1984: $166,500,000,000.

"Fiscal year 1985: $187,700,000,000.

"Fiscal year 1986: $204,400,000,000.

"(2) The appropriate levels of total new budget authority are as follows:

"Fiscal year 1983: $875,925,000,000.

"Fiscal year 1984: $911,899,000,000.

"Fiscal year 1985: $986,074,000,000.

"Fiscal year 1986: $1,052,709,000,000.

"(3) The appropriate levels of total budget outlays are as follows:

"Fiscal year 1983: $807,325,000,000.

"Fiscal year 1984: $848,699,000,000.

"Fiscal year 1985: $914,574,000,000.

"Fiscal year 1986: $972,369,000,000.

"(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

"Fiscal year 1983: $204,000,000,000.

"Fiscal year 1984: $184,399,000,000.

"Fiscal year 1985: $178,399,000,000.

"Fiscal year 1986: $142,469,000,000.

"(5) The appropriate levels of the public debt are as follows:

"Fiscal year 1983: $1,383,900,000,000.

"Fiscal year 1984: $1,612,199,000,000.

"Fiscal year 1985: $1,841,298,000,000.

"Fiscal year 1986: $2,041,367,000,000.

and the amounts by which the temporary statutory limits on such debt should be accordingly increased are as follows:

"Fiscal year 1983: $93,700,000,000.

"Fiscal year 1984: $228,299,000,000.

"Fiscal year 1985: $229,099,000,000.

"Fiscal year 1986: $200,069,000,000.

"(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

"Fiscal year 1983:

"(A) New direct loan obligations, $55,400,000,000.

"(B) New loan guarantee commitments, $94,500,000,000.

"Fiscal year 1984:

"(A) New direct loan obligations, $48,200,000,000.

"(B) New loan guarantee commitments, $94,500,000,000.

"Fiscal year 1985:

"(A) New direct loan obligations, $48,100,000,000.

"(B) New loan guarantee commitments, $97,400,000,000.

"Fiscal year 1986:

"(A) New direct loan obligations, $48,700,000,000.

"(B) New loan guarantee commitments, $101,000,000,000.

"(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations and new loan guarantee commitments for fiscal years 1983 through 1986 for each major functional category are:

"(1) National Defense (050):

"Fiscal year 1983:

"(A) New budget authority, $244,100,000,000.

"(B) Outlays, $214,300,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1984:

"(A) New budget authority, $270,650,000,000.

"(B) Outlays, $242,600,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1985:

"(A) New budget authority, $300,950,000,000.

"(B) Outlays, $272,550,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1986:

"(A) New budget authority, $333,060,000,000.

"(B) Outlays, $302,420,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"(2) International Affairs (150):

"Fiscal year 1983:

"(A) New budget authority, $24,900,000,000.

"(B) Outlays, $11,500,000,000.

"(C) New direct loan obligations, $11,700,000,000.

"(D) New loan guarantee commitments, $9,200,000,000.

"Fiscal year 1984:

"(A) New budget authority, $18,200,000,000.

"(B) Outlays, $12,700,000,000.

"(C) New direct loan obligations, $11,200,000,000.

"(D) New loan guarantee commitments, $10,300,000,000.

"Fiscal year 1985:

"(A) New budget authority, $16,500,000,000.

"(B) Outlays, $12,800,000,000.

"(C) New direct loan obligations, $11,500,000,000.

"(D) New loan guarantee commitments, $10,300,000,000.

"Fiscal year 1986:

"(A) New budget authority, $15,900,000,000.

"(B) Outlays, $12,800,000,000.

"(C) New direct loan obligations, $11,600,000,000.

"(D) New loan guarantee commitments, $10,300,000,000.

"(3) General Science, Space, and Technology (250):

"Fiscal year 1983:

"(A) New budget authority, $7,900,000,000.

"(B) Outlays, $7,700,000,000.

"(C) New direct loan obligations, $200,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1984:

"(A) New budget authority, $8,500,000,000.

"(B) Outlays, $8,200,000,000.

"(C) New direct loan obligations, $37,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1985:

"(A) New budget authority, $8,500,000,000.

"(B) Outlays, $8,500,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1986:

"(A) New budget authority, $8,400,000,000.

"(B) Outlays, $8,400,000,000.

"(C) New direct loan obligations, $0.

"(D) New loan guarantee commitments, $0.

"(4) Energy (270):

"Fiscal year 1983:

"(A) New budget authority, $4,000,000,000.

"(B) Outlays, $4,600,000,000.

"(C) New direct loan obligations, $13,100,000,000.

"(D) New loan guarantee commitments, $200,000,000.

"Fiscal year 1984:

"(A) New budget authority, $3,900,000,000.

"(B) Outlays, $4,100,000,000.

"(C) New direct loan obligations, $13,900,000,000.

"(D) New loan guarantee commitments, $200,000,000.

"Fiscal year 1985:

"(A) New budget authority, $3,600,000,000.

"(B) Outlays, $2,900,000,000.

"(C) New direct loan obligations, $14,300,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1986:

"(A) New budget authority, $3,200,000,000.

"(B) Outlays, $2,700,000,000.

"(C) New direct loan obligations, $14,400,000,000.

"(D) New loan guarantee commitments, $0.

"(5) Natural Resources and Environment (300):

"Fiscal year 1983:

"(A) New budget authority, $12,500,000,000.

"(B) Outlays, $12,800,000,000.

"(C) New direct loan obligations, $100,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1984:

"(A) New budget authority, $12,000,000,000.

"(B) Outlays, $12,500,000,000.

"(C) New direct loan obligations, $27,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1985:

"(A) New budget authority, $12,200,000,000.

"(B) Outlays, $12,600,000,000.

"(C) New direct loan obligations, $27,000,000.

"(D) New loan guarantee commitments, $0.

"Fiscal year 1986:

"(A) New budget authority, $12,500,000,000.

"(B) Outlays, $12,200,000,000.

"(C) New direct loan obligations, $27,000,000.

"(D) New loan guarantee commitments, $0.

"(6) Agriculture (350):

"Fiscal year 1983:

"(A) New budget authority, $24,200,000,000.

"(B) Outlays, $24,000,000,000.

"(C) New direct loan obligations, $18,600,000,000.

"(D) New loan guarantee commitments, $5,500,000,000.

"Fiscal year 1984:

"(A) New budget authority, $11,600,000,000.

"(B) Outlays, $11,400,000,000.

"(C) New direct loan obligations, $12,100,000,000.

"(D) New loan guarantee commitments, $3,800,000,000.

"Fiscal year 1985:

"(A) New budget authority, $14,000,000,000.

"(B) Outlays, $12,300,000,000.

"(C) New direct loan obligations, $11,700,000,000.

"(D) New loan guarantee commitments, $3,800,000,000.

"Fiscal year 1986:

"(A) New budget authority, $13,200,000,000.

"(B) Outlays, $13,100,000,000.

"(C) New direct loan obligations, $12,200,000,000.

"(D) New loan guarantee commitments, $3,800,000,000.

"(7) Commerce and Housing Credit (370):

"Fiscal year 1983:

"(A) New budget authority, $5,200,000,000.

"(B) Outlays, $2,700,000,000.

"(C) New direct loan obligations, $6,500,000,000.

"(D) New loan guarantee commitments, $48,700,000,000.

"Fiscal year 1984:

"(A) New budget authority, $5,900,000,000.

"(B) Outlays, $1,800,000,000.

"(C) New direct loan obligations, $6,400,000,000.

"(D) New loan guarantee commitments, $48,700,000,000.

"Fiscal year 1985:

"(A) New budget authority, $6,500,000,000.

"(B) Outlays, $0.

"(C) New direct loan obligations, $6,300,000,000.

"(D) New loan guarantee commitments, $48,700,000,000.

"Fiscal year 1986:

"(A) New budget authority, $6,500,000,000.

"(B) Outlays, −$300,000,000.

"(C) New direct loan obligations, $6,300,000,000.

"(D) New loan guarantee commitments, $48,700,000,000.

"(8) Transportation (400):

"Fiscal year 1983:

"(A) New budget authority, $26,800,000,000.

"(B) Outlays, $22,100,000,000.

"(C) New direct loan obligations, $200,000,000.

"(D) New loan guarantee commitments, $1,100,000,000.

"Fiscal year 1984:

"(A) New budget authority, $27,700,000,000.

"(B) Outlays, $25,900,000,000.

"(C) New direct loan obligations, $100,000,000.

"(D) New loan guarantee commitments, $600,000,000.

"Fiscal year 1985:

"(A) New budget authority, $28,400,000,000.

"(B) Outlays, $26,900,000,000.

"(C) New direct loan obligations, $100,000,000.

"(D) New loan guarantee commitments, $400,000,000.

"Fiscal year 1986:

"RECONCILIATION

"SEC. 2. (a) Not later than June 6, 1983, the Senate committees named in subsections (b) through (f) of this section shall submit their recommendations to the Senate Committee on the Budget and not later than June 6, 1983, the House committees named in subsections (g) through (l) of this section shall submit their recommendations to the House Committee on the Budget. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

"SENATE COMMITTEES

"(b) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within the jurisdiction of that committee, (A) to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays, or (B) which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority and outlays, or (C) any combination thereof, as follows: $1,243,000,000 in budget authority and $1,243,000,000 in outlays in fiscal year 1984; $1,332,000,000 in budget authority and $1,332,000,000 in outlays in fiscal year 1985; and $1,327,000,000 in budget authority and $1,327,000,000 in outlays in fiscal year 1986.

"(c)(1) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $856,000,000 in fiscal year 1984; to reduce outlays by $2,024,000,000 in fiscal year 1985; and to reduce outlays by $2,484,000,000 in fiscal year 1986.

"(2) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $8,900,000,000 in fiscal year 1984; $12,675,000,000 in fiscal year 1985; and $51,000,000,000 in fiscal year 1986.

"(d) The Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $258,000,000 and outlays by $534,000,000 in fiscal year 1984; to reduce budget authority by $368,000,000 and outlays by $834,000,000 in fiscal year 1985; and to reduce budget authority by $836,000,000 and outlays by $1,486,000,000 in fiscal year 1986.

"(e) The Senate Committee on Small Business shall report changes in laws within the jurisdiction of that committee to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

"(f) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $202,000,000 and outlays by $201,000,000 in fiscal year 1984; to reduce budget authority by $117,000,000 and outlays by $115,000,000 in fiscal year 1985; and to reduce budget authority by $118,000,000 and outlays by $118,000,000 in fiscal year 1986.

"HOUSE COMMITTEES

"(g) The House Committee on Agriculture shall report changes in laws within the jurisdiction of that committee, (A) to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays, or (b) which provide spending authority as defined in section 401 (c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority and outlays, or (C) any combination thereof, as follows: $1,243,000,000 in budget authority and $1,243,000,000 in outlays in fiscal year 1984; $1,332,000,000 in budget authority and $1,332,000,000 in outlays in fiscal year 1985; and $1,327,000,000 in budget authority and $1,327,000,000 in outlays in fiscal year 1986.

"(h) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $816,000,000 in fiscal year 1984; to reduce outlays by $1,538,000,000 in fiscal year 1985; and to reduce outlays by $1,979,000,000 in fiscal year 1986.

"(i) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $258,000,000 and outlays by $534,000,000 in fiscal year 1984; to reduce budget authority by $368,000,000 and outlays by $834,000,000 in fiscal year 1985; and to reduce budget authority by $636,000,000 and outlays by $1,486,000,000 in fiscal year 1986.

"(j) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

"(k) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $202,000,000 and outlays by $201,000,000 in fiscal year 1984; to reduce budget authority by $117,000,000 and outlays by $115,000,000 in fiscal year 1985; and to reduce budget authority by $118,000,000 and outlays by $118,000,000 in fiscal year 1986.

"(l)(1) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce by $849,000,000 in fiscal year 1984; to reduce outlays by $1,481,000,000 in fiscal year 1985; and to reduce outlays by $2,077,000,000 in fiscal year 1986.

"(2) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $8,900,000,000 in fiscal year 1984; $12,675,000,000 in fiscal year 1985; and $51,000,000,000 in fiscal year 1986.

"MISCELLANEOUS PROVISIONS

"SEC. 3. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution, or amendment thereto, providing—

"(1) new budget authority for fiscal year 1984; or

"(2) new spending authority described in section 401(c)(2)(C) of the Budget Act first effective in fiscal year 1984, within the jurisdiction of any of its committees unless and until such committee makes the allocations or subdivisions required by section

302(b) of the Budget Act, in connection with the most recently agreed to concurrent resolution on the budget.

"SEC. 4. It is the sense of the Congress that the President and the Congress, through the appropriations process, should limit the on-budget new direct loan obligations of the Federal Government to an amount not to exceed $37,600,000,000 in fiscal year 1983 and $29,300,000,000 in fiscal year 1984; off-budget new direct loan obligations to an amount not to exceed $17,800,000,000 in fiscal year 1983 and $18,900,000,000 in fiscal year 1984; and new loan guarantee commitments to an amount not to exceed $94,500,000,000 in fiscal year 1983 and $94,500,000,000 in fiscal year 1984. It is further the sense of the Congress that the President and the Congress should limit total Federal Financing Bank origination of direct loans guaranteed by other Federal agencies to $16,200,000,000 in fiscal year 1983 and $17,300,000,000 in fiscal year 1984, and Federal Financing Bank purchases of certificates of beneficial ownership from Federal agencies to $11,500,000,000 in fiscal year 1983 and $13,200,000,000 in fiscal year 1984. It is further the sense of the Congress that direct borrowing transactions of Federal agencies should be, to the maximum extent possible, restricted to the Federal Financing Bank.

"SEC. 5. (a) The joint explanatory statement accompanying the conference report on this resolution shall include an estimated allocation, based upon the first section of this resolution as recommended in such conference report, of the appropriate levels of total new direct loan obligations and new loan guarantee commitments for fiscal year 1983 and fiscal year 1984, among each committee of the House of Representatives and the Senate which has jurisdiction over bills and resolutions providing such new obligations and commitments.

"(b) As soon as practicable after this resolution is agreed to, every committee of each House, after consulting with the committee or committees of the other House to which all or part of the allocation has been made, shall subdivide among its subcommittees the allocation of new direct loan obligations and new loan guarantee commitments for fiscal year 1983 and fiscal year 1984, allocated to it in the joint explanatory statement accompanying the conference report on this resolution.

"SEC. 6. It is the sense of the Congress that the budgets of Federal agencies initiating Federal Financing Bank purchases of certificates of beneficial ownership and originations of guaranteed loans should include the budget authority and outlays resulting from the transactions. The Congress recommends that the committees with jurisdiction over the Federal Financing Bank Act of 1973 consider expeditiously legislation to require that the budgetary impact of such Federal Financing Bank transactions be included in the budgets of the initiating agencies beginning with the fiscal year 1985 budget.".

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. WEICKER. Mr. President, how much time does the Senator from Connecticut have?

The PRESIDING OFFICER. The Senator from Connecticut has 3 minutes and 10 seconds remaining.

Mr. STAFFORD. Will the distinguished Senator yield me about 1 minute?

Mr. WEICKER. Mr. President, I ask for the yeas and nays on my amendment as modified.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I yield a minute to the distinguished Senator from Vermont.

Mr. STAFFORD. Mr. President, I think the amendment now pending before the Senate, with the modification which we have accepted from the distinguished Senator from Washington (Mr. GORTON), gives the Senate an opportunity to decide whether or not it really wants a budget resolution this year. This is the key question: Do we want to vote a budget resolution, or do we want to end up in a rather chaotic state, appearing in front of the country as unable to resolve the issues that go into a budget resolution?

I say we have reached the time when the Senate is going to be put to the test: do we want a budget resolution this year or do we not? I believe the majority on both sides of the aisle want a budget resolution. I hope that the Senate will adopt the amendment that has been offered by my colleagues and myself.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time?

The Senator from Connecticut.

Mr. WEICKER. I yield to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I would like to make a couple of points about the proposition that is at the desk now. One, it is a 3-year reconciliation, which I think is extremely important; second, the revenues as provided by the amendment of Senator GORTON are basically the same as that at the desk.

Defense is only slightly more. It is 6 percent, 5.5 and 5. Finally, Mr. President, I do believe this sends a signal of responsibility to the financial markets on the part of the Senate and the Congress.

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. Mr. President, I yield myself such time as I might need off the bill.

The PRESIDING OFFICER. Does the Senator yield time off the amendment or the resolution?

Mr. CHILES. Off the resolution.

The PRESIDING OFFICER. The Senator has that right. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, we are getting down to the late hour. We have been talking for a long time that we were going to come down to this. It is kind of like the shot clock in basketball; we are getting down to whether we are going to take the last shot. That is where we are now. I think we have time to take the last shot. I am afraid that that is the last shot—whether we are going to have a budget and whether we are going to have a budget process. When we see the remarks that come out of the White House that we do not care whether we have a budget or not, that we can have a veto strategy, we can run against Congress and we do not need a budget when we know there are individuals down there that say we will be able to do better with our defense numbers because Congress will never go and cut the particular weapons systems, when we see people that say if we do not have a budget, then we will not have to worry about raising any revenue, we will be able to get by there, all of those things tell me that the process is in great jeopardy.

I have supported for a number of weeks now the bipartisan budget that came out of the committee, which I felt was the best thing that we could possibly do because we would be reducing revenues, we would be reducing the deficit, we would begin bringing that deficit down to 2.6 percent of the gross national product in 1988, we would be saying that we should not be going out and borrowing more money now to give people a red ink tax cut at a time that we are trying to hold interest rates down.

I strongly believe in that proposition. Democrats in the Budget Committee strongly believed in that proposition. We held firm with what we thought the number should be, and ultimately we were successful. If I thought that we could hold firm longer in the Senate and be successful, I would be holding firm now.

I am convinced, Mr. President, that there are not enough votes to pass the committee budget. I am convinced that there are no votes for the committee budget on the Republican side of the aisle. I have tried to talk to colleagues over there, and I find no votes. I am convinced that we have some Democrats over here that are nervous about voting for $30 billion additional revenue.

Knowing that and feeling that there is no way that we can pass what I think is the best plan and what I would like to support, then I am going to look in every way I can to find what is the next best thing to try to reduce those deficits. What I find is the next best thing is the Chafee amendment as modified by Senator GORTON, with the other distinguished five Senators that are the cosponsors of that amendment.

When I look and see what it actually does, it is $22 billion below the President's deficits in the 5 years; it produces $21 billion lower interest than we will pay if we have the President's

budget. The interest rate is terribly important because every dollar that we have to borrow is jeopardizing the recovery. It is jeopardizing whether interest rates are going to go up or not. It follows the principle that we tried to lay down in the Budget Committee, and that is that you have to get some revenue in the first 2 years. I would like to get a lot more revenue than this budget actually picks up in the first 2 years, but now with the Gorton compromise it does help make up for some of that revenue by going to $51 billion in tax increases in year No. 3. That is higher than the President's $46 billion contingency number. It is a 3-year reconciliation. I have described the Domenici-Baker substitute at one time in irreverent terms, and I apologize to my good friend from New Mexico. That word kind of slipped out—I guess I am kind of prone to saying something like that—when I said it was "rinky dink." My concern was that that budget was only a 2-year reconciliation. My concern was the signal that would send to the markets if we were only talking about the revenue, small revenue that the President was talking about over the first 2 years, doing nothing about increases in the third year even though the President had wanted to do that; that it would be the worst of all signals that we could send.

Mr. DOMENICI. Will the Senator yield?

Mr. CHILES. I yield.

Mr. DOMENICI. Since the Senator indicated that he did not have to say it, why did he say it again?

Mr. CHILES. I was only repeating what the Senator said yesterday. And I will go wash my mouth out with soap when we leave. That is what my mother used to do with me when I used some terms that she did not wish me to use.

Because we have been talking about whether there is going to be a budget process or not and we have on our side been critical of the administration and some other Republicans that we have said do not want that process, I want to say to my good friend and the distingusihed chairman of the committee that I do not think anybody has worked harder to see that we have a budget process and to see that it continues, and I know of no one that feels stronger about it than the Senator from New Mexico. He met me bright and early this morning to express his concern that we were going to get into a situation today where we might see the whole thing blown up. He said, "How can we set the procedure so that we save as much time as we can, so that we take the steps we can to accommodate all of the votes than can be taken in this body to see whether there is a majority for a plan?" He has certainly done that. He gave back his time on the tabling motion on Domenici-Baker. He has accommodated the Senators that are moving this proposition, and he has accommodated our side of the aisle, all of that while I do not think he agreed with this particular proposition and probably is not going to support it.

I know of his desire. If everyone felt exactly as he did, I would not be as concerned as I am that we might lose the process. But I dreadfully am concerned about that.

This amendment that we are talking about now gives us a 3-year reconciliation, provides a good source of revenue in the third year, reduces deficits, reduces the interest rate below the President's budget, and I think it is a good step for us to take to the House and to go to conference with and see what is the best budget that we can produce at that time.

If we fail to produce this, I do not know where we go from there. But knowing that the White House is against even this, knowing the White House has been intransigent in anything that we tried to do to produce meaningful compromise, has been against any kind of revenue numbers, is not concerned as to whether we have a budget process or not, I think it is a dreadful risk that we run.

I say to my many Democratic friends who have the feeling the Republicans have a majority here, why should they not be responsible for producing a budget, the Republicans have failed to allow us to particulate up until today, why should we be trying to pull their ox out of the ditch today, I think we need to do it today because it is good for the country. I think we need to forget about what we would think about any kind of politics. I always think the best politics is what is best for the country anyway. What is best for the country today is to have the Senate produce a budget, to have the Senate come up with numbers that show that we are concerned about this deficit, we are trying to get one lower than the President, we are concerned about interest rates, and we are concerned about new revenues. That I think is all of the things that this particular substitute will give us today.

Without that, we would not have a 3-year reconciliation, and for that reason it seems to me to make sense.

Mr. President, I am not alone in this thinking. I ask unanimous consent to have printed in the RECORD today an editorial from Hobart Rowen talking about the "Dead Hand of the Deficit." He is talking about the importance of reducing the deficit.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

DEAD HAND OF THE DEFICIT

(By Hobart Rowen)

Political forces are making it extremely doubtful that much is going to be done about the massive federal budget deficit. If not, budget director David Stockman's warning that the deficit "will be stuck at $200 billion as far as the eye can see" is right on the mark.

As Wall Street analyst Sam Nakagama pointed out in a recent commentary, "With the 1984 elections looming ahead, neither the Republicans nor the Democrats are eager to make further large cutbacks in non-defense spending."

For the same reasons, despite heroic efforts by Sen. Bob Dole (R-Kan.), no one is really willing to bite the bullet on tax increases. On the contrary, Congress is rolling over and playing dead for the banking-industry lobby, reversing last year's effort to install a modest and proper withholding procedure for taxes owed on dividends and interest.

The only organized effort that will help in the reduction of the budget deficit is the bipartisan refusal of Congress to go along with the president's request for a 14 percent increase—10 percent real—in defense spending. But even this only cuts the five-year costs for arms from $1.8 trillion to $1.6 trillion.

Yet the importance of reducing the budget deficit can hardly be exaggerated. In the recent euphoria associated with the booming stock market, it's almost been forgotten. But the deficit is one of three main elements—the others being what he calls the "international debt blockage" and the failure of any major nation to encourage economic expansion—that cause economist Henry Kaufman serious concern.

At best, Kaufman said in an interview, worldwide economic recovery "is flying at a low level, and you've got to be sure you don't hit the trees when you're flying at a low level." He sees debt problems piling up, not being solved.

And although bankers like to say that the problem is just one of "liquidity"—a temporary shortage of cash—Kaufman believes that many of the debtor nations could be heading into "solvency" problems, that is, going broke or bankrupt.

Robert V. Roosa and William M. Reichert of Brown Bros. Harriman, a private New York banking firm, recently delivered a rather grim analysis of budget prospects. They pointed out that deficits of the magnitudes that Stockman and other realists now foresee almost surely negate the possibility of a sustained economy recovery.

They say the conflict between the deficits—which absorb most of the nation's savings—and growth "would extend beyond U.S. borders, for the rest of the world is extremely sensitive to U.S. economic growth and interest rates." This point has also been made forcefully in the discussions in Paris this week at the Organization for Economic Cooperation and Development.

Europeans agree with Roosa and Reichert that once the American economy emerges from recession—and the Reagan administration insists that the recovery in the United States is broader than Europe has yet conceded—"large deficits become restraining rather than stimulative."

They argue, as well, that the deficit will eventually push up real interest rates (unless the Federal Reserve softens monetary policy considerably). That will continue to keep the dollar overvalued in foreign exchange markets, which in turn depresses American exports.

Because both Democrats and Republicans find it politically difficult to do more than trim around the edges of the deficit via fiscal policy, economic policy resides—by de-

fault—mostly in the hands of the Federal Reserve. That makes all the more interesting recent White House complaints about the "independence" of the present chairman, Paul Volcker. It begins to sound as if the way is being paved to dump him.

"If the Fed pursues a non-inflationary path and is forced to curtail the expansion of credit, real interest rates might go higher . . . possibly aborting the recovery," say Roosa and Reichert. "If, on the other hand, the Fed monetizes a significant portion of the deficits by allowing the money supply to grow rapidly . . . inflation may reemerge. . . . This leaves economic policy between a rock and the hard place."

Their net conclusion, after making allowance for the probability that no projections are ever exact, is that in the years that lie ahead, taxes will have to be boosted (further reversing the giveaways of Reaganomics), defense spending will come to be reduced, and inflation and interest rates will still be higher than anyone wants. That means the prognosis for economic growth and jobs is poor. In turn, that suggests that the sooner politicians get up their courage to regain control of the budget, the better.

Parsing the transcript of President Reagan's extemporaneous mini-press conference the other day was scary enough. But what must have triggered my nightmare, as best I can reconstruct it, was a background briefing the same day by a senior European diplomat (you don't become senior by going public) on the utility of the upcoming summit meeting of the seven Western industrial nations at Williamsburg.

"There is huge benefit," he argued, in the opportunity for "practical politicians" to meet even briefly by themselves with no aides "shoving notes in front of them"; to let their hair down and "take each other's measure."

That did it. It was the thought of Ronald Reagan having his measure taken by six sharp-eyed, seasoned veterans of parliamentary rough-and-tumble, with their keen ear for nuance and their necessary sensitivity to every twist and turn in U.S. policy—and of him talking the way he talked to those six reporters in the Oval Office.

I am not even thinking of the quickly corrected slips of the tongue about Salvadoran "freedom fighters" or the muddled presentation of his Nicaraguan policy, which attracted most of the notice. Rather, my nightmare vision is of polite coughs, fleeting exchanges of glances, and perhaps abrupt changes of subject (nothing rude) as the president takes off on one or another of the fundamental flights from reality to be found in the press conference transcript. For example:

China: He was "not at all sure" that Jimmy Carter had "added anything" to what "a previous president to the previous administration" (that would be Richard Nixon) had already accomplished. What Carter added, of course, was the hard part—the 1979 "normalization" agreement establishing full diplomatic relations with the People's Republic, at the expense of downgrading relations with Taiwan to the level of "unofficial." In Carter's time, a military aid relationship was also struck up with Peking, while limitations were imposed on such aid to Taiwan.

* * * * *

The Mideast: Conceding that Jimmy Carter "started" the Camp David agreement, he argued that the Reagan administration has "gone a step beyond [by] trying to have an overall peace in the entire area—that has never been proposed."

The reality: it has been proposed in the so-called Rogers Plan under Nixon, and regularly by Henry Kissinger, it is the bedrock of the Camp David Accords (which Reagan takes as the basis for his own Mideast "initiative"). They are subtitled "A Framework for Peace in the Middle East." The preamble states: "The parties are determined to reach a just, comprehensive, and durable settlement of the Middle East conflict."

The Alliance: "I do not believe that the NATO alliance has ever been more solid than it is now, or that there has been a better relationship between us and our allies." If Reagan tries that in the free-form shoptalking sessions, his best hope would be that it would be taken as a joke to break the ice so apparent in the summit preparations on East-West trade, on Western economic relations, on arms control, on assessments of the Soviets.

These are fundamental misapprehensions. The familiar post-mortem rationalizations—that the president was "having an off day" or perhaps didn't quite catch the question—don't persuade. White House aides, conceding a problem, talk about the need for better briefing, more structured formats, tighter wraps, all of which helped Ronald Reagan out of trouble in the 1980 campaign.

But that's only a formula for cleaning up the act. It can have the effect of improving the performance. But it can't alter the evidence that to "let Reagan be Reagan" is to invite the conclusion that his attention/retention span for foreign affairs is short—that, left on his own devices, he is either out of date or out of touch.

Mr. CHILES. Our work would have probably been easier if we had to do our budget 3 months ago, 5 months ago, but now with the stock market going up every day and the news getting better and better, I know a lot of the troops say:

Why in the world should we be worrying about these deficits now? The good times are rolling. We do not have to be concerned about further cuts in spending. We do not have to be concerned about revenues. I am running this year. What is it going to do in the Presidential election next year?

Everybody is kind of feeling that way.

Goodness knows, you only have to look at that chart and look at the numbers on either of those budgets, the Republican substitute or the bipartisan committee budget, and see the kind of problems we are facing. We will face those problems unless we can send a signal that we are producing a deficit that at least is going down.

The substitute has the deficit going down. It shows that 1984 will be better. It shows that 1985, 1986, 1987, and 1988 will be going down on a declining curve. That is essential if we want to see the recovery continue, if we want to see interest rates stay where they are or go down further.

With 10 percent unemployment, there is no way we will get those people back to work. They are the ones who have suffered. They are the ones who are really the victims of it. If we care about those people, and I think we do, if we care about this country and trying to put us on our feet again, we have to show that we can produce a blueprint in the direction of lower deficits and lower interest rates.

That is the responsibility each of us has, as a Member of the Senate, representing our State and our country. I hope everybody will think about that when they vote on this particular deficit.

Mr. President, I hope the Senate will adopt this substitute. I hope the Democrats will see that it is to our advantage and to the advantage of the country to produce votes to see that we adopt this particular substitute.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. BYRD. Mr. President, I fully support the statement made by the ranking minority member of the Budget Committee, Mr. CHILES.

After all, it was, I guess, under Democratic administrations in the Senate that the budget process was created. I think the budget process has been emasculated and greatly abused in the last 2 years. I do not like that.

However, that is not to say that I am for ditching or deep-sixing the budget process today. I support the Senator from Florida, who has just stated that it is important to retain that budget process. As I understand him, this amendment as modified would result in lower deficits than the President's budget.

Mr. CHILES. That is correct.

Mr. BYRD. And lower deficits than contained in the Baker-Domenici substitute.

Mr. CHILES. That is correct.

Mr. BYRD. And would establish a trend that would encourage the American people to believe that, indeed, we are going to try to keep deficits down.

Mr. CHILES. That is right.

Mr. BYRD. So I support this amendment, and I express the hope that we will have bipartisan support. There has not been very much that was bipartisan in this matter until today.

Mr. CHILES. No.

Mr. BYRD. But now I hope we will have bipartisan support on this amendment.

Of course, it is going to have some bipartisan support because it is being offered by some of our good friends on the other side.

I hope there will be a strong showing of votes from the other side as well as a strong showing of votes from our side.

Mr. CHILES. Mr. President, I certainly concur with the statements of the distinguished minority leader.

With respect to the remarks I am trying to make on our side of the aisle, I do not know that I can make them to the other side of the aisle, but I hope

there will be enough concern over there about how important this process is, how important it is that we get a budget out. They have had an opportunity to stand up for the President. They have had an opportunity to vote for their leadership resolution. That has failed.

Now I hope they will join what is a move from their side of the aisle and produce the votes to see that we have a bipartisan budget that we can take to conference with the House.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I understand that the Senator from Kansas desires 5 minutes in opposition, and I yield to him.

Mr. DOLE. Mr. President, since we have been debating about 2 weeks what the Senate Finance Committee should do, perhaps I ought to speak.

I say at the outset that I am perfectly willing to go the extra mile so far as revenues are concerned. But I think the record should be made clear that we had a vote here last year on $100 billion in new revenues, and that did not get a single vote on the other side of the aisle, until the conference report came up.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. CHILES. The distinguished ranking minority member is not here now, but as I recall, that package was presented to the Democrats who sit on the Finance Committee after it had all been worked out. No hearings were held. It was just brought in and sort of laid on the table; and it was said, "Here is the revenue." The Republicans voted it out, and we did not get a chance to participate at all.

As I recall, the Democrats were ready to raise some revenue last year, had several propositions on how to do it, but did not get any consideration on those. That was totally a Republican package. You produced your votes and you passed that.

The same thing was being done this time. Thank goodness, there were a few people on the Republican side of the aisle who thought it was the wrong thing to do.

I think we are willing to participate in the landing any time we get a chance to participate in the takeoff.

Mr. DOLE. That is the point I want to make. I do not know whether we are going to have a takeoff. Those of us who have to raise the revenue should have some passengers on the plane.

The last time we took off—on the withholding debate—we gave away $20 billion in revenue on this floor. I did not see anybody jumping up on either side saying, "We should not give away $20 billion."

If we had that $20 billion, it would make these deficit numbers look better.

I will say, to the credit of those offering the substitute on our side, that every one of them voted to retain that money.

The only point I make is that if there are those who say we should raise $75 billion, I hope they are all with us when we vote on the legislation to raise the $75 billion, and not just vote for a budget and when the revenue bill comes to the floor say, "I didn't mean that when I voted for $75 billion. I meant something else. I meant taking away the third year of the tax cut, or indexing."

So far as I am concerned, those are not negotiable. But there are a lot of things we can do to raise revenue.

There are a lot of loopholes that should be addressed. There is a lot of tax compliance that should be addressed.

We should have some agreement in this Chamber that we are going to try to make the system fair and protect the tax cuts for the working people by closing loopholes and exacting more compliance. About $100 billion that is due in taxes is not being paid, and there are $296 billion in tax expenditures that should be looked at.

So far as I am concerned, I would not quarrel with the revenue numbers. I do not think they are unrealistic, at least in the first 2 years, if we could come back from conference with the numbers. But then the problem is whether or not we can get any votes on the Senate floor for a revenue bill.

It just seems to this Senator, based on last year and then earlier this year, when the bankers took over the Senate, we ought to be careful that what we say we are going to raise in revenue in the budget resolution we can pass on the floor, and then maintain. The Senator from Kansas is perfectly willing to carry out his responsibilities, and has the greatest respect for the Senate Budget Committee, having served on that committee. And I know the task of the Senator from Florida and the Senator from New Mexico has been very difficult. But I just cannot be silent since all the debate is over how the Senate Finance Committee is going to raise all this revenue.

If, in fact, these revenue numbers are accepted, we will do the best we can. But I am concerned with the high-revenue numbers on the House side. Therefore, I believe that these revenues offered by the distinguished Senator from Washington are too high.

So it would seem to me the best we could hope for is to send this budget back to the Budget Committee, and hope they can come back with a better resolution.

(Mr. WILSON assumed the Chair.)

Mr. BAKER. Mr. President, will the Senator yield to me for a moment?

Mr. DOMENICI. I would be pleased to yield to the distinguished majority leader.

Mr. BAKER. Mr. President, it is now 3:20 p.m. I announced earlier that I hoped we could finish this matter one way or the other by 6:30 p.m., and I am still hopeful in that regard.

Let me say, that I have no quarrel with the Senator from Washington for his initiative nor that of the Senator from Connecticut, the Senator from Rhode Island, the Senator from Vermont, the Senator from Oregon, and others, who have made this proposal. But, Mr. President, let me point out that what we are going to do, as the chairman of the Finance Committee remarks, is lay on the Finance Committee an uncertain obligation to do what the Senate has not been willing to do until now—raise even a modest amount of revenue.

I regret that the Budget Committee got locked up to the place where it was required, with the assistance of the vote of the chairman, to report a resolution that he did not want, that the Democrats included 30 billion dollars' worth of new revenue, and which assumes the repeal of the third year of the tax cut.

Now, there is an effort now to characterize this as a compromise. I want to say right now if there is to be a compromise, the way to compromise is to take this resolution back to the committee. If there is a way to find a bipartisan solution, it is to do it within that committee and to report it to us on a basis that will permit us in the regular course of affairs to consider it on its merits as a resolution from that committee.

Mr. President, the day is growing short, and I do not know whether this amendment will pass or not. I hope it does not pass and I will vote against it. But, if it does not pass, Mr. President, it is my full intention to ask the manager of this resolution, the chairman of the Budget Committee, to make a motion to recommit this resolution to his committee so that we can get on with the business at hand and try to find a solution to the questions involved.

It is often said "Well, you know the President has no role to play here, he doesn't have to sign a resolution, he can't veto it. It is purely congressional action." Of course that is true. But, Mr. President, it is certainly a matter of interest to the President of the United States whether or not there are additional revenues to be raised and how they are to be raised.

So, Mr. President, I suggest we should take account of the concern, and I believe the legitimate concern, of the President of the United States in this respect: we should send this

resolution back to committee and we should try to make an accommodation with the White House on what basis we will design a budget for this country in the years ahead.

We have spent much more time than I had hoped we would spend on this resolution. A lot of the time was spent doing nothing at all, sitting around waiting for each other and I regret that. But we have just about used up the 50 hours allocated under the statute and I am just about ready, Mr. President, to say that the thing to do is for the Senate to acknowledge that the work of the Budget Committee needs to continue and if this matter is recommitted under the act it must return in 3 legislative days. It would be my intention then not to ask the Senate to be in session on Friday, to count today, Monday, and Tuesday and we would take this resolution up, as it must be reported by the Budget Committee then, either on Tuesday evening or if there was not time to complete it, then on Wednesday.

Mr. President, I urge that we not accept this initiative, that we defeat it and send this thing back to the Budget Committee for one more try.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I hope that the Senate will not adopt this amendment at this point. I do, however, feel as if it would be grossly unfair, as chairman of the Budget Committee, if I did not commend those who were involved in the amendment as it finally finds itself before the Senate. I think that considering how polarized the sides were to begin with it has come a long way, a tremendously long way. The leader has suggested that if the amendment fails we have time to recommit. The resolution, then, comes back here with only the small amount of time remaining on the resolution. He suggested that we could use that time for accommodation.

I have suggested to the distinguished leader, my friend from Tennessee, that indeed if the resolution is recommitted we are going to have to have some accommodation from the White House. He has assured me that he will work on that. I have asked my good friend, the chairman of the Finance Committee and he told me he would work on that. I say that only because I have had my share of attempting to accommodate with the White House on the defense issue and I did not get anywhere in 3 weeks. It looks like I am going to have 3 days this time but, nonetheless, frequently when you are under the gun, people accommodate. I am hopeful they will.

Simply, I do not believe that this amendment is good policy. I really do not think the House and Senate are going to end up enacting the taxes proposed here. I do not think you are going to get the full $73 billion in new taxes over 3 years, which is what is proposed. So I have a lot of doubt about that kind of reconciliation which seems to give us a euphoric feeling that we are doing a lot about deficits, because the likelihood is that the Congress will not follow through with the necessary laws.

Let me close where I started by complimenting those who have participated, the distinguished junior Senator from Washington who has been very helpful on the committee, and those who voted to table my side amendment. They have now joined, most of them, in this proposal. It is a rather significant step forward. I thank them for their willingness to compromise and I think it means that there is a growing feeling that we have got to get a resolution. But I do not think this is the amendment to pass.

Unless there is additional time sought I am ready to yield back and I assume we will vote.

Mr. BYRD. Mr. President, I would like to have 1 or 2 minutes.

Mr. WEICKER. How much time do I have?

The PRESIDING OFFICER. The Senator has 44 seconds remaining.

Mr. WEICKER. I certainly yield my 44 seconds.

Mr. BYRD. I would like to ask Mr. GORTON a question. The revenues involved in his modification, in his amendment to the amendment which was accepted as a modification, would amount to $8.9 billion, I believe, in fiscal year 1984. Is that about what a $500 cap on the third year would raise?

Mr. GORTON. I will say to my friend, the minority leader, to the best of my knowledge it is approximately that amount. I would defer to the better judgment which the chairman of the Finance Committee might come up with. I must say to the Senator that that was not my assumption in this respect but it would be quite consistent with doing that.

Mr. BYRD. Yes. Under such a cap, then, every family of four with an adjusted gross income up to $39,000 would receive the full 10-percent cut; is that correct?

Mr. GORTON. The Senator is correct.

Mr. BYRD. If the Finance Committee chose to move in that direction?

Mr. GORTON. The Senator is correct.

Mr. BYRD. And those persons with incomes above $39,000 would all get a tax cut but it would be capped at $500; is that not correct, give or take?

Mr. GORTON. The Senator is correct.

Mr. BYRD. So instead of a tax cut of $2,368 that a family of four earning $100,000 would otherwise receive, they will receive $500?

Mr. GORTON. I think I would defer to the chairman of the Finance Committee with regard to those figures but I believe the figures are substantially correct.

Mr. BYRD. In any event, this would not be a tax increase. It would simply be a way in which, if the Finance Committee chose and the Ways and Means Committee chose, it would be a way in which lower and middle income people would receive their full 10-percent cut while those who are above that line would receive a tax cut but it would be limited to $500, give or take a little.

Mr. GORTON. I believe the minority leader to be correct. Of course, as the chairman of the Finance Committee pointed out in his own remarks, this is simply a number and the Finance Committee literally has any number of numbers.

Mr. BYRD. I do not argue with the Senator from Kansas on that. But at least those figures could accommodate such a cap.

Mr. GORTON. The Senator is correct.

Mr. BYRD. And that would come out about right.

Mr. BAKER. Will the Senator yield to me?

Mr. DOMENICI. I am pleased to yield to the distinguished majority leader.

Mr. BAKER. Mr. President, what I am about to say next is certainly not meant as any slight to the minority leader or the distinguished author of the amendment. But I think just now, with the questions by the minority leader, that we have established the real confrontation that exists, the real essence—and I do not think this was meant by the Senator from Connecticut or the Senator from Rhode Island or the Senator from Washington. Maybe it was, I do not know. But what we are really about to decide is whether we are going to tinker with the third year of the tax cut. Eight point nine billion dollars is not enough to repeal the third year of the tax cut, but $8.9 billion, as the minority leader, I think, implies, is enough to cap the third year of the tax cut.

Just so I am sure I understand, I believe that that is the real issue between us on this vote. Are we going to change the third year of the tax cut or leave it intact? If we are going to change the third year of the tax cut—and I expect many Democrats will support this amendment—if we are going to do that, the vote would be yes. If we are going to vote against changing it, the vote would be no.

Obviously, this lends itself to other configurations and other interpretations. The Senator from Washington has pointed out that these were just numbers and that is not what he in-

tends. But I think the questions put by the minority leader sharpen that issue. I think we should assume what we are deciding right now is whether to leave the third year of the tax cut intact.

Mr. GORTON. Will the distinguished majority leader yield?

Mr. BAKER. I yield the floor.

Mr. BYRD. Will the Senator yield to me?

Mr. CHILES. I yield to the minority leader.

Mr. BYRD. Mr. President, the distinguished majority leader—and I say this with all due deference—is accurate in his own mind, but probably not accurate in the minds of even those who are sponsoring the amendment. It is merely one approach that could be taken. I feel that approach would be good because it would be fair to the middle and lower income people of this country. But I do not know what the motivation is or what approach would be preferred by Mr. WEICKER or Mr. GORTON or others. I am simply saying that a cap is one approach which could be taken. I personally believe it is the right approach.

Mr. CHILES. Mr. President, I yield some time to the distinguished Senator from Washington.

Mr. GORTON. Mr. President, with all due respect to my own esteemed leader, since I am the author of this particular figure, I wish to say that I do not regard it as appropriate to characterize this vote as a vote on the third year of a tax cut. I support it. I support the retention of indexing. I am absolutely convinced that the distinguished Senator from Kansas is quite imaginative enough and successful enough to come up with revenues which would meet this figure without changing the basic structure of the income Tax Code at all, except in the field of deductions, exemptions, tax preferences, and the like. And, for what it is worth, the author of this amendment would hope that he would do precisely that.

Mr. CHILES. Mr. President, I ask my distinguished colleague from Washington, the number $8.9 billion has a ring to it. Is that original from the Senator from Washington or have I heard that number somewhere else? Did someone else speak of that number, saying that was the amount of revenue they could pick up without tampering with the third year, or something?

Mr. GORTON. The Senator from Florida is very shrewd and very wise in this respect. As a matter of fact, the number comes from a figure to which both the chairman of the Finance Committee and the chairman of the Ways and Means Committee in the House have spoken of as a practical revenue number; that is, $8 billion, together with the revenue effect of decisions which we have already made in the course of this debate.

Mr. CHILES. I thank the distinguished Senator from Washington.

Mr. BAKER. Will the Senator yield?

Mr. DOMENICI. I am pleased to yield to the majority leader.

Mr. BAKER. Mr. President, I want to make it absolutely clear to the Senator from Washington, the Senator from Connecticut, and others, I have never said it was their intention to do that. What I said was that the only fair import of the remarks by the distinguished minority leader suggests that it is a part of the consideration involved here in voting on this measure as to whether we are going to keep the third year of the tax cut.

Mr. BYRD. Will the Senator yield?

Mr. BAKER. Yes.

Mr. BYRD. I say to the distinguished majority leader that I have a right to support this amendment for whatever reason I may wish to support it and I would assume that other Senators who vote for it or against it would do so for whatever reasons they choose.

I personally would like to see a cap. I think that would be fair to the middle and lower income people of this country. But that is no directive to the distinguished Senator from Kansas, the chairman of the Finance Committee. There is just a dollar figure here. He can go in that direction; he can go in other directions.

But I do not think that the majority leader would dispute the fact that that is about the same dollar figure. That is what I was asking the Senator from Washington, that, roughly the same figure could be involved in a cap.

Mr. BAKER. Mr. President, I find it extraordinarily difficult for me to stand up and to ever, ever express anything other than gratitude to the minority leader for his embrace of a Republican initiative. But I have to confess that when that infrequent occurrence happens, I wonder why I am being embraced. [Laughter.]

In this case, I suspect the reason for it was implied, at least, in the minority leader's suggestion about the third year of the tax cut.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. DOMENICI. I am pleased to yield to the Senator from Kansas.

Mr. DOLE. Since I am getting all of this advice on what this revenue number does or does not mean, I might say that it also could mean a $5 a barrel oil import fee, which I know would be popular in some quarters. That would raise about $9 billion. I have all kinds of options here to get $8.9 billion.

Mr. BYRD. Will the Senator yield?

Mr. DOLE. Yes.

Mr. BYRD. Does the Senator forget that most vigorous filibuster that ever occurred in the United States which occurred in 1977? It was the deregulation of natural gas.

Mr. DOLE. How does that give me $9 billion? [Laughter.]

Mr. BYRD. I do not know, but the Senator talked about some increase or some taxes on oil.

Mr. DOLE. I just threw that out. Everybody interprets this, as they wish. This is just a giant crap game anyway and you just shoot until you win around here. But I think you are about to shoot the Finance Committee chairman.

This amendment raises about $76 billion in revenue. If we can put in this amendment that it is going to be raised by closing loopholes and tax compliance, you might have a lot of support. But I do not know why we have to take it from the working people, by tampering with the third year of the tax cut. The fair way is to close loopholes and raise tax compliance.

I know the Senator from Ohio has supported me in that effort, one of the few on that side that did, I might add.

SEVERAL SENATORS. Vote.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, will the Senator from New Mexico yield?

Mr. DOMENICI. I would be pleased to yield.

Mr. METZENBAUM. Mr. President, will the majority leader be good enough to yield for a question?

Mr. BAKER. I am happy to yield.

Mr. METZENBAUM. The Senator from Ohio has a lot of respect for the majority leader and knows that the majority leader never embarks upon a course of action without knowing where his ship is going. Would the Senator from Tennessee, therefore, be good enough to advise the Members of the Senate what alternatives he is thinking about or talking about or suggesting in the event this amendment is defeated in order to bring about a compromise solution of the whole question of getting a budget out of the Senate in the event the additional 3 days are provided? I would just like to know what his thoughts are, what he is really suggesting that this body should be doing.

Mr. BAKER. I think that is the answer.

Mr. President, seriously, I indicated earlier, I will say to my friend from Ohio, that I think, one way or the other, we have to preserve the budget system and I think the way to do that is to demonstrate whether anything is going to pass here or not. This may pass. I hope it does not pass. But if it is passed, the Senate has spoken.

But I am not about to stand here and say we ought not to have a budget resolution. I am determined to try to get a budget resolution.

I am not going to gladly see the Senate leave without doing that. So if this amendment fails, it is my intention to ask the distinguished chairman of the committee, or I am prepared to do it by myself if he wishes, it make a motion to recommit to the Budget Committee, with the request that they report back within the 3 days provided by statute, and to debate within the time remaining. It would not be a new 50 hours. Then to dispose of this matter after the committee takes a fresh start.

Presumably, the committee would approach this matter on the basis of the preferences expressed by the Senate so far. That would be on the votes, relative strength or lack of strength, of the several proposals that have been discussed, and to bring back to us a resolution.

But just so there is no misunderstanding about it, I do not share the sentiments expressed by an official of the White House yesterday, that we might be better off without a budget resolution. I do not believe that. I think we should have a budget resolution. I am committed to get a budget resolution. It is not my plan to try to thwart that. Indeed, if this amendment fails, as I hope it does, it would be my intention to ask the Senate to give the committee a fresh start.

Mr. STEVENS. Will the chairman yield?

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield to the Senator from Alaska.

Mr. STEVENS. I will be brief. I am constrained to make a couple of remarks. Having been here during the period of the development of the budget process, I cannot remember a time when the Senator from Maine (Mr. Muskie) or the prior chairman from South Carolina could have gotten a budget through this body without bipartisan support. I read that because of five or six Members on this side having a disagreement with the balance of 48, that for some reason or other that means that the budget process is coming to a halt.

If it comes to a halt, it is because the budget process is becoming a partisan matter. Again I say to my friends on the other side of the aisle, the pendulum swings, and the time is going to come, perhaps, during your service here in the Senate when support will be needed from this side of the aisle. Having been one of those who supported Senator Muskie and supported Senator HOLLINGS in the past, with a plea for bipartisan support on budgets, I wonder where that support is now. Where is the bipartisan support for the budget process? Or is this a process of just holding the feet of the majority to the fire until somehow or other we coerce five people who happen to disagree with the majority on our side to change their mind?

Is the budget process a bipartisan process or is it a partisan process? If it is a partisan process, this Senator would like to know now. I think I am learning now that it is.

Mr. METZENBAUM. Will the Senator yield?

Mr. STEVENS. I yield the floor.

Mr. CHILES. Mr. President, I yield myself a couple of minutes.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. I will have to say this: I just heard the most incredulous statement I have heard since I have been on the Senate floor in the last 12 years. If I had not heard it, I would not believe it. My distinguished and good friend from Alaska is talking about the budget process fails because of partisanship. We have been on this floor for a week now asking every day when could we participate in the process.

Do you call it bipartisanship when your side agrees to something and they come up with your substitute, we are not consulted, and we do not get a chance to say anything, that you worked for 2 or almost 3 weeks to try to get 51 votes on your side, and then when you did not get 51 votes on your side and we are trying to participate in a bipartisanship compromise now—my friend, is that partisanship on our side?

You talked about Muskie and Bellmon. Do you remember who was in the majority then? We were in the majority then, the Democrats were. At the time we were in the majority, everything that went through the Budget Committee was taken up function by function, category by category. There were no caucuses that went in and presented a plan at 3:30 in the afteroon that was voted out at 10, as happened last year on the budget. There was no Democratic plan that came out. It was a process that we went through.

We had a majority. And we came to the floor and Senator Muskie and Senator Bellmon stood back to back and fought for the committee position. That is something that the Senator from Florida has asked for, the ability to do that in the Budget Committee, asked for that on this floor, talked about that for weeks.

Now you are talking about this as a partisan process on this side of the aisle?

Mr. STEVENS. It appears that way to this Senator. What you recite is interesting history, I say to my friend. But what led to those positions that came out of the Budget Committee this year? Solid opposition from your side to the concepts that came in the President's budget, solid opposition here. Why is it with 48 people on this side there are no people over there in agreement with our side?

Mr. CHILES. I believe the Senator from Alaska smokes the same pipe maybe that the President does. That is bipartisanship means "You follow what I say." That is bipartisanship. But if you disagree with it at all, you are being partisan.

You said the President's plan. The President said in his state of the Union speech that he wanted a bipartisan economic policy. Until today, until today, we have not had any opportunity to participate in that bipartisan policy, and by golly you are trying to take it away from us today. I am reminded of the old farmer who they put out of the room because he smelled. He had manure in his hair. He said, "Gosh, you can kick me out for smelling, but don't rub it in my hair."

It is kind of like you are talking with us that way.

No, we want to participate. We have some concern.

Mr. STEVENS. All I will say to my friend, and again I am saying the pendulum swings and, believe me, this process will be political unless what we are going through now comes to a halt.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I was just going to say to my good friend from Florida, I used the word "incredulous" the other day, and they told me it was incredible, not incredulous. Is that what you meant?

Mr. CHILES. I just repeated what I heard my good friend from New Mexico say.

Mr. DOMENICI. Then you meant incredible.

Mr. CHILES. I am delighted that he has corrected us.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. The Senator indicated he would like to have 2 minutes?

Mr. MELCHER. Yes.

Mr. DOMENICI. I yield 2 minutes.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. It has been difficult to find out what the deficit is if this amendment is adopted. But as I understand from the author of the modification which was accepted by the author of the amendment, the first year deficit would be $184 billion. We voted on whether or not we would accept $192 billion and rejected that.

The second year the modification would be $178 billion in deficit. We just rejected $186 billion.

The third year would be $142 billion, and we just rejected $147 billion.

In each case the budget deficits in this amendment are still too high and it ought to be rejected.

I would also like to comment on the discussion about the bipartisanism of this budget debate.

On our side, the term rinky-dink was used and on the other side I just heard the chairman of the Finance Committee talk about a big crap game. If that is bipartisanship applying to this budget process, it is a pretty loose term.

I think the figures we are being asked to vote on are pretty loose and they are just shoved out here, off the floor. I dare say the chairman of the Budget Committee does not have these figures. Is that true? Does the chairman of the Budget Committee have these figures I just read off?

Mr. DOMENICI. I apologize to my good friend.

Mr. MELCHER. I was reading off the deficit figures which would exist if this amendment, as modified, were agreed to.

Mr. DOMENICI. Let me say while all this staff is here which assisted the Senator form his numbers, I do not vouch for them. If I were offering the amendment, they would be prepared in the same way. The numbers offered by the distinguished Senator were prepared by the professional staff. If he wants to give them to me, I will give them to the distinguished Senator.

Mr. MELCHER. I will save the time of the body. I read them off and they are in the record.

It does point out that these figures are just out here and penciled in and are really not very firm.

The chairman of the Finance Committee just brought out another one, $20 billion which was supposed to be lost from the modification of the withholding tax provision.

Mr. DOLE. It is $18.6 billion.

Mr. MELCHER. The figure of $18.6 billion. That points out how these figures are thrown around loosely. The Joint Taxation Committee, that guided the chairman of the Finance Committee while we were debating that issue, came to me afterward and said the true figures——

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. DOMENICI. I yield 2 more minutes.

Mr. MELCHER. The chairman of the Finance Committee said $20 billion, then $18.6 billion. After the hassle was over, 5 days after that hassle and debate were over on withholding, the staff of the Joint Taxation Committee came to me to describe what the official figures were. I will inform the chairman of the Committee on Finance, they said that they are $13.5 billion. During the course of that debate, we went from $20 billion to $18 billion and I guess to $13.5 billion, although it has not caught up yet with the chairman of the Finance Committee.

The point is when Treasury gives you a figure, it may be changed the next day. The Office of Management and Budget may give you a figure that varies from the Treasury on the same day. But the fact is that these figures are not firm and when they are thrown out here as if they are firm, everyone can take it with a huge grain of salt. I don't think this is the way to approve a budget.

I do not like that, Mr. President. I think it is misleading. It is misleading to the Senate and misleading to the public to throw these figures out as if they are firm figures and you can hang your hat on them. You cannot hang your hat on them; they are just an estimate. Particularly are they an estimate on revenue gains when you get them from the Treasury on something they support, because they are likely to mislead us by 10 or 20 percent on any of their estimates of what the adjustments are in taxes after it is enacted.

Mr. GORTON. Will the Senator yield to me for one moment?

Mr. DOMENICI. I am pleased to yield.

Mr. GORTON. Mr. President, I wish to say to the Senator from Montana that the figures involved in this amendment are calculated in precisely the same way as are the figures in the resolution before us from the Budget Committee and all other proposals which have been before this body for the past 2 weeks. They are exactly as precise as those.

The Senator is, of course, correct: No one knows precisely what is going to happen in 2 or 3 years. The real point is all of them are comparable. The revenue figures are not supplied by the Treasury. They are the figures which we as sponsors of this amendment have deemed to be necessary to carry out the purposes of the amendment. They have nothing to do with the Treasury at all. They are comparable to all of the other figures on which the Senator from Montana has voted or will vote on the budget resolution.

Mr. MELCHER. I thank the Senator from Washington. That is a positive statement. I accept his figures as the most accurate that are available at this time. Even with that the deficits in this amendment are too high.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. Mr. President, I yield 3 minutes to the distingushed Senator from Nebraska.

Mr. EXON. Mr. President, as a member of the Budget Committee, I have been listening to the debate with keen interest. In fact, yesterday afternoon, I came to the conclusion that we would never ever have a chance of getting a budget out of the Senate and I felt it would be proper for me to reconsider this for the consideraton of the Budget Committee and tell the Budget Committee to do our work right. We did not do our work right and maybe we ought to do it all over again.

Mr. DOLE. May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Nebraska.

Mr. EXON. I thank the Chair.

Before we consider going back into the budget session again, I hope that, in the spirit of bipartisanship, we would give some instructions to the Budget Committee that the Republicans would not caucus and the Democrats would not caucus, that we would go into the Budget Committee and spend 3 days, if necessary, in that Budget Committee in open session, working out our difficulties. I may be in a position to support an appeal, if made at a later date, to recommit this to the Budget Committee.

I would simply say that we talk about bipartisanship all too often, but we do very little about it. The record will show that this Senator has been on the floor the last 2 days offering to cooperate, as I have frequently, to bring out a true bipartisan budget.

I think one thing that we are continually overlooking, and if there is one thing that has been hardly mentioned, it is the key matter with regard to the budget; that is the deficit. I do not know how many people in the country understand budgets, but they all know what deficits are.

Instead of talking about a budget that would produce the lowest deficit that may help get this country back on track, that may insure lowering interest rates to something reasonable, we hear the continual talk about partisanship, about the fact that we lack cooperation, about the fact that we are debating here tax increases. I think we should be debating—in my opinion—deficits and how the deficits are going to affect the economy of this country and this world in the years ahead.

I look at the Weicker-Gorton amendment before us and, from the figures that have been presented to me, Mr. President, the Weicker-Gorton amendment, as compared with the resolution that was reported out of the Budget Committee, would increase the deficits by $21 billion in 1984, $31 billion in 1985, $11 billion in 1986, $18 billion in 1987, and $28 billion in 1988. It may be a significant step in the right direction that the Weicker-Gorton proposal is $22 billion lower in deficits than the President's budget as submitted and $199 billion lower than the Domenici-Baker compromise.

I have been trying to concentrate on deficits. I think it is important, that we have a responsibility here.

The PRESIDING OFFICER. The Senator from Nebraska has used the 3 minutes yielded to him.

Mr. CHILES. I yield 2 additional minutes.

Mr. EXON. I think it is important here, Mr. President, that we do focus in on the budget, but while focusing in on the budget, I think we should ask ourselves, what is the budget all about? It is to support in the most responsible way the functions of Government and with no deficit at all. Yet, here we are, considering passing a resolution that will skyrocket the deficits to the $200 billion level and keep them there nearly as long as we can see into the future.

There were two interesting stories printed on the editorial page of the Washington Post this morning, one by Mr. George F. Will and the other by Mr. Hobart Rowan, that tied into the heart of this matter. I would hope that whatever we do here, we should base it primarily on what we can do to reduce the deficit—whether we can do it here, whether we have to recommit this to the Budget Committee with some instruction to bring something back that can get 51 votes. Whatever it is, I think it is important that we try to protect the budget process. Without it, I think we are going to have a worse deficit in the future than the deficit I see on the board behind me.

I certainly hope that, whatever action the Senate takes on the amendment presently before us, the Senate will oppose it because it does not get the deficits down to even the unacceptable high level that we came out of the Budget Committee with.

I yield the floor.

● Mr. MATHIAS. Mr. President, today huge budget deficits hang in front of America's economy like stoplights, stoplights that threaten to halt a sustained recovery. Continued long-term deficits will confirm expectations of rekindled inflation, hold interest rates high, depress investment, and limit job opportunities.

It is an axiom of budget arithmetic that a responsible budget resolution will result in budget deficits that decline from each year to the next. We must now accept the hard corollary of this budgetary axiom: Some revenues need to be raised to support the military and domestic outlay that Congress, by its votes, has deemed reasonable and appropriate for our great Nation.

To modify the revenue program is not to repudiate the past. In 1981 we simply went too far. To reverse our excesses and to raise some revenues will actually improve our chances of restoring a healthy economy.

When this budget debate is over, the American people will look at our bottom line. What size deficits will they see? Will deficits be stuck at nearly $200 billion as far as the eye can see? Or will they see deficits beginning downward toward our traditional economic patterns?

Let us consider the size of the deficits in relation to the economy as a whole. The fiscal 1983 deficit will be 6.4 percent of the gross national product. This represents a post-World War II high. In fiscal 1976, in the aftermath of the worst postwar recession up to that time, the deficit reached only 4 percent of GNP. The time to address this issue is now.

I submit for the RECORD a table showing the actual deficits as a percentage of GNP over the last decade and projected deficits under our new proposal.

The choices now are clear: We can have no budget at all. The Nation can have unending, unacceptable deficits. Or we can act to bring deficits under control.

Our proposal offers real hope for a sustained recovery and increased employment, for a decade of investment in the future, and for growing prosperity and global influence. Failure to make the hard decision—to increase revenues—would set in motion a train of forces that will be impossible to control later on.

The table follows:

BUDGET DEFICIT AS A PERCENTAGE OF THE GROSS NATIONAL PRODUCT

	GNP	Deficit	Deficit as percent of GNP
Fiscal year:			
1973	1,252.0	14.8	1.2
1974	1,379.4	4.7	0.3
1975	1,479.9	45.2	3.1
1976	1,640.1	66.4	4.0
1977	1,862.8	44.9	2.4
1978	2,091.3	48.8	2.3
1979	2,357.7	27.7	1.2
1980	2,573.9	59.6	2.3
1981	2,871.8	57.9	2.0
1982	3,033.0	110.7	3.6
1983 (estimate)	3,193.7	204.0	6.4
1984 (estimate)	3,498.7		
New alternative		180.6	5.2
1985 (estimate)	3,821.5		
New alternative		169.0	4.4
1986 (estimate)	4,142.2		
New alternative		157.8	3.8

●

Mr. MITCHELL. I am pleased that the pending amendment provides sufficient budget authority to enable the Environmental Protection Agency to fulfill its mandated responsibilities.

This amendment would simply return the budget of the EPA to its 1981 level.

If we are to restore the ability of this agency to function, the provision of adequate funding is an essential precondition.

The budget and personnel levels at the EPA have been drastically reduced over the last 2 years. The agency's operating budget would be 44 percent lower in inflation-adjusted terms, and its personnel levels would be 29 percent below 1981 levels if the administration's proposed 1984 budget were accepted.

The budget resolution as reported takes a small step to correcting that situation: It provides for an increase in the Superfund authorization for hazardous waste clean up, and it raises the research and development budget slightly over the 1983 funding level.

But this small increment, sound as it is, does not go sufficiently far to repair the damage done to the agency over the last 2 years.

It is now clear that this agency bore the brunt of the administration's desire for regulatory reform, and it was a goal approached in the most meat-ax fashion imaginable. It finally resulted in the resignation of the top management of EPA and what we all hope will be a revival of its capacity and its commitment to carry out the laws as they are written, under the direction of the new Administrator.

But we cannot expect the new Administrator to succeed unless we give him adequate tools with which to do the job. And the resolution before us now simply would not do that.

The 2-year-long assault on the EPA is now over. The administration is now faced with the need to regain both its credibility and the initiative in upholding the environmental laws on the books. This amendment is designed to provide the agency and its staff with the resources they will need to do that credibly and effectively. We cannot afford yet another year in which the commitment of the EPA to its job remains in question. We cannot afford yet another year in which the hazardous potential of a new Times Beach may be realized. We cannot afford another year in which needed environmental controls are delayed for want of adequate research while funding for that needed research is cut.

The EPA has identified 419 hazardous waste sites nationwide which demand priority attention. These are not minor inconveniences which may be easily avoided by the people living near them. These are dump sites which have the potential to contaminate the Earth and the ground water; these are dump sites which can be a clear and present danger to the health of the local communities.

If the agency had identified 419 fires burning out of control across the Nation, we would not have waited for over 2 years before taking action. But these hazardous waste sites are every bit as dangerous as uncontrolled fires. Indeed, because they are not always perceived as an active threat, they are even more dangerous, because people in local communities are not clearly forewarned of the dangers and have no direct way to protect themselves.

This amendment would provide that at least half the available funds in the Superfund account be spent to deal with those waste sites.

The Superfund program was established 2½ years ago, and it is surely not too much to expect, midway through the program, that its provisions be implemented for the purposes set forth in the law.

But it became clear in the course of hearings on the progress of Superfund implementation, that there existed in the top administrators of EPA, an unstated, but effectively implemented desire to limit the expenditures from Superfund in order to make certain that sufficient funds remained when the law expired to give plausibility to the notion that the law was unnecessary in the first place.

Whether that was an actual policy goal explicit in the intentions of those formerly in charge of the agency is now a moot point. What is not moot, however, is the fact that this deliberate slowdown policy, implicit or explicit, has severely curtailed the rate at which Congress anticipated the law would operate. That is a result that should now be corrected as speedily as possible.

The record of cleanups to date is paltry. Of the 419 sites identified as priority sites, EPA has provided funding to help clean up just 78. The other 341 sites have been left just as they were found: Deadly hazards to close-by communities, potential threats to the ground water above which they are located, and a serious concern to each of 44 states in which they are located. It is well past time that these identified hazards are eliminated. The amendment we propose today would move us a substantial step toward that goal.

In addition to adequately funding the crucial Superfund cleanup effort, this amendment would lay the foundation for rebuilding the capacity of the EPA to define, regulate and aid in the cleanup of other pollutants.

The situation with respect to the States is particularly important. As the States are given more and broader responsibilities for environmental protection and cleanup, the resources devoted to helping them fulfill that task are in danger of being seriously diminished.

The administration's budget figures for 1984 would represent a 36-percent decrease from 1981 for the grants which States use to carry out environmental laws. At a time when State government budgets are every bit as tight as the National Government's, a continued decrease in these grant programs will simply result in delays in granting permits, reductions in essential staff to enforce requirements, and retard the delegation of added responsibilities to the State level.

Such an overall outcome will not have an effect limited to the single budgetary year of this resolution; it will have a lasting and cumulative effect on the entire nationwide effort to maintain existing laws in force, to strengthen the enforcement of current standards and to overcome the results of past pollution as well as prevent new technologies from adding to it. Such an outcome would have an effect on the health and lives of Americans in future years well beyond its effect in this one budgetary year. And it is an effect we cannot afford to permit.

The most fundamental responsibility of a national government is to protect the well-being of its people. To that end, we devote billions of dollars for the national security. We devote billions to income support programs to assure that no American lives in deprivation. It is no less fundamental a responsibility of the National Government to assure that Americans need not fear that the air they breathe and the water they drink as a threat to their health.

Increased funding is a way to carry out that responsibility effectively. The funding for EPA in this amendment represents the most minimal commitment we can and should make to carrying out the laws which protect our people from the hazards of our industrial society.

The funds in this amendment cannot, alone and immediately, make up for the last 2 years of mismanagement at EPA. They cannot overcome, immediately, the suspicion that has been fostered. But this is a downpayment we can make now to indicate our seriousness and our commitment to restoring the traditional, bipartisan Federal responsibilty for the national environment. I urge my colleagues to vote for it.

SEVERAL SENATORS. Vote.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield back any remaining time I have on the opposition side.

Have the yeas and nays been ordered?

The PRESIDING OFFICER. All time has been yielded. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. PRYOR) is necessarily absent.

The PRESIDING OFFICER (Mr. QUAYLE). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 46, nays 53, as follows:

[Rollcall Vote No. 86 Leg.]

YEAS—46

Andrews	Bradley	Cranston
Biden	Byrd	D'Amato
Bingaman	Chafee	Danforth
Boschwitz	Chiles	Dixon
Dodd	Johnston	Pressler
Durenberger	Kassebaum	Riegle
Eagleton	Kennedy	Rudman
Ford	Lautenberg	Sarbanes
Gorton	Leahy	Sasser
Hart	Mathias	Specter
Hatfield	Matsunaga	Stafford
Heinz	Metzenbaum	Stennis
Hollings	Mitchell	Tsongas
Huddleston	Moynihan	Weicker
Inouye	Packwood	
Jackson	Pell	

NAYS—53

Abdnor	Goldwater	Nickles
Armstrong	Grassley	Nunn
Baker	Hatch	Percy
Baucus	Hawkins	Proxmire
Bentsen	Hecht	Quayle
Boren	Heflin	Randolph
Bumpers	Helms	Roth
Burdick	Humphrey	Simpson
Cochran	Jepsen	Stevens
Cohen	Kasten	Symms
DeConcini	Laxalt	Thurmond
Denton	Levin	Tower
Dole	Long	Trible
Domenici	Lugar	Wallop
East	Mattingly	Warner
Exon	McClure	Wilson
Garn	Melcher	Zorinsky
Glenn	Murkowski	

NOT VOTING—1

Pryor

So Mr. WEICKER's amendment (No. 1262), as modified, was rejected.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HOLLINGS. Mr. President, I would like to classify my vote for the Gorton-Weicker substitute amendment to the budget.

My vote was not in support of the tax or spending policies included in that amendment. And my vote was certainly not in support of or in favor of the tremendous deficits included in that proposal. As I explained to the Senate during our deliberations these past 2 weeks, there is an alternative budget that is fair, effective, and that would return us to a balanced budget in the near future. All it would require is the courage of Congress to move to a freeze on Federal spending. I lost that battle but I am convinced now, more than ever, that the deficits must be reduced and that a freeze is the most practical way to achieve that.

But my vote for this amendment was a vote for the budget process. It is necessary that the Senate pass a budget resolution. Returning this resolution to the committee is not the answer; it is instead an abdication by the Senate of its responsibilities. For this reason, I reluctantly supported this amendment. I did not support the policies included therein, but it is now important for the Congress to demonstate that it can administer to our budget process and that it can pass a budget resolution.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

Mr. President, if the Senator from New Mexico, the chairman of the committee, will yield to me for a moment, as I indicated in my remarks earlier, I think it is time now to recommit this resolution to the committee with the request that they use their tender mercies to come together on a true bipartisan basis and produce a resolution that we can support.

It happens that the act already provides a time limitation, so we do not need to worry about that. It is 3 days. It may be that in those days that calm and reason will prevail and we can find something.

I repeat that I am determined to the extent that it is possible to do so to get a budget resolution.

As soon as the committee reports back, it is my intention, of course, to ask the Senate to turn once again to its consideration. It is privileged, and we will take it up and there will be time remaining.

I inquire of the Chair: How many hours now remain for debate on the resolution?

The PRESIDING OFFICER. Three hours and twelve minutes remain.

Mr. BAKER. When it comes back then there will be more than 3 hours, assuming there is no debate on the motion to recommit. As far as I am concerned there is no requirement for a rollcall vote on the motion to recommit. Of course, we can have one if the Members wish.

If it is recommitted, it is my intention to confer with the minority leader to see if we can take up once again as the order requires the immigration bill, and there may be one vote on an amendment to the immigration bill. After that is disposed of it will be my intention to ask the Senate to go out until Monday.

I see the Senator from Wyoming is nodding his head. That may not be possible.

While we focus on the other matter, then, of the motion to recommit, I wonder if the Senator from Wyoming would permit me to confer with him, with the Senator from Arizona, and with the minority leader and we will try to arrange that sequence.

Mr. SIMPSON. Very good.

Mr. SARBANES. Mr. President, will the majority leader yield for a question?

Mr. BAKER. I yield.

Mr. SARBANES. It is the majority leader's intention to recommit the resolution and after it is brought back by the committee to be a completely different resolution, I take it, in the Chamber, than before and open to amendment, I assume at that point. But that whole process would then be compressed into 3 hours. Is that correct?

Mr. BAKER. Mr. President, I believe that is what the act provides.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. Does the act provide that if a motion to recommit prevails and the committee reports in not more than 3 days the time remaining for debate on the resolution so reported is the time remaining at the time of recommittal?

The PRESIDING OFFICER. That is the interpretation of the Chair.

Mr. BAKER. I thank the Chair.

Mr. SARBANES. Mr. President, does the majority leader feel that that would provide the Senate with a reasonable opportunity to act on whatever the committee may bring back to us at that point?

Mr. BAKER. I am perfectly willing to change that time. I have no desire to limit the Senate in the amount of time that it wishes to debate that measure.

I am simply saying that by statute Senators are guaranteed that time, and I will confer with the minority leader and with the two managers. If they wish to extend that time I am perfectly willing to ask the Senate to do that.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. BAKER. I yield.

Mr. MOYNIHAN. Did I hear the majority leader correctly that he looks forward to a bipartisan solution to the budget, in effect a bipartisan budget resolution?

Mr. BAKER. Yes, I do. I have other remarks I will make on that subject to the Senator in private. I likened it to the effort of early Christians to find the Holy Ghost, but at this moment I will not proceed on that subject.

Mr. MOYNIHAN. I only wish to congratulate the majority leader and say he has the support of many Senators on this side of the aisle for that, even though he can only discuss it in the most secret recesses of the Capitol.

Mr. BAKER. I beg to differ with the Senator. I am perfectly happy to discuss it in public. It is only that I do not wish to shock the conscience of the Senator from New York.

Mr. President, if I may, I now yield to the Senator from New Mexico so that he may make the motion and then we can decide if we need a rollcall vote.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

MOTION TO RECOMMIT SENATE CONCURRENT RESOLUTION 27

Mr. DOMENICI. Mr. President, on behalf of myself and the distinguished Senator from Florida (Mr. CHILES) I move to recommit Senate Concurrent Resolution 27 to the Budget Committee with an instruction to the committee that the resolution be reported back within 3 days, not counting any days on which the Senate is not in session.

Mr. CHILES. Mr. President, I join with the distinguished chairman on that. I am delighted with what the majority leader said, that we can sit down and determine what would be a fair amount of time to come out, and I certainly do not wish to see us have another 50 hours. We do not need that. But I think we need adequate time to discuss it.

Mr. BAKER. Mr. President, if the Senator will yield to me, I am sincere about that and I will talk to the two managers and the minority leader on that subject.

I wish to say more seriously than I said a moment ago that I really do believe the two managers, the chairman and the ranking minority member, have an opportunity now to go back to the committee and their members and say, "Look, you know that two or three sides to this issue had their day, and it is time now that we sit down together and see what we can work out."

I am anxious to do that. If I can be helpful in that respect I offer my services in the effort.

Mr. CHILES. Mr. President, let me say we are delighted to hear of an offer of having a bipartisan effort in the committee. I think our Democratic members will certainly be there looking to participate.

Mr. BAKER. I thank the Senator.

Mr. DOLE. Mr. President, will the Senator from New Mexico yield?

Mr. DOMENICI. I yield.

Mr. DOLE. Mr. President, I hope that if the Budget Committee is going to solve this on a bipartisan basis and they wish to know how much taxes we raise they consult with the Senator from Kansas and the Senator from Louisiana and other members on the Finance Committee. I think it is going to go back to decide what the revenue numbers are, and we are very happy to do that. In fact, we are reconciled to some revenue figure. We would certainly be willing to cooperate with the Budget Committee in advance.

Mr. DOMENICI. Mr. President, let me say to my good friend from Kansas that I appreciate his comments. I think he would acknowledge that as far as the Senator from New Mexico is concerned when it comes to matters within his committee on such things as reconciliation I have regularly consulted with him and his expert staff, and I do not intend to change that policy.

Mr. SYMMS. Mr. President, will the Senator from New Mexico yield?

Mr. DOMENICI. I yield.

TOWARD A BALANCED BUDGET

Mr. SYMMS. Mr. President, I deeply regret that the Senate has not been able to fundamentally restructure America's budgetary priorities. The American economy profoundly needs

deficit reductions leading to a balanced budget soon. We need to get to a balanced budget by one fundamental course of action—reductions in Government spending. While reducing Government spending, we also need to reapportion Federal spending to increase our defense and military capabilities. We simply have no choice but to rebuild America's defenses. The Soviet Union will not allow us to continue in the old ways of the past—increasing entitlements and other domestic spending while cutting back defense spending.

Moreover, while cutting domestic spending, increasing defense, and reducing deficits, we must avoid raising taxes. Not only will tax increases not balance the budget themselves, but they will choke off increasing economic growth which has been resulting in net increases in revenues. The American Republic was founded on the principle of resisting excessive taxation, and we must remain true to our historic principles by unleashing the miraculous American economic engine. The American economy, properly freed from too heavy a tax burden, too large deficits, and too much domestic spending, is admired all over the world as the best means of producing the most good for the most people. American free enterprise, too often hampered by excessive taxes or high interest rates induced by large deficits, is the best means of providing for the general welfare and the general prosperity of the Nation.

Our free society is sustained by our free enterprise economic system. Incentives to produce and sell and grow are what makes America great. Our budgetary priorities must reflect our desire to preserve the fundamental strength of America—the free enterprise economic system.

In sum, Mr. President, we must reduce our deficits by cutting spending while increasing defense, and by avoiding new taxes. Spending cuts are the only way to quickly reduce deficits. Unfortunately, Congress has continually increased spending, rather than reducing it. The old politics of spend and tax, tax and spend are still with us. These politics are difficult to change.

The budget which most closely approached what I consider to be the sound fiscal principles which have historically made America strong, prosperous, and free was the Hatch-Gramm budget. This budget only attracted 23 votes, but it did lead to a balanced budget by 1989 by cutting domestic spending, increasing defense, with marginal increases in taxes. All other budgets fail to satisfy the fundamental principles of sound fiscal policy.

Mr. MITCHELL. Mr. President, a major question which must be addressed in this debate concerns the military budget. We must ask: How much defense spending is enough to guarantee our Nation's security? And how can we most efficiently use that money?

I served in Berlin, Germany, as army intelligence officer at the height of the cold war in the 1950's. As a result of that experience, I am under no illusions about the seriousness of the threat posed by the Soviet Union to U.S. security and to the security of the members of the Atlantic Alliance.

I am an advocate of a strong national defense, based on a strategy of deterring aggression and protecting our Nation's vital interests at home and abroad.

Since coming to the Senate in 1980, I have consistently supported DOD authorization and appropriations bills which have provided for real growth in our national defense. I have done so because our security is threatened by the Soviet Union's continuing substantial investment in its armed forces. We run a considerable risk unless we respond to this challenge by improving our own Armed Forces and by simultaneously pressing for verifiable and balanced international agreements to limit and reduce arms.

We run a similar kind of risk, however, if we indiscriminately throw money at defense efforts which are not part of a defined strategy or at weapons systems which underperform, do not work, or are unneeded.

President Reagan's defense budget for fiscal year 1984 is not based on a defined set of priorities derived from a sound military strategy.

Gen. David C. Jones, former Chairman of the Joint Chiefs of Staff, during February 2 Budget Committee hearing, described the all-encompassing nature of the administration's defense plan:

> It is a little hard to go in and figure out just what is the strategy, because the strategy document that is written sort of emphasizes everything, and then the Services take that and are sort of able to pick and choose.

In response to the Budget Committee's questions about the strategy which the President proposes to implement, General Jones said:

> Even though I applaud the fact that the rhetoric has been toned down this year compared to the past, programs have not changed. But the guidance that we received was to prepare for protracted nuclear war, to provide enduring survivability over a long period of time, to do much more in space, to do much more in air defense, and in the whole strategic area to go beyond. Then it says let us be able to fight the Soviets any place in the world and implies simultaneity rather than a one-and-a-half war or whatever; and it says let us be able to fight a long war; and let us be able to have a maritime superiority with a 600 ship Navy; and let us be able to go to Southwest Asia; and let us improve our mobilization base; and let us improve our industrial preparedness.
>
> You can make a good case for each one of these—no question about it. But you cannot do it all.

The administration's apparent desire to do it all follows a revealing exercise in one upsmanship. During the closing days of the 1980 Presidential campaign when the annual defense budget totaled $158 billion, Ronald Reagan promised to increase defense spending by 5 percent in real terms. Following the election, President Carter submitted to Congress a budget for fiscal year 1982 in excess of $200 billion. Not to be outdone, President Reagan then decided to seek a 7-percent increase to the already large Carter budget. As Steven R. Weisman noted in the New York Times Magazine, the result was a "new growth rate [of] 11 percent after inflation, more than twice what Reagan had promised."

This year the President has come to us asking that he be given an 11-percent increase in defense spending over the 25 percent in defense increases he has received since he took office. He asks this at the same time that he proposes to hold constant or reduce most domestic programs. Moreover, the President remains adamant in opposing elimination of the third-year tax cut.

This is a formula which will jeopardize rather than promote a strong America. It is a formula which overemphasizes the military component of security while it dangerously disregards the economic component of security.

In our debates on national defense we often fail to acknowledge how important to our Nation's security are such things as the rate of economic growth, the strength of the nonmilitary industrial base and the level of productivity.

I share the view of Robert S. McNamara, former Secretary of Defense and World Bank President, who, with McGeorge Bundy, Cyrus Vance, and Elmo Zumwalt, has written:

> * * * that the economic foundations of our national security, which are every bit as important as the defense component, have been undermined. The United States faces an economic problem of immense proportions, the solution to which has not yet been put into place. Not only has our nation, for many years, been favoring consumption over investment by a wide margin, it has lost its competitive edge in world markets; and real interest rates are at such high levels as to make any rapid and sustained reduction in unemployment very unlikely.

The situation outlined by McNamara and his colleagues will get worse, not better, as long as we continue to ignore the problem of the deficit. As a nation, we simply cannot afford to keep increasing the amount of deficit each year.

The administration's own estimate of the deficit for fiscal year 1984 is $200 billion, an amount equivalent to

over 6 percent of our gross national product. This level is unacceptable. It will inevitably result in the diversion of private savings to Government use, driving interest rates up and leaving American business starved for the capital it requires to expand and prosper.

While the administration defense program will not be exclusively responsible for the anticipated 1984 deficit, it is certain to be the major contributor. And, if the administration is successful in carrying out an unrealistic 5-year defense plan, the deficits in the late 1980's and early 1990's will be even greater in real terms.

A major reason for this is the fact that the President's defense budget is unwisely weighted heavily in favor of weapons procurement instead of readiness spending. For example, the administration's budget increases nuclear force funding by 37 percent while general-purpose forces funding is limited to an 8-percent increase. It proceeds with extremely expensive yet unnecessary programs such as the B-1 bomber while it cuts training exercises, and forces reductions in such things as annual flying hours per naval aircrew.

What this Congress approves for the Pentagon as part of the fiscal year 1984 budget will be paid for by American taxpayers during much of the next decade. In fiscal year 1982, 30 percent, roughly $57 billion, of actual defense spending occurred as a result of authority granted by Congress in prior fiscal years. During the coming fiscal year—1984—the rate of actual spending as a result of prior commitments will climb to 35 percent, or $77 billion. According to an analysis conducted by the Federation of American Scientists, by the close of fiscal year 1984 the administration "will have committed $146 billion for spending in future years."

I cannot express strongly enough my concern over the future procurement commitments we are making this year. When the bills for all these weapons systems become due in the late 1980's and early 1990's, enormous deficits resulting from high defense procurement outlays will be avoided only if the size of the forces are reduced, or if cuts are made in important operations and maintenance accounts.

After purchasing all this weaponry, I doubt seriously whether we will curtail operations, cut back on proper maintenance, or reduce the size of our uniformed services. The only course of action available will be to raise taxes.

Rudolf G. Penner, in a December 1982 Wall Street Journal opinion article entitled "The War Over Pentagon Spending" characterized the situation this way:

> While the high deficits projected for 1984 and 1985 represent a severe problem, I believe that the financial markets would take a more sanguine view of them if the long-term growth of defense spending and the major domestic entitlement programs were slowed so that the deficit is put on a sharp downward path in the late 1980s.
>
> And if after a reasonable debate, it appears that it would not be wise to slow defense spending growth significantly, then there is no other responsible decision but to commit ourselves to a higher tax burden in the longer run unless nondefense programs are cut more than seems likely.
>
> Put another way, the debate over weapons procurement in the 1983 and 1984 budgets is really a debate over appropriate tax policy in the 1985-90 period. That point should be emphasized again and again until it is seared into our consciousness.

Mr. President, I cannot accept the administration defense program with its lack of a defined strategy, with its overemphasis on nuclear systems and its underemphasis on conventional war readiness and sustainability. Though I believe in the need for a stronger defense, I do not feel I responsibly can support a budget, the defense portions of which promise either an enormous deficit burden or substantially increased taxes later in this decade. Accordingly, I have sought, and will continue to seek, a more realistic increase of about 5 percent in defense spending in each of the next 3 years. That is the level of defense spending best calculated to enhance our national security, at home and abroad.

Mr. GLENN. Mr. President, I support the first concurrent budget resolution as reported by the committee, primarily because I believe it is of great urgency that we cut the deficit of this Government. I believe the committee's resolution, as amended by the Senate to accommodate the needs in the areas of education, health care for the unemployed, and medicaid for low-income women, is the best proposal we have seen.

The amendment offered by my colleagues from the other side, particularly as modified by the Senator from Washington (Mr. GORTON), represents a significant improvement over the other alternative presented by the Republican leadership, which I believe the Senate wisely tabled. Nevertheless, I voted against that amendment because it was, in my judgment, second best to the one reported by the committee. And I will vote, Mr. President, to recommit this resolution to the Committee on the Budget in the hope that the Senate will go ahead and pass a resolution which does the most to cut the deficit and help put this economy on the march again.

SENATE SCHEDULE

Mr. BYRD. Mr. President, I ask the majority leader what the program is for the remainder of the day. I have a feeling that many Members may be under the impression that this will be the last rollcall vote if it is a rollcall vote, and it is perfectly all right with me if we have a voice vote on it. But I have a feeling, after discussing the circumstance earlier with the majority leader, there may be another rollcall vote today.

Mr. BAKER. As the minority leader and I discussed the hope that when this matter is disposed of, I trust by recommittal, that the Senate will return to the consideration of the immigration bill, and one amendment, the DeConcini amendment, might be disposed of yet today. But I have been getting furious hand signals, one from the Senator from Wyoming and the other from the Senator from Arizona.

Mr. SIMPSON. Mr. President, I certainly do not want to stay over here on this side of the aisle too long. In view of that, let me just say——

Mr. BYRD. Will the Senator use his microphone?

Mr. SIMPSON. I thank the Senator. There are some amenities over here we do not have on our side. [Laughter.]

Let me say, Mr. President, I believe we would not have the necessity of a rollcall vote this evening if the Senator wished to lay down that particular measure and address it on Monday or Tuesday. But I think we are going to reach an accord, I can assure you, with Senator DeConcini's proposal, which is a transitional work program, a key part of the immigration legislation. I do not believe there will be a requirement for a rollcall vote tonight, and that issue will be accepted.

Mr. BAKER. Mr. President, on the basis of that representation, then may I say to the minority leader that if there is no rollcall vote on the motion to recommit, I would not expect any further rollcall votes today, and I do not anticipate asking the Senate to be in session tomorrow.

Mr. KENNEDY. Mr. President, if this is accepted and recommitted, is it the intention then of the leader that we lay down the immigration bill this evening and what, then, would be the program for the early part of next week? I welcome the opportunity to work toward completion of the immigration legislation, but I think it is important since there are, I believe, in excess of 15 Members that I know about who have amendments and who wish to be present when there is a vote on that legislation.

Mr. BAKER. I thank the Senator.

What I would like to do is provide, after we go on that measure today, to lay down and perhaps debate the DeConcini amendment, and that we go out until Monday, and that on Monday the Senate will resume consideration of the immigration bill, following the conclusion of the debate on the nomination of Mr. Ruckelshaus, which will be called up on Monday.

There is a proposal I have not yet cleared with the minority leader. But in answer to the Senator's request, I

would hope that would be the sequence of events we would cover on Monday.

Then there would be final passage on the immigration bill which would occur no later than 10 p.m. on Tuesday, May 17.

Mr. CHILES. Mr. Leader, may we have some time in which we would not have votes before sometime on Monday, and I would hope it would be as late as it possibly could be to give the Budget Committee time to work and people who have traveling time, time to get back?

Mr. BAKER. I am happy to include that. I would be glad to say that there would be no votes before 2 p.m.

Mr. CHILES. Make that 4 p.m.

Mr. BAKER. All right, 4 p.m.

Let me say that a unanimous-consent agreement we are circulating at this time provides that any votes that are ordered on Monday would be stacked to occur on Tuesday so that the Senator from Florida will be protected absolutely on that day.

Mr. KENNEDY. Mr. President, I would like to see a time proposed, and I hope we will be able to continue debate on the immigration bill and complete it. Is it the intention of the leader to complete the immigration bill before we bring up the budget resolution or will it be set aside?

Mr. BAKER. I would hope we would finish and, indeed, this order would provide that we would finish immigration no later than 10 p.m. Tuesday, and if the Budget Committee does report it would not be my intention to ask us to turn back to the budget resolution until after we finish immigration on Tuesday night.

Mr. KENNEDY. I would just want to indicate that I welcome the opportunity to return to the immigration bill and hope we can finish it expeditiously.

Mr. HATFIELD. I wonder if the majority leader would settle on whether there will be a rollcall vote on the motion to recommit so that we in the Appropriations Committee can get back to work.

Mr. BAKER. I think the point is extremely well taken. I hope the Senator from New Mexico will put his motion. In that case, I would encourage the Chair to put the question to the Senate.

The PRESIDING OFFICER. Do the Senators yield back all remaining time?

Mr. DOMENICI. I yield back all of our time.

Mr. CHILES. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the motion of the Senator from New Mexico to recommit the resolution.

The motion to recommit was agreed to.

Mr. BAKER. I move to reconsider the vote by which the motion to recommit was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, there will be no more rollcall votes today.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I am unsure as to what business is pending before the Senate. The unanimous-consent order I guess automatically makes the immigration bill pending after disposition of the budget resolution. I am not sure a motion to recommit constitutes disposition. If it does not, I ask unanimous consent that there now be a period for the transaction of routine morning business in which Senators may speak for not more than 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

DR. BEN T. LANHAM, JR.

Mr. HEFLIN. Mr. President, on Tuesday, March 29, 1983, Alabama lost one of its most outstanding citizens when Dr. Ben T. Lanham, Jr., passed away. Dr. Lanham, a retired vice president for administration at Auburn University, served for more than 40 years as a teacher and administrator at Auburn. I know that I join his many friends and admirers in expressing sympathy to his wife, Bernice, his son, Ben, and his daughter, Betty.

There is no question that Dr. Lanham was a great scholar as well as administrator. He held a bachelor's degree from Clemson University, a master's degree from the University of Tennessee, the doctorate from Michigan State University, and did postdoctoral work at Iowa State University. In 1939, Dr. Lanham joined the Auburn faculty as an assistant professor of agriculture economics. He would become head of the department in 1956.

In teaching and research, Dr. Lanham's principal areas of professional interest included farm management, production economics, agricultural policy, and economic development. His expertise in the academic realm led him into memberships and offices in academic and professional organizations. Among these positions were vice president of the Alabama Environmental Quality Council, chairman of the Alabama Water Resources Research Institute Council and chairman of the editorial board of the Journal of Alabama Academy of Science, to name just a few.

In addition to teaching, his contributions to Auburn University were made through serving as the elected president of the general faculty and chairman of the faculty council in 1954 through 1955. A few years later, Dr. Lanham was the associate director of the Agricultural Experiment Station and in 1964 became the assistant dean of the school of agriculture; 1966 found Dr. Lanham serving as Auburn's first vice president for research and then in 1972, he was named vice president for administration. His influence in Auburn University's School of Agriculture, which was deep and spanned several decades, will not be forgotten.

Indeed, Dr. Lanham will be greatly missed—by his friends, colleagues, the university, and the community, both local and academic. Those who knew him were fortunate to experience his guidance, leadership, and warm friendship.

I thank the Chair.

FORT McCLELLAN WINS ARMY ENVIRONMENTAL QUALITY AWARD

Mr. HEFLIN. Mr. President, I was extremely pleased and proud to recently learn that Fort McClellan, Ala. has been chosen to receive the Army Environmental Quality Award for 1982. This award is presented annually to the Army installation that has demonstrated the Nation's most outstanding environmental protection program.

Fort McClellan's noteworthy achievements in improving local water quality, preventing soil erosion, attaining effective pest control, and developing numerous environmental training programs helped the fort earn the first place award, in competition with eleven other installations.

In Alabama, we are very proud of our natural environment. Fort McClellan is located near Anniston, just a few miles from the beautiful Talladega National Forest, in one of the many naturally beautiful areas of our State. I know that I am speaking for all Alabamians when I say thank you to the people of Fort McClellan for their efforts in environmental protection in the past year.

I do not mean to imply, however, that this is the first year that Fort McClellan has been concerned with environmental quality. In fact, for some 4 years prior to 1982, Fort McClellan had been chosen as the first runner-up in the Army competition.

The installation was also honored in 1982 by being awarded the Governor of Alabama's Environmental Award. This latest designation marks the fifth consecutive year the fort has been chosen to receive this distinction.

Specific highlights of the environmental program at Fort McClellan include environmental research projects which use computer models, television inspection of sewer lines, use of solar heating systems, and remote sensing techniques, as well as an environmental assessment of a proposed chemical

decontamination training facility. The program also placed a great deal of stress on the importance of environmental education, for both the military and civilian population.

Again, I am very proud of the people of Fort McClellan for their performance in the field of environmental protection. I wish them the very best as they enter the Secretary of Defense Environmental Award competition, along with representatives from the Air Force, Navy, and Marine Corps. I am sure they will do well.

I thank the Chair.

HAPPY 100TH BIRTHDAY TO MEMO, IN ST. LOUIS

Mr. DANFORTH. Mr. President, Mrs. C. M. Pearson will be 100 years old Saturday. Known to the many who love her as Memo, she will celebrate her big day at a family party in St. Louis.

Memo was born in Pennsylvania. Having raised her two children in Indiana, she moved to Missouri after World War II. Her daughter, Marjorie, is Mrs. John J. McAtee of St. Louis, and her son, Robert, lives in Hawaii. She has long divided her time between their homes.

Memo is a champion mother and grandmother. It is said that she can beat anyone in dominoes and that she is a first-rate gin rummy player as well.

I have been privileged to know Memo since she was a youthful 70 or so. I am not sure what she would say is the secret to a long and full life, but to this observer, she has at least two notable attributes. First, she stays active. She drove a car until well into her 90's, and she keeps and trains parakeets. Second, she has a heart full of love which she shares freely with her family and friends, and which they return in kind.

Mr. President, Memo Pearson is one of the most beloved people I have known. She is a great citizen of our State. I join her many friends and her family in wishing her a happy 100th birthday.

ALASKA'S STRUGGLE FOR STATEHOOD

Mr. STEVENS. Mr. President, today marks one of the important steps in the story of Alaska's struggle for statehood.

On May 12, 1958, just 25 years ago, Representative Clair Engle moved to bring the Alaska statehood bill to the floor of the House.

He sought a special privileged status reserved for statehood bill, cricumventing the Rules Committee, so that the bill could be taken up by the House for debate.

Bills for Alaska statehood had been before Congress since 1916, when Territorial Delegate James Wickersham introduced the first bill.

By 1958, there had been at least 3,500 pages of printed hearings held by the House and Senate in the years spanning 1946 to 1957. The House Insular Affairs Committee reported in 1957 that "Alaska is in all ways ready for statehood."

As public support mounted for Alaska to become a part of the Union, the press, across the 48 States and in Alaska, showed their support for Alaska's dream.

As one who was here in Washington, D.C. at the time of our statehood fight, I would like to share with you some of those articles printed in the Nation's newspapers 25 years ago that gave the case for Alaska statehood. I ask unanimous consent that some of them be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. STEVENS. Alaska's history as a State is not long, but its story, the culture of its Native people, the determination and vitality of all its residents, and its contributions to the Nation and the world are all already legendary.

As we approach the 25th anniversary of the admission of our "Great Land," Alaska, into the Union, I want to make certain we remember the day Alaska became a State as one that will go down in history for Alaskans as well as all Americans.

The articles follow:

EXHIBIT 1

[From the Seattle Post-Intelligencer, May 19, 1958]

A VITAL COUNT-DOWN

There will be a count-down on the floor of the House of Representatives Wednesday vital to Alaska and important to everyone in the United States.

It will be a simple poll on whether the House undertakes immediate consideration of the bill to make Alaska the forty-ninth state.

Underneath, it is a vote on accepting the bill from the Interior Committee and bypassing autocratic chairman Howard Smith (D, Va.), who has it locked in a one-man pigeon hole in the Rules Committee. The Rules Committee normally determines when all bills go to the floor.

Alaskan bills have been before Congress for 42 years; Alaska has been awaiting statehood since it became a territory 91 years ago.

The President wants the bill. So does Speaker Rayburn.

There seems little question that the Senate will vote for it.

Both Democratic and Republican parties in their 1956 platforms pledged "immediate statehood" for Alaska.

Public opinion polls show that the American People favor statehood by 12 to 1.

A majority of members of the Rules Committee itself by private count are reported for the bill.

Thus Wednesday's count-down for Alaska is not voting to bypass the Rules Committee so much as it is voting to bypass Chairman Smith, who has said the bill will get out "over my dead body."

And every representative's vote to take up the bill will be a vote for the good of all except Mr. Smith, for he seems the only obstacle in America to statehood for Alaska in this session of the Congress.

[From the Washington Post, May 22, 1958]

HOUSE AGREES TO ACT ON ALASKA STATEHOOD

(By Richard L. Lyons)

The Alaska statehood bill passed its first big test yesterday when the House agreed to act on it, but its fate was still much in doubt.

By a 217-172 margin, the House voted to bypass its Rules Committee which had blocked the bill for 11 months. It then started debate which set off a series of stalling maneuvers and other tactics that could tie up the House for days.

The vote to go around the powerful Rules Committee was unusual. The committee is a legislative traffic cop which sets rules for floor action on most major bills. It can kill bills by pigeonholing them. Not often does the House interfere with it.

A statehood bill is one of a few types of legislation that can be taken to the floor without a rule. Backers were reluctant to do this because the bill will be acted on under general rules of the House which theoretically let each of the 435 members speak for one hour. Also, it could be amended to death.

The Rules Committee could have given it the protection of a rule limiting debate and barring crippling amendments. Statehood supporters took yesterday's action as a last resort, with the backing of Speaker Sam Rayburn, when they decided the Rules Committee would not act.

Rep. Howard W. Smith (D-Va.), Rules Committee chairman and a leading opponent of Alaska statehood, tried to head off the bill yesterday on a technical point that its "privileged" status was destroyed because this general legislation contained appropriations, in violation of House rules. Rayburn overruled him.

On the motion to take up the bill, 133 Democrats and 84 Republicans voted to act on it, while 100 Republicans joined 72 Democrats, mostly from the South, in voting to do nothing. Defeat of this motion probably would have killed the bill for this session.

All 10 Virginia Congressmen voted against considering the bill. All Maryland members voted for its except Reps. Edward T. Miller (R) and James P. S. Devereux (R).

Next hurdle for the statehood backers will be to limit debate. It could consume three months if each member took his hour. But a majority vote can cut it off at any time. Rep. Leo W. O'Brien (D-N.Y.) floor manager of the bill, said he plans to try to close debate this afternoon and vote on amendments Friday. Smith talked of "a couple weeks" of debate.

Four times during the afternoon opponents cut into the debate with demands for quorum calls. Each meant that fewer than 100 members were on the floor at the time.

If O'Brien is able to limit debate, opponents still can offer amendments as long as they want. Most feared by statehood backers is an effort to tack on the Hawaii statehood bill, a maneuver which in the past has always killed both. The Senate has an Alaska statehood bill on the floor, waiting for the House to act.

O'Brien told the House that statehood is necessary for full development of Alaska's resources. He said the territory is ready and wants statehood and that all polls show the American people do, too.

Rep. John R. Pillion (R-N.Y.) led off debate for the opponents with the big-state argument that statehood would give 200,000 Alaskans as much representation in the Senate as the biggest states. Addition of more states would dilute representation of the 48 states in both houses, he said.

[From the Washington Post, Apr. 2, 1958]

ACT ON ALASKA

Chairman Howard Smith of the House Rules Committee has had three months in this session of Congress, as well as several months in the last, to grant a rule on the Alaska statehood bill. This bill was reported by the House Interior Committee in June 1957. When Mr. Smith finally got around to holding a hearing last week, the meeting was adjourned for want of a quorum. This may not have been Mr. Smith's fault because of the unusual demands of the day. But Mr. Smith has voiced his own irreconcilability, and enough of his tactics has become evident to show that he envisages prolonged hearings to delve into all matters already gone into *ad nauseam* by the Interior Committee. This is a tyrannical abuse of the function of the Rules Committee, which is supposed to be a traffic director, not a dictatorial suppressor. If Speaker Rayburn means to stand by his pledge to help obtain passage of the statehood bill, it is time for him personally to take a hand.

[From the Washington Post, Mar. 30, 1958]

WHO WANTS ALASKA?

The people of Alaska, I know, greatly appreciate the support which The Washington Post has given our Alaska statehood cause, both through its excellent editorials and the always effective Herblock cartoons.

I would like to suggest one amendment, however, to your editorial of March 20, "Who Wants Alaska?"

For while you are correct in stating that 73 percent of the persons questioned in a recent Gallup Poll favor immediate statehood for Alaska, really that figure does not give an adequate idea of the overwhelming popular support which the poll showed. For while 73 percent favored immediate statehood for Alaska, only 6 percent were opposed and 21 percent had no opinion.

In reckoning the majority for statehood, clearly those who had no opinion are excludable. The pertinent figures, therefore, are 73 percent for and 6 percent against, a ratio of just over 12-1. This is overwhelming and is, perhaps, as close to unanimity as is ever attainable on almost any public issue.

It is therefore to be hoped that the Congress will not, as Dr. Gallup and The Post pointed out, lag "far behind public opinion," but will respond as an elective body under our democracy is expected to do. I doubt whether the 85th Congress could enact any legislation which would be more popular at home, and more useful abroad in demonstrating that the United States practices what it preaches.

[From the Washington Post, May 4, 1958]

THE CASE FOR ALASKA . . . REASONS FOR GRANTING STATEHOOD SUMMARIZED

(By Roscoe Drummond)

The outlook now is that Alaska will become the 49th state in the Union before the present Congress has run its course. The statehood bill has cleared the committees. An early vote in the House is in sight.

It has been before Congress since 1916 and its supporters are convinced that at last the votes are at hand to make Alaskan statehood a reality. Should Congress again say no:

It would be reneging on the most explicit commitment both parties ever put into their national platforms. In 1956 the Democrats and Republicans pledged "immediate statehood" for Alaska.

It would violate the manifest wishes of the American people who in a series of public opinion polls running from 1946 to 1958 have increased their support of Alaskan statehood from 5 to 1 to 12 to 1.

It would dishonor the promise of the 91-year-old treaty by which Alaska became an American territory and in which we pledged to give its inhabitants "all the rights, advantages, and immunities of the United States." The right to self-government is one of them. The right to be free from taxation without representation is another.

The more one examines the merits of Alaskan statehood, the more persuasive the case becomes. Obviously there are great advantages to the citizens of Alaska whose elected Representatives in the Territorial Legislature only last year voted unanimously for statehood. There are also many advantages to the United States, particularly when you consider that on this round earth Alaska is the doorstep to the American Continent and the most strategic outpost of our defenses as the alert-flights to the Arctic demonstrate.

All may not be familiar with such basic facts as these:

The Alaska people—85 per cent of the Alaskans are of the stock of the American pioneers who trekked across the plains and mountains to build the western United States. About 15 per cent are Eskimos, Aleuts and Indians. They are a sturdy, worthy and resourceful people.

The Alaskan population—At present it stands at 212,500. But the most significant fact is the rate of growth. Between 1950 and 1956 the population increased by 53,000 or 48.6 percent. Alaska has shown a greater percentage population growth than any state in the Union for 17 years.

At least 22 of our states had fewer people when Congress granted them admission.

Alaskan loyalty—Only in Alaska did the enemy invade North America in World War II. No more loyalty, no more patriotism, no more willingness, to sacrifice were displayed by any part of our people than by the Alaskans.

Alaskan communism—The last report made by the Federal Bureau of Investigation in 1951 stated that there were 10 Communists in Alaska. There is no reason to believe there are any more today, probably fewer. Would that we did as well in continental United States.

The Alaskan land—Business Week puts it this way: "Picture a land mass stretching from Maine to Florida, from the Great Lakes to the Gulf of Mexico, embracing 20 easternmost states. Wrap around it a coastline greater than that of the United States itself, and you have an image of Alaska, twice the size of Texas and one fifth as large as all the 48 states together."

Alaskan resources—The United States has already gotten back 425 times over the $7 million purchase price it paid to imperial Russia, in metals, minerals, timber and oil. Alaska is rich in resources. Geologists conservatively estimate that Alaska is one of the four great petroleum basins in the world, no wonder Alaska isn't developed when you consider that the Federal Government owns 99 per cent of the land.

[From the Anchorage Daily Times, May 8, 1958]

STATEHOOD, OIL, PLANES HIGHLIGHTED

Millions of readers the nation over have been reading newspaper stories on Alaska in the Scripps-Howard chain.

The stories, written by Scripps-Howard staff writer Albert M. Colegrove, were pegged to statehood, oil development, federal government red tape, fishing and "success stories."

Scripps-Howard owns a chain of 19 newspapers in the following cities: New York, Cleveland, Pittsburgh, San Francisco, Indianapolis, Columbus, Cincinnati, Knoxville, Denver, Birmingham, Memphis, El Paso, Houston, Fort Worth, Albuquerque, Evansville, Ind., and Washington, D.C.

Colegrove's first article appearing under an Anchorage dateline said:

"The air almost crackles with excitement today in Alaska's biggest city. Topics A, B and C (you hear them everywhere) are: oil, aviation, Alaska's chances for statehood . . . There's an oil hunt here that just may make the old gold rush look like penny ante stuff."

Colegrove's articles were written from many points in Alaska, including Anchorage, Fairbanks, Seward, Juneau, Ketchikan and Petersburg. From Ketchikan, Colegrove wrote:

"Alaskans, led by Gov. Mike Stepovich, are working desperately today to get more year-round business here. But they say the federal government's grip makes it tough."

From Petersburg, he wrote: "It is almost impossible to exaggerate the dislike most Alaskans feel today for the federal government overlords who rule this territory's lifeblood industry—fishing. They believe Washington's experts have all but ruined them."

Another story from Anchorage said: "Alaska is playing the oil game today for stakes higher than most people back in the states dream. . . . If this territory has even half the available oil that conservative businessmen and geologists suspect, world political strategy is due to be altered."

Colegrove, who is a former executive editor of the San Francisco News and a former Washington, D.C., correspondent for the newspaper chain, spent about two weeks in the territory last month.

During World War II he was stationed at Adak and Kodiak in the military service.

Using Anchorage contractor Walter Hickel as an example, Colegrove reported "success stories" of Alaskans who have made good in the business world. He wrote: "He's (Hickel) one of a whole breed of young Alaskans who, with ingenuity and guts, have changed the territory into the kind of a place they think merits a 49th star on the U.S. flag."

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed in the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:26 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2175. An act to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes.

At 5:09 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 101. Concurrent resolution expressing the sense of the Congress that the people of the United States should observe the month of May 1983 as Older Americans Month.

HOUSE BILL REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 2175. An act to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes; to the Committee on the Judiciary.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read and referred as indicated:

H. Con. Res. 101. Concurrent resolution expressing the sense of the Congress that the people of the United States should observe the month of May 1983 as Older Americans Month; to the Committee on the Judiciary.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1037. A communication from the Secretary of the Senate, transmitting, pursuant to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in his possession from October 1, 1982 through March 31, 1983; ordered to lie on the table.

EC-1038. A communication from the Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a report of the value of property, supplies, and commodities provided by the Berlin Magistrate and under the German Offset Agreement for the quarter January 1 through March 31, 1983; to the Committee on Appropriations.

EC-1039. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend chapter 157 of title 10, United States Code, to authorize the Secretary of Defense to provide transportation for next of kin of certain persons who are unaccounted for, to attend annual national meetings sponsored by the National League of Families of American Prisoners and Missing in Southeast Asia; to the Committee on Armed Services.

EC-1040. A communication from the Assistant Secretary of the Air Force (Manpower, Reserve Affairs, and Installations), transmitting a draft of proposed legislation to amend title 10, United States Code, to clarify the authority of the Armed Forces to conduct safety investigations of accidents involving aircraft of the Armed Forces and to protect from public disclosure certain parts of reports of such investigations; to the Committee on Armed Services.

EC-1041. A communication from the Administrator of the Energy Information Administration, Department of Energy, transmitting, pursuant to law, the 1982 Annual Energy Review; to the Committee on Energy and Natural Resources.

EC-1042. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to modify the boundary of the Pike National Forest in the State of Colorado, and for other purposes; to the Committee on Energy and Natural Resources.

EC-1043. A communication from the Acting Administrator of the Environmental Protection Agency, transmitting a draft of proposed legislation to amend and extend the Toxic Substances Control Act, as amended, for 2 years; to the Committee on Environment and Public Works.

EC-1044. A communication from the Director of the Resources, Community, and Economic development Division, General Accounting Office, transmitting, pursuant to law, a report entitled "The Costs and Benefits of Single Family Mortgage Revenue Bonds: Preliminary Report"; to the Committee on Finance.

EC-1045. A communication from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the Social Services Block Grant Act, to authorize consolidation of certain block grants to Indian tribes, and for other purposes; to the Committee on Finance.

EC-1046. A communication from the Chairman of the Foreign Claims Settlement Commission, Department of Justice, transmitting, pursuant to law, the annual report of the Commission for calendar year 1982; to the Committee on Foreign Relations.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-157. A joint resolution adopted by the Legislature of the State of Utah; to the Committee on Agriculture, Nutrition, and Forestry:

"MILK PRODUCTION TAX RESOLUTION

"Whereas, Congress recently authorized the Department of Agriculture to impose a 50 cents per hundredweight assessment on milk production;

"Whereas, an additional 50 cents per hundredweight will be imposed on April 1, 1983, if surpluses are not below an acceptable level;

"Whereas, this assessment will cost a small dairyman up to $40 per day for every 100 cows, or more than $14,000 per year;

"Whereas, the stated purpose of the assessment is to reduce production, but is in fact counterproductive to reducing milk surpluses and unfairly penalizes the small dairyman;

"Whereas, most family dairy operations are experiencing very difficult economic times and this assessment will be devastating to dairy operators in Utah; and

"Whereas, a proper means of stopping overproduction would be to phase out the Price Support Program and let the free market prevail. Now, therefore, be it

"Resolved by the General Session of the 45th Legislature, That the Congress of the United States be requested to repeal this repressive assessment on dairy production and develop a plan to phase out the price support system.

"Be it further resolved, That the Lieutenant Governor forward a certified copy of this resolution to the Speaker of the House of Representatives and to the President of the Senate of the Congress of the United States and to each member of Utah's delegation to Congress."

POM-158. A resolution adopted by the Tinian Land Owner's Association requesting the Trusteeship Council of the United Nations to assist the people of Tinian, Northern Mariana Islands in obtaining just compensation for the taking of their private property by the United States Military; to the Committee on Energy and Natural Resources.

POM-159. A resolution adopted by the Senate of the State of Massachusetts; to the Committee on the Judiciary:

"RESOLUTIONS MEMORIALIZING THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES TO ESTABLISH INTERNATIONAL FLAG WEEK

"Whereas, the hope of world peace is shared by the citizens of all nations; and

"Whereas, the flag of each nation represents the reliefs and policies of that nation; and

"Whereas, the promotion of world peace would be motivated by a display of the flags of all nations illuminated by a "light of peace"; and

"Whereas, throughout the world each nation, at a designated period of time, would fly all national flags at its national capitol; now therefore be it

"Resolved, That the Massachusetts Senate hereby memorializes the President and the Congress of the United States to establish an 'International Flag Week' to coincide with our flag week in June of each year and urges all nations to participate in the display of the flags of all nations during said period in order to promote world peace; and

"Be it further resolved, That copies of these resolutions be transmitted forthwith by the clerk of the Senate to the President of the United States, to the Presiding Officers of each branch of Congress and to the Members of each branch of Congress from the Commonwealth of Massachusetts."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ROTH, from the Committee on Governmental Affairs:

Special Report entitled "Federal Identification Fraud" (Rept. No. 98-84).

● Mr. ROTH. Mr. President, today, on behalf of the entire Senate Governmental Affairs Committee, I submit a report entitled: "Federal Identification Fraud." This report, the result of a yearlong investigation conducted by the Permanent Subcommittee on Investigations (PSI), is both timely and important because of its relevancy to the immigration reform legislation pending before Congress.

As chairman of PSI I have taken a very active interest in the problem of false indentification and, at my direction, hearings were held on June 15 and 16, and again on September 23, 1982, on fraud and abuse in the issuance of Federal identity documents. We also addressed the topic of the misuse of Federal identification to penetrate entitlement and other benefit programs. From these hearings we learned that false identification fraud is a growing underground industry within the United States, an industry which serves fugitives, terrorists, illegal aliens, and various other felons who are seeking to defraud Federal and State governments out of billions of dollars annually. Further, PSI's investigation revealed that the resolution of this enormous problem is one which requires modifications in our procedures for issuing identification documents, changes in the documents themselves, and an effective law enforcement effort directed at the criminal use of these documents.

This report identifies the need for more information sharing where Federal benefit programs are concerned. We were shocked to learn, as we did at our hearings, that even when a Federal law enforcement agency had information concerning false identities, that this information was not passed on to other law enforcement agencies.

Since PSI's 1982 hearings, Congress passed the False Identification Crime Control Act of 1982, Public Law 97-398, which establishes penalties for certain less false-identification-related crimes. Based on my review of the effectiveness of Federal agencies in combatting the problem of false identification, I am of the opinion that the U.S. Secret Service is expertly qualified to enforce Public Law 97-398, and should do so concurrent with other Federal law enforcement agencies. For the record, I am also submitting a copy of a letter I recently sent to the Attorney General expressing this viewpoint.

Finally, immigration reform legislation pending before Congress addresses many important social concerns, one of which is of particular interest to PSI. That is the requirement that the administration develop an identification card system so that employers can determine who is legally entitled to work in the United States. Based upon this subcommittee's demonstration of the failings and weaknesses of current Federal identification, I believe we have a responsibility to examine current and proposed plans in this area, and to insure that this effort is headed in the right direction.

Mr. President, I ask unanimous consent that the letter earlier mentioned be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
PERMANENT SUBCOMMITTEE
ON INVESTIGATIONS,
Washington, D.C.

Hon. WILLIAM FRENCH SMITH,
Attorney General,
U.S. Department of Justice,
Washington, D.C.

DEAR MR. ATTORNEY GENERAL: Recently Congress passed the False Identification Crime Control Act of 1982 (P.L. 97-398) and President Ronald Reagan signed this legislation into law thereby establishing penalties for certain false identification related crimes.

As Chairman of the Senate Permanent Subcommittee on Investigations, I have taken a very active interest in this area and, at my direction, the Subcommittee staff recently conducted a year-long investigation into the false identification problem. On September 23, 1982, the Subcommittee completed hearings on the fraud and abuse involved in the use of false federal identification documents and the threat it poses to entitlement and other benefit programs. The Subcommittee's investigation supported a 1976 Department of Justice study which estimated that the impact of false identification on government and business translated to a $15,000,000,000 loss to the American public. Adjusted to reflect inflation increases, this figure rises to a $24,000,000,000 lost in 1982. Our investigation further revealed that the resolution of this enormous problem is one which requires modifications in our procedures for issuing identification documents, changes in the documents themselves, and an effective law enforcement effort directed at the criminal use of these documents. The passage of P.L. 97-398 provides a real opportunity to address the lack of effective enforcement by collectively applying resources from the family of federal law enforcement agencies.

It is my understanding that this legislation does not assign law enforcement jurisdictional authority. In this regard, I would like to express my opinion that concurrent jurisdiction by all federal law enforcement agencies would not only be appropriate but would greatly enhance the effective enforcement of the laws created by this legislation. Assigning enforcement jurisdiction to one agency would be counterproductive to the control of a criminal problem of this magnitude.

The Subcommittee's year-long investigation of the false identification problem included interviews with numerous federal law enforcement officials. These interviews were designed to determine, among other things, the effectiveness of the various agencies in combating the problem of false identification. As a result we discovered several agencies which are both well qualified and willing to enforce the laws created by P.L. 97-398.

Expressing a particularly enthusiastic interest in this area of investigation was the U.S. Secret Service. We found the Secret Service to be eminently qualified to enforce false identification laws. Historically, they have over one hundred years of experience in the investigation of crimes relating to the counterfeiting and forgery of obligations of the United States. The Secret Service has found that individuals who engage in the counterfeiting of currency often engage in the counterfeiting of items of identification. Additionally, the negotiation of counterfeited or stolen U.S. government checks and bonds is most often accomplished using false identification documents. These factors result in substantial contact, during the course of their investigations, with criminals who manufacture or use false identification. As part of its effort to combat crimes of counterfeiting and forgery, the Secret Service maintains laboratory facilities, employee expertise, and liaison with the printing industry. These attributes could easily be applied to the investigation of false identification crimes.

I chose to highlight the Secret Service because of my personal knowledge of their interest in this matter, however they are but one example of the various federal law enforcement agencies whose experience, expertise, and resources would be invaluable in contending with the enormous problem of false identification. This problem, because of its magnitude, will potentially defy the efforts of any single law enforcement agency—especially at a time when resources are at a premimum. For this reason and because crimes involving false identification cross existing jurisdictional lines, I have concluded that concurrent law enforcement jurisdictional authority would result in the most effective application of enforcement effort to this problem.

I urge you to seriously consider these considerations in arriving at your decision on the question of law enforcement jurisdiction and encourage some form of concurrent jurisdiction be assigned to the law created by the False Identification Crime Control Act of 1982.

Sincerely,

WILLIAM V. ROTH, Jr.,
Chairman.●

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

Daniel G. Amstutz, of New York, to be Under Secretary of Agriculture for International Affairs and Commodity Programs.

(The above nominations was reported from the Committee on Agriculture, Nutrition, and Forestry with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DURENBERGER:

S. 1267. A bill to transfer from the Director of the Office of Management and Budget to the Administrator of General Services the responsibility for publication of the catalog of Federal domestic assistance programs, and for other purposes; to the Committee on Governmental Affairs.

By Mr. SPECTER:

S. 1268. A bill to amend the Immigration and Nationality Act to provide for the adjustment of status to that of aliens lawfully admitted to the United States for permanent residence for certain alien parents of children born in the United States; to the Committee on the Judiciary.

S. 1269. A bill for the relief of Shailesh K. Patel and Premlata Patel; to the Committee on the Judiciary.

By Mr. DECONCINI (for himself and Mr. HATCH):

S. 1270. A bill to amend title 17, United States Code, regarding the Copyright Royalty Tribunal; to the Committee on the Judiciary.

By Mr. CHAFEE (for himself, Mr. STAFFORD, Mr. RANDOLPH, Mr. BENTSEN, Mr. DOMENICI, Mr. MITCHELL and Mr. BAKER):

S. 1271. A bill to encourage citizen participation in wildlife conservation programs and to establish the National Fish and Wildlife Foundation; to the Committee on Environment and Public Works.

By Mr. ROTH:

S. 1272. A bill to amend the Internal Revenue Code of 1954 to impose a use tax with regard to the use of the services of the Commodity Futures Trading Commission; to the Committee on Finance.

By Mr. SYMMS (for himself, Mr. MCCLURE, Mrs. HAWKINS, Mr. COHEN and Mr. GORTON):

S. 1273. A bill to direct the Secretary of Agriculture to conduct, in accordance with law and the intent of the Congress, the pilot project study of alternative means of providing assistance under the school lunch program previously authorized by law, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. ABDNOR:

S. 1274. A bill for the relief of Martin Navarro; to the Committee on the Judiciary.

By Mr. HEFLIN:

S. 1275. A bill to establish a specialized corps of judges necessary for certain Federal proceedings required to be conducted, and for other purposes; to the Committee on the Judiciary.

By Mr. MITCHELL:

S. 1276. A bill to provide that the pensions received by retired judges who are assigned to active duty shall not be treated as wages for purposes of the Social Security Act; to the Committee on Finance.

By Mr. MELCHER:

S. 1277. A bill to amend the joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. MELCHER (for himself, Mr. TSONGAS, Mr. STENNIS, and Mr. COCHRAN):

S. 1278. A bill to provide for an accelerated program of research, development and demonstration with respect to the production of electricity from magnetohydrodynamics, leading to the construction and operation of at least one major proof of concept demonstration project in connecton with an existing electric powerplant, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HELMS (for himself, Mr. MCCLURE, Mr. EAST and Mr. NICKLES):

S. 1279. A bill to amend the Food Stamp Act of 1977 to establish a State block grant option for the food stamp program; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DODD (for himself and Mr. WEICKER):

S.J. Res. 99. A joint resolution designating May 1983 as "Purple Heart Month", and honoring the three original recipients of the Purple Heart; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BAKER (for himself, Mr. RANDOLPH, Mr. HELMS, Mr. HOLLINGS, Mr. STENNIS, Mr. FORD, Mr. SASSER, Mr. HEFLIN, Mr. BURDICK, Mr. STAFFORD, Mr. HATFIELD, and Mr. HUDDLESTON):

S. Res. 140. A resolution to celebrate the 50th anniversary of the Tennessee Valley Authority, a public enterprise that works; to the Committee on Environment and Public Works.

By Mr. BAKER (for himself and Mr. BYRD):

S. Res. 141. A resolution to authorize the testimony of Vince Thomas; considered and agreed to.

By Mr. HUDDLESTON:

S. Res. 142. A resolution to limit multiple warhead ICBM's; to the Committee on Foreign Relations.

By Mr. CRANSTON:

S. Con. Res. 34. A concurrent resolution expressing the sense of the Congress in support of a call for jobs with peace; to the Committee on Appropriations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DURENBERGER:

S. 1267. A bill to transfer from the Director of the Office of Management and Budget to the Administrator of General Services the responsibility for publication of the catalog of Federal domestic assistance programs, and for other purposes; to the Committee on Governmental Affairs.

PUBLICATION OF CATALOG OF FEDERAL DOMESTIC ASSISTANCE PROGRAMS

Mr. DURENBERGER. Mr. President, today I am introducing a bill to transfer from the Director of the Office of Management and Budget (OMB) to the Administrator of the General Services Administration (GSA) part of the responsibility for publication of the Catalog of Federal Domestic Assistance. This legislation would also make certain improvements to the data base underlying the catalog.

In the Federal Program Information Act of 1977, the Director of OMB is charged with responsibility for the efficient and regular distribution of current information on Federal domestic assistance programs. It requires the Director to establish a data base and to develop a data retrieval system for domestic programs. It further charges him with responsibility for disseminating program information to the public and State and local governments. The Catalog of Federal Domestic Assistance was developed pursuant to this act. It is a compendium of Federal programs, projects, services, and activities which provide assistance or benefits to the American public. It contains financial and nonfinancial assistance programs administered by departments and establishments of the Federal Government. It is the most comprehensive coverage of Federal programs available.

The bill I am introducing today grew out of a desire by OMB to transfer most of the functions connected with the Program Information Act out of the Office and assign them to the General Services Administration. Such a total transfer of responsibility would have been a mistake.

Under current law, the Director is solely responsible for the catalog and its underlying data base—from initial collection of the data, verification and correction of the data, to designing the catalog's format, to its actual publication. It is understandable that OMB would like to move the production responsibilities out of the Office. But, it is essential that the Director remain responsible for actually collecting the data from the agencies, for final approval of the data as it goes into the catalog, and for the format of the catalog.

After extensive consultations with OMB, it was agreed that the actual preparation, printing, and distribution of the catalog would be permitted to move over to GSA. Oversight, validation and correction of data submitted by the agencies, and policy setting concerning implementation of the act would remain the responsibility of OMB. Moreover, OMB would remain responsible for collecting the data from the agencies.

This legislation is the result of these discussions. It permits a transfer of actual production responsibilities at the same time it insures that OMB will continue to be responsible for overseeing the implementation of the Program Information Act. Under this bill, OMB will continue to maintain day-to-day control over the program information system and will continue to serve as the central contact of the

line agencies with respect to Federal assistance program information.

Finally, Mr. President, the bill I am introducing today tightens up the definition of "allocation formula" as presently used in the Federal Program Information Act, and establishes standards for compiling information on formulas and the associated data and statistical estimates. It is a great improvement over the existing situation where the information on formulas is not reported on a standardized basis.

By Mr. SPECTER:

S. 1268. A bill to amend the Immigration and Nationality Act to provide for the adjustment of status to that of aliens lawfully admitted to the United States for permanent residence for certain alien parents of children born in the United States; to the Committee on the Judiciary.

S. 1269. A bill for the relief of Shailesh K. Patel and Premlata Patel; to the Committee on the Judiciary.

IMMIGRATION LEGISLATION

● Mr. SPECTER. Mr. President, I rise today to reintroduce a bill to grant permanent residency to immigrants who have lived in this country continuously for at least 7 years, have American-born children, and have no criminal record. I have also sent to the desk special legislation on behalf of an immigrant family in Pennsylvania now facing deportation who would qualify for permanent residency under my general legislation which I have today submitted.

I offer this legislation fully hoping that passage of S. 529, the Immigration Reform and Control Act, will render my legislation unnecessary. However, with its passage still uncertain and the family in question facing imminent deportation, this legislation is timely now.

These bills recognize that millions of immigrants who have entered or remained in the United States in technical violation of our immigration laws, after having lived here for many years, have become for all practical purposes contributing, productive, and dedicated citizens of this country. During their long period of residence in the United States, they have accrued undisputed equitable interests in remaining here, the most important of which is their American-born children.

The children born in this country to illegal immigrants are eligible for full American citizenship. Frequently, this is the only home they have ever known, or wish to know. It is grossly inconsistent with any notions of humanitarianism to deport these children or to force their separation from their parents. Whatever the legal status of the parents' presence in this country, it does not justify uprooting these children from their only real home to be sent to foreign lands where their adjustment must inevitably be painful, if not impossible.

An egregious example of the consequences of our present laws is the case of the Patel family in suburban Philadelphia. Shailesh Patel has lived in this country for 17 years, since leaving India. His wife, Premlata, has been here for 11 years. They have three young children who attend school here and have made close friends.

The Patel family have been good citizens. The children have absolutely no familiarity with India and cannot speak their parents' native dialect and cannot possibly succeed in school there. Mr. Patel is well liked in his community and has operated a successful service station for many years.

I have taken the time and had occasion to visit the Patels in their home in suburban Philadelphia, a beautiful home, indicative of the contribution which they have made to this country. I have visited Mr. Patel's service station and can personally attest to the fact that Mr. Patel is a productive, law-abiding citizen.

The Patels are now faced with a deportation order under which they will be forced to return to India. Their American dream will be brought to an abrupt and painful end if that deportation order is carried out.

The forced exclusion of such hard-working, conscientious, and community-spirited people is certainly not what our immigration laws were designed to accomplish. This is certainly the case when their effect is to permanently disrupt the lives of young, American-born children.

Last year, the Senate passed an immigration bill which included a provision which would have allowed the Patels to remain in the United States. Unfortunately, this bill died in the House of Representatives, necessitating the reintroduction of these measures this Congress.

Mr. President, I am the son of immigrants. My parents came to this country with little more than an ambition of making a better life for their family than they had known themselves. Shailesh Patel—and thousands of immigrants like him who have lived and worked in this country for many years—harbors the same ambition for himself and his family.

Through hard work and initiative, he and his wife have come far toward realizing their ambition, and in doing so have enriched the lives of their community and the United States.

We are a Nation that has grown great by opening its doors. To allow immigrants who have made a productive life for themselves here and who seek to contribute to their communities to join us as citizens is to the benefit of all and to the benefit of the United States.

I urge early consideration and passage of these bills.

Mr. President, I ask unanimous consent to have the bills printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1268

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Alien Parental Amnesty Act of 1983".

SEC. 2. (a) The Immigration and Nationality Act is amended by inserting after section 244 of such Act the following:

"ADJUSTMENT OF STATUS OF CERTAIN ALIEN PARENTS OF CHILDREN BORN IN THE UNITED STATES

"SEC. 244A. (a) Notwithstanding any other provision of law and except as provided in subsection (b), the Attorney General shall adjust the status to that of an alien lawfully admitted for permanent residence an alien who—

"(1) makes an application for such adjustment;

"(2) has been physically present in the United States (excluding Puerto Rico, Guam, and the Virgin Islands) for a continuous period of not less than seven years immediately preceding the date of such application; and

"(3) is the parent of a child born in the United States.

"(b) The provisions of subsection (a) shall not apply to any alien who—

"(1) is inadmissible under section 212(a) insofar as it relates to criminals, procurers, and other immoral persons, subversives, violators of the narcotic laws or smugglers of aliens; or

"(2) ordered or participated in the persecution of any person because of race, religion, national origin, sex, or political opinion.

"(c) Upon the approval of an application for adjustment made under subsection (a), the Attorney General shall record the alien's lawful admission for permanent residence as of the date of such approval.

"(d) Any adjustment of status made by the Attorney General under this section shall be without regard to, and shall have no effect on, any numerical limitation contained in this Act."

(b) The table of contents for such Act is amended by inserting after the item relating to section 244 the following:

"Sec. 244A. Adjustment of status of certain alien parents of children born in the United States".

S. 1269

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding paragraph (14) of section 212(a) of the Immigration and Nationality Act, for purposes of such Act, Shailesh K. Patel and Premlata Patel shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the proper number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas which are made

available under section 203(a) of the Immigration and Nationality Act to natives of the countries in which the aliens were born or, if applicable, the total number of immigrant visas which are made available under section 202 of such Act to natives of the countries in which the aliens were born.●

By Mr. DECONCINI (for himself and Mr. HATCH):

S. 1270. A bill to amend title 17, United States Code, regarding the Copyright Royalty Tribunal; to the Committee on the Judiciary.

FREE MARKET COPYRIGHT ROYALTY ACT OF 1983

● Mr. DECONCINI. Mr. President, today I am introducing a bill that amends the Copyright Act to bring equity to the relationship between the copyright holders and one group of users of copyrighted material. This bill, the Free Market Copyright Royalty Act of 1983, is designed to substitute a free market alternative to an artificial Government-imposed relationship between parties, and improve decisionmaking at an agency that we, the Congress, created in 1976, the Copyright Royalty Tribunal.

When we created the Tribunal, it was our hope that this agency would serve, among other functions, as an effective and fair referee in a legally and economically complex area, the determination, adjustment, and distribution of royalty rates for the retransmission of over-the-air broadcast signals. The CRT was charged by Congress in 1976 to adjust the royalty rates set by statute for the retransmission of distant Nonnetwork television programing under a compulsory license if certain rules and regulations of the Federal Communications Commission were changed. When such adjustment became necessary, as it did in 1981, Congress expected that the CRT would balance the interests of copyright holders in receiving a fair return for their creative work against the interests of the copyright user in receiving a fair income from such use while considering the public interest in access to such copyrighted material. In at least one area addressed by the CRT rate adjustment decision, I believe that the CRT has erred in its balancing responsibility. The legislation I introduce today will correct this error. Because I believe that the CRT's error was caused at least in part by Congress failure to provide it adequate professional staff, particularly lawyers and economists, I have included provisions in my legislation which reform the basic structure of the CRT.

On November 19, 1982, the CRT issued a decision which increased the royalty and the amount the cable system must pay for carriage of the signal of any distant broadcast station it was not permitted to carry under FCC rules in effect as of June 24, 1981. Parties who believed themselves aggrieved by this decision were able to get its effect delayed by Congress until March 15, 1983. I resisted the efforts in Congress to stay the CRT decision because I support the general principle that copyright holders are entitled to just compensation for use of their creative works. I was not then, and am not now, persuaded that the CRT decision does not represent a proper balancing of the economic interest involved in this dispute. The CRT decision is an appeal before the Federal courts and they shall determine the reasonableness and fairness of the basic issue of the adjustment of royalty rates.

I am convinced, however, that the CRT erred in not allowing the free market to work to determine compensation in the one area that it is already doing so. If a broadcast television station has become a national cable broadcast network with a sufficiently large national audience and advertiser base to require payment of equitable copyright licensing fees to program suppliers in direct marketplace negotiations, then the CRT and Congress should recognize and sanction such negotiations. In the presence of such direct licensing practices, there is no need for the supplementary fee imposed by the CRT. Moreover, program suppliers will receive a windfall if, in addition to the marketplace licensing fee, they receive a second large payment based on the CRT's increased royalty rate.

The effect of the CRT decision has been to deny access to one or more distant broadcast stations to millions of Americans. While I reiterate my belief in fair compensation, I believe that a mechanism must be found to insure such compensation while maximizing public access to creative works. I have been disturbed to read literature put out by a very interested party to this dispute, trumpeting the CRT decision as a great victory because it will lessen competition for its members. While considering the bill I introduce today, I believe the new Judiciary Subcommittee on Patents, Copyrights, and Trademarks should closely examine the anticompetitive aspects of the CRT decision and the statute upon which it was based.

Let me urge my colleagues to support this bill's free market alternative. There is no need for an artificial Government-imposed relationship between the parties involved in this copyright use. My bill will bring equity to this relationship between copyright holders and national cable broadcast networks and will halt the windfall which some program suppliers have gained by this decision. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1270

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Free Market Copyright Royalty Act of 1983".

FINDINGS

SEC. 2. The Congress hereby finds that—

(1) in order to promote the availability and diversity of nationally distributed television programing for the public, national cable broadcast networks are needed that will provide to cable subscribers a full range of news, information, sports, and entertainment services; and

(2) the Copyright Royalty Tribunal lacks adequate professional staff to perform effectively its statutory functions.

DISTANT SIGNAL ROYALTIES

SEC. 3. Section 801(b)(2) of title 17, United States Code, is amended by—

(1) striking out "; and" in subparagraph (D) and inserting in lieu thereof a period; and

(2) inserting at the end thereof the following new subparagraph:

"(E)(i) Notwithstanding the provisions of subparagraph (B), the Tribunal shall exempt from any adjustments in copyright royalty rates made pursuant to this subsection the carriage by any cable system (including functional equivalents thereof), as defined in section 111(f) of this title, of any national cable broadcast network signal. Carriage of a national cable broadcast network signal pursuant to such exemption shall be subject solely to the royalty rate provisions of section 111(d)(2)(B), as adjusted in accordance with section 801(b)(2)(A), and shall not count against the complement of signals referred to in clauses (i) and (ii) of subparagraph (B). For purposes of this subsection, the term 'national cable broadcast network' means a television broadcast station that has been classified as such by the Tribunal. The Tribunal shall so classify any television broadcast station that requests such classification upon the certification by the station that—

"(I) the station's signal is distributed nationally for carriage by cable systems and the station promotes such carriage;

"(II) the station's commercial practices and rates seek to compensate the station for its national audience;

"(III) the station's share of the national viewing audience is measured regularly by the major national rating measurement services; and

"(IV) copyright owners who supply works for performance or display over the station are aware of the national distribution of the station's signal.

"(ii) The Tribunal shall issue, within thirty days after its receipt of such certification, its classification of the station as a national cable broadcast network if it finds that the certification meets the standards set forth in this section. The decision of the Copyright Royalty Tribunal to deny classification as a national cable broadcast network shall be reviewable de novo in Federal district court; and".

MEMBERSHIP OF THE TRIBUNAL

SEC. 4. (a) Upon expiration of the terms of office of the three commissioners of the Copyright Royalty Tribunal whose terms expire on September 27, 1984, no person shall be appointed to fill either of two of

such offices after such date. Such two offices shall be abolished effective on September 28, 1984.

(b) Effective on the date on which the offices of two Tribunal commissioners are abolished pursuant to subsection (a) of this section, section 802(a) of title 17, United States Code, shall be amended by striking out "five" the first place it appears in the first clause and inserting in lieu thereof "three".

STAFF OF THE TRIBUNAL

SEC. 5. (a) Section 805 of title 17, United States Code, is amended by adding at the end thereof a new subsection as follows:

"(c) The Tribunal shall appoint, and fix appropriate compensation for a General Counsel and a Chief Economist to carry out the functions customarily performed by persons with such titles.".

(b) The appointments mandated by section 805(c) of title 17, United States Code, as added by subsection (a) of this section shall commence no earlier than the date on which the membership of the Tribunal is reduced from five commissioners to three commissioners, pursuant to section 4 of this Act.●

THE COPYRIGHT ROYALTY TRIBUNAL REFORM ACT OF 1983

● Mr. HATCH. Mr. President, in June 1981, the General Accounting Office issued a report entitled, "The Operation of the Copyright Royalty Tribunal," which noted several problems with the Copyright Royalty Tribunal requiring congressional attention. These problems have persisted, making the GAO's recommendations equally relevant today. The Copyright Royalty Tribunal Reform Act of 1983 addresses some of the GAO identified problems. For instance, there has been some concern over the need for five CRT commissioners, while there is a clear need for access by commissioners to technical legal assistance and economic analysis.

This CRT reform bill directs the CRT to appoint a general counsel and chief economist. But, rather than increase appropriations for the CRT, funds for these added personnel will be provided by reducing the number of commissioners from five to three. These changes are welcome, and will remove the CRT from past criticisms regarding its limited workload and the professional quality of its work, and are consistent with GAO recommendations.

Many of my colleagues also share my concern over the limited expertise brought to the CRT by past commissioners. I wish to express my hope that further vacancies at the Commission will be filled by individuals with expertise or with extensive experience in those issues which the CRT must address. In its study, the GAO compared the CRT with six other Federal rate setting and adjudicatory organizations. In only one case, however, did legislation establish criteria for the selection of commissioners; and in every organization, appointments of individuals with appropriate expertise was the rule. This "rule" should also apply to the appointment of CRT commissioners.

The CRT reform bill also addresses a limited, but significant inhibition of market forces aggravated by the CRT's recent increases in the compulsory license royalty rates cable systems pay for the right to retransmit the signals of certain distant broadcast stations. As a result of the wide distribution on cable of some signals, broadcast stations have the potential to become national cable broadcast stations. Such stations, with a large national audience and advertiser base, are fully capable of paying copyright licensing fees to program suppliers in direct, marketplace negotiations. Where this is the practice, there is no need for a second, supplementary fee based on the CRT's increased compulsory license for cable. This bill will require the CRT to undertake certification of broadcast stations seeking classification as a national cable broadcast station, and thus being capable of providing licensing royalties directly to program suppliers rather than through the artificial compulsory license mechanism.

This bill does not purport to address the impact of cable's compulsory license rights on the competitiveness between local broadcasters and local cable distribution services. Indeed, the necessity of the compulsory license mechanism in this context is the subject of some dispute. The Register of Copyrights, David Ladd, has expressed the belief that "the cable compulsory license is no longer justifiable." The CRT, however, has stated that "a cable compulsory license is necessary." I believe that no unfair competitive advantage should be enjoyed by either local broadcasters or by local cable operators, and favor the benefits of direct, marketplace negotiations, when feasible.

Mr. President, this bill will streamline the CRT and significantly enhance its ability to professionally carry out its responsibilities. At the same time, it will promote feasible, direct marketplace negotiations between suppliers and broadcasters in limited circumstances. I would like to commend Senator DECONCINI for his interest in copyright matters and his interest in the effective operation of the Copyright Royalty Tribunal.●

By Mr. CHAFEE (for himself, Mr. STAFFORD, Mr. RANDOLPH, Mr. BENTSEN, Mr. DOMENICI, and Mr. MITCHELL):

S. 1271. A bill to encourage citizen participation in wildlife conservation programs and to establish the National Fish and Wildlife Foundation; to the Committee on Environment and Public Works.

NATIONAL FISH AND WILDLIFE FOUNDATION ESTABLISHMENT ACT

● Mr. CHAFEE. Mr. President, today I am introducing along with Senators STAFFORD, RANDOLPH, BENTSEN, DOMENICI, and MITCHELL, legislation to establish a Fish and Wildlife Foundation. The impetus for this legislation is the generosity of Ted Gianoutsos, an employee of the Department of the Interior, and his wife, Francoise, who have offered to provide the initial funding to establish the foundation.

The legislation is modeled after similar legislation for the National Park Foundation and would establish a charitable and nonprofit corporation which accepts and administers gifts from private citizens for the purposes of fish and wildlife conservation.

The foundation would have a board of nine members, all appointed by the Secretary of the Interior, who would serve 4-year terms. The terms of the initial board are to be staggered and the legislation requires that the board represent diverse points of view relating to fish and wildlife conservation. At least 3 of the members must be educated and experienced in the principles of fish and wildlife conservation.

Mr. President, I hope this legislation will encourage citizens participation in our wildlife conservation programs. The responsibilities of the Fish and Wildlife Service are great and, like most agencies, they face tight budget requirements. Wildlife habitat acquisition, public education about wildlife, endangered species recovery, hunter ethics, and a number of other programs enjoy broad public support but limited funding.

The foundation will provide a means for those concerned with wildlife conservation to lend a hand in a direct and meaningful way. I urge my colleagues to join me in supporting this legislation and thanking Mr. and Dr. Gianoutsos for their hard work, dedication, and generosity.

Mr. President, I ask unanimous consent that text of the bill be printed in the RECORD.

S. 1271

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Fish and Wildlife Foundation Establishment Act".

SEC. 2. ESTABLISHMENT AND PURPOSES OF FOUNDATION.

(a) ESTABLISHMENT.—There is established the National Fish and Wildlife Foundation (hereinafter in this Act referred to as the "Foundation"). The Foundation is a charitable and nonprofit corporation and is not an agency or establishment of the United States.

(b) PURPOSES.—The purposes of the Foundation are—

(1) to encourage, accept, and administer private gifts of property for the benefit of, or in connection with, the activities and

services of United States Fish and Wildlife Service; and

(2) to undertake and conduct such other activities as will further the conservation and management of the fish and wildlife resources of the United States, and its territories and possessions, for present and future generations of Americans.

SEC. 3. BOARD OF DIRECTORS OF THE FOUNDATION.

(a) ESTABLISHMENT AND MEMBERSHIP.—The Foundation shall have a governing Board of Directors (hereinafter referred to in this Act as the "Board"), which shall consist of 9 Directors, each of whom shall be a United States citizen and—

(1) 6 of whom must be knowledgeable or experienced in fish and wildlife conservation; and

(2) 3 of whom must be educated and experienced in the principles of fish and wildlife management. The membership of the Board, to the extent practicable, shall represent diverse points of view relating to fish and wildlife conservation. The Director of the United States Fish and Wildlife Services shall be an ex officio nonvoting member of the Board. Appointment to the Board shall not constitute employment by, or the holding of an office of, the United States for the purposes of any Federal law.

(b) APPOINTMENT AND TERMS.—By December 31, 1983, the Secretary of the Interior (hereinafter referred to in this Act as the "Secretary") shall appoint the Directors of the Board. The Directors shall be appointed for terms of four years; except that the Secretary, in making the initial appointments to the Board, shall appoint 3 Directors to a term of 2 years, 3 Directors to a term of 4 years, and 3 Directors to a term of 6 years. A subsequent vacancy on the Board shall be filled within 60 days of said vacancy in the manner in which the original appointment was made.

(c) CHAIRMAN.—The Chairman shall be elected by the Board from its members for a two-year term.

(d) QUORUM.—A majority of the current membership of the Board shall constitute a quorum for the transaction of business.

(e) MEETINGS.—The Board shall meet at the call of the Chairman at least once a year. If a Director misses three consecutive regularly scheduled meetings, that individual may be removed from the Board and that vacancy filled in accordance with subsection (b).

(f) REIMBURSEMENT OF EXPENSES.—Members of the Board shall serve without pay, but may be reimbursed for the actual and necessary travelling and subsistence expenses incurred by them in the performance of the duties of the Foundation.

(g) GENERAL POWERS.—(1) The Board may complete the organization of the Foundation by—

(A) appointing officers and employees;

(B) adopting a constitution and bylaws consistent with the purposes of the Foundation and the provisions of this Act; and

(C) undertaking of other such acts as may be necessary to carry out the provisions of this Act.

(2) The following limitations apply with respect to the appointment of officers and employees of the Foundation:

(A) Officers and employees may not be appointed until the Foundation has sufficient funds to pay them for their service. Officers and employees of the Foundation shall be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay in effect for grade GS-18 of the General Schedule.

(B) The first officer or employee appointed by the Board shall be the Secretary of the Board who (i) shall serve, at the direction of the Board, as its chief operating officer, and (ii) shall be knowledgeable and experienced in matters relating to fish and wildlife conservation.

SEC. 4. RIGHTS AND OBLIGATIONS OF THE FOUNDATION

(a) IN GENERAL.—The Foundation—

(1) shall have perpetual succession;

(2) may conduct business througout the several States, territories, and possessions of the United States;

(3) shall have its principal offices in the District of Columbia; and

(4) shall at all times maintain a designated agent authorized to accept service of process for the Foundation.

The serving of notice to, or service of process upon, the agent required under paragraph (4), or mailed to the business address of such agent, shall be deemed as service upon or notice to the Foundation.

(b) SEAL.—The Foundation shall have an official seal selected by the Board which shall be judicially noticed.

(c) POWERS.—To carry out its purposes under section 2, the Foundation shall have, in addition to the powers otherwise given it under this Act, the usual powers of a corporation acting as a trustee in the District of Columbia, including the power—

(1) to accept, receive, solicit, hold, administer and use any gift, devise, or bequest, either absolutely or in trust, of real or personal property or any income therefrom or other interest therein;

(2) to acquire by purchase or exchange any real or personal property or interest therein;

(3) unless otherwise required by the instrument of transfer, to sell, donate, lease, invest, reinvest, retain or otherwise dispose of any property or income therefrom;

(4) to borrow money and issue bonds, debentures, or other debt instruments;

(5) to sue and be sued, and complain and defend itself in any court of competent jurisdiction, except that the Directors of the Board shall not be personally liable, except for gross negligence;

(6) to enter into contracts or other arrangements with public agencies and private organizations and persons and to make such payments as may be necessary to carry out its function; and

(7) to do any and all acts necessary and proper to carry out the purposes of the Foundation.

For purposes of this Act, an interest in real property shall be treated as including, among other things, easements or other rights for preservation, conservation, protection, or enhancement by and for the public of natural, scenic, historic, scientific, educational, inspirational, or recreational resources. A gift, devise, or bequest may be accepted by the Foundation even though it is encumbered, restricted, or subject to beneficial interests of private persons if any current or future interest therein is for the benefit of the Foundation.

(d) CERTAIN LANDS, WATERS, AND INTERESTS NOT SUBJECT TO CONDEMNATION.—No lands or waters, or interests therein, that are owned by the Foundation and are determined by the Director of the United States Fish and Wildlife Service or the Migratory Bird Conservation Commission, as the case may be, to be valuable for purposes of fish and wildlife conservation or management shall be subject to condemnation by any State or political subdivision, or any agent or instrumentality thereof.

SEC. 5. EXEMPTIONS FROM TAXATION.

The Foundation and any income or property received or owned by it, and all transactions relating to such income or property, shall be exempt from all Federal, State, and local taxation with respect thereto. The Foundation may, in the discretion of the Board, contribute toward the costs of local government in amounts not in excess of which, as a charitable and nonprofit corporation, it would be obligated to pay such government if it were not exempt from taxation under this section, and may agree to so contribute with respect to property transferred to it and the income derived therefrom if such agreement is a condition of the transfer. Contributions, gifts, and other transfers made to the Foundation shall be regarded as contributions, gifts, or transfers to the United States. The conveyance of any qualified real property interest to the Foundation shall be deemed to further a governmental conservation policy and yield a significant public benefit for purposes of section 170(h) of the Internal Revenue Code of 1954 (relating to qualified conservation contributions).

SEC. 6. ADMINISTRATIVE SERVICES AND SUPPORT.

The Secretary may provide personnel, facilities, and other administrative services to the Foundation, including reimbursement of expenses under section 3, not to exceed then current Federal Government per diem rates, for a period of up to five years from the date of enactment of this Act, and may accept reimbursement therefor, to be deposited in the Treasury to the credit of the appropriations then current and chargeable for the cost of providing such services.

SEC. 7. VOLUNTEER STATUS.

The Secretary may accept, without regard to the civil service classification laws, rules, or regulations, the services of the Foundation, the Board, and the officers and employees of the Board, without compensation from the Department of the Interior, as volunteers in the performance of the functions authorized herein, in the manner provided for under section 7(c) of the Fish and Wildlife Act of 1956 (16 U.S.C. 742f(c)).

SEC. 8. AUDITS, REPORT REQUIREMENTS, AND PETITION OF ATTORNEY GENERAL FOR EQUITABLE RELIEF.

(a) AUDITS.—For purposes of the Act entitled "An Act for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (Public Law 88-504, 36 U.S.C. 1101-1103), the Foundation shall be treated as a private corporation established under Federal law.

(b) REPORT.—The Foundation shall, as soon as practicable after the end of each fiscal year, transmit to Congress a report of its proceedings and activities during such year, including a full and complete statement of its receipts, expenditures, and investments.

(c) RELIEF WITH RESPECT TO CERTAIN FOUNDATION ACTS OR FAILURE TO ACT.—If the Foundation—

(1) engages in, or threatens to engage in, any act, practice, or policy that is inconsistent with its purposes set forth in section 2(b); or

(2) refuses, fails, or neglects to discharge its obligations under this Act, or threatens to do so;

the Attorney General of the United States may petition in the United States District Court for the District of Columbia for such equitable relief as may be necessary or appropriate.

SEC. 9. UNITED STATES RELEASE FROM LIABILITY.

The United States shall not be liable for any debts, defaults, acts, or omissions of the Foundation nor shall the full faith and credit of the United States extend to any obligation of the Foundation.

SEC. 10. AMENDMENT AND REPEAL.

The Congress expressly reserves the right to repeal or amend this Act at any time.

SEC. 11. AUTHORIZATION OF APPROPRIATIONS.

For the 10-year period beginning on October 1, 1983, there are authorized to be appropriated to the Department of the Interior not to exceed $1,000,000 to be made available to the Foundation—

(1) to match, on a one-for-one basis, private contributions made to the Foundation; and

(2) to provide administrative services under section 6.●

● Mr. MITCHELL. Mr. President, today I am very pleased to cosponsor legislation to establish the National Fish and Wildlife Foundation. The Foundation will increase opportunities for private citizens to contribute to fish and wildlife conservation.

Appropriately, the idea, hard work, and initial funding provided to establish the foundation has come from dedicated private citizens. Ted and Francoise Gianoutsos are avid outdoors people who wish to contribute to the programs of the U.S. Fish and Wildlife Service. Through their generosity, a trust will be established to enhance programs at the Service that are dedicated to hunter education and ethics, and to the conservation of raptors—birds of prey. They have stipulated that should a Fish and Wildlife Foundation be established by an act of Congress, their trust shall terminate and the proceeds shall be given to the Foundation. It is just such a foundation that we have the opportunity to institute here today.

This legislation is modeled after similar legislation for the Park Service Foundation and would establish a charitable and nonprofit corporation which accepts and administers gifts from private citizens for purposes of fish and wildlife conservation. The Foundation would have a board of nine members to be appointed by the Secretary of the Interior. Members of the board must represent diverse points of view in relation to wildlife conservation and at least three members must be educated and experienced in the principles of fish and wildlife management. The legislation authorizes $1 million to be expended over a 10-year period to match, on a 1-to-1 basis, private contributions to the Foundation. Use of these matching funds and additional private contributions are not restricted to hunter or raptor programs and may be used for other appropriate fish and wildlife conservation activities.

Mr. President, the legislation we are introducing today is an important initiative in fish and wildlife conservation. I join the Gianoutsos in hoping that the Foundation will be a focal point for those citizens and organizations who want to help the Fish and Wildlife Service in its important work. I know that my colleagues will want to join me in thanking the Gianoutsos for their contribution to this effort.●

By Mr. ROTH:

S. 1272. A bill to amend the Internal Revenue Code of 1954 to impose a use tax with regard to the use of the services of the Commodity Futures Trading Commission; to the Committee on Finance.

TAX USER FEE FOR SERVICES OF COMMODITY FUTURES TRADING COMMISSION

● Mr. ROTH. Mr. President, last year I introduced a measure which would impose a small fee on commodity futures trades. Funds generated from the imposition of this so-called user fee were to defray operating costs of the Commodity Futures Trading Commission. I, along with Senators RUDMAN, STEVENS, MURKOWSKI, and PROXMIRE, felt that this industry should contribute to the Federal authority which allows them to operate in the public trust. We saw no reason why an industry which has tripled in size in the last 10 years could not shoulder some of its own weight, rather than continuing to allow the general population to pay for its regulation.

Unfortunately, the commodity user fee legislation did not become law. And what was the onerous fee that was deemed to harsh for the poor commodity industry to bear? That fee was a mere 6 cents per trade, when the average cost of a contract is in the tens of thousands of dollars. I must say that I find it incredible that millions of Americans with no relation to the commodity markets must finance their regulation while the traders, individuals willing to take massive risks on expensive contracts, refuse to pay less than the cost of a postage stamp.

I therefore, wish to introduce a bill which provides for a tax to be levied upon the execution of such qualified commodity contract or option on any contract market or board of trade as defined by section 5 or the Commodity Exchange Act. This user fee in the form of a tax will generate revenue to the general treasury which will offset the expenses undertaken by the Commodity Futures Trading Commission in its regulation of the trading of commodity futures and commodity option contracts. While this tax in the form of a user fee is similar to the user fee proposal in that it provides that the commodity traders and brokers who benefit from regulation help fund that regulation, the tax differs from the user fee in that its implementation will be regulated by the Secretary of the Treasury.

The amount of this tax would be 5 cents for every qualified commodity contract or option executed for the account or benefit of a commodity association member. Thus, a member of the National Futures Association, the self-regulatory commodity trading authority, pays a nickle for each contract traded. A commodity trader who is not under the jurisdiction of this self-regulatory body must pay 10 cents for each contract or option so executed. The difference exists because those traders not under the effective control of the NFA will require more of the resources of the CFTC, while NFA members require substantially less attention by the Federal regulator of commodity trading. The tax difference also will serve to convince nonmembers to join the NFA and to encourage members to remain within the self-regulatory body.

This bill would also set a $3 tax upon dealer option and leverage transactions. The traders of these instruments are not members of the NFA and enjoy special exclusivity provisions under the Commodity Exchange Act. Otherwise unregulated, the traders of these contracts should be responsible for the regulation which promotes their legitimacy and therefore customer participation.

There are those who will argue that this tax will burden the industry, hinder self-regulation and unfairly lays the burden of regulatory costs upon the trader. To these persons I would point out that the securities industry has done reasonable well over the last 50 years while supporting a self-regulatory body and requiring traders to pay a fee for each transaction undertaken. There is no unique characteristic of the commodity industry which renders it incapable of providing a portion of its own support.

When my user fee bill was defeated in the Senate last year, a compromise provision was included in section 31 of S. 2109, the CFTC Reauthorization bill which called for a study to be conducted by the CFTC to determine what the effect of a user fee would be. No similar provisions existed in the House version. The Conference committee on this bill derived section 237 of the CFTC Reauthorization bill which called for a "study of the regulatory experience of the NFA." Section 237 specifies that service fees will be considered but there is no specific mention of user fees, nor does the Joint Statement of the Managers of the Conference Committee include any reference to user fees specifically.

Even if a user fee study could be inferred from this language, the ques-

tion is then, why undertake such a study? I find it hard to believe that a 5-cent tax per trade will cripple the massive commodity industry. At the same time, such a study would doubtlessly cost hundreds of thousands of dollars. A CFTC study on insider trading cost $200,000 and a CFTC portion of the financial industry study is estimated at almost $1 million. Do we really need to spend hundreds of thousands of dollars to show that the commodity industry can afford to pay 5 cents for every trade executed?

With each new contract and new exchange, the responsibilities of the CFTC have grown accordingly. Philip Johnson, the recent resigned chairman of the Commission, as well as his predecessor Jim Stone, have provided strong leadership and extremely competent administration in an agency rendered beleaguered by budgetary and manpower limitations. The industry has grown tremendously while the tiny agency has attempted to promote both growth and effective regulation.

The Commission will have more to do as time progresses to the increasing volume and complexity of commodity trading. An effective Federal regulatory agency will insure that business is conducted fairly, thereby promoting increased customer participation. The industry therefore directly benefits from CFTC regulation and accordingly should be expected to provide some of the support for the Commission.

This tax in the form of a user fee would thus promote and insure NFA memberships, and would result in those who benefit most from regulation helping to pay for their benefits at a minimal cost to themselves.

Mr. President, I ask unanimous consent that a section-by-section analysis be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

Section 1. (a) of the bill provides that Chapter 33 of the Internal Revenue Code is amended by inserting 5 sections before subchapter B to facilitate a tax upon the execution of certain commodity contracts. These five sections would be numbered section 4241 through 4245.

Section 4241—This section describes what will be taxed, how much the tax will be and who shall be liable for the tax.

Subsection (a)—The tax shall be imposed on the execution of qualified commodity or option contracts that are traded on any contract market or board of trade as defined by Section 5 of the Commodity Exchange Act.

Subsection (b)—If the contract is executed for the account or benefit of a commodity association member, the tax will be five cents for each contract or option executed. If the contract is executed for any other account or benefit the tax will be ten cents for each contract or option executed.

Subsection (c)—The tax shall be paid by the contract market or board of trade on which the contracts were executed.

Section 4242—This section describes the imposition of and liability for a tax upon the granting of a dealer option and the execution of a leverage contract.

Subsection (a)—A three dollar tax shall be imposed on the granting of each dealer option contract as described by section 4c(d) of the Commodity Exchange Act and on the execution of each leverage transaction offered as described by section 19 of the Commodity Exchange Act.

Subsection (b)—The tax shall be paid by the entity which granted the commodity option or offered the leverage transaction.

Section 4243—This section defines the terms used for the purposes of this subchapter.

Section 4244—Subsection (a) of this section provides that the taxes shall be paid on the basis of a return filed within 45 days after the close of taxable period. Section (b) provides that the Secretary of the Treasury shall provide a receipt for a properly executed return and full payment of any taxes imposed.

Section 4245—This section provides for a reduction of the tax in special cases.

Subsection (a)—The Secretary may issue an order to adjust the imposition of the tax in accordance with that order.

Subsection (b)—If the Secretary finds, after notice and opportunity for a hearing, that the impositon of this tax will create a significant adverse effect upon a person or market, the Secretary may issue an order reducing the tax, but not below zero, with respect to that transaction by that person or on Section (b) of the bill provides for the creation, membership, function and termination of an advisory committee to assist and advise the Secretary of the Treasury on the implementation of this tax.

Section (c) of the bill provides for conforming existing statutory sections with this bill.

Section 2 of the bill provides for the date upon which the provisions of the Act take effect.●

By Mr. SYMMS (for himself, Mr. MCCLURE, Mrs. HAWKINS, Mr. COHEN, and Mr. GORTON):

S. 1273. A bill to direct the Secretary of Agriculture to conduct, in accordance with law and the intent of the Congress, the pilot project study of alternative means of providing assistance under the school lunch program previously authorized by law, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

SCHOOL LUNCH PILOT PROJECT ACT OF 1983

Mr. SYMMS. Mr. President, today I am introducing legislation which is necessary only because the Department of Agriculture directly and flagrantly ignored the legislative will of the Congress. My bill directs the USDA to do what the Congress told them to do 2 years ago—test cash in lieu of donated commodities and a commodity letter of credit in lieu of donated commodities as an alternative to the present commodity component of the national school lunch program.

Public Law 96-528, authored by my senior Senator from Idaho, JIM MCCLURE, stated that the USDA was directed to test an all cash in lieu of commodities system and an all commodity letter of credit system in lieu of the present program in 60 school districts throughout the Nation. Our legislative directive did not say to the Department test a part cash and part commodity system against the present system. Our directive was, we thought, absolutely clear—test all cash and all commodity letters of credit in lieu of the present system.

A colloquy which took place on the Senate floor when this pilot project was adopted directed the USDA to publish notice of the pilot project in the Federal Register and submit to the Congress the methodology for the study in advance of its implementation. Our colloquy also directed that certain aspects of the study be clearly evaluated so that the Congress would learn whether there was a better way to get the benefits of American agriculture to our school lunch program and still meet the agricultural and nutritional objectives of the national school lunch program.

Those of us who supported the pilot project legislation were fearful that the USDA would not set up or operate the pilot project properly, and it was for that reason that we were so specific in the legislation and in our colloquy on the legislation on the floor of the Senate. This effort was supported by both Democrats and Republicans, liberals and conservatives, and rural as well as urban legislators.

USDA went out and got school districts to participate, some 64 school districts in 29 States of the Nation. USDA entered into agreements with these school districts based on a study methodology which followed the congressional will and the pilot project began. The Congress appropriated substantial moneys for the evaluation itself, and we all said to ourselves—it looks like our fears were wrong, the USDA is going to set up and run a fair study which will give us some answers.

The Congress, in setting up the pilot project, assumed that the USDA would not change the rules of the pilot project in midstream and cost participating school districts substantial moneys in return for their good faith effort to help the Congress and the Department get some answers. We were wrong there. In December, after the Congress had adjourned, USDA summarily announced to the school districts participating, and to selected Members of Congress after the fact, that a decision had been reached to change tne methodology for the pilot project from an all cash in lieu of commodities and all commodity letters of credit in lieu of commodities study to a hybrid system where the results would be clouded, participating school districts affected adversely, and the will of the Congress thwarted.

In making its decision, the Department explained they did not have the money to provide cash in lieu of commodities or commodity letters of credit

in lieu of commodities for the so-called bonus commodities which are provided to school lunch programs over and above regular commodities they receive. USDA, in its wisdom, had decided that if the bonus commodities came in the form of cash or letters of credit for the pilot project no one would be upset. They were wrong there too. I am upset and I know that a large number of my colleagues on both sides of the aisle in the Senate as well as in the other body are upset. Of equal importance, the school districts in the pilot project feel betrayed and believe USDA has reneged on the contract under which they agreed to participate.

USDA argues that they must give the pilot project school districts dairy commodities rather than dairy bonus letters of credit or bonus cash because they have the commodities in storage and that will save money. Is there any Member of this body who believes that by not following the letter of the law we passed setting up the demonstration that $1 will be saved? In fact, what USDA has done is assure that the study will not come to any conclusions, established a hybrid study of marginal value, and deprived the Congress, the administration, and the American public of the opportunity to learn if there is a better, more cost-effective way to run this program.

As far as I know, the USDA is still buying dairy products under the price support program and still donating commodities to schools. Does the USDA really expect me and other Senators and Members of the other body to believe that they will somehow buy less dairy products because they gutted the pilot project we mandated?

I and my colleagues who have joined me in sponsoring this legislation being introduced today believe that the Congress and the American people are entitled to know the answers to all the questions we asked when we mandated the test. That is all this legislation seeks to do—assure us all that we will get the answers.

My bill expands the number of school districts in the pilot project from 60 to 200; directs where USDA will get the funds to provide cash or commodity letters of credit for all commodities involved in the test; provides that the USDA shall pay to the school districts now participating monetary damages for the costs they incurred due to the arbitrary USDA action changing the methodology of the test; and assures that the Congress will get a test of an all cash in lieu of commodities and all commodity letter of credit system in a sufficient number of school districts and for a sufficient time frame to tell us whether there is a better way to insure the same nutritional quality in school lunches at a lower cost to the taxpayer.

I have taken the unusual step in the legislation of directing that the General Accounting Office ride herd on the USDA in this effort to assure that the Department does not try to scuttle the project again. I have done this deliberately, and I assure my colleagues that this approach is necessary to preserve the integrity of the study.

Mr. President, I would like at this time to insert into the RECORD a listing of the school districts who have been affected by the USDA decision on the study methodology, along with their estimate of the damages they have incurred through the USDA action. School districts in the study from which we have not heard as yet are included, but their damages are identified as "unknown." In addition, control school districts which are receiving commodities, but which will be compared to pilot districts receiving cash and letters of credit are identified as "control" districts.

The Congress cannot let the bureaucracy ignore our legislation or our clearly stated intent. I urge all Senators with affected school districts in their States to talk with their local constituents as I have. When they have, I am sure they will want to consider joining those of us who are introducing this legislation today and work for its prompt enactment.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1273

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That this Act may be cited as the "School Lunch Pilot Project Act of 1983".

DEFINITIONS

SEC. 2. As used in this Act—

(1) the term "basic commodities" means commodities, other than bonus commodities, provided to school districts under the school lunch program;

(2) the term "bonus commodities" means commodities donated under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) for use in the school lunch program; and those commodities provided in the above entitlement under Section 32 of the Act entitled "An Act to amend the Agricultural Adjustment Act, and for other purposes," approved August 24, 1935 (7 U.S.C. 612c);

(3) the term "school lunch pilot project study" means the study provided for in the last proviso of the matter under the heading "CHILD NUTRITION PROGRAMS" in title III of the Act entitled "An Act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1981, and for other purposes", approved December 15, 1980 (94 Stat. 3113);

(4) the term "school lunch program" means the program established by the National School Lunch Act (42 U.S.C. 1751 et seq.); and

(5) the term "Secretary" means the Secretary of Agriculture.

FINDINGS

SEC. 3. The Congress finds that—

(1) the school lunch program was established to safeguard the health and well-being of the children of the United States and to encourage the domestic consumption of perishable agricultural commodities;

(2) in order to enable the Congress to determine whether there are more cost-effective means of meeting these objectives, the Secretary was directed to conduct over a three-year period a school lunch pilot project study under which sixty school districts would be provided, in lieu of commodities provided under the school lunch program, all cash assistance or all commodity letters of credit assistance;

(3) the Secretary established the methodology for the study, with prior consultation with the Congress, and contracted with school districts to participate in the study;

(4) during the school year ending June 30, 1983, the Secretary altered the methodology for the study in a manner which was inconsistent with law, the intent of the Congress, and fairness to the school districts;

(5) the Secretary altered the study methodology without prior consultation with the Congress in contravention of the intent of the Congress, expressed during floor debate in the Senate on the study, that the Secretary should consult with the Congress on the study methodology;

(6) the Secretary altered the study methodology after having contracted with school districts to participate in the study and without prior consultation with the districts and, as a consequence, imposed severe financial hardship on the participating school districts;

(7) the Secretary altered the study methodology in a manner that prevents the study of an all cash assistance program or all commodity letters of credit assistance program as required by law; and

(8) the Secretary altered the study methodology in a manner that provides for a one year study rather than a three year study required by law, thereby preventing an adequate program evaluation.

SCHOOL LUNCH PILOT PROJECT STUDY

SEC. 4. (a) In carrying out the school lunch pilot project study, the Secretary shall—

(1) provide to participating school districts, in lieu of commodities provided for the school lunch programs operated in the districts, all cash assistance or all commodity letters of credit assistance;

(2) continue the study through June 30, 1986;

(3) increase the number of school districts participating in the study so that, in lieu of commodities provided for the school lunch programs operated in the districts, one hundred districts receive cash assistance and one hundred districts receive commodity letters of credit assistance;

(4)(A) use appropriated funds to carry out the evaluation for this study;

(B) in meeting expenses incurred in providing cash assistance or commodity letters of credit assistance to participating school districts in lieu of basic commodities, use funds available under section 32 of the Act entitled "An Act to amend the Agricultural Adjustment Act, and for other purposes", approved August 24, 1935 (7 U.S.C. 612c), in an amount (as determined by the Secretary) that would have been expended, except for the enactment of this Act, for the purchase and distribution of basic commodities to participating school districts; and

(C) in meeting expenses incurred in providing cash assistance or commodity letters of credit assistance to participating school districts in lieu of bonus commodities, use funds which would have been spent by the Commodity Credit Corporation (as determined by the Secretary) for the purchase, processing, storage, and distribution of bonus commodities that would have been made available to the districts except for the enactment of this Act including such bonus commodities which would have been purchased and donated to such school districts under Section 32 of the Act entitled "An Act to amend the Agriculture Adjustment Act, and for other purposes," approved August 24, 1935 (7 U.S.C. 612c);

(5) maintain separate accounts on the amount and use of cash assistance and commodity letters of credit assistance provided to participating school districts in lieu of basic commodities and bonus commodities;

(6) consult with, and obtain the approval of, the Comptroller General of the United States before establishing or altering the policy or methodology of the study; and

(7) no later than December 15, 1986, submit a report of the results of the study to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(b) The Comptroller General of the United States shall—

(1) consult with, and consider requests for approval from, the Secretary concerning the establishment and alteration of the policy and methodology of the school lunch pilot project study as provided in subsection (a)(6); and

(2) no later than six months after the date of the enactment of this Act, and each six months thereafter until June 30, 1986, submit a report on the administration of the study to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

COMPENSATION FOR STUDY METHODOLOGY

SEC. 6. (a) Upon request of a participating school district and with the approval of the Comptroller General of the United States, the Secretary shall compensate a school district which was participating in the school lunch pilot project study on or before the date of the enactment of this Act for losses sustained by the district as a result of the alteration of the methodology used to conduct the study before the date of the enactment of this Act, as described in section 3.

(b) There are authorized to be appropriated such sums as may be necessary to carry out this section.

CONFORMING AMENDMENT

SEC. 5. The last proviso of the matter under the heading "CHILD NUTRITION PROGRAMS" in title III of the Act entitled "An Act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1981, and for other purposes", approved December 15, 1980 (94 Stat. 3113), is amended by striking out "a 3-year pilot project study in 60 school districts" and inserting in lieu thereof ", in accordance with section 4 of the School Lunch Pilot Project Act of 1983 and in two hundred school districts, a pilot project study through June 30, 1986".

By Mr. HEFLIN:

S. 1275. A bill to establish a specialized corps of judges necessary for certain Federal proceedings required to be conducted and for other purposes; to the Committee on the Judiciary.

ADMINISTRATIVE LAW JUDGE CORPS ACT

Mr. HEFLIN. Mr. President, I rise today to introduce legislation to establish a unified Administrative Law Judge Corps. Today, administrative agencies have wide-ranging powers which touch almost every aspect of our lives. When administrative disputes between the Federal Government and individuals arise, administrative law judges appointed from within the department or agency are utilized to resolve the dispute.

As ranking minority member of the Subcommittee on Administrative Practice and Procedures, I believe that these disputes should be adjudicated in an independent atmosphere free of bias, in order to insure fairness and give credence to these decisions. These judicial officers must be free from any association or personal obligation to any party in order that every litigant to the process be afforded due process. In one of our most significant Federal enforcement agencies every administrative law judge was a prosecutor, in that agency, before becoming an ALJ for that agency. The mere appearance of bias and prejudice smacks at the vital concept of an independent judiciary.

Administrative law judges are a significant part of our Federal adjudicating system. Our Federal judiciary consists of 515 active U.S. district court judges, yet there are presently 1,147 administrative law judges. In 1947, there were only 196 administrative law judges. The number of judges in the Social Security Administration in 1947 was 13. There are now 820 administrative law judges in the Social Security Administration. As the number of agencies proliferated and their scope of authority expanded, the jurisdiction of administrative law judges significantly increased, such that today an administrative law judge may levy penalties against individuals up to $100,000.

The Administrative Law Judge Corps created by this legislation would consist of all current administrative law judges. Judges would continue to have jurisdiction over proceedings and adjudications as granted under the Administrative Practice and Procedure Act. In addition, these Corps judges may accept any other case referred to the Corps by any Federal agency or court desiring to make a decision based on records developed at a hearing conducted by an administrative law judge. Future judges would continue to be selected under the present merit system, but instead of the "rule of three," selection would be from the top five persons on the register. This reform provides a greater diversity in the selection of judicial officers.

The chief administrative law judge shall be appointed by the President with the advice and consent of the Senate and serve for a 5-year term as chief administrative officer of the Corps and preside over the Council of the Corps. A Judicial Nomination Commission, consisting of five leading members of the bench and bar, would recommend to the President three candidates for the position. The integrity of the merit system is maintained by requiring the candidate to be an administrative law judge for the first 5 years preceding the appointment.

The Corps would be divided into not more than 10 and not less than 4 divisions, in keeping with the major specialities of administrative law with each administrative law judge assigned to a division after consideration of the judge's experience and expertise. Each division shall be headed by a division chief judge nominated by the Judicial Nomination Commission and appointed by the President with the advice and consent of the Senate, who shall exercise administrative supervision over the division. This bill establishes seven division areas which may be modified as necessary by the Council.

The policymaking body of the Corps shall be the Council of the Corps which will be composed of the chief judge and the division chief judges. This Council would have authority over all major policy decisions, the creation of divisions, and the appointment, assignment, transfers, and reassignment of judges thereto. The Council may also prescribe the rules of practice and procedure for the conduct of proceedings and business before the Corps.

This measure further provides for the appointment of a five-member Judicial Nomination Commission for the Administrative Law Judge Corps which shall submit the names of qualified nominees for appointment to the position of chief judge and division chief judges. Also contained in this bill are procedures for more effective removal and discipline of administrative law judges.

The chief administrative law judge will submit an evaluation report on each division to the President and Congress not later than 2 years after the effective date of this act. Provision is also made for the transfer of all functions performed by administrative law judges to the Corps, as well as personnel, assets, liabilities, property, and unexpended funds.

Any pending procedures shall be continued before the Administrative Law Judge Corps.

This concept is supported by the Judicial Administration Division of the American Bar Association, the National Conference of Administrative Law Judges, Federal Administrative Law Judges, Federal Administrative Law Judges Conference, and the Association of American Law Judges.

Several States have implemented similar systems under which administrative law judges are no longer assigned to individual agencies, but are instead assigned to a single, central panel that provides trial services to various agencies as needed. Substantial cost savings and efficiencies have been achieved in each of those States. More importantly, each State has witnessed improved public perception of administrative law judges as members of a truly independent administrative judiciary, It is now time that these advantages are brought to the Federal Government.

This structural reform is necessary to insure truly independent adjudications. This system will result in significant cost savings and permit more flexible use of the administrative law judges presently employed by 30 separate agencies and departments. Also under this system, the merit selection system is preserved and the expertise possessed by administrative law judges will continue to be utilized.

I urge my colleagues in the Senate to support this vital legislation.

Mr. President, I ask unanimous consent that the text of this bill be printed following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1275

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Administrative Law Judge Corps Act".

ESTABLISHMENT OF ADMINISTRATIVE LAW JUDGE CORPS

SEC. 2. Title 5, United States Code, is amended by redesignating subchapter III of

chapter 5 as subchapter IV and by inserting a new subchapter III to read as follows:

"SUBCHAPTER III—ADMINISTRATIVE LAW JUDGE CORPS

"§ 561. Definitions

"For the purposes of this subchapter—

"(1) 'agency' means an authority referred to in section 551 (1) of this title;

"(2) 'Corps' means the Administrative Law Judge Corps of the United States established under section 562 of this title;

"(3) 'administrative law judge' means an administrative law judge appointed under section 3105 of this title on or before the effective date of the Administrative Law Judge Corps Act or under section 567 of this title after such effective date;

"(4) 'chief judge' means the chief administrative law judge appointed and serving under section 563 of this title;

"(5) 'Council' means the Council of the Administrative Law Judge Corps established under section 565 of this title;

"(6) 'Nomination Commission' means the Judicial Nomination Commission for the Administrative Law Judge Corps established under section 566 of this title;

"(7) 'Board' means the Complaints Resolution Board established under section 569 of this title; and

"(8) 'division chief judge' means the chief administrative law judge of a division appointed and serving under section 564 of this title.

"§ 562. Establishment; membership

"(a) There is established an Administrative Law Judge Corps consisting of all current administrative law judges, and such Corps shall be located at the seat of Government.

"(b) An administrative law judge serving as such on the date of the commencement of the operation of the Corps shall be transferred to the Corps as of that date. An administrative law judge who is appointed on or after the date of the commencement of the operation of the Corps shall be a member of the Corps as of the date of such appointment.

"§ 563. Chief administrative law judge

"(a) The chief administrative law judge shall be the chief administrative officer of the Corps and shall be the presiding judge of the Corps. The chief judge shall be nominated as prescribed in section 566 of this title and shall be appointed by the President, by and with the advice and consent of the Senate. The chief judge must be an administrative law judge who has served as an administrative law judge for at least five years preceding the date of appointment as chief judge. The chief judge shall serve for a term of five years or until a successor is appointed and qualifies to serve. A chief judge may be reappointed upon the expiration of his term, by and with the advice and consent of the Senate, if nominated for reappointment in accordance with section 566 of this title.

"(b) If the office of chief judge is vacant, the division chief judge who is senior in length of service as a judge shall serve as acting chief judge until such vacancy is filled.

"(c) The chief judge shall, within 90 days after the end of each fiscal year, make a written report to the President and the Congress concerning the business of the Corps during the preceding fiscal year. The report shall include information and recommendations of the Council concerning the future personnel requirements of the Corps.

"§ 564. Divisions of the Corps; division chief judges

"(a) The Corps shall have not more than ten and not less than four divisions. Each judge of the Corps shall be assigned to a division. The assignment of a judge who was an administrative law judge on the date of commencement of the operation of the Corps shall be made after consideration of the areas of specialization in which the judge has served. Each division shall be headed by a division chief judge appointed by the President, by and with the advice and consent of the Senate who shall exercise administrative supervision over the administrative law judges assigned to such division.

"(b) Except as provided in subsection (a), and after the initial appointment and establishment of each division, the number of divisions and the jurisdiction of each division shall be determined by the Council. Until changed by the Council, the divisions of the Corps shall be as follows:

"(1) Division of Communications, Public Utility, and Transportation Regulation.

"(2) Division of Health, Safety and Environmental Regulation.

"(3) Division of Labor.

"(4) Division of Labor Relations.

"(5) Division of Benefits Programs.

"(6) Division of Securities, Commodities, and Trade Regulation.

"(7) Division of General Programs and Grants.

"(c) Each division chief judge shall be nominated as prescribed in section 566 of this title and shall be appointed by the President, by and with the advice and consent of the Senate. To be eligible for nomination and appointment as division chief judge, a person must possess experience and expertise in the specialty of that division and have served as an administrative law judge for at least five years.

"§ 565. Council of the Corps

"(a) The policymaking body of the Corps shall be the Council of the Corps. The chief judge and the division chief judges shall constitute the Council. The chief judge shall preside over the Council. If the chief judge is unable to be present at a meeting of the Council, or if there is a vacancy in the office of chief judge, the division chief judge who is senior in length of service as a member of such Council shall preside.

"(b) A majority of the judges present at a meeting of the Council shall constitute a quorum for the purpose of transacting business. The affirmative vote by a majority of all the members of the Council shall be required to approve a matter on behalf of the Council. Each member of the Council shall have one vote.

"(c) Meetings of the Council shall be held at least once a month at the call of the chief judge or by a majority of the Council.

"(d) The Council is authorized—

"(1) to approve or disapprove the assignment of judges to divisions and the transfer or reassignment of judges from one division to another, subject to the provisions of section 567 of this title;

"(2) to approve or disapprove the creation, reconstitution, or abolition of divisions of the Corps;

"(3) to approve or disapprove the reassignment of a division chief judge who heads a division specified in section 564 (b) of this title;

"(4) to appoint a person to be an administrative law judge and a member of the Corps under section 567 of this title;

"(5) to approve or disapprove the filing of charges seeking adverse action against an administrative law judge under section 569 of this title;

"(6) to approve or disapprove the establishment or abolition of regional offices of the Corps and the assignment and reassignment of personnel thereto;

"(7) to prescribe the rules of practice and procedure for the conduct of proceedings before the Corps, except that, with respect to a class of proceedings adjudicated by an agency before the effective date of the Administrative Law Judge Corps Act, the Council may not amend or revise the rules of practice and procedure prescribed by that agency during the two years following such date without the approval of that agency;

"(8) to approve or disapprove rules and regulations pertaining to the assignment of cases to administrative law judges;

"(9) to determine all other matters of general policy of the Corps;

"(10) to issue such rules and regulations as may be appropriate for the efficient conduct of the business of the Corps and the implementation of this subchapter;

"(11) subject to the civil service and classification laws and regulations, to select, appoint, employ, and fix the compensation of the employees (other than administrative law judges) that they deem necessary to carry out the functions, powers, and duties of the Corps and to prescribe the authority and duties of such employees;

"(12) to establish, disestablish, alter, consolidate, and maintain such regional, district, and other field offices as are necessary to carry out the functions, powers, and duties of the Corps and to assign and reassign employees to such field offices;

"(13) to procure temporary and intermittent services under section 3109 of title 5, United States Code;

"(14) to enter into, to the extent or in such amounts as are authorized in appropriation Acts, without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5), contracts, leases, cooperative agreements, or other transactions that may be necessary to conduct the business of the Corps;

"(15) to delegate any of the chief judge's functions or powers to one or more division chief judges or to other officers or employees of the Corps, and to authorize the redelegation of any of those functions or powers;

"(16) to make suitable arrangements for continuing judicial education and training for judges of the Corps; and

"(17) to provide for the training of other employees of the Corps.

"(e) The Council shall select an official seal for the Corps which shall be officially noticed.

"§ 566. Judicial Nomination Commission

"(a) There is established a Judicial Nomination Commission for the Administrative Law Judge Corps. The Nomination Commission shall consist of five members selected as provided in subsection (b). The Nomination Commission shall submit the names of qualified nominees for appointment to the position of chief judge and positions as division chief judges.

"(b) Each of the following persons shall appoint one member to the Nomination Commission within 30 days after the effective date of the Administrative Law Judge Corps Act:

"(1) The chief judge of the United States Court of Appeals for the District of Columbia Circuit.

"(2) The chief judge of the United States District Court for the District of Columbia.

"(3) The Chairman of the Administrative Conference of the United States.

"(4) The Chairman of the Administrative Law Section of the American Bar Association.

"(5) The President of the Federal Administrative Law Judges Conference.

"(c)(1) The persons first appointed pursuant to paragraphs (1) and (2) of subsection (b) shall each serve for a term of three years.

"(2) The person first appointed pursuant to paragraph (3) of subsection (b) shall serve for a term of two years.

"(3) The persons first appointed pursuant to paragraphs (4) and (5) of subsection (b) shall each serve for a term of one year.

"(d)(1) Subject to the provisions of this subsection, a vacancy on the Nomination Commission shall be filled in the same manner as the original appointment. An officer or employee of the United States may be a member of the Commission. The Commission shall select one of its members to be the Chairman.

"(2) Any member appointed to serve an unexpired term which has arisen by virtue of the death, disability, retirement, or resignation of a member shall be appointed only for such unexpired term, but shall be eligible for reappointment.

"(3) Each person appointed pursuant to this section after the initial appointments made in accordance with subsection (c) shall be appointed for a term of 3 years.

"(e) (1) For the initial appointment of the chief judge or, in the event of a subsequent vacancy in such position prior to the end of the term of such judge, the Nomination Commission, within 90 days after the effective date of the Administrative Law Judge Corps Act or 60 days after notification by the acting chief judge that a vacancy has occurred, as the case may be, shall submit to the President for appointment a list of the names of three persons qualified to fill the vacancy.

"(2) Not less than 60 days before the term of the chief judge expires, the Nomination Commission shall submit to the President for appointment a list of the names of three persons, one of whom may be the incumbent chief judge, who are qualified to be the chief judge.

"(3) For the initial appointment of the division chief judges, the Nomination Commission, within 90 days after the effective date of the Administrative Law Judge Corps Act, shall submit to the President for appointment, a list of the names of three persons qualified to fill such positions.

"(4) If there is a vacancy in a position of division chief judge, the chief judge shall notify the Chairman of the Nomination Commission within 10 days after such vacancy occurs. Within 60 days after such notice, the Nomination Commission shall submit to the President for appointment a list of the names of three persons qualified to fill the vacancy.

"(5) The President shall appoint judges, by and with the advice and consent of the Senate, pursuant to this subsection from the lists provided by the Nomination Commission. The President may, however, reject any list provided for any position and request that such Commission submit another list for any such position.

"(f) (1) A member of the Nomination Commission who is an officer or employee of the United States shall not receive additional compensation while serving as a member of the Nomination Commission. Other members of the Commission shall receive compensation at the daily equivalent of the rate provided for employees in grade GS-18 of the General Schedule established under section 5332 of this title, for each day, including traveltime, he or she is engaged in the actual performance of his or her duties as a member of the Commission. A member shall not be deemed an officer or employee of the United States solely by reason of his or her service as a member of the Nomination Commission.

"(2) All agencies of the United States shall provide, to the extent allowed by law, to the Nomination Commission the assistance and facilities that the Nomination Commission requests, including access to records and other information pertaining to prospective nominees, to enable the Nomination Commission to perform its functions. Records and information so furnished shall be treated as privileged and confidential by the Nomination Commission.

"(3) Funds appropriated to conduct the general operations of the Corps may be expended to defray the expenses of the Nomination Commission.

"§ 567. Appointment, compensation, and transfer of administrative law judges

"(a) After the initial establishment of the Corps, the Council shall appoint new or additional judges as may be necessary for the efficient and expeditious conduct of the business of the Corps. Appointments shall be made from a register maintained by the Office of Personnel Management under subchapter I of chapter 33 of this title. Upon request by the chief judge, the Office of Personnel Management shall certify enough names from the top of such register to enable the Council to consider five names for each vacancy. Notwithstanding section 3318 of this title, a vacancy in the Corps may be filled from the highest five eligible individuals available for appointment on the certificate furnished by the Office of Personnel Management.

"(b) A judge of the Corps may not perform or be assigned to perform duties inconsistent with the duties and responsibilities of an administrative law judge.

"(c) A judge of the Corps on the date of commencement of operation of the Corps may not thereafter be involuntarily reassigned to a new permanent duty station that is beyond commuting distance of the judge's permanent duty station on that date. A judge may be temporarily detailed, once in a 24-month period, to a new duty station, at any location, for a period of not more than 120 days.

"§ 568. Jurisdiction

"(a) Except as provided in subsection (c), an administrative law judge who is a member of the Corps shall hear and render a decision upon—

"(1) every case of adjudication subject to the provisions of section 554 of this title;

"(2) every case in which hearings are required by law to be held in accordance with section 554 or section 556 of this title; and

"(3) every other case referred to the Corps by an agency or court in which a determination is to be made on the record after an opportunity for a hearing.

"(b) When a case under subsection (a) arises, it shall be referred to the Corps. Under regulations issued by the Council the case shall be assigned to an administrative law judge. Administrative law judges shall be assigned to cases within their division in rotation, so far as practicable.

"(c) Notwithstanding subsection (a) or (b)—

"(1) the agency, or one or more members of the body that comprises the agency, may hear the case and render the decision thereon; or

"(2) an agency may provide for omission of the decision of the administrative law judge in accordance with section 557(b)(2) of this title.

"(d) Federal agencies and courts are hereby authorized to refer to the Corps any other case where a determination on the record after an opportunity for a hearing by a judge of the Corps is found by such court or agency to be desirable and appropriate.

"§ 569. Removal and discipline

"(a) Except as provided in subsection (b) of this section—

"(1) an administrative law judge may not be removed, suspended, reprimanded, or disciplined except for misconduct, incompetence, or neglect of duty but may be removed or suspended for physical or mental disability; and

"(2) an action specified in paragraph (1) of this subsection may be taken against an administrative law judge only after the Council has filed a notice of adverse action against the administrative law judge with the Merit Systems Protection Board and the Board has determined, on the record after an opportunity for a hearing before the Board, that there is good cause to take such action.

"(b) Subsection (a) does not apply to—

"(1) the replacement or reassignment of a division chief judge as provided in section 564(c) of this title; and

"(2) an action initiated under section 1206 of this title.

"(c) Under regulations issued by the Council a Complaints Resolution Board shall be established within the Corps to consider and to recommend appropriate action to be taken upon complaints against the official conduct of judges.

"(d) The Board shall consist of two judges from each division of the Corps. Each Board member shall be elected by the administrative law judges who are assigned to the division for a term of two years. The chief judge and the division chief judges may not serve on the Board.

"(e) A complaint of misconduct on the part of an administrative law judge must be made in writing. The complaint shall be filed with the chief judge, or it may be originated by the chief judge on his own motion. The chief judge shall refer the complaint to a panel consisting of three members of the Board selected by the Council, none of whom serves in the same division as the administrative law judge who is the subject of the complaint. The complaint must be referred as it was originally received or drawn and may not be accompanied by any other matter. The administrative law judge who was the subject of the complaint shall be given notice of the complaint and the composition of the panel. The administrative law judge may challenge peremptorily not more than two members of the panel. The Council shall replace a challenged member with another member of the Board who is eligible to serve on such panel.

"(f) The panel shall inquire into the complaint and shall render a report thereon to the Council. A copy of the report shall be provided concurrently to the administrative law judge who was the subject of the com-

plaint. The report shall be advisory only, except that if the report recommends that no action should be taken against the administrative law judge who was the subject of the complaint, the Council may file charges with the Merit Systems Protection Board or take other action against that administrative law judge based on the matters contained in the complaint only upon a finding by the Council that extraordinary circumstances warrant such action.

"(g) The proceedings, deliberations, and reports of the Board and the contents of complaints under this section shall be treated as privileged and confidential. Documents considered by the Board and reports of the Board are exempt from disclosure or publication under section 552 of this title. Section 552b of this title does not apply to the Board.".

AGENCY REVIEW STUDY AND REPORT

SEC. 3. The chief administrative law judge of the Administrative Law Judge Corps of the United States shall make a study of the various types and levels of agency review to which decisions of administrative law judges are subject. A separate study shall be made for each division of the Corps. The studies shall include monitoring and evaluating data and shall be made in consultation with the division chief judges, the Chairman of the Administrative Conference of the United States, and the agencies that review the decisions of administrative law judges. Not later than two years after the effective date of this Act, the Council shall report to the President and the Congress on the findings and recommendations resulting from the studies. The report shall include recommendations, including recommendations for new legislation, for any reforms that may be appropriate to make review of administrative law judges' decisions more efficient and meaningful and to accord greater finality to such decisions.

TRANSITION AND SAVINGS PROVISIONS

SEC. 4. (a) There are transferred to the administrative law judges of the Administrative Law Judge Corps established by section 562 of title 5, United States Code (as added by section 2 of this Act), all functions performed on the day before the effective date of this Act by the administrative law judges appointed under section 3105 of such title before the effective date of this Act.

(b) With the consent of the agencies concerned, the Administrative Law Judge Corps of the United States may use the facilities and the services of officers, employees, and other personnel of agencies from which functions and duties are transferred to the Corps for so long as may be needed to facilitate the orderly transfer of those functions and duties under this Act.

(c) The personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available or to be made available, in connection with the functions, offices, and agencies transferred by this Act, are, subject to section 1531 of title 31, United States Code, correspondingly transferred to the Corps for appropriate allocation.

(d) The transfer of personnel pursuant to subsection (b) of this section shall be without reduction in classification or compensation for one year after such transfer.

(e) The Director of the Office of Management and Budget, at such time or times as the Director shall provide, may make such determinations as may be necessary with regard to the functions, offices, agencies, or portions thereof, transferred by this Act, and to make such additional incidental dispositions of personnel, assets, liabilities, grants, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to, or to be made available in connection with such functions, offices, agencies, or portions thereof, as may be necessary to carry out the provisions of this Act. The Director shall provide for such further measures and dispositions as may be necessary to effectuate the purposes of this Act, and for the termination of the offices and agencies specified in this Act.

(f) All orders, determinations, rules, regulations, certificates, licenses, and privileges which have been issued, made, granted, or allowed to become effective in the exercise of any duties, powers, or functions which are transferred under this Act and are in effect at the time this Act becomes effective shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Administrative Law Judge Corps of the United States or a judge thereof in the exercise of authority vested in the Corps or its members by this Act, by a court of competent jurisdiction, or by operation of law.

(g) This Act shall not affect any proceeding before any department or agency or component thereof which is pending at the time this Act takes effect. Such a proceeding shall be continued before the Administrative Law Judge Corps of the United States or a judge thereof, or, to the extent the proceeding does not relate to functions so transferred, shall be continued before the agency in which it was pending on the effective date of this Act.

(h) No suit, action, or other proceeding commenced before the effective date of this Act shall abate by reason of the enactment of this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 5. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act and subchapter III of title 5, United States Code (as added by section 2 of this Act).

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 6. Title 5, United States Code, is amended as follows:

(1) Section 573(b) is amended by redesignating paragraphs (4), (5), and (6) as paragraphs (5), (6), and (7), respectively, and inserting a new paragraph (4) to read as follows:

"(4) the chief administrative law judge of the Administrative Law Judge Corps of the United States;".

(2) Section 3105 is amended to read as follows:

"§ 3105. Appointment of administrative law judges.

"Administrative law judges shall be appointed by the Council of the Administrative Law Judge Corps pursuant to section 567 of this title.".

(3) Section 3344 and any references to such section are repealed.

(4) The table of sections for chapter 33 is amended by striking out the item relating to section 3344.

(5) The tables of contents of this title and of chapter 5 thereof each are amended by—

(A) redesignating subchapter III as subchapter IV; and

(B) inserting after the item relating to section 559 the following:

* * * * *

(6)(A) Subchapter III of chapter 75 of title 5, United States Code, is repealed.

(B) The table of sections at the beginning of chapter 75 of title 5, United States Code, is amended—

(i) by striking out the items relating to subchapter III and section 7521;

(ii) by striking out "Subchapter IV" and inserting in lieu thereof "Subchapter III"; and

(iii) by striking out "Subchapter V" and inserting in lieu thereof "Subchapter VI".

(7) Section 5314 is amended by adding at the end thereof the following:

"Chief Administrative Law Judge of the Administrative Law Judge Corps".

(8) Section 5315 is amended by adding at the end thereof the following:

"Division Chief Judges of the Administrative Law Judge Corps".

(9) Section 5316 is amended by adding at the end thereof the following:

"Administrative Law Judges in the Administrative Law Judge Corps".

(10)(A) Section 5372 is repealed.

(B) The table of sections at the beginning of chapter 53 of such title is amended by striking out the item relating to section 5372.

"SUBCHAPTER III—ADMINISTRATIVE LAW JUDGE CORPS

"Sec.
"561. Definitions.

OPERATIONS OF THE CORPS

SEC. 7. Operation of the Corps shall commence on the date the first chief administrative law judge of the Corps takes office.

EFFECTIVE DATE

SEC. 8. Except as otherwise provided, this Act and the amendments made by this Act shall take effect on the date of enactment.

By Mr. MITCHELL:

S. 1276. A bill to provide that the pensions received by retired judges who are assigned to active duty shall not be treated as wages for the purposes of the Social Security Act; to the Committee on Finance.

TREATMENT OF PENSIONS OF CERTAIN JUDGES

● Mr. MITCHELL. Mr. President, the Social Security Amendments of 1983 constituted a major congressional achievement. I am concerned, however, that a minor provision, dealing with the taxation of payments made to retired Federal judges who continue to handle cases, will have a severe adverse impact on the judiciary.

The bill I am introducing today would reinstate the provisions that were in effect prior to this year's social security bill. Under these provisions, payments made to retired Federal judges would not be treated as earned income.
